ALTANTIC CITY, N. J.—More than 200 leading Radio manufacturers together with representatives of broadcasting stations, Radio publishers, government bureaus and others recently gathered in the Ambassador hotel here, for the second annual convention of the Radio Manufacturers association.

"The greatest need in the Radio industry today is the cooperation of the entire industry in the creation of a nation-wide effort which will furnish twenty-four hours of broadcasting service of interest to every individual in the country," said Herbert H. Frost, of Chicago, retiring president of the association, in opening the convention.

Hoover Sends Message

A letter of welcome from Herbert Hoover, secretary of commerce, was read. Mr. Hoover noted that he thought that the association could profitably engage in an economic inquiry into the trade with a view to determining whether some substantial changes should not be made in the method of distribution, which today imposes unnecessarily large distribution costs upon the consumer and at the same time increases the risks and production costs of the manufacturer.

That broadcasting is the life blood of the Radio industry was emphasized repeatedly by President Frost in his opening address to the industry. He urged the manufacturers to become very active in the support of adequate broadcast service.

Sees Coming of Used Set Marts

The establishment of used Radio set exchange marts will likely come in every city in the United States before long, in the opinion of Carl Boyd, who was elected first vice-president of the association.

Just as the handling of used automobiles and the reselling of cars that are traded in by purchasers of new cars is an important part of the automobile industry, so the sale of used Radio sets will become an important part of Radio sales, Mr. Boyd declares.

"More than seven million Radio sets have been sold in the United States since the listening pastime became a business, and approximately five million of them are in condition that makes them useful today," Mr. Boyd said.

"Science for Service" KOAC

OREGON Agricultural College Has Radio Listener

Student Body of 80,000. Broadcasts Its Campus Courses Throughout State and Beyond. Faculty Members Deliver 450 Air Lectures in Year.

By ALBERT J. WOODS

A RECENT newspaper cartoon pictured Radio Broadcasting as a mighty Pegasus—a winged horse—hovering over the pigmy figure of a government official with a bridle in his hand.

Perhaps Radio is wild, untamed; cavorting here and there through the heavens with a song in its wings, a commercial kick in its heels and a wilful sort of freedom that should be brought under the control of man-made order and system.

But in Oregon it has been harnessed to a school that, through its aid, is scattering knowledge and wisdom to the largest student body, possibly, in the world.

Oregon, rich in scenic grandeur, natural resources and a perennial temperate climate, has a state college that maintains an aggregate class attendance of 80,000. The campus is shown on this page. Of course, it is not intended to infer that the 80,000 are assembled here physically, but it is assumed very positively that they are massed here regularly in mind, spirit and ear-power for they are the Radio-listening student body of the Oregon Agricultural College at Corvallis.

"Science for Service," is the slogan of this worthy institution. Here they have harnessed Radio broadcasting to higher knowledge and in a manner of system and order are making culture and understanding available to all, under all circumstances of living. Skilled educators have arranged progressive lectures in connection with their regular courses on the campus so that teachers, farmers, farmers' wives and their children, city dwellers, foresters, stockmen, engineers and others may participate in these studies as a relaxation from the day's routine and reap the benefits of the latest teachings of science. This latest great discovery of science is, therefore, utilized for service, enactly in accord with the motto of the school.

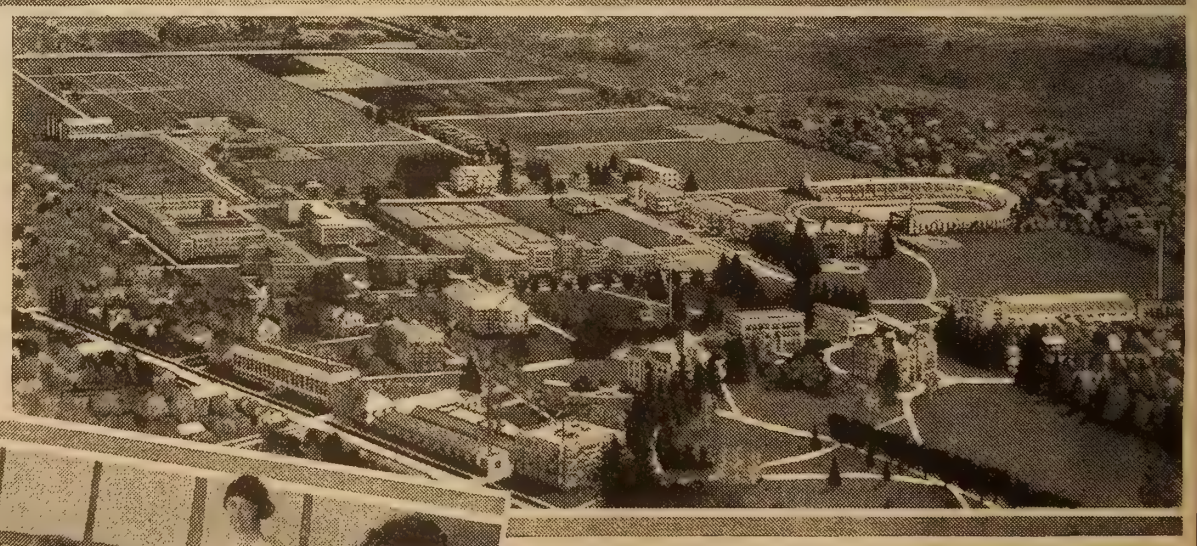
During the current college year, October 2, 1925 to June 30, 1926, Radio Station KOAC will have broadcast approximately 450 lectures furnished by eight of the nine major schools of the college, as follows: Agriculture, Basic Arts and Sciences, Commerce, Engineering and Mechanic Arts, Forestry, Home Economics, Mines and Vocational Education.

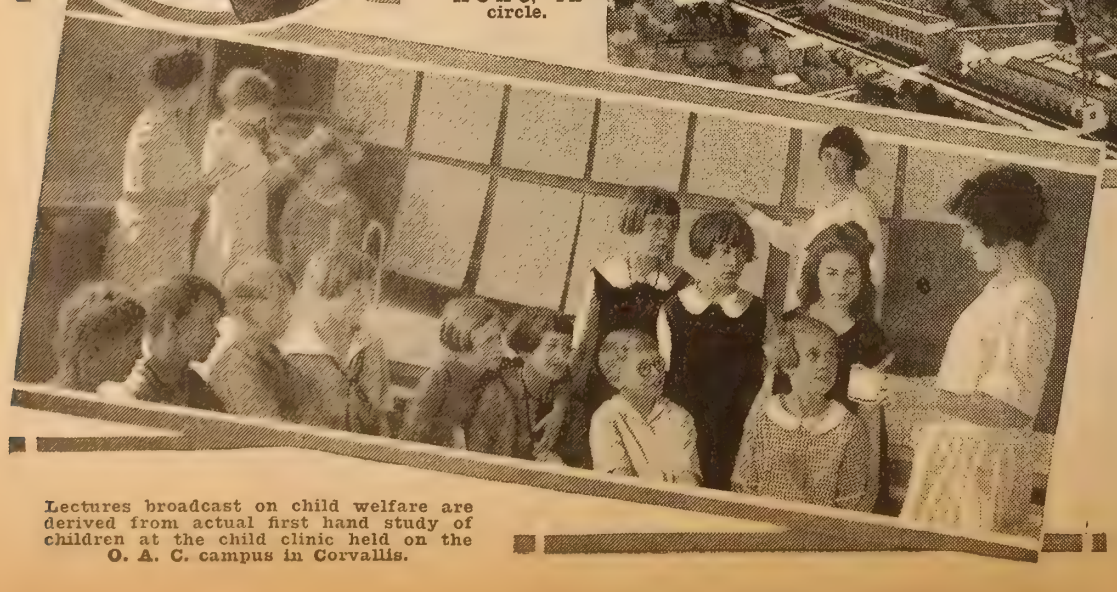
Suppose you were unaware of all this and should tune in KOAC on a Monday. At noon, between 12 and 1 o'clock you would tap the O. A. C. Lunch Box, containing an assortment of ten minute morsels very satisfying to one with an intellectual appetite. In the evening you would sit with certain text books, note paper and pencil and follow lectures that parallel the resident instruction in the campus class rooms. On this certain day it would likely be under one of these subjects: Agricultural Engineering, Animal Husbandry, Dairying, Beekeeping, Farm Crops, Farm Management, Horticulture or Poultry. There are 130 lectures on these subjects presented by forty-three different faculty members.

Oregon Agricultural College works in close cooperation with the United States department of agriculture and on this night would be broadcast information of a general and also specific nature prepared by Mr. Sam Pickard, chief of the Radio department in the government bureau. Child welfare is a matter of study at O. A. C. and there are weekly broadcasts to the boys and girls clubs by H. C. Seymour, state club leader. On Mondays and Fridays a special committee broadcasts the latest market conditions, of particular interest to cattle and horse raisers.

Wednesday and Thursday afternoons are set aside for the Homemakers' programs. This is not a hodge podge of come what may. Every member of the faculty may present one of these subjects: Seasonal Suggestions for the Flower Garden, China and Her Present Troubles, Is the League of Nations a Success? The College Woman of Today, Eugenics and Social Welfare or Rambles with Nature. Another day they may hear something about, Child Care and Training, Household Management, Home Planning and Decoration, Millinery and Clothing, Meal Planning, The Ideal Diet and Food Preservation.

Top, Mrs. Jeanette Boyer Xanten, soprano, voice instructor. Below, typical Oregon farmer student taking KOAC notes—the Glee Club quartet, above the O. A. C. campus. W. L. Kadderly, director KOAC, in circle.





Lectures broadcast on child welfare are derived from actual first hand study of children at the child clinic held on the O. A. C. campus in Corvallis.

This branch has been under supervision of Mrs. Jessie D. McComb, state leader of home economics instruction for the college extension service. The program includes seventy-eight lectures by twenty-eight different faculty members and has been worked out as the result of a state-wide survey of actual home workers' requirements.

All work and no play would make a college broadcasting station a rather fearsome thing for those who enjoy college sports and society. So KOAC does not neglect this phase of its service. College effervescence finds its vent through special programs by the glee club, cadet (*Continued on page 14*)

Listening to 東京放送局

WHICH Is to Say You Are Listening to "Tokyo Broadcasting Bureau" About to Celebrate First Anniversary of Public Radio in Japan. Three Stations Now Heard Here. Classical, Educational and Drama Features Preferred. Not Interested in Jazz.

By MARSHAL TAYLOR

HIGH on the historic old hill of Atagoyama, outside the gates of Tokyo, an important event is planned for next month. Flags will fly, long lines of visitors will parade, gay Oriental music will thrill the air. Radio Station JOAK will celebrate its first birthday.

Broadcasting is young in Japan, but it is growing fast. Tokyo has its thousand watt station, JOAK; Osaka an equally powerful station, JOBK, and Nagoya has JOCK. All three of these stations have been heard by many DX fans in the United States. JOAK not only has reached the California coast cities, a distance of 5,000 miles, but has penetrated to the very center of the North American continent with reception reports coming from Chicago and Ohio.

After four months of experimental broadcasting JOAK moved into its big, new station on Atogoyama hill last July. A letter from M. Oyama of JOAK to Donald Wright at Terminal Island, California, states that there are now 180,000 listeners in Japan with the list growing during the last few months at the rate of 600 new ones each day.

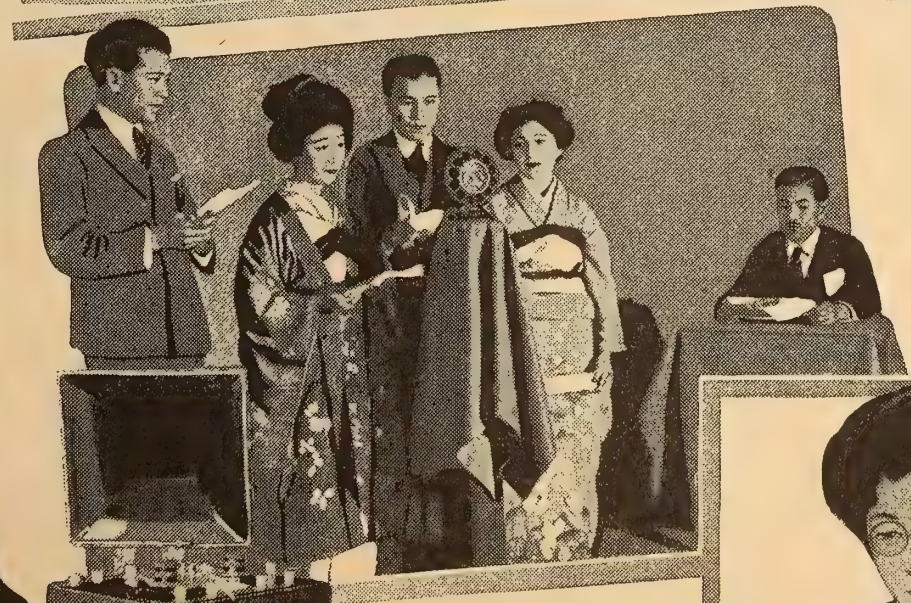
Japanese listeners like their sets ready to perform. They get no kick out of "hay wire" hook-ups. Radio apparatus manufacture has not been extensively developed as it generally is conceded that the Americans have the best inventions which are, of course, protected in Japan. The more wealthy families have the best standard sets. Those in moderate circumstances are satisfied with crystal sets or those of the more simple construction.

Mr. Oyama states that work is under way to build a superpower station of 10,000 watts for JOAK in order that "crystal set owners for 100 miles distant may be able to hear and enjoy the programs." The government engineers already have relayed between the three leading stations and it is expected that soon they will be able to exchange programs with each other.

The operating stations are called "bureaus." Set owners pay a bureau tax of one yen a month and a government tax of one yen a year.

"Nighthawks," "Hoot Owls," and "Coo Coo" clubs are still unknown in Japan. The stations all sign off at ten o'clock, but they begin at 9 in the morning. They take their Radio more seriously than we do.

Educational subjects are most in demand. There also is a general interest in stock and exchange quotations. News bulletins are frequently flashed over the air during the day. In the afternoon there is apt to be an opera between university or college lectures. More attention is paid to the teaching of English than any other single educational subject. Listeners provide themselves with English text books, then follow the readings and teachings of the instructor who conducts his class in the silence of the broadcasting studio.



Madame Akiko Midorikawa (above), first woman announcer in Japan, at JOAK. Miss Kurishima (below) is her assistant at microphone. At left are JOAK Players presenting Japanese drama, "Paper Doll Whispering of the Coming of Spring." Radio dramas are popular with Nipponese listeners.

Japanese school girl (left) with typical Japanese made receiving set in which simplicity of operation is the chief goal of manufacturers. Below is home of one of the wealthier families with American made set.

When it comes to mere entertainment the Japanese listeners seem to prefer Radio plays, mystery drama and romance. They enjoy allegorical compositions, and the children, especially, are enraptured with such Japanese story-plays as "Kaminingyo Haru-no-Sasayaki," which means, "Paper Doll Whispering of the Coming Spring." With ear phones pressed close to their little dark heads they sit entranced when such artists as Miss Shizuko Myabe or Miss Umemura Yoko softly converse into the microphone the prophesy of the little buds that shake out their silken skirts to clothe the naked cherry trees with glorious blossoms. And they believe that the actresses are indeed paper dolls who have come to life high in the fleecy clouds and that the Radio, like a butterfly net, has caught their voices for the children to hear.

American jazz finds no responsive chord in the breast of the Japanese. It is looked upon as a sort of weird musical insanity. But the Japanese are a courteous people, and, inasmuch as there are many foreigners within the empire who enjoy the hot, syncopated dance music, they sometimes put on a jazz number as an act of courtesy.

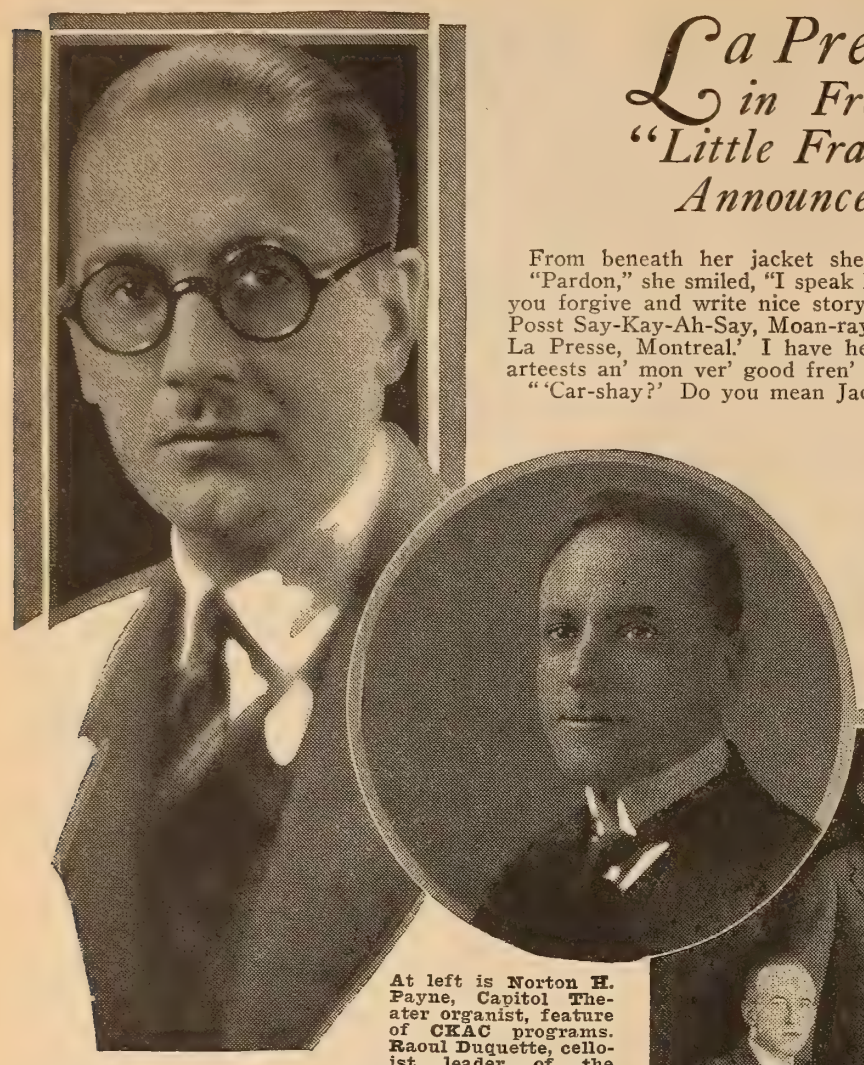
M'selle Aimee Presents CKAC

La Presse of Montreal Broadcasts in French and English. Quebec Called "Little France of America." Damoiselle Thinks Announcer Jacques Cartier "Magnifique."



At left is Norton H. Payne, Capitol Theater organist, feature of CKAC programs. Raoul Duquette, cellolist leader of the Windsor Hotel Concert Orchestra, exclusive feature. Right is CKAC staff, left to right: J. P. Callaghan, Arthur Dupont, Adrien Arcand, Mary Brotman, Leonard Spencer, Jacques Cartier, Norah O'Donnell and A. Lebeau. Lower, Cartier and Capt. Edmund Burke.

By H. P. BROWN

WE HAD a very entrancing visitor some weeks ago when it was still quite cold and I have saved her for you until these warm days because I think she will bring you a whiff of the pines and a cool breeze from that romantic land of Cartier, Quebec and the Canadian St. Lawrence.

Dave ushered her in. Dave is seventeen and all the world is fair and young to him. He was a little pale as he preceded her and I did not wonder.

"Memshell Aimee Baudouin of Montreal," he whispered. "Gee, she's a cute little Frenchy."

I stood up as she entered. She was like a bird as she flitted into the room. Her fur-topped kid boots, laced half way to her knees; her white, fox-trimmed jacket and snowy tam with its tuft of silky fur proclaimed her the very spirit and soul of the great Northland snows.

"Parle vous Francais, oui?" she chirped. Everybody knows that much French, especially since the war. So I answered:

"Not enough to carry on any animated conversation, Ma'm'zelle Baudouin. Je parle Anglaise only foire."

"Ah, eet is to be regret but I am not much surprise," tiny dimples darkened the natural tint of ripe winter-green berries that glowed on her cheeks.

Dave, obviously dazzled, placed a chair beside my desk. She perched herself on the edge of it, and I sat down. Dave retired with a regretful look over his shoulder.

From beneath her jacket she drew a large, gray envelope.

"Pardon," she smiled, "I speak English not even fair but I hope you forgive and write nice story for my dear La Presse Radio, Posst Say-Kay-Ah-Say, Moan-ray-al; as the English say, 'CKAC, La Presse, Montreal.' I have here some photographeries of ze arteests an' mon ver' good fren' Monsieur Cartier."

"'Car-shay?' Do you mean Jacques Cartier?"

"Oui, the same, monsieur. You know Monsieur Cartier?"

"Never had the pleasure of meeting him personally but I hear a lot about him."

"Ooo-la-la! He is ze great announcaire, wif ze grand maniere, so virile, so homme d' esprit. The people of Quebec—all Canada—I—we, we—I know not how to say eet—faire de etat, Monsieur Cartier—"

Jacques Cartier, the explorer, who first sail the boat into Canada and plant the French flag at Montreal for France. His uncle was Sir George Cartier, the first prime minister of Canada.

"My papa he tell me ze story long time ago when I was a—a—jeune fille. We live north, long ways in the snow. My papa catch the fox, the otter, the bear. So many, many people live in the woods and alone and now they have the Radio. Oh, if you could un'erstan' how, how marvielle, wonnerful the CKAC Radio is for our people in Quebec—no other Radio speak ze French and that is all the most of our people un'erstan' and the CKAC it come four year ago when only twenty-five homes have receiving Radio. Now everybody have.

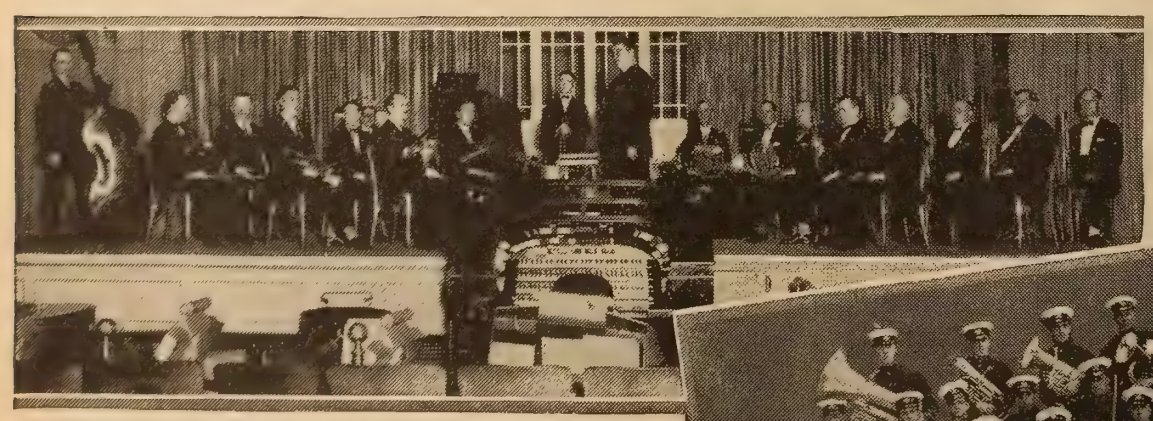
"La Presse, which is the bigges' newspaper in Canada, she give the great band concerts for towns all around and the people (*Continued on page 14*)

"You have not been long on this side of the Atlantic?" I changed the subject deliberately. Her soft, brown eyes were filling with tears as she struggled to express herself adequately.

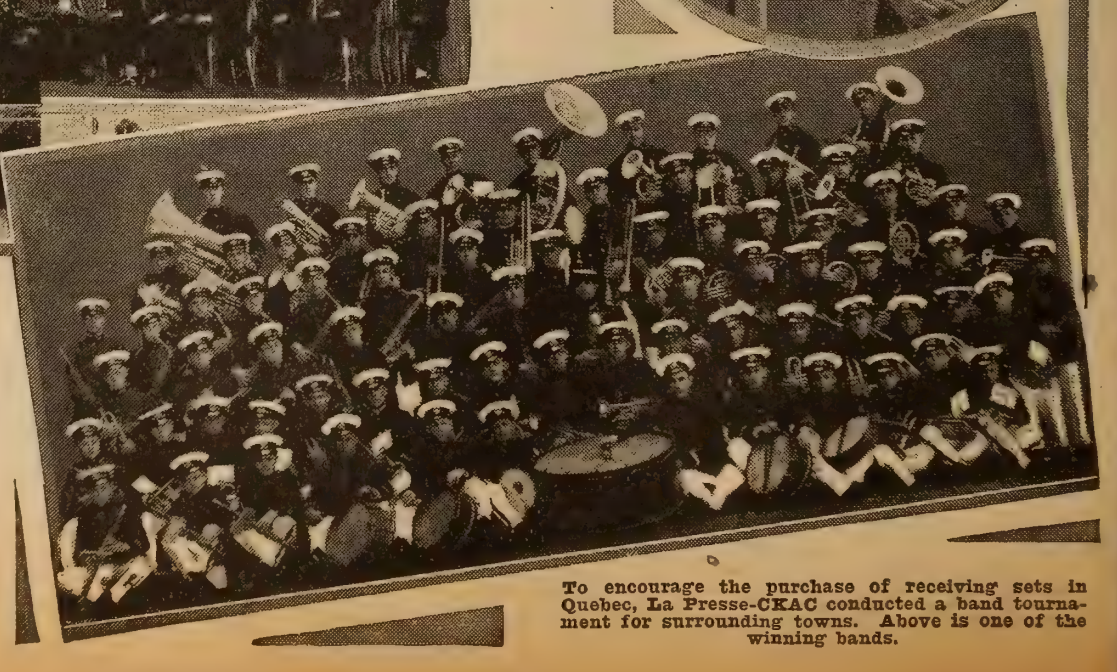
"All my life I haf lived in ze Province of Quebec, monsieur."

"Don't they talk English?"

"Only a few, un petit nombre. Eighty per cent are French. It is the Little France of America. Monsieur Cartier of La Presse he makes the programmes in bos the French and the English. Monsieur Cartier, his great, great, great, grandpere was



Above is the Capitol Theater Symphony Orchestra, said to be one of the finest musical organizations in the Dominion. Its classical selections have won many friends from this music loving community.



To encourage the purchase of receiving sets in Quebec, La Presse-CKAC conducted a band tournament for surrounding towns. Above is one of the winning bands.

BIG RABBIT

by HUGH FULLERTON

"MORE SPEED, man. It's up to you, now. Give her the limit." Big Dick Borton, the best pal a man ever had, stood over me as I urged more power into the little engine that was carrying us so swiftly through the water.

The thought that it was "up to me" sent my heart with a throbbing ache against my ribs. Somewhere in the depths of the Florida wilderness was my Roberta. Suppose we should be too late—what would happen?

It seemed like ages since I had received that note, hurriedly written, that she was being taken away from the Atlanta home of her guardian, Major Gaskill. We had been warned. The hard visaged little banker had told me that something was wrong; that the major had been speculating, first with his own funds, then with the girl's and finally the bank had become involved. Roberta had told me herself she feared kidnaping but she dared not protest for fear of the scandal.

Dick and I had managed to leap aboard the private car on which she had been taken by the mysterious negro giant, Trimble. She had been accompanied by her maid and then we found evidence that the major, himself, was one of the party. Before we could protect ourselves we had been attacked and overcome by Trimble and dumped out, as the train sped onward, at the edge of Jacksonville.

It was hours before we were in condition fit to resume the trail. Then we heard talk of the "Big Rabbit." It seemed a powerful, yet intangible, voodoo that had terrorized the negroes. We found Roberta had been whisked aboard a strange craft which departed inland, off the channel route. Dick took one boat and I chartered the Jason with the understanding that we were to meet at a certain point.

Dick had come and gone when I reached the objective. I waited frantically for word from him until Danforth, a detective I had known in New York, arrived on the scene. He was looking for timber thieves. Borton returned all but exhausted after swimming and tramping through swamps and bogs until he had found the rendezvous, the lair of the Big Rabbit. He had obtained disguises for himself. Dan and I were blackened to pass for negroes as we now raced to the rescue in this desolate jungle.

CHAPTER VIII

The Race Through the Swamp

"PUSH her! Drive her to the limit!" Borton kept repeating. The Jason was behaving beautifully and, tuned to perfection, she was slicing the water at the best speed I could coax out of her without risking overheating the motor. She was doing almost forty miles an hour and not a knock or rattle marred the purr of the engine. Again and again Borton turned to me in nervous impatience, begging for greater speed.

"At this gait we'll make it in less than two hours," I growled as I nursed the engine and listened carefully to the steady hum of the motor. The Jason was covering herself with glory.

"Get everything you can out of her while we are on the St. Johns," Borton remarked, fretting, "I'm going to crawl down into the bottom and try to get a nap. We can't make any real speed after we turn into the Ocklawaha and it will commence to get dark in there shortly after six o'clock. The moon will not help any until after eight o'clock and if we are that late we may lose. Drive her."

He spoke with savage earnestness, and his face was drawn into lines by anxiety and weariness.

"Why?" I demanded, still hanging over the engine.

"The negroes are ordered to meet at eight o'clock tonight," he exclaimed. "Evidently they are meeting for something important, connected with Major Gaskill. If we are late, or miss the meeting place the Lord only knows what will happen. An hour may mean everything."

His manner and words increased my uneasiness, which had been relieved by the physical exercise of operating the boat. Above the steady explosions of the engine I fired question after question at Borton but he either did not understand or was too weary to attempt to reply and, coiling his big frame in the bottom of the boat, his legs under a seat, he cuddled up with his head resting on a piece of his odd baggage and snored.

"LET him sleep," Danforth advised, "We'll wake him when we get well into the Ocklawaha. You run the engine and I'll steer. I know the river." Crawling over the baggage he took the wheel and commenced cutting corners to save every possible foot of distance.

It was a strange ride as the boat flashed through the silence of the narrowing St. Johns. The physical and nervous strain was beginning to tell upon us. Forward, Danforth sat humped over the steering wheel peering steadily ahead, the stump of a cigar clenched tightly in his teeth. There was little chance for talk. Occasionally Danforth called back to me as I hovered over the engine, listening, coaxing, watching the gasoline supply.

Danforth was taking all the short cuts, clipping quarter and even half miles off the distance where the course lights marked a wide sweep in the channel. Once he swerved like a flash to avoid a log floating just under the surface. Half a dozen times he slipped over bars where the water seemed scarcely deep enough for us to pass and where the boat stirred up the sediment on the bottom in its rapid passage.

The river banks were pressing more closely together. Clearings and orange groves showed on one side. On the other clearings had ceased entirely, and the bank of the river was marked with a blackening solid growth of oak and cypress with tall pines rising behind them. The trees were covered with a heavier growth of Spanish moss, and the under jungle was a matted tangle of smaller growths. The green of new sprouted eaves of the water oak showed livid where the yellow jasmine, creeping upward through the matted masses of moss, burst into a shower of beauty that cascaded down almost from the crests of the trees.

We were reaching the deeper swamp land. Clearings ceased at both sides. With a quick nod of his head Danforth ordered a slower rate of speed. A sudden turn, a rush seemingly straight at the bank of the river and the boat, flashing into a narrow lane of water, dived, as it seemed, into the heart of the swampy jungle. Before us a narrow, tortuous lane of water opened, winding between solid walls of dank growths rising, it seemed, out of the water itself. With a second jerk the Jason lost herself in the water wilderness and was twisting her way through the narrow aisle of water.

IT WAS late afternoon. The sun still was shining warm and bright, but as we dived into the depths of that Stygian river of the jungle, it seemed as if night were falling. In that forest arcade of water lay a ghostly twilight. In the tree tops far above us we could see the glint of sunlight and occasionally a golden bar, prying its way through some crevasse, splotched the surface of the water like a flame across a river of ink.

"We've got to push her," Danforth called, gripping his teeth grimly into the remains of his cigar. "Drive her hard. It is getting darker in here more quickly than I expected. Watch the lighter spots and race through them. We must make speed while I can see to dodge stumps and turn the corners. It'll be worse soon."

I slowly increased the speed, but a few moments later the motor commenced to miss fire, and, after spluttering along spasmodically for half a mile while I strove vainly to locate the source of the trouble, it stopped entirely and floated helpless in the sombre blackness of the dark river.

A huge water moccasin, disturbed, dropped like a plummet from a cypress limb into the water. An alligator slid with a soft splash from the side of a hummock and sank slowly, leaving only the tip of its snout above the surface. In the tree tops a wondrous choir of birds sang the evening hymn of the Land of Flowers. Gay parrots and other birds of brilliant plumage moved across the upper parts of the trees, flashes as of flame showing the flitting of the Cardinals.

The silence, punctuated only by the notes of birds, exaggerated the noises and the whispering voices of the creeping, crawling things of the jungle.

I HAD no eye for beauty nor ear for the music of the forest, but sweated and swore while wrestling with that infernal engine, every precious instant bringing the denser darkness nearer.

"Take it easy," said Danforth quietly. "Look it over instead of killing yourself whirling that wheel."

His advise was sound. I stopped physical effort and, within five minutes, located a clogged feed pipe that had crippled the carburetor—a small thing, remedied in a moment with a bit of wire. I was swearing at my own denseness and whirling the wheel when Borton awoke suddenly.

"Five minutes to six," he said sharply as he looked at his watch and glanced outboard, "How long have we been stopped?"

"Twenty minutes, engine broke down," I reported, just as the engine exploded twice and settled into a steady throb as the boat leaped forward. The noise of the exhause made conversation, save in loud tone, impossible, but Danforth, from his post at the wheel, called back:

"Is the place we're going to this side or beyond the place where the sight seeing boats tie up for the night?"

"Several miles this side," Borton called back. "I'm not certain just how far."

"We have a chance to reach it in time then," Danforth said grimly. "Cut loose that engine and I'll try to take her through."

"We've got more than half an hour of this kind of light," I yelled, "If the trees don't get any thicker."

"Al right—speed her up," said Danforth, chewing his cigar and talking back over his shoulder. "If we land on a stump or log, swim for the east bank. Give me speed; I'll take her through."

Never before and probably never again will that black lane of water, winding through the heart of the tangled swamp, see such a display of speed and reckless daring. Twisting, turning, sometimes swerving aside so suddenly in avoiding a crash into trees or logs that the boat skidded on one side and water flew like a screen over the rail, we dashed through that ever darkening inferno of semi-tropical growths. We flashed past a row boat, proceeding leisurely up the river and the two negroes, paddling with their faces toward the bow after the custom of the natives, turned toward us with surprise, and one, evidently accepting us as colored, waved a greeting.

BORTON, as we passed them, lowered his face that they might not see he was white, then did a strange thing. He rubbed his hands in the oil in the boat bottom, near the engine, blackened them and with the black hands made some sign in the air. One of the negroes rested his oars, raised his hands, made motions as if pawing the air—and shook his head sideways vigorously.

"They're not going," Borton yelled over the drumming of the motor. "I hoped they were and that we were getting near. Probably can't row there in time. Push her."

"She's doing close to thirty-five miles now," I yelled in reply.

"We'll make it—if we don't hit something," Danforth called back.

Light still illuminated the tree tops far overhead and a faint reflection of the dying twilight filtered downward. Birds already were going to roost in the lower

"Tillie," I said as calmly as possible, "you must help us. There are three of us here to save the major, Miss Tonneson and you. You most show us where they are. If possible you must tell your mistress that help has arrived."

As our eyes pierced through the red glow of pine knot flames and the fog of resinous smoke rising straight in the still air we discerned at the opposite end of the natural woodland cathedral, a crude, stage-like structure. It was open at the side, facing the clearing . . . A large chair, rudely carved, occupied the exact center.

branches of the trees and heavy shadows lay on the water, with lighter lanes where the trees were not so thick, making it more difficult to see objects in the channel.

I scarcely could see beyond where Danforth sat crouched in front just behind the hood of the bow, peering steadily ahead into the shadowy darkness. He seemed a machine, whirling the wheel rapidly in one direction, and reversing so quickly it seemed we must be swamped if not wrecked.

No one was speaking now. I nursed the engine, oiling, and in nervous desire to do something, testing screws and wires. It was well—for once a screw, jarred loose by the heavy vibration of the boat, released one of the battery wires, and before I could restore the connection we lost speed, and sharp curses flashed at me from both the others. Once we struck a glancing blow, reeled crazily, scraped heavily along one side of the boat and shipped water. Danforth, was partly torn from the steering wheel, lost control for an instant, the boat careened wildly, tore through the overhanging branches of a tree, righted and fled onward.

FOR more than ten miles we raced recklessly through the depths of the swamp, scarcely slacking speed. Every instant we expected the frail craft would dash against a tree or a floating log and that we would be hurled into the inky water, or shattered by the impact. Not a bit of solid land could be seen, the trees rising from the water, save where hummocks had formed around the aerial roots of huge cypress trees.

"Better turn on the headlight," I called.

"We don't dare," Borton cried back quickly. "We're getting close."

In one of the minutes in which I dared raise my eyes from the engine and bearings I observed Borton had crept forward and was leaning over the rail studying the east side of the river carefully, as if seeking some mark he knew. He struck a match, cautiously screening it low in the boat and looked at his watch.

"It's six minutes of seven," he called. "Drive her—just a little further."

The light had failed and it was dark, almost as midnight, excepting where occasionally a luminous land broke the blackness as the dying afterglow shone through a semi-submerged forest, without guide, without knowledge of the channel, depending only upon the sharp eyes of the little detective for safety from an accident which might mean destruction.

Borton suddenly threw up a hand with a sharp command to slacken speed. An instant later I breathed a sigh of relief as the engine, throttled down, changed its tune and the speed of the vessel slowly lessened.

"We are almost there," Borton said in lower tones. "We just passed the cypress hummock where I hid before taking to the river. Run slowly and make as little noise as possible."

I obeyed thankfully and in silence. Borton crawled forward again, and crouched, peering over Danforth's shoulder intently watching the line of trees.

"Hold her as close as you safely can to the trees on the left," he ordered. "Go ahead slowly. I want to find the landing place I picked out."

ALMOST without sound we slipped along, the engine now muffled down. To stifle as much of the noise as possible I leaned far over the side and draped a heavy wet cloth over the exhaust, deadening the sound of the explosions. The side of the boat was scraping under the overhanging branches of trees. Moss laden ends of branches whipped our faces and forced us to crouch low in the boat.

"Shut off the engine," Borton called in a hoarse whisper.

For five minutes we propelled the boat noiselessly along the bank by catching the branches of trees and pulling her along as Borton peered anxiously under the trees.

"All right," he said in a low tone. "Pull her in alongside that hummock just ahead. There is on opening on this side of it. Slide right up alongside the log. We can climb over it into a path and the boat will lie hidden."

Noiselessly we obeyed orders and dragged the Jason between the tree clumps and alongside the prostrate trunk of a huge pine, half buried in mud and water. In its fall the pine had torn up a huge pile of mucky earth in which plants and grass had rooted, forming a soggy little island. We tied the boat fast, her nose to a Judas tree, covered with masses of pink blossoms. A huge clump of needley like Spanish bayonet formed a screen which hid the boat entirely.

"Help me with this stuff," Borton whispered cautiously. "The path is right over there beyond the hummock, back of those Spanish bayonets. Mark the spot well so you'll know it when we come back. Remember the way."

We were lifting the packages from the boat and Borton led the way. Behind the huge clump of Spanish bayonet we stopped while he went on a few yards, glanced around and returning announced the road was clear.

"Listen, fellows," he said, "whichever one of us manages to reach the girl must make a break for the boat. Whoever reaches it with her must make a get-away without waiting for the others unless they are coming. I don't know just what we are running into but we must get the girl. Don't hesitate to shoot her rather than have the negroes retake her."

"Come on, let's hurry," he added sharply. "We want to be on the ground as soon as possible. It can't be far from here, for I hear them."

WE CLAMBERED over a log, through oozy mud and up an incline to where the footing was firmer, and came upon a well trodden path leading away from the river.

Borton led the way rapidly along the path. I was burning with excitement, curiosity and there was sort of a dry feeling in my throat and a burning fear for the girl I loved. There was no chance to ask questions as I brought up the rear of the procession.

Danford, his cigar stub still clenched between his teeth, trotted steadily in front of me. I could not help envying the coolness of the man. He tightened his belt and with a big package of Borton's mysterious disguise held under one arm, he jogged along through the darkness, perhaps to death, as coolly as if strolling up Broadway. I was hampered with an unwieldy package which, while not weighing much, handicapped my movements.

For perhaps half a mile the strange procession wound in single file along the narrow path. Ahead a sound like far away voices increased in volume yet we saw no one. A glow, as of fire, shone from somewhere ahead. Borton slowed down, moved forward again cautiously and finally stopped in a small opening where the path on which we had been traveling met another.

"Here is where we part, fellows," he said briefly. "I do not know what we are going against except that there are hundreds of negroes going to meet at a place less than a mile ahead. I want you fellows to light your pine torches, go right on and mingle with the crowd as quickly as possible. Join right in and don't talk to anyone. No one will recognize you or notice you unless you betray yourselves. One thing is certain you will see more negroes than you ever have seen together in your lives.

"I am certain Miss Tonneson and her uncle are prisoners by order of Trimble. What he intends to do I don't know. He has sent out orders for all the Sons of the Big Rabbit to meet and every negro in this section of Florida who can get here will be present."

"What are we going to do? What are you going to do?" I asked.

"CAN'T tell," Borton said briefly. "I am going to try to run the whole show and to beat Trimble at his own game. If I am discovered—let it go. Don't cut in if you have a chance to save the girl. You circulate around in the crowd and try to learn where the major and Miss Tonneson are kept. Then try to get the girl away to the motor boat. I will try to distract their attention and give you more chance to do it. If either of you happens to be left when the boat pulls out stick to the crowd and follow the negroes out through the swamps. You'll be safe unless they find out you are white. You will reach a railroad in fifteen miles or so—but get clear before daybreak—or they'll spot you."

We shook hands. I was surprised to find how little excited I felt. It was as if we were parting for a night's sleep.

"Above all," Borton said, "don't start anything unless things come to a showdown. If we are found out, back against a tree and cut loose—and GET TRIMBLE FIRST. We'd better push on. You go straight ahead. I'll take this back path."

Picking up his queer packages Borton hurried away into the blackness. We stood gazing after him an instant, then without a word, moved quickly forward. Ahead, now bright, now shut off by heavy growths, we could see lights moving like giant will-o'-the-wisps. We stopped, lighted our pitch pine torches, waited for them to flame up and Danforth and I moved forward, side by side along the widening path. In a few minutes we fell in with negroes carrying torches and lanterns, emerging from other paths, all moving toward the place where a great glare lighted the forest. They laughed, called shouted scraps of songs, jostled each other in rough play.

We went forward as rapidly as we could without the risk of drawing attention to ourselves and presently emerged from the mouth of the tunnel-line path into a great, open glade. A small island in the heart of the swamp had been cleared and, as we stepped out into the clearing, there burst upon our gaze one of the most weird and appalling scenes ever beheld by the eyes of man.

CHAPTER IX

In the Rabbit's Den

WE STOOD, stunned with awe, at the mouth of the forest path, looking out upon a scene so wild and weird it might have been taking place in some jungle depth of the Upper Congo.

An exclamation of amazement, perhaps mingled with terror, burst from my lips that almost betrayed us to the negroes who passed us both coming and going and in large numbers. Danforth recalled me to my senses grabbing me by the arm and digging his fingers into the muscles. He burst suddenly into a boisterous laugh, imitating the tones of the black men around us and whispered, "Steady, Wen; keep cool."

My sudden paralysis of mind and muscle passed.

We emerged into a large clearing, perhaps a hundred and fifty feet wide and four hundred or more in length. Evidently it had been a pine covered knoll and the pine had been cut away, the underbrush cleared. Whether there had been a saw mill at one time is impossible to know, but the ground was covered with sawdust. Huge live oaks and water oaks at the sides of the rectangular clearing extended their

It's Time for Spring Cleaning

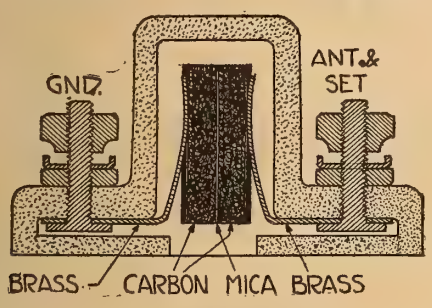
TIPS HOT Off the Bat for the Beginner or Fan Who Had His Set Installed. What Lightning Arresters, A and B Batteries Are. Part II.

By the TECHNICAL EDITOR

MAY we repeat—"Lightning never strikes twice in the same place." There isn't usually anything left to strike. Emphasis is therefore placed upon the necessity of installing approved lightning protection for your Radio if you would avoid fire hazards as well as comply with the rulings of the Board of Fire Underwriters.

In figure 4 of the last issue was shown the proper location and method of installing such protection. The

Figure 6, above, is a well-known lightning arrester. Figure 7, below, shows how it would look cut through.



market affords several makes which one may use with assurance of satisfactory operation. The majority of such makes comprise an airproof housing of porcelain in which is installed and sealed two carbon blocks separated by a very thing strip of mica. The blocks are connected to antenna and ground respectively.

In operation they function as a low capacity shunt path to ground from the antenna. This path is such that normal current values will not pass or bridge the gap, while the extreme voltage or power of a lightning discharge breaks down the gap and allows the discharge to pass directly to the earth. Thus is eliminated the danger of lightning entering the house and receiver where much damage might occur.

In figure 6 is pictured a well-known make of arrester using carbon blocks with mica air gaps, while figure 7 is a sawed apart drawing showing its interior mechanism.

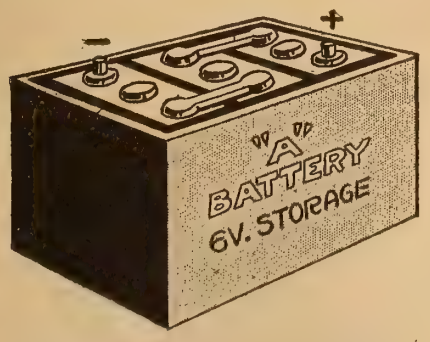


Figure 8. A six volt storage A battery.

Once the parts are installed the bottom of the arrester is hermetically sealed with a noncombustable material. To install it, after mounting upon the outside of the building, the antenna is connected to one of its terminals and then passed on to the receiver, and the ground wire is fastened to the remaining terminal and then to the ground post of the receiver. Be sure that the ground wire runs in as direct line as possible to its earth connection. Electricity in any form dislikes flowing in other than straight lines. Therefore all bends and turns should be avoided.

Lightning arresters employing copper, brass or other metals as the discharge media should be avoided. The reason for this is that all metals have a relatively low fusing or melting point and cannot withstand heavy discharges, without the danger of such fusing causing a short circuit which would make the receiver inoperative. On the other hand, carbon has a very high fusing point and seldom if ever need be replaced. Because lightning has never bothered your receiver there is no valid excuse for not providing protection before it is too late. Do it now while the subject is fresh in your mind.

Now about batteries, which in Radio are called A, B and C batteries. These letter classifications refer to the particular circuit within the receiver which is served by the battery. Radio A batteries are of two general types, storage A batteries (figure 8) and dry cell A batteries (figure 9). Storage batteries are the more economical for use with tubes which require ¼ ampere or more for the lighting of the filaments, such as the 201A, 301A, UX, WX, or CX class. They have the advantage over dry cells in that they can withstand heavy current drains without losing their voltage efficiency, and can be recharged readily when exhausted

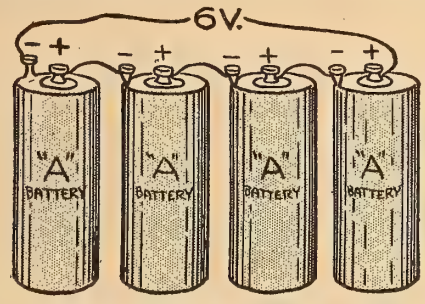

Figure 9. Dry cell A batteries. Four are shown here connected in "series."

or discharged. One should clearly understand that the purpose of an A battery in a Radio receiver is to heat the filament of the tube to a point where it will expell sufficient electrons to permit the B battery to function. It has no other reason for existance. A storage A battery should for general utility work have an ampere

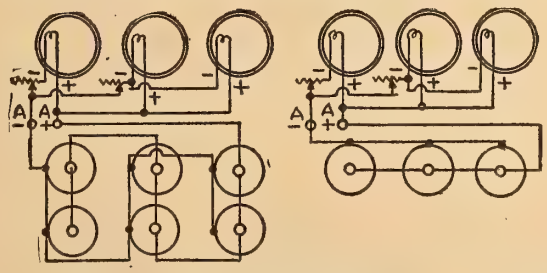

Figure 10, left, and Figure 10-A, right, for all 1½-volt tubes. Not less than one, preferably two cells, should be used for each tube.

hour capacity not less than 100. A smaller size requires recharging often while a larger size will be inclined to deteriorate through standing inactive too long before being recharged. This then means that in order to secure the greatest efficiency and longest life from a storage battery, it must be used, and at a fair ampere dischargal rate. An idle battery soon goes to the scrap heap.

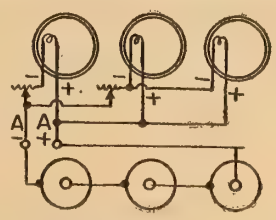

Figure 11. For one to three 3-volt tubes.

A batteries of the dry cell type, shown in figure 9, are preferred for use with tubes using less than ¼ ampere, such as 199's, or tubes of the 3-volt type. Perhaps the most important consideration for the securing of best results is the use of a sufficient number of dry cells connected properly. Figures 10 to 13-A, inclusive, show a number of ways of connecting dry A cells properly for various numbers and voltages of tubes.

Figure 13-B shows what is meant by "series" and "parallel" connections. Connecting in series means the connection of the center or carbon post of one cell to the zinc or outside post of the next cell. Connecting in parallel means connecting the center post of one cell to the center post of the next, and zinc or the outside post to zinc or outside post of the next cell. For illustration, a "bank" of four cells in parallel would have all four of the center or carbon posts connected together by one wire, and all four of the zinc or outside posts connected together by another wire. To connect such a bank in series to another such bank, connect the zinc post of one bank to the carbon or center post of the next bank, etc. Figure 13-A shows a series connection of four banks of two cells in parallel.

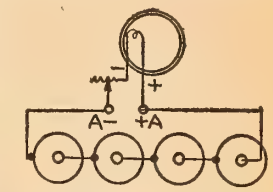

Figure 13. For one 5-volt tube, use four dry cells in series.

The B battery is that battery which supplies the energy which operates the telephones or loud speaker of the receiver. It is also sometimes known as the plate battery. B batteries are made commercially in two kinds. One, known as a wet or storage B battery, is shown in figure 14. The other, pictured in figure 15, is a typical flat type of dry B battery. In addition to the above, there are now available very commendable B battery substitutes which are known as B eliminators. As these have not come into general use by the masses we will confine our discussion to the types of B's shown in figures 14 and 15.

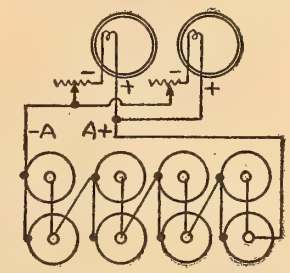

Figure 13-A. For two 5-volt tubes, use one bank of four dry cells in series for each tube.

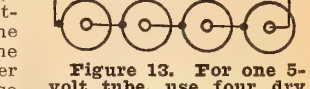

Figure 13-B. Top is "series"; bottom, parallel connection.

Contrary to the impression current in some localities, a wet B battery is preferable for all receivers in which the drain exceeds 16 milliamperes, and especially if the receiver is in fairly constant use. Wet B's are readily recharged, but have the disadvantage of requiring considerable attention. The more popular B battery is of the dry cell type. Recent improvement in manufacture have now provided dry cells which withstand heavy current drains and remain in efficient service for unbelievable periods. It has now become almost an axiom that all receivers using five or more tubes should use only the "heavy duty" type of B battery in order to secure the greatest economy of operation over a given period. Such batteries are made in the 45-volt size with 22½-volt tap.

At this point it appears as pertinent to the subject to contradict the thought that B batteries, of either the dry or wet cell type, cause noises in a receiver. Exhaustive tests with such batteries in every condition of charge have been made by no less an authority than the U. S. bureau of standards, but no noises attributable to the batteries were observed. It is true that loose

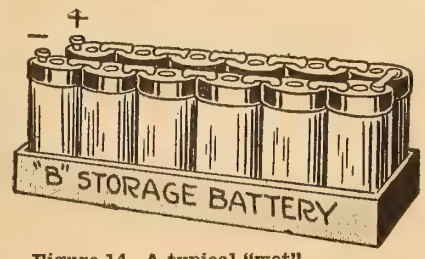

Figure 14. A typical "wet" or storage B battery.

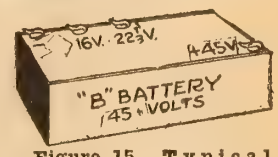

Figure 15. Typical block of "dry" B battery.

or corroded connections give an imperfect contact and sometimes a resulting scratchy noise, but when such connections are well made, one may as well look to some other portion of the circuit for the trouble.

Another point of equal value is the testing of batteries. How often have you seen them tested anywhere from fifteen minutes to an hour or more after the receiver has been turned off? All battery tests should be made when the set is in operation, not when disconnected. It is not the recovery voltage which you desire to learn, but the operating value.

Test your B or A batteries immediately after you have finished using the receiver and before shutting it off. All such tests should be made with a high-grade voltmeter. The 50 cents "and up" kind will do more harm to the batteries than good, while its readings are quite likely to be far removed from the truth. Thirty per cent below normal is the "cut-off" voltage. In other words, when a 45-volt battery declines to 32 volts, it has rendered value received and should be replaced.

(Continued on page 11)

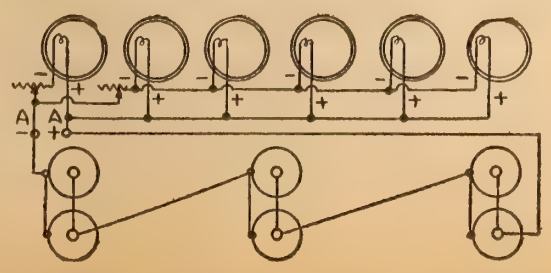

Figure 12. For one to six 3-volt tubes, the above arrangement is recommended as the best.

S-O-S: New Portable Super

AUTOMOBILE, Canoe, Motorboat, Beach or Camp--- All These Are Home to This Little Super-Heterodyne Which Is Easy and Reasonable for Anyone to Build.

By MILO GURNEY

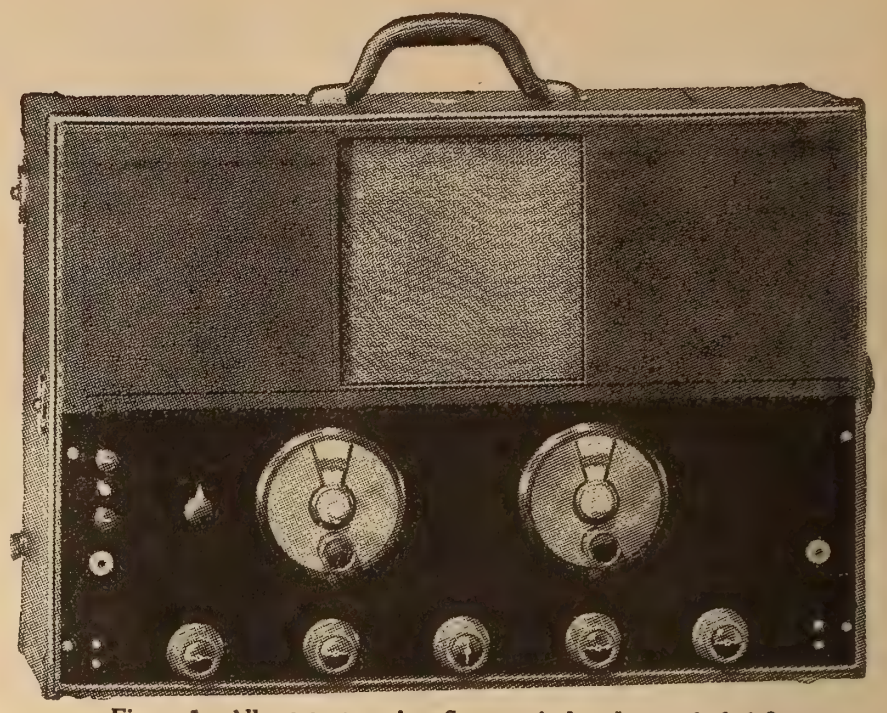

Figure 1. All set to tune in. Symmetrical and neat, isn't it?

NOW that many of the downtrodden are recovered from their annual attack of spring fever, comes vacation time and the lure of the great outdoors. Yet no vacation can be complete without a portable Radio receiver. The evening bedtime story, the voice of your favorite announcer, the "pep" of the Charleston, and the soothing melody of "Always" must be with one always.

The word "portable" as applied to a Radio receiver means much more than compactness. The set's design cannot be such as to over-crowd the parts, it should be adaptable to either antenna or loop reception, and it must insure a mechanical ruggedness which will permit of considerable rough handling without marring its efficiency. Beyond this, where possible, the finished receiver should present a pleasing appearance to add to its usefulness in the home.

In presenting a "how to build" article for Radio Digest's "S-O-S" portable, the author feels that this receiver combines in a marked degree many, if not all, of the desirable features required.

AS super-heterodyne circuits have passed through another eventful winter of experimentation and resulting betterment, we may then look to this circuit as most suitable for our purposes. It is also of interest that in building this circuit one has the advantage of using the new No. 171 Victoreen intermediate transformers, designed particularly for use with tubes of the 199 class. These transformers represent a new offering by the Geo. W. Walker Co., of Cleveland, Ohio. Their amplification factor and general operating performance make them stand out as distinctive in their field and well worthy of one's confidence.

As a portable receiver is subject to very severe shocks through handling and the microphonic noises incident to the use of 199 tubes must be circumvented, the selection of a suitable socket entailed a careful test of several makes. Our final selection was the No. 9040 Universal as manufactured by the Benjamin Electric Mfg. Co., of Chicago. Upon examination of this device, many very desirable features are disclosed beyond the novel method used for reducing microphonic effects. Taking advantage of one of these, it will be noted that the sockets are mounted in a reverse position underneath the sub panel, the socket base proper protruding up and through the panel, thus providing not only neatness in top sub panel appearance, but permitting the placing of all wiring beneath this panel without unsightly drill holes.

The variable tuning condensers offered another problem which was not easy of solution, as several factors bearing upon the final selection had to be met. First among these was the requirement that the condenser possess a mechanical ruggedness beyond that found in many makes of the so-called straight line frequency type. Of equal importance was the assurance that the rotating shaft carrying the rotor plates be so designed as to offer automatic compensation for wear, thus obviating the necessity of adjustment attention by the user.

The final selection was the type No. S. L. F. 1223 Amsco condenser, manufactured by Amsco Products, Inc., of New York city. This particular make possesses much which was desirable. The outer frame makes the condenser rigid and strong, while both the stator and rotor plates are wedged into machine milled bars, and in turn wedged into Radion supporting studs. The rotating shaft carrying the rotor plates is made of chromium nickle needle steel and fits into a locked bronze bearing. This bearing is split in order to offer a self compensation for wear, while a hardened steel washer is interposed in front between this bearing and the rotor bar. The opposite end of the rotor bar also fits into a bronze casing assembly and is provided with a steel ball thrust bearing. From the above description one will readily understand that a condenser constructed as is the Amsco has much to commend it as distinctly quality apparatus.

There is an old axiom which reads that no chain is any stronger than its weakest link. This applies very forcibly in the selection of fixed bypass condensers. While a more serious attempt has been made of late by several manufacturers to produce fixed condensers whose values will remain fixed and with the limits of error narrowed down to an acceptable point, we are still confronted with altogether too many brands in which one cannot place much confidence. In the selection of fixed condensers for Radio Digest's S-O-S portable, the experience of a great many manufacturers of Radio receivers was called upon, the final selection favoring Aerovox condensers, as designed and constructed by the Aerovox Wireless Corp., of New York city. The No. 1200 type which is used as the main bypass for radio frequency currents readily met the 500-watt breakdown test to which they were submitted. Contrary to the general impression, it should be understood that a discharging condenser is subject to very heavy surges. This discharge takes place as a successive ripple. At each peak the strain to which the holding plates are subjected is quite beyond that usually understood. Mechanical strength in addition to careful calibration of capacitive values are therefore important and are well met in the product mentioned.

POSSIBLY no product used as an accessory to a portable receiver is called upon to provide efficient service as are the filament and plate batteries. Of necessity space will not permit the use of husky, large capacity units, therefore one's selection must assure a make which enjoys a reputation for uniformity, a high recovery value and a construction assembly which, except under severe abuse, will give full value received. Of a few types meeting these conditions, the National Carbon company's Nos. 764 and 7111, were selected as representative of the high quality required. The name "Eveready" hardly needs additional mention. It is already generally established that products produced under this label will prove well adapted to the work in hand. The No. 764 B battery is of the heavy duty type, capable of withstanding the drain incident to the extended use to which receivers of this class are usually put.

It is apparent to the reader that it would be folly to make a selection of audio frequency transformers suitable for this receiver without ignoring all of the "boost" literature offered and selecting that make which in conjunction with the associated apparatus, offered the most pleasing reproduction. Fortunately, early in the making of such tests a transformer was found which (*Continued on page 30*)

Old Man Static's Funeral

PART III, in Which Is Described the Making of an Efficient Buried Antenna System

By MILO GURNEY

THE author is not "Bubbling Over" this morning—if you know what I mean. In truth, he lacks fifty pieces of silver. All of which is irrelevant, not admissible or pertinent to the subject of underground antennas. In the last article on antennas of this character a promise was made that suggestions would follow for experimentation with horizontal types of aerials. The details of these experiments, promised for the June 15 issue, will be delayed as the avalanche of mail on buried aerials has brought a few very valuable experimental ideas which are of such interest that all will want to learn of them.

May I then introduce Clifton G. Whitchurch, of Ardmore, Oklahoma. This gentleman has invented an underground system which is novel in design and, according to his statement, works very satisfactorily in his locality. We are taking the liberty of reproducing his description of the underground condenser antenna with the certainty that each of you will agree that his plan possesses merit.

Takes But Very Small Space

Mr. Whitchurch writes in part as follows:

"The antenna about to be described, is the result of a number of experiments conducted with the two objects in view, efficiency and adaptability for installation in a very small space. From my experience, it appears the first object has been attained while as to the latter, the reader is left to judge for himself. All that is required for the installation of this interesting experiment is a post hole digger, a space six inches in diameter and enough man power to sink the hole five or six feet deep.

"My experience has been with antenna coupled super-heterodynes and two stage radio frequency receivers. While ordinary loop aerial reception was also tried, the reception results with the underground system were considerably more uniform and static was reduced markedly. When using the loop a number of bloopers were ever present but with the underground aerial, but one or two of these tormenters were able to plow through. These were located so close I was compelled to admit they were neighbors.

"A defective electric lighting transformer was barely audible when receiving underground. With the loop and under the same conditions the noise from this transformer would drown out WBAP, Fort Worth, and WFAA, Dallas, Texas, 100 miles away. This interference was so pronounced on the loop that with loud speaker reproduction nothing but a roar could be heard. The receiver I am using is a seven tube Super-Autodyne. The loop employed when comparisons were being made is of the box type, 18 inches wide and 84 inches high. On stations farther than 200 miles away, the volume received favors the underground system. Under this distance, there is little choice so far as volume is concerned when using either the loop or underground systems. I believe the two stations mentioned, WFAA and WBAP, actually come in stronger when using the loop.

Underground System Beats Loop for DX

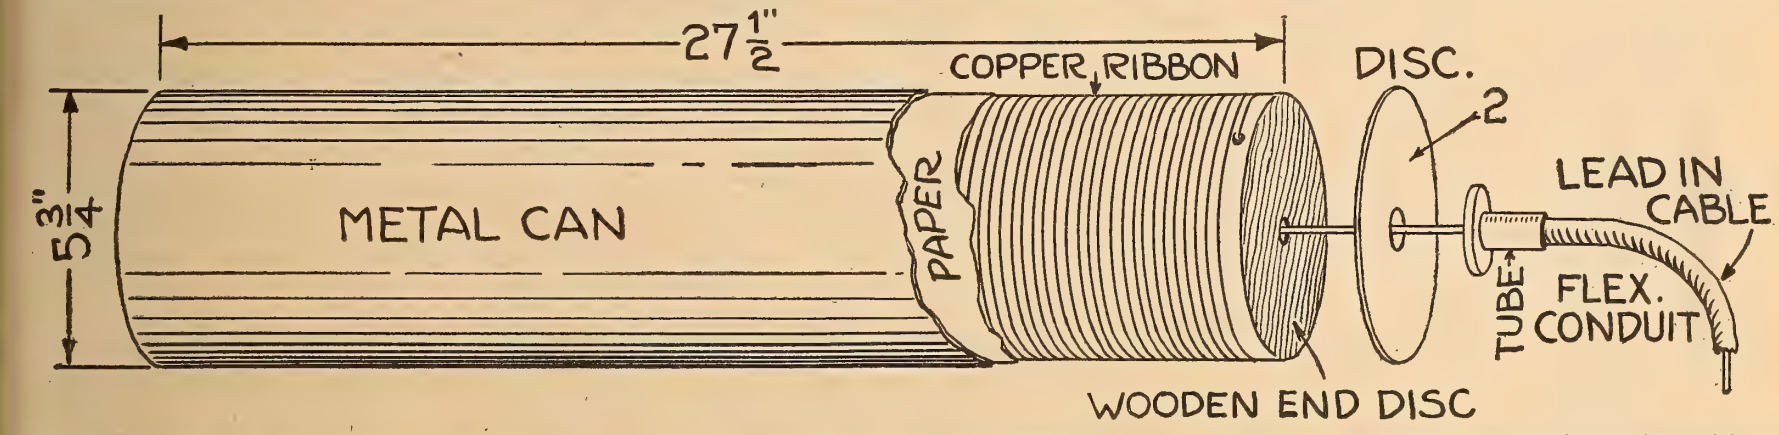
"On stations 500 miles or more distant, the use of the underground system brings in a very noticeable increase in volume over that obtained with the loop. In fact, it is observed that it is readily possible to bring in distant stations on the underground system which cannot be picked up at all when using the loop.

"The writer has not tried for extreme DX, all reception being secured upon a large concert type diaphragm loud speaker which lacks in great sensitivity. However, such stations as KDKA, WGR, WWJ, WSB, WSAI, WBZ, KFMX, CFCN, WMBF, KGO and KFI are received here, in Ardmore, Okla., with real volume, if one is to believe his neighbors in the adjoining block and compare with their stories. It is to be noted that the list of stations which I am able to receive, with the exception of the last few, are, as the Hired Hand at WBAP would say, 'Quite a fur piece frum here.'

"For the benefit of those who desire to construct an underground system such as I am using, the writer will attempt to outline the procedure. The dimensions may be varied. This may be desirable possibly for the particular make of receiver you are using, although in general the specifications given will apply to a great many receiver makes.

"The underground antenna specified contains 132 feet of ¼-inch flat copper ribbon. If this is not to be had, one may use an equal length of ¼-inch, 24-strand ribbon aerial wire. You will need a cylinder of either bakelite or paper 5¾ inches in diameter and 27½ inches long. If this diameter is not available, either a smaller or larger one may be used, making sure, of course, that if a smaller diameter cylinder is used, then the length will have to be increased, and vice versa for a larger cylinder." (For those not familiar with the method for determining the length of tubing required, the diameter times 3.1416 equals the length of a turn. Therefore the length per turn and the spacing will determine the total length of cylinder required.—Editor's Note.)

"The cylinder selected should have a sealing head disk of bakelite or wood at each end (see illustration). A ¾-inch hole ½ inch deep should be drilled in one of the heads at its exact center. Next drill a ⅜-inch hole ¼ inch from this same end of the cylinder and on into the center to intersect the hole in the center of the head. These two holes now form an outlet for one end of the winding to pass through. It is needless to mention that if a paper cylinder is used, it should be thoroughly dried and given a coating of hot paraffin.



Directions for Winding Cylinder

"We are now ready for the winding which is done with ¼-inch copper ribbon or braided tape. Insulate the starting end of this ribbon for about 3 inches, wrapping with electricians' tape, and insert this insulated end in the outlet just drilled so that about ½ inch protrudes from the center hole in the sealing head. Fill the hole with hot paraffin and allow it to harden. You may now begin the winding, which should be spaced 1/16 inch between turns, and continue until the whole 132 feet have been wound upon the form. The finishing end may be brought through the tube head at the reverse end from the beginning and sealed off with paraffin or sealing wax, or fastened in any convenient way as no connection is made to it. The winding finished, dip the whole in a bath of hot paraffin and then allow to cool. Follow this procedure by wrapping on two layers of insulating paper, which may be any high-grade glazed paper, over the wound form and again dip in the hot paraffin bath and allow to cool.

"We are now ready to construct the housing or can for the underground antenna. This will require a sheet of either copper or tin 20 by 28 inches in size, providing the size cylinder specified was used. This sheet should be formed into a cylinder by a tinsmith. Do not solder the seam, but first insert the wound form. Once this is accomplished the seam may now be drawn together tightly over the wound form and securely soldered water tight. This forms a continuous cylinder which should be sealed at the ends by covering with copper or tin discs which are also be soldered to the enclosing can. Before doing this, however, one of the metal heads (marked 2 in the illustration) should have a 1½-inch center hole made in it for the lead to be taken out. The completed can will now appear with only one center of the winding form visible and its associated ribbon terminal drawn through.

Bringing Out the Lead-In

"To the exposed terminal of the ribbon solder a two-foot length of stranded ignition cable and tape the joint. Covering this cable and soldered to a center hole covering disc of tin should be a two-inch length of metal tubing. When in place this tube and disc are soldered to the end covering disc so as to be water tight and the tube should be filled with sealing wax or hot paraffin. To the exposed end of the cable is then soldered your lead-in which should consist of either number 12 or 14 solid copper insulated lead-covered wire. The connection so made must be well taped with electricians' tape and likewise dipped in hot paraffin. The sheath of the lead cable is to also be soldered with a length of wire to the metal can, but you are warned that considerable care must be exercised in doing this so that you will not burn the lead covering.

"We are now ready to install the antenna, which will require a hole 6 or 7 inches in diameter, or just large enough to admit the can. This hole should not be less than 5 feet deep and preferably 6 feet.

"The hole finished, lower the "canned" antenna clear to the bottom and pour thin mud over it, being careful to hold the can down with a stick while so doing in order to keep it from floating. Gradually fill the hole with dirt, keeping it more or less watery. One foot from the top, the process of watering may cease, and the remainder of the hole can be filled with dry dirt and thoroughly tamped.

"The exposed end of the copper wire in the lead-covered cable is to be attached to the antenna post of your receiver, while the ground post of the receiver is to remain attached to the ground you are now using. If your receiver is grounded and shielded, you should solder the sheath of the cable to such shielding. If not shielded and you care to go to the trouble of doing so, you may expect added selectivity as a reward for your efforts.

At first, one may not secure the results anticipated as it takes some time for the total condenser effect to function. There will be many successes and no doubt an equal number of failures. An underground antenna that will work wonderfully in one locality, very often refuses to function well elsewhere.

Mr. Whitchurch's article was not quite clear in some of its statements. However, the specifications in general are quite complete and we are of the opinion that this gentleman would be pleased to correspond with those who would care to write him.

(Another very successful type of underground, static reducing antenna, which has the obvious merit of being simple to make, will be described by Mr. Gurney in the mid-June issue of Radio Digest, out June 14.—Editor's Note.)

IT'S TIME FOR SPRING CLEANING

(Continued from page 9)

C batteries are made only in the dry cell type and range in voltage value from 1½ to 22½ volts. They generally are inserted in the grid circuits of audio frequency amplifiers, although they are also employed in the radio frequency amplifiers of some circuits. Their purpose is to place a negative charge upon the grid of the tube, thereby forcing it to operate with more clarity. In addition, such a negative charge materially reduces the current flow from the B battery, thus lengthening its life. Very often this current reduction amounts to one half of that normally taken by the receiver, hence it is obvious that C batteries should always be used for economy's sake without regard to the improved quality. C batteries have "shelf" life, or from six to nine months.

When testing a wet or storage A battery, the use of a hydrometer is to be preferred. With your storage A battery instruction sheet or with the hydrometer will come a list of hydrometer readings to guide you in the proper charging periods of the battery. In general, however, a wet A battery is fully charged when its hydrometer reading is 1280 to 1300, and it will require recharging when the specific gravity or hydrometer reading has dropped to 1250, the danger line usually being 1225. These values may differ slightly from various instruction pamphlets but in general may be relied upon.

Another test of the state of a storage A battery is to use a voltmeter. When using such a device, do not make the mistake of turning off the tubes and then taking your reading. You can only determine the actual condition of your battery through testing it when the tubes are turned on.

For Radio Skeptics

YOU who have friends that still remain skeptical as to the arrival of Radio as an institution, read to them this editorial. Let them be not afraid of investing in a good Radio installation. The day of Radio is here and will stay for many years to come.

Dr. J. H. Dellinger, chief of the Radio section of the United States bureau of standards, Uncle Sam's final authority on Radio, has very recently stated that Radio is now definitely established as a practical, dependable, permanent utility for everyday use.

Dr. Dellinger believes that the newest and most recently designed sets on the market cannot be improved to any considerable extent so far as service is concerned. He thinks future improvements in broadcasting will be in the transmitting rather than receiving end.

The day of rapid changes in Radio models, Dr. Dellinger says, has passed. Following the period of experimental development, during which the market was flooded with scores of "sets" of all degrees of receptivity, the industry has now settled down to the production of a relatively few standard, high class sets, expertly designed and substantially built, which may be expected to give as good results five, ten or fifteen years from now as they do when new.

"There is no longer any more reason for waiting to buy a good Radio set," says Dr. Dellinger, "than there is in waiting to buy a good piano. While there doubtless will be occasional refinements in receiving equipment, these are not likely to affect appreciably the comparative value of the standard sets of today. Tubes, of course, will lose their efficiency after from 1,000 to 2,000 hours of use, but most of these can be reactivated at small cost. The set as a whole, however, will retain its efficiency and value indefinitely."

Tell your doubting friends what they are missing. Tell them what this high authority has said. An investment in good receiving equipment is lasting, profitable and may not be classed as a luxury.

Playful, Joking Stage Hands

NOW the stage hands are gunning for the broadcasters. In Omaha, we learn, the stage hands' local union has been eyeing WOAW and other stations jealously, and wondering if there isn't some excuse by which the broadcasters can be forced to employ one or more invisible scenery shifters.

We do not laugh at this suggestion because it is a move of organized labor. We honestly believe in organized labor's collective bargaining system where it is of benefit to the welfare of the public. But we laugh at this one originated by the Omaha stage hands because it is so utterly ridiculous from every viewpoint.

The stage hands would find a job where there is no work to do. Perhaps they would go so far as to coerce stations and force them each to employ a high-priced union stage hand to sit around and twiddle his thumbs. Mr. H. H. Bushey, business manager of the Omaha local, who started the movement, evidently suspects the broadcasters of having various concealed "sets" and "drops."

Broadening Religious Beliefs

RADIO and economics together are working one of the greatest changes in the worship of the Deity in the United States that this country has ever known. The broadcasting of religious services, be they denominational or non-denominational, is showing its effect on the various creeds. People are beginning to realize that, after all, every religion is working toward the same general end.

Since the advent of Radio, church memberships have increased in this country far beyond their normal growth.

Radio can be thanked for this broadening of public thought, this widening of the belief of religious minded people. Perhaps the very expanse, the wide reaches of space covered by this new medium of microphone and loud speaker, have help the minds of the listeners to expand and take cognizance of the many ways of arriving at the same goal.

RADIO INDI-GEST

Indi-Gest Poets

The Indi-Gest Poets come and go,
Some give up when ideas come slow;
They sail like a meteor 'cross the sky,
A flash for a minute, then fade and die.

Rhea did well in verses light,
'Till she sponsored one entitled "Night,"
That strain was too much,—the next she cast
Was in primer style, and that was her last.

The Trombone man sarcastic gets,
I judge by his stuff he is one of the Wets.
They say that he lives beside the lake
So should have no trouble his thirst to slake.

This writer has taken a few months' rest,
But is in again as a "Colyum Pest,"
At the start, perhaps, a little bit lame,
But able to play to the end of the game.

GEORGE

George, Indi-Gest's roaming bard, who has the world's largest portable set, is back with us. Greetings! His receiver is in a commissary box car which travels all around the country and is now anchored temporarily at Red Cloud, Nebr. He has just sent in a bunch of lilting rhyme, and Indi is glad to promise you one of George's best, "Railroad Radio," next issue.

To Old King Tutt

My dear Majesty: I wish to express my approval of your poetic protest against the feminizing of Radio Digest. Women are all right in their place. For instance, the hot mamas on the front page and the Hey Hey girls on the Advance Program pages are all right I say. But when the sweet, young things write about the lavender eyes of Oswald Maraschino and the lavender whiskers of Gerald Fromage, it is time that the honest voice of yeomanry be lifted in protest. Whither are we drifting?

In this connection I will say that this "Betty" jane may be on the level. However, I strongly suspect that the "Marcella" kid is the bunk. I don't think she is a she. By this I mean that one of the lads in the office, is grinding this stuff out and kidding the general public. Maybe the bird smokes an ancient corn cob pipe and gleefully rings a bull's eye in the goboon while he pens such gems as "effervescing youth and ambition," "I have did my darndest," "both wear neckties and shoes." I have written to the management but received nothing definite in reply. Maybe "Indi" himself writes this bunk while in a girlish mood.

Again expressing my approval for your manly stand, I am, very truly yours,

THE THIRD TROMBONE PLAYER

——— HIM!

Who fills my den with awful noise,
Destroying peace and equipoise,
Wrecking nerves and avoirdupois?
The blooper.

Who, playing pinwheels with his dials,
Uncorks each night the seething vials
Of my wrath—though he be distant miles?
The blooper.

Who inspires in once gentle breast
Base impulse of homicide to rest,
Till it seems no crime to kill the pest?
The blooper.

J. E. R.

Intermission Idiosyncrasies

A. C. S. Announcing

"At 9:45 Willie Westfall, the child wonder of New York and New Orleans will render a violin solo, 'Wishes and Wisteria.' One audience called it hisses and hysteria. Willie, we would like to state, has played before many of the crowned heads of Europe, and a few that ought to be crowned—with a two dollar catsup bottle or a stocking full of T.N.T. However, you may enjoy this solo number immensely. We'll be satisfied if you are."

ARTHUR C. STOWELL

Dr. B. G. Clausen, broadcasting his evening church services over WGY recently, surprised his congregation by bursting into song right in the middle of his sermon. His solo consisted of a negro spiritual. Whereupon, we assume, a number of sleeping masculine pewholders and Radio fans were awakened, thinking they had tuned in on WEAP, the Fort Worth Star-Telegram in action.

Static Cure in Six Operations

Dear Indi: I have a static eliminator hook-up well worth your consideration. It is as follows:

(1) Dig up aerial. (2) Climb up on the house and take down the ground. (3) Remove all batteries, placing them in a strong cardboard box made of wood. (4) Disconnect loud speaker horn from unit. Place in a prone position standing up straight in the box. (5) Pack all tubes in the family flivver's tool box, so that they won't get broken. (6) Place a can under the grids to catch all the leaks. (7) Place the set in the box in an oblong position flat on its back, pack in sawdust, and place box in dark attic until next fall.

Results: This is the best method I have ever tried. It eliminates practically all static.

M. G.

FRANQUE'S FILOSOFEE

Every tube has a silvered lining.

INDI

Oh Say Not So!

Condensed

BY DIELECTRIC

The transition has been made from winter schedules to those better suited to warm evenings; where listeners suffer some discomfort if they choose to tune in broadcasting stations on their circuit. No longer do we have the "all classical" programs, though many studios continue to feature classical numbers, instead music of a lighter vein comes into the loud speaker. Continuity programs have lost none of their attraction to the great majority of Radio auditors and we may expect them to continue unabated throughout the season of heat and static. Fortunately, this type of entertainment is provided by local broadcasters in their own studios, or rebroadcast from some metropolitan station.

It is intended to review here the closing concerts featuring works by old masters and presented by well-known artists of this country and Europe. Beginning with that Atwater Kent concert in which Mme. Frances Alda made her Radio debut, there is an inclination to dwell not only on her versatility but Strad quality of tone—bright and silvery. Her choice of songs showed intuitive discernment of the cosmopolitan tastes of the hundreds of thousands listening and a courteous acknowledgment of their right of appeasement. Personally, the violin playing of Mr. Corliagni was received with enthusiasm, as he possesses charm of style, musicianship and a tone quality rich and pure.

While the Schola Cantorum was known outside its immediate home territory before that eventful night when a chain of broadcasting stations introduced it to countless others, still it never could have merited warmer praise than on that occasion. The tonal sweep of the trained body of voices through selections of impressive grandeur, into songs of vivacity and changing mood, attacking contrapuntal fugue-like compositions with perfect rhythmic balance, these were some of the accomplishments which made friends far and wide over the country—and deservedly. No particular distinction should be made between the excellence of one choir and any other, for each helped form the whole.

When at last the final gala concert of the winter series of concerts sponsored by Mr. Kent had come to its close, all those who had followed from Sunday evening to Sunday evening the appearance of one after another of the foremost artists of the world, a feeling of real gratitude was felt toward the man responsible for it. Allan McQuhae's fresh Irish tenor, Maria Kurenko's unapproachable coloratura singing, Albert Spaulding's seasoned art as a violinist, Josef Hofmann's virile masterly pianism; there indeed was a musical feast seldom offered to any paid audience—yet presented gratis to all who might listen.

Rodman Wanamaker is the possessor of a collection of old violins of great value—both intrinsic and commercial—which he graciously permitted members of the New York Philharmonic orchestra to play in the studio of Station WJZ, New York. Fiddles are heard everywhere and quickly discernible to the persons acquainted with the masterpieces of Italy, France and Germany, and a great many more folks now know what music can come from one of these instruments. The cello (noted among collectors of rare old instruments) made one fairly weep as its gorgeous wealth of tonal beauty came through the speaker into the quiet homes of a myriad of listeners. Radio displays these, without fear of damage to their priceless varnished surfaces, before an audience too large to handle otherwise.

A. T. & T. DIVORCES ITSELF FROM WEAF

INTERESTING NEWS BRIEFS AND BROADCASTING BITS

C. B. Locke Leaves WBAP—No Radio Forecasts Yet—"Subpoena" Wendell Hall—Hamm on Air

The broadcasting activities heretofore carried on by the broadcasting department of the American Telephone and Telegraph company, under general designation of WEAF, have just been incorporated under the name "Broadcasting Company of America." Inasmuch as broadcasting service is apart from telephone service in its special problems involved, the separate corporation was deemed advisable. The new company, of course, is owned entirely by the A. T. and T.

* *

C. B. Locke, popular WBAP announcer and Radio editor of the Fort Worth Star-Telegram, has resigned to go into Radio sales work. Roland Perry, a member of the Star-Telegram editorial staff, has been promoted to the positions vacated by Mr. Locke.

* *

A nation which enjoys good music will never turn bolshevik and singing workmen will do better work and lead happier lives, says Powel Crosley, Jr., owner of Station WLW and the Crosley Radio corporation at Cincinnati. This Radio industry leader declares that the musical efforts of the broadcasters are working for the more peaceful spirit of the nation and the greater enjoyment and contentment of its citizens.

* *

At the present time the weather bureau of the degartment of agriculture will not attempt to make "Radio Forecasts," a service it is often called upon to give. People want to know in advance whether or not the listening will be good or bad on certain evenings, and what parts of the country can be heard best. But at this time, the weather bureau says, the reliability of such forecasts would be very questionable.

* *

Speaking of Radio, Dr. Herbert A. Fricker, Canadian critic and noted choir leader, has made the statement, "The new science is bringing music into her own as perhaps the most valuable of all the arts to humanity at large." The strained nerves of the present generation need a soothing influence, the noted critic remarks, and this is now within reach of even the most humble of our citizens.

* *

Wendell Hall and his wife, when they made their appearance in Fort Worth, Texas, were immediately served with a subpoena by the grand jury, demanding that they stay in Fort Worth. Inasmuch as the Star-Telegram station, WBAP, wanted the "Red-Headed Music Maker" on hand at all times, and WFAA, at Dallas, was close by, WBAP officials decided that the safest way to keep him in Fort Worth was to subpoena him. The grand jury obliging, the plot was carried out, and WBAP listeners benefited to the discomfiture of the touring ukulele songster and his charming wife.

* *

Dedication services of the new East Lansing Peoples' church, erected recently at East Lansing, Mich., and costing $350,000, were broadcast by Station WKAR, the Michigan State college broadcaster. Four denominations, Baptist, Methodist, Congregational and Presbyterian, took part in the dedication services.

* *

Fred Hamm and his orchestra are back on the air. The original "Bosses' Own" music makers whose lilting refrains have been heard during the past two years by millions of listeners from the popular Elgin stations, WTAS and WCEE, recently began an indefinite engagement at the "Purple Grackle" Spanish restaurant two miles East of Elgin, and are being broadcast by WGN and WLIB nightly.

* *

A hook-up of twenty-six of the largest broadcasting stations carried the principal addresses and proceedings of the forty-ninth annual convention of the National Electric Light association which was held in Atlantic City recently.

* *

Prizes announced by Warner Brothers to hamdom for the best logs submitted covering the two-way conversations on 40-meter waves between 6KY, Hollywood, Calif., and 6XBR, portable broadcaster now on tour of the Pacific northwest and intermountain states, have been increased to a total of $1,200. The time of the exchange of messages is also changed to 9:30 p. m. Pacific time, or 11:30 Central standard time. The first prize is $500 in cash. 6XBR wil circle the world in its tour.

* *

Americas' first avowed school of instrumental syncopation has been opened in New York city by Ben Bernie, famous WEAF orchestra leader. All kinds of jazz instruments are taught in courses of instruction modeled after the accepted plans used by the standard schools of classical music.

* *

When the 1926 National Balloon races were started recently from Hot Springs, Ark., every one of the ten starting balloons was equipped with a Radio receiving set. This is the first time in history that all have been so equipped. The reason for the popularity of the receivers may be attributed to the success of Pilot Van Orman of the Goodyear IV, who for the past three years has won the races. Station KTHS, New Arlington hotel here, broadcast every detail of the races and gave the pilots periodic weather reports.

* *

A mystery broadcaster whose owners are cursed with a misplaced sense of humor has frightened Los Angeles, Calif., listeners several times recently with fraudulent warnings. Once the news was broadcast that a hurricane was sweeping down the San Fernando valley and threatening Los Angeles. Again, a fictitious warning was given that the big Hollywood dam in the hills was about to burst and flood the northern half of the city. Considerable work was necessary to restore the peace of mind of citizens. Inspectors are searching for the offender.

HIRED HAND-SUNFLOWER GIRL DUET

Here they are—both of them—the Sunflower Girl and the Hired Hand. The picture was taken in the studio of WLS, Chicago, where this famous pair from WBAP, the Fort Worth Star-Telegram, had occasion recently to visit. "Just finished sweepin' out the microphone and thought I'd do a little announcin'," drawls the Hired Hand, laying down his broom and picking up homes all the way to Texas and the Southwest. The Hired Hand is known to the income tax collector as Harold Hough. He admits he is about 32 years old, his eyes are "sorta" gray, and he has a voice and a way that girls wake up in the middle of the night to remember. His piano playing, crooning team mate is equally famous.

NEW UX-171 RADIOTRON POWER TUBE APPEARS

Is Designed for Use in Last Audio Frequency Stage

NEW YORK.—In order to provide still greater power from the storage battery receiver, yet without the need for alternating current supply, there is now introduced the new UX-171 Radiotron. This tube, although no larger than the UX-112 type, is capable of supplying an amazingly large volume of undistorted output to the loud speaker; and as is the case with other types of power tubes, it is intended for use only in the last stage of an audio frequency amplifier.

The new UX-171 tube may be operated from a six volt storage battery through a five or six ohm rheostat or if preferred, it may be operated from a five volt source of alternating current. The maximum plate potential of this new tube is 180 volts. The negative grid bias or C battery should be 40.5 volts for the full 180-volt plate potential. The filament current is .5 ampere.

Duke Moves Radio Set First

LONDON.—When the Duke of York, the Prince of Wales' younger brother, moved house here recently, the first thing to be unloaded at his new home from the removal truck was a Radio receiver with square frame aerial.

Radio Club Notes

Station CKY of the Manitoba telephone system has inaugurated a systematic study of receiving conditions throughout the Province of Manitoba. Trained observers in the company's employ have been appointed at stragetic points in the province and they are reporting daily on receiving conditions, noting in particular such interference as may exist and its probable cause. These reports are telephoned each morning to CKY, where a summary is made and broadcast at noon, It is hoped that much of value will be learned regarding Radio phenomena as a result of this survey. As CKY is the first station in Canada to undertake a work of this kind, their summaries should be of marked and valued interest.

* *

Radio clubs will be interested in the following tabulation of types of interference encountered by 148 persons to whom questionaires were mailed.

Induction noises, 58; radiating receivers, 50; spark interference, 17; satisfactory reception, 23.

From the above figures it is apparent that our old enemy the "Blooper," is not to be blamed for everything. Induction noises run a close race, well out in front, while spark trouble comes in for a share of the blame. But why have nearly fifty per cent of the trouble arising from bloopers? Be a good fellow and show your blooping friend how to tune his "getter," as one fan terms his Radio.

* *

City Attorney A. H. McMillan, of Bay City, Mich., recently submitted to his city commission the draft of an ordinance to regulate the operation of Radio receivers and to prevent unnecessary interference. The ordinance provides, among other features, the licensing of all receivers. A two dollar license fee is suggested. We await with interest the final disposition of this draft, as it is somewhat doubtful whether such an ordinance could be enforced.

MANUFACTURERS MEET

(Continued from page 3)

under the direction of President Frost, new officers were elected for 1926-27 as follows:

President, A. T. Haugh, King Mfg. Co.; secretary, L. G. Baldwin, Willard Battery Mfg. Co.; treasurer, P. C. Lenz, Runzell-Lenz Co.; directors-at-large, Carl Boyd, Reichmann Co., Powel Crosley, Jr., Crosley Radio Corp., Vernon Collemore, Atwater Kent Mfg. Co., E. F. McDonald, Jr., Zenith Radio Corp.; directors of eastern division, H. H. Eby, H. H. Eby Mfg. Co., C. C. Colby, Samson Elec. Co., E. M. Squarely, U. S. Tool Co., Godfrey Gort, L. S. Brach Mfg. Co., S. B. Trainor, Amplion Corp. of Am., B. H. Price, Amsco Products Co., H. H. Frost, E. T. Cunningham, Inc.; directors of western division, Leonard Parker, Stewart-Warner Co., Towner K. Webster, Ekko Co., J. A. Bennan, Jefferson Elec. Mfg. Co., W. W. Dowdell, Sterling Mfg. Co., Harry Bradley, Allen-Bradley Mfg. Co., Jess Hawley, Newcomb-Hawley Co., Harry Simpson, Maring Wire Co., D. MacGregor, All-American Radio Corp.

The first named director in each of the three groups are also first, second and third vice-presidents in the order named.

LABOR BODY DEFIES U.S. AND NABS WAVE

INSISTS ON HAVING BROADCASTER REGARDLESS

Chicago Federation Threatens Opening Up on 491.5 Meters Now Used by WEAF and KGW

CHICAGO.—Before this is read, the Chicago Federation of Labor has threatened to have its broadcasting station in operation here, on the same wave length as WEAF, namely 491.5 meters.

The Chicago labor body has been attempting for some time to secure a wave length, but has been refused by the commerce department whose officials say there are already too many stations in Chicago, and besides they haven't any wave lengths.

But that has only put the fight into E. N. Nockels, secretary of the Chicago Federation, who says, "We will be within the law, because the law requires the department of commerce to issue a license to any completed station that makes application.

Won't Let A. T. and T. Monopolize

"Dragging through the courts would take too long. The wave length of WEAF is not used west of New York, and we do not feel that the American Telegraph and Telephone company should be permitted to monopolize the air."

Here Mr. Nockels erred, for KGW, Portland, Ore., uses the same wave as WEAF.

Regardless of the error, however, fans and other broadcasters are interestingly awaiting the fireworks which are bound to occur if WCFD, the labor station's call, opens as scheduled on WEAF's wave. The station is located on the end of the Chicago municipal pier.

Real Wedding to Go on Air June 1 from WHT

USL Honeymoon Winners to Be Married in Studio

CHICAGO.—As often as Al Carney has played the wedding march on the studio organ at WHT, he has never played it for an actual wedding ceremony. So it will be for the first time that he will play it when Charles E. Riddle and Irma O. Schertz are married in the studio on the night of June 1 by the brother of the groom, the Rev. E. M. Riddle.

The studio will be turned into a chapel. Floral decorations will cover the walls and adorn the organ manual at the east end of the studio which will serve as an altar. A choral program consisting of appropriate anthems will be arranged for the occasion.

After the ceremony the couple will be taken to Niagara Falls as guests of the United States Light and Heat corporation. It was this company that offered a week's entertainment in the "honeymooners' paradise" for the best suggestion for a USL program to be put on the air by WHT. The contest ended March 1. Mr. Riddle and Miss Schertz won with their suggestion, which will soon appear on the WHT program.

"La Presse" Records Listeners' Favorites

Enterprising Phonograph Company Then Sells to Fans

MONTREAL, Que.—An entirely novel way of bringing Radio entertainers into more personal contact with listeners has been inaugurated recently by CKAC, La Presse station, here.

Whenever a popular entertainer faces the microphone and renders a special number which has been requested by over 500 fans, arrangements are made with a local phonograph record manufacturer and one or two of these numbers are registered via CKAC through the registering laboratories of the local firm.

The first of these to be most successfully recorded and put on sale the following day were the "Palms" and "Hosanna" as played by Norton H. "Buddy" Payne, popular organist of the Canadian Famous Players Capitol theater in Montreal.

The numbers were played during one of his bi-monthly Thursday night organ recitals. In less than four days over 3,000 of the records were sold in and around Montreal.

SERVICE IS KOAC'S AIM

(Continued from page 4)

band, Madrigal club and orchestra. Sports are broadcast from the field of action by W. L. Kadderly, official program director and announcer.

And do the people of the state appreciate this college via air? The answer is in the enormous sacks of mail from the listening student body. They write for confirming data to the notes taken during the lectures, for additional information, for any and all kinds of information pertaining to Oregon. And there are of course, innumerable letters of just pure gratitude for being able to glean such intellectual growth through Radio as it is employed by Oregon Agricultural College to actually make science of service.

RADIO IN MIKADO LAND

(Continued from page 5)

J. Moskovita, 1121 S. Meyler street, San Pedro, California, often listens to the Japanese broadcasting and sends us a typical program from JOBK, which was sent to him from Osaka in confirmation of a report he sent to Japan. It starts out with exchange quotations, stock reports, music, lecture, news report, another lecture, and at one o'clock there was opera followed by a fairy story, children's hour, Japanese classical music, Radio drama and classical selections from German, French and Italian composers.

Yes, Radio is new in Japan, but the moving picture theaters complain that it has caused a falling off of twenty-five per cent in attendance. Those who have sets are making the utmost use of them. It is predicted there will be a million listeners before a second anniversary rolls around. And then what? Will Japan continue to utilize the Radio to educate and promote culture of the highest type or will she be doing the next thing after the Charleston?

MLLE. DESCRIBES CKAC

(Continued from page 6)

hear over Radio and that CKAC gives a prize to the bes' band. All the people all over Quebec ver' happy 'bout the bands and that started making Radio populaire.

"Then Monsieur Cartier asks lots people come see Quebec in automobile en tour. When they hear heem on Radio an' he tells how quaint, how interest Moanray-al with its ol' fashion customs and bos French an' English ways everybody come see."

Mademoiselle Boudouin toyed with her gloves for a moment.

"It must be very cold in Quebec," I remarked glancing at her furs.

"Sometimes col', yes. But Monsieur Cartier say you people have entirely wrong notion. We have very won'erful countrêe in Quebec. We do not have what you call 'iceclaize' on the end of our noses, no, nevaire. Come and see sometime for yoursel'."

For nearly an hour she sat, telling of Jacques Cartier and his station. She told of the Chicago newspaper man, J. P. Callaghan, who came to La Presse to work with the news dealers, building up and extending circulation, a rather cold and unsentimental job. He became interested in CKAC and now he puts in an hour every day telling Mother Goose rhymes and entertaining the kiddies.

She told of the wonderful concerts by the Capitol Theater Symphony orchestra, of Raoul Duquette and his Windsor Hotel Concert orchestra, of the great opera singers, of the splendid assistance given to Cartier by other members of the staff, Arthur Dupont, Adrien Arcand, Leonard Spencer and A. Lebeau.

"An' so many, many letters from all over the United States as well as Canada," she said, drawing on her gloves. "We even have one from the White House in Washington."

Suddenly she was standing. She put a picture of a band on my desk without telling me what band it was. She had picked up the various other pictures, telling me about each individual.

"Now I must go," she said, "I doan know what you say but please give us a nice story. Mr. Cartier he work ver' hard an' we have such a won'erful sta- station we wan' everybody to listen' who has nevair heard it."

I saw Dave standing at the door, as she flitted by—and, I think she smiled a little at him. His color seemed to take on a rosy hue. And the story? Well, there isn't any story, except just to tell the things she said as nearly as I can remember how she said it. And Dave? Say he's been tuning in CKAC every night that he could get them. Yesterday he told me he thought he recognized her voice and she was singing French but he doesn't understand French. He's planning to go up that way for his vacation this summer.

2LO Star to Movies

LONDON, England.—John Henry, 2LO's leading humorist, has become a movie star. The adventures he so drolly describes before the mike are now being put on the screen by Gaumonts. The first three pictures will be known as "How I Began," "Listening In," and "The Loud Speaker."

RHUBARB AND CRUMB CAKES NOW POPULAR

HELEN HARRINGTON DOWNING GIVES TWO RECIPES

WQJ Day Program Chief Tells How Kitchen Fans' Taste Varies According to Season

By Helen Harrington Downing
Director of Day Programs at WQJ

I HAVE been asked frequently which of the recipes I have broadcast was the most popular with our invisible audience. It would be quite difficult to answer that truthfully as we have new fans listening each day. Many want to take down a recipe at the time it is given, but are interrupted and have to leave their Radio. Occasionally they do not think of that specific recipe again until they may want to use it, then they write us as late as a month or two afterwards requesting it.

For a while we thought, from the number of requests we had for it, everyone must be serving Ice Box Cake daily, but again we decided that Upside Down or Topsy-Turvy Cake was the popular dessert.

Demand Is Changing

Booth seem to have had their day as far as the Radio audience is concerned and at present "Household Helps," "Shortcake Recipes" and "Meals for House Cleaning Week" are holding the lead. "Spring Vegetables and New Ways of Preparing Them" always comes in for its share of popularity, too, at this season.

While Ice Box Cakes are most popular in the fall and Upside Down Cakes during the winter, cakes of various kinds are requested regularly. Crumb Cake and the new Rhubarb Cake recipe right now are pleasing those who a year back were asking for others.

As rhubarb is plentiful and popular right now possibly these recipes will interest readers of Radio Digest who have not previously tried them. The directions are as follows:

Rhubarb Cake

Required: 1 cup brown sugar; 1½ cups rhubarb sweetened (cooked); 1 level teaspoon soda; 1 cup raisins; 1 cup chopped nuts (walnuts or others); ½ cup butter; 2 1/3 cups flour; 1 teaspoon each cinnamon, cloves and nutmeg; 1 level teaspoon Calumet Baking Powder.

Method: Cream sugar and shortening. Add spices. Add flour with soda, and baking powder sifted in. Throw the nuts and raisins on to the dry flour. Mix all very thoroughly together. Lastly add rhubarb.

Be careful to have a stiff batter. Bake in a loaf pan in a slow oven. This cake may be warmed and used as a pudding with hard sauce.

HERE'S WHERE WQJ TRIES RECIPES

This is a corner of the model kitchen of the Calumet Baking Powder company whose recipes are broadcast daily by Helen Harrington Downing over WQJ, Chicago.

Crumb Cake

Required: 2½ cups flour, ½ cup butter and 2 cups brown sugar. Mix these well together; take out ¾ cup mixture for top. Also required: 1 egg; ¾ cup milk; 2½ teaspoon Calumet Baking Powder; 1 teaspoon cinnamon.

Method: Beat hard until the batter is smooth. Pour into greased pan (8 x 8 x 2 inches). Sprinkle the crumb mixture over the top. Bake in a moderate oven 325 degrees Fahrenheit for 20 minutes, then 340 degrees for 20 minutes.

The Reader's View

Likes New Issues

As a regular reader of your magazine I want to congratulate you on your new issue, and heartily endorse your plan to issue it twice a month instead of every week. I think you have the best magazine on the market.

I am going to experiment with an underground aerial and will report my results to you. I believe it will overcome some of the static. Herewith are some votes for my favorite announcer. Please give him credit for them.—H. L. Joyner, Greenville, N. C.

Rah! for the Hired Hand

I have a little "spiel" if proper, I should like to be permitted to air same through your valuable columns. As a start, I wish to say that I like most of our genial and hard working announcers, with the exception of those that read their letters, calls, and telegrams at the end of each selection from their station.

Tonight, over WBAP, the Hired Hand announced that he had withdrawn from the Radio Digest Gold Cup race, that he had written Radio Digest who absolutely refused to withdraw his name, and gave as his reasons for withdrawing, that he had only "placed" in '24 and '25 and could not believe that he could win this year.

Modest man. I agree with the Editor of Radio Digest. I refuse to have his name withdrawn, and ask all our good friends of Radio to "let's put him over" for the simple reason that the Hired Hand is the worlds' most colorful announcer, says what he means and means what he says, and does not take all night to say the same.

For example, I listened to the Hired Hand at the Fort Worth Fat Stock show this year. The event was judging of the saddle horse class. It took the judges over fifty minutes to announce the winners, and for fifty minutes I kept my dials on Fort Worth and listened to the Hired Hand's descriptive efforts. Think it over, if that does not prove he's a World's Champion, what'll you have? Let's make him Gold Cup Announcer for 1926.—W. J. E., Lindale, Texas.

The Judges Seem to Agree

I am writing to inform you that I have received word that I was successful in winning the Radio World's Fair international reception contest. In this case I won a medal which will be presented September 16, during the Radio World's Fair.

I thought you might be interested in this as I was also second prize winner in your International Radio Week reception contest.—H. Leadbetter, New York, N. Y.

Concerning A.F.D. and R.A.V.

Concerning A.F.D.'s reception test period, I wish to say that I believe this is a good idea and would like to see some stations start it.

R.A.V. of Lafayette, Ind., reports that he received KFJR, Stevensville, Mont., on December 12, 1923, when they were using 5-watts power. Does R.A.V. believe that were KFJR still located at Stevensville and broadcasting with 5 watts he could receive them under present conditions?

I doubt if it could be done now.—W.I.G., Chicago, Ill.

Working People's Hour

I have charge of the Radio department of a local factory and have received many complaints from listeners because of the fact that the better entertainment comes so late in the evening that they lose much

NORTH AMERICAN KIWANIS CONVI

HIGH LIGHTS OF THE AIR

THE FIRST of June brings a change in the personnel of the Nighthawk frolics at Station WDAF. Zez Confrey and his orchestra will take the place of Ted Weems' Victor Recording orchestra and will become the musical background for these well-known Radio frolics.

Two refreshing week-end trips may be enjoyed this warm weather by fans tuning in Saturdays, June 5 and June 12, at 10 p. m. Eastern standard time for the Mayflower orchestra programs at WRC. A ship's bell and whistle and the navy song "Anchors Aweigh" will start the cruises into the seas of harmony and rhythm. Edward H. Husing, announcer at WRC, will act as official conductor aboard the Tivoli excursions and as pilot for the Mayflower voyages.

The young writer will be especially interested in the talk Tuesday, June 1, by Nell Sneed, woman's editor of the Kansas City Star. Miss Sneed will let the novice in on the secrets of running a woman's page.

The mystery of the Himalaya mountains will keep the listener spellbound who dials for WLIT, Philadelphia, Wednesday, June 2. Colonel Roosevelt, who has recently returned from hunting museum specimens among these snow-covered peaks will talk.

Virginia Flohri and Robert Hurd have combined their talents to form one of the most popular "acts" of Pacific broadcasting. Miss Flohri, who has created an enthusiastic audience during her past three years singing from KFI, and Mr. Hurd, a recent and welcome addition to coast musical circles, discovered, during an impromptu recital in Miss Flohri's home that their voices, soprano and tenor, blended unusually well. The KFI audience, after their first duet recital, responded so heartily that a series of duets was announced. On June 3 the two will present an interesting concert of Schubert, Schumann, Greig and Strauss.

Ninety-eight thousand Kiwanians over the North American continent will be interested in the Radio broadcasting of the 10th Annual International Kiwanis convention on Monday evening, June 7, in Montreal over CHYC. This united simultaneous meeting of the 1,530 clubs on the North American continent will be the third time Kiwanis has synchronized a continent-wide unified expression of international understanding. The Radio, of course, will greatly aid in this opportunity.

Summer is here—the time when canoes glide softly through the moonlight and every young person desires to fit into this romantic atmosphere to best advantage. Dan Nolan, nationally recognized ukulele expert, will furnish just the right accomplishment. Learn to play this Hawaiian instrument by dialing for WTIC, Wednesday, June 9, Mr. Nolan will tell you just how he does it and how you can do it, too.

Colorado's semicentennial anniversary will be observed over KOA, Denver, Friday evening, June 11, when a special two-hour studio program will be given by the Colorado-Made Goods club under the direction of Mrs. Alvin B. Collins. One of the introductory features will be a "word scenario" on "Cultural Colorado," followed by a group of vocal numbers by the Unity church quartet, primitive Indian music by Dr. Jean Allard Jeancon, curator of archaeology of the Colorado museum, and Spanish airs by the station orchestra. Songs and readings of Colorado's growth comprise part two.

Patriotic music marks the end of the programs this issue. Monday, June 14, is Flag Day and all the stations will celebrate with the songs of our Republic.

NORTH AMERICAN KIWANIS CONVENTION BROADCAST THROUGH CHYC

HIGH LIGHTS OF THE AIR

THE FIRST of June brings a change in the personnel of the Nighthawk frolics at Station WDAF. Zez Confrey and his orchestra will take the place of Ted Weems' Victor Recording orchestra and will become the musical background for these well-known Radio frolics.

Two refreshing week-end trips may be enjoyed this warm weather by fans tuning in Saturdays, June 5 and June 12, at 10 p. m. Eastern standard time for the Mayflower orchestra programs at WRC. A ship's bell and whistle and the navy song "Anchors Aweigh" will start the cruises into the seas of harmony and rhythm. Edward H. Husing, announcer at WRC, will act as official conductor aboard the Tivoli excursions and as pilot for the Mayflower voyages.

The young writer will be especially interested in the talk Tuesday, June 1, by Nell Sneed, woman's editor of the Kansas City Star. Miss Sneed will let the novice in on the secrets of running a woman's page.

The mystery of the Himalaya mountains will keep the listener spellbound who dials for WLIT, Philadelphia, Wednesday, June 2. Colonel Roosevelt, who has recently returned from hunting museum specimens among these snow-covered peaks will talk.

Virginia Flohri and Robert Hurd have combined their talents to form one of the most popular "acts" of Pacific broadcasting. Miss Flohri, who has created an enthusiastic audience during her past three years singing from KFI, and Mr. Hurd, a recent and welcome addition to coast musical circles, discovered, during an impromptu recital in Miss Flohri's home that their voices, soprano and tenor, blended unusually well. The KFI audience, after their first duet recital, responded so heartily that a series of duets was announced. On June 3 the two will present an interesting concert of Schubert, Schumann, Greig and Strauss.

Ninety-eight thousand Kiwanians over the North American continent will be interested in the Radio broadcasting of the 10th Annual International Kiwanis convention on Monday evening, June 7, in Montreal over CHYC. This united simultaneous meeting of the 1,530 clubs on the North American continent will be the third time Kiwanis has synchronized a continent-wide unified expression of international understanding. The Radio, of course, will greatly aid in this opportunity.

Summer is here—the time when canoes glide softly through the moonlight and every young person desires to fit into this romantic atmosphere to best advantage. Dan Nolan, nationally recognized ukulele expert, will furnish just the right accomplishment. Learn to play this Hawaiian instrument by dialing for WTIC, Wednesday, June 9. Mr. Nolan will tell you just how he does it and how you can do it, too.

Colorado's semicentennial anniversary will be observed over KOA, Denver, Friday evening, June 11, when a special two-hour studio program will be given by the Colorado-Made Goods club under the direction of Mrs. Alvin B. Collins. One of the introductory features will be a "word scenario" on "Cultural Colorado," followed by a group of vocal numbers by the Unity church quartet, primitive Indian music by Dr. Jean Allard Jeancon, curator of archaeology of the Colorado museum, and Spanish airs by the station orchestra. Songs and readings of Colorado's growth comprise part two.

Patriotic music marks the end of the programs this issue. Monday, June 14, is Flag Day and all the stations will celebrate with the songs of our Republic.

Wandering minstrels whose voices are ever appearing over new microphones are Russ Wildey and Bill Sheehan, below, the popular Ray-O-Vac Twins. At the present time these happy artists of the air are touring the Atlantic coast. Elizabeth Coles, violinist, left, as she appeared in costume at KDKA, Pittsburgh. To the right is Katherine Prescott Bemis, soprano, who often sings during the housewives' matinee at KOA, Denver.

Balkite "B" and the Balkite Trickle Charger convert your radio receiver into a light socket set

Operate your present receiver from the light socket. Then you need never again worry about recharging or replacing batteries. Nor will your set ever again be handicapped by weak power. With full even power, always exactly as required, your set will give consistently good reception to be had in no other way.

No changes in your set are necessary. You need add only Balkite "B" at $35* and the Balkite Trickle Charger at $10.* Balkite "B" replaces "B" Batteries entirely and supplies "B" current from the light socket. The Balkite Trickle Charger, once connected to the lighting circuit, is left on permanent charge. It keeps your "A" battery always at full power. For maximum convenience, you may also purchase from your dealer a switch that cuts out the charger and turns on Balkite "B" during operation.

Both Balkite "B" and the Balkite Trickle Charger are entirely noiseless. They are permanent pieces of equipment with no bulbs or moving parts and nothing to replace or get out of order. Other than a negligible amount of household current, their first cost is the last. Add them to your set and convert it into a light socket receiver. Ask your dealer.

**Prices slightly higher west of the Rockies and in Canada*

KNX, Hollywood, Calif. (336.9m-890kc), 7-7:30 p. m., Mutual Motors mirth contest; 7:30-8, program, Overell's Furniture company; 8-9, L. W. Stockwell company program; 9-10, Stephens Motors minstrel show; 10-11, Goodrich Silvertown Cord dance orchestra; 11-12, Cocoanut Grove dance orchestra.
KWSC, Pullman, Wash. (348.6m-860kc), 8-9:30 p. m., Aloha Harmonizers; Horace Trimble; Ola Bain, James Lemley, Will DeNeff; songs, L. A. Kirtland.

STEWART-WARNER IS AIDING SAFETY FIRST

PLAYLETS AND TALKS ARE SUPPLIED TO STATIONS

Purpose Is to Prevent Automobile Accidents to Motorists and Pedestrians —Marcus A. Dow Is Head

CHICAGO.—An "Oral Safety Chain" is being forged that will extend around the United States. Its links are words which will be welded directly and through the air. Its purpose is to aid in the prevention of automobile accidents to motorists and pedestrians.

This chain is the conception of Marcus A. Dow, past president of the National Safety council, and director of the Stewart-Warner Safety council.

Under the comprehensive plan just completed, safety playlets and safety talks will be broadcast by stations scattered throughout the country. Already the following stations have agreed to cooperate with Mr. Dow: WAMD, Minneapolis; WSBF, St. Louis; WMC, Memphis; WHAD, Milwaukee; WRVA, Richmond, Va.; WHB, Kansas City, Mo.; KHJ, Los Angeles, and a station in Wilkes-Barre, Pa. They have been signed up by Stewart-Warner representatives in the cities where the stations are located.

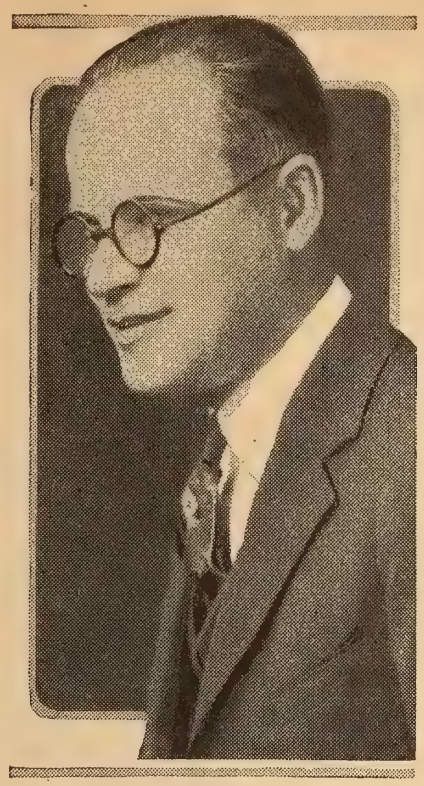
Give Playlets and Talks

Mr. Dow himself has been booked to give a series of safety talks in Louisville, Memphis, Worcester, Mass.; Reading, Pa.; Omaha, Salt Lake City, Oakland, Calif; Los Angeles, and other cities. These talks are under the auspices of the local safety councils or the safety committee of local associations or chambers of commerce.

In addition, the safety playlets or talks will be broadcast over Station WBBM, Chicago, the studio of which is located in the corporation's offices. The playlets are worked out from Mr. Dow's ideas by the studio staff of WBBM. Copies of the playlets are then immediately forwarded to the other stations in the chain where they are released for broadcasting on Thursday of each week.

It is Mr. Dow's plan to make as many safety addresses as time will permit. Associations of commerce or safety councils in the United States are advised to write him at 1826 Diversey parkway in the event they desire his services.

BLINDNESS DOESN'T BLOCK HIS SUCCESS



NEW YORK.—Arthur Stone, considered America's best blind pianist, has entertained WEAF's audience on many occasions. In addition to being a pianist and despite his handicap, Mr. Stone is a master of the piccolo and an orchestra leader of exceptional ability. He enjoys the distinction of being among the first to introduce orchestras in vaudeville. Several years ago Stone's orchestra was considered the best of its kind.

JEWELL ELECTRICAL INSTRUMENT CO.

1650 Walnut St., Chicago

"26 Years Making Good Instruments"

"I've just had a lesson in radio economy, and, believe me, it's illuminating"

"I WENT into my radio dealer's this noon for a couple of Eveready 'B' Batteries and said, 'Tom, give me a pair of Eveready 45-volt "B" Batteries, No. 772's.'

" 'How many tubes in your set, Jim?' he asked.

" 'Five,' I answered.

" 'Then what you want is a pair of Eveready Layerbilt No. 486's.'

" 'Why?' I asked.

" 'Because the Eveready 772's are meant for sets having one to three tubes. With average use of the set, and used with a "C" battery*, they should last a year or longer. But on a five-tube set, with average use and with a "C" battery, they will only last about four months. Anyone with a four or five tube set should buy a pair of Eveready Layerbilts No. 486. Used with a "C" battery they should last eight months or longer.'

" 'Yes, but the 772's cost only $3.75 each,' I said, 'and the Layerbilt $5.50. There's some difference.'

" 'Well, figure it out for yourself,' said Tom. *'Two* sets of 772's should last you about eight months, and will cost you $15.00. *One* set of Eveready Layerbilts should last about eight months, and will cost you only $11.00.' "

The simple rules for this satisfaction and economy are:

On 1 to 3 tubes—Use Eveready No. 772.

On 4 or more tubes—Use the Heavy Duty "B" Batteries, either No. 770, or the even longer-lived Eveready Layerbilt No. 486.

On all but single tube sets—Use a "C" battery.

When following these rules, the No. 772, on 1 to 3 tube sets, will last for a year or more; and the Heavy Duties, on sets of 4 or more tubes, for eight months or longer.

We have prepared for your individual use a new booklet, "Choosing and Using the Right Radio Batteries," which we will be glad to send you upon request. This booklet also tells about the proper battery equipment for use with the new power tubes.

Manufactured and guaranteed by
NATIONAL CARBON CO., Inc.
New York San Francisco
Canadian National Carbon Co., Limited
Toronto, Ontario

*NOTE: A "C" battery greatly increases the life of your "B" batteries and gives a quality of reception unobtainable without it. Radio sets may easily be changed by any competent radio service man to permit the use of a "C" battery.

DIRECTING MOVIE AT SEA REAL PROBLEM

THEN PARAMOUNT'S TECHNICIANS FOUND RADIO

Pirate Battle of "Old Ironsides" Filmed Under Direction of Special Broadcasting Station

LOS ANGELES.—Radio has again come to the rescue and fans of the silversheet will be able to see scenes on the screen that would have been impossible to film without the help of Radio.

Several months ago when the Famous Players-Lasky company conceived the idea of another epic photoplay picturing the conquest of the old frigate "Old Ironsides" against the pirates of Tripoli, which holds such a romantic place in our national history, it was realized that for the filming of the big sea battle most of the boats engaged in the fray would be out of range of the human voice. Direction by a thought-out plan, supplemented by wig-wags, as well as field amplifiers soon proved to be practically worthless.

Broadcast Station Is Solution

It was decided that some means of utilizing Radio would be the solution, and the technical staff of Paramount's west coast organization was set to work, the result of which was the building of a 110-meter broadcasting station of low power and twenty-six receivers fixed to tune but to one wave length.

The receivers were installed on the various vessels in the directing of the picture and it was only necessary that Director James Cruze talk into a microphone in an ordinary tone of voice in order to command the movement of twenty-six ships and more than 2,000 actors aboard them.

Effort Believed First of Kind

It is thought this is the first time a motion picture has actually been directed by Radio. The movie companies have long used field amplifiers, or public address systems as they are better known, to control large mob scenes but the field amplifier with its necessary connecting cables was useless on the high seas where the various ships at times were separated by miles and it was necessary to make a practical application of the broadcast station do the work.

The call letters of the station used in the filming of "Old Ironsides" are KFP. The sea scenes were all taken near Catalina Island off the southern California coast.

WDAF Adds New Studio

KANSAS CITY, Mo.—One more studio has been added to the string from which entertainment is supplied for the listeners of WDAF, the broadcasting station of the Kansas City Star. It is the one installed by the Ivanhoe Masonic Lodge in the Ivanhoe temple. It will be used for a series of Radio concerts by the Ivanhoe band and glee club.

Isbell Town Crier at KNX

HOLLYWOOD.—Harold Isbell, for the past year staff announcer of KYW and who conducted the Insomnia club broadcasts from that station for many months, has once more felt the urge of California and has returned to Los Angeles where he is taking over the job as Town Crier of the Night Watch for Station KNX.

Televocal

61 A Fifth Ave. ~ ~ New York

CANADA TURNS DEAF EAR TO COMPOSERS

MONTREAL.—Although confirmation is not available, rumors are strongly gaining ground to the effect that Canadian legislature will flatly refuse to give further hearings to Societies of Authors and Composers with a view of amending the copyright act bill to enable the societies to collect fees from broadcasters, theaters, churches, etc. This is the result of combined efforts on the part of the Canadian Association of Broadcasters, the various Radio listening clubs, the theater and moving picture organizations and church bodies.

COOLIDGE BROADCASTS WILLIAMSBURG SPEECH

WRVA Handles Sesquicentennial of Virginia Convention

RICHMOND, Va.—The celebration of the sesquicentennial anniversary of the passage by the Virginia convention of 1776 of a resolution instructing its delegation in congress to declare the United Colonies free and independent from Great Britain, took place at Williamsburg, Va., May 15, with President Coolidge making the address, which was broadcast by WRVA, here.

The bell of Old Bruton church rang as it did 150 years ago, when it announced to Colonial Williamsburg that the Virginia convention had taken the first definite steps towards the independence of the United Colonies.

Radio Franks Now Become Movie Actors on Phonofilm

NEW YORK.—The Radio Franks, leading favorites among broadcasting artists, made their metropolitan debut as motion picture actors recently in a De Forest Phonofilm at the Rivoli theater, here. The Phonofilm of the Radio Franks, one of the most recent produced at the De Forest studios shows the popular singers broadcasting.

The voices of the two Franks, perfectly synchronized with the movements of their lips, are reproduced in this Phonofilm in a most faithful manner as the picture is screened. The illusion created is that of the pictures actually singing.

Izaak Walton Worshippers Begin Fishing for WAMD

MINNEAPOLIS.—WAMD, the Radisson hotel station, here, is now broadcasting every Monday and Friday, authentic fishing reports from the fishing regions in Minnesota and Wisconsin. The reports are given at 7:05 p. m. Central time.

The reports contain information as to the abundance of fish, the best method of catching them in the different parts of the state and the kinds of fish to be caught.

Photogravures of Your Favorite Artists

GALLERY OF RADIO STARS

SUITABLE FOR FRAMING OR PLACING IN YOUR ALBUM

BY SPECIAL arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each week in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutively numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

RADIO INVENTION IS DEADLIEST WEAPON

MAY DESTROY CITIES AND FLEETS MILES AWAY

British Government Buys Air Torpedo from Young New Zealander; Apparatus from Ground

LONDON, Eng.—An invention that will add indescribable terrors to the air warfare of the future has just been purchased by the British government from Captain A. J. Roberts, a young New Zealand inventor.

Captain Robert's invention is a secret method of Radio control, proof against interference. With it he has produced a weapon with which entire cities can be torpedoed and air fleets defeated without one man risking his life in the air.

A man on the ground will be able to torpedo a city 80 to 100 miles away, or fight a raiding air fleet single-handed.

Looks Like a Miniature Plane

Official experiments have conclusively proved that no other apparatus except that controlled by Capt. Roberts can have any influence on the torpedo in the air.

The invention takes the shape of a miniature airplane built on the usual lines. Once in the air it can be sent in any direction from the ground and can be used exactly like the torpedo fired from warships. During the official tests Captain Roberts demonstrated the torpedo on the ground, using a control apparatus of only one-half the power of the Radio apparatus with which experts endeavored in vain to jam or influence the torpedo.

The new torpedo is capable of dealing destruction within a radius of 100 miles. Its cost is comparatively low, and it can be landed in perfect safety should it misfire in the air.

London Voice Reaches Mexico with 15 Watts

Birmingham Man Claims No Antenna Is Used

LONDON.—Derek Shannon, of Birmingham, England, has invented a new Radiotelephony system which dispenses with the use of aerial and earth connections, it is reported.

Recently conversation was successfully maintained by his system between a ship in the English channel and a private house in Guernsey, one of the channel islands.

Mr. Shannon has succeeded, according to the announcement, in speaking to Mexico City, Mexico. To accomplish this feat the inventor states that the input power to the transmitter was only fifteen watts, as compared with 200,000 watts, the power used by the Rugby phone station when communicating in tests with New York recently.

Radio-Paris on Market

PARIS, France.—Rumors are current here that broadcasting station "Radio-Paris" is in the market, and that an offer by the present owners to sell for 200,000 francs has been made to two different interests.

LOCATES LOST BROTHER IN AFRICA

To Crockett Ellis, above, an amateur Radio operator with a homemade short wave transmitting and receiving set, located at Memphis, Tenn., Mrs. Lydia Nelson, of San Francisco, Calif., owes credit for getting into communication with a brother who had been missing for 25 years, and who was located finally in South Africa.

By Aubrey Betts

TO CROCKETT ELLIS, an amateur wireless operator with a homemade short-wave transmitting and receiving set, Mrs. Lydia Nelson, of San Francisco, Calif., owes credit for getting into communication with her brother Sigfred Yenson, who had been missing for 25 years, and who has finally been located in South Africa.

Ellis, who lives at 976 Oakview street, Memphis, Tenn., was listening in at his homemade set the other day when he heard a message to the effect that the sender was operating in Capetown, South Africa, and that Sigfred Yenson was present.

The message also requested any listener in to relay the message on to Yenson's sister in San Francisco. A thrill of elation shot through young Ellis as he comprehended the significance of the message.

Detectives Search in Vain

Nerves taut, he pressed the head phones tightly against his ears, so that not a word would he miss. And when he had received the entire message, he leaped from his chair to the telephone and soon a telegram was speeding over the wires—a telegram for Mrs. Lydia Nelson, of San Francisco, Calif., and containing information which her heart had hungered for over a long period of years.

Yenson disappeared 25 years ago. When five years had passed and Mrs. Nelson did not hear from her brother she became somewhat uneasy about him. High-priced detectives were employed by her, and expeditions were sent out whenever she could find a seeming trace of him, but all to no avail.

Woman Queries by Radio

Still the years sped, but slowly for the grieving sister. Radio began to come into prominence, and Mrs. Nelson appealed to broadcasters, and they did all that they could—they broadcast her message for news of Sigfred Yenson.

One night a man in far-off Capetown, South Africa, heard the appeal. He knew Yenson. He got busy with his transmitting set, and the message which he sent flashing through the ether was:

"Yenson is found. Notify sister, Lydia Nelson, of San Francisco, Calif."

And that was the message that young Ellis, in Memphis, Tenn., picked up with his set.

Operator Elated but Modest

Ellis is very modest about accomplishing what he did in this matter.

"I merely happened to be the fortunate one to hear the appeal," he said. "Anyone else would have done the same thing."

Ellis has one of the best homemade stations in the United States. He has been in communication with Brazil, Argentina, Chile, Mexico, Belgium and Hawaii. Other foreign countries or far-off places which he had been in communication with are: Canada, New Zealand, Australia, Porto Rico and many others—twenty-four in all, outside of the United States.

Sister Is Proud

Ellis is 20 years old, and has been interested in Radio for about three years. He has a sister who is attending the University of Tennessee, at Knoxville, and with whom he keeps in communication via Radio. And she is quite proud of her brother and his little homemade station, and their being the connecting link, as it were, that brought a brother and sister together again after a quarter of a century, and where private detectives, hundreds of telegrams, scores of cables and several expeditions had failed.

Pup Is Thrilled by Announcer's Voice

Young Boston Bull Creates Rumpus When He Hears Master Talking Through Radio Receiver

BERRIEN SPRINGS, Mich.—Modern collections of animal stories would be quite incomplete without a Radio animal story, so Trix, young Boston bull, belonging to John E. Fetzer, chief engineer and announcer at WEMC, "The Radio Lighthouse," located here, would like to add his chapter.

Trix lives back home in Lafayette, Indiana, and every time John goes home, his faithful terrier registers fits of joy in his efforts to extend a hearty welcome.

But the folks at home always make it a point to tune in WEMC, especially when Mr. Fetzer announces. Although Trix is a Radio fan and member of the I Won't Bloop Club, yet the announcement, "This is WEMC, the Radio Lighthouse, at Berrien Springs, Michigan," recently aroused the dog from his sound twilight sleep on the parlor rug.

In Which No John Is Found

In an instant he was up, and the wag of his tail and the twinkle in his eye indicated that there is more truth than poetry to the slogan: "His Master's Voice." First he thought he would try the front door, then the back door, but nobody was there. Then pell mell into the parlor he went again—and upstairs—but no "master" could he find.

Again, "The selection you just heard from WEMC was—," and through the house again Trix tore in frantic search for his master whom he simply knew must be there. As the strains of orchestra music died away, Trix, tired and discouraged, found his way back to his restful corner a disappointed, but we hope a Radio wiser dog.

"Sam 'n' Henry" Are Sought For Phonograph Recording

CHICAGO.—"Sam 'n' Henry," WGN's famous comic strip characters, who make their appearance each night at 10 o'clock, Central time, in one of their humorous adventures, are being eagerly sought by the representatives of several phonograph companies in an effort to put their delicious dialogue into permanent form. Sam 'n' Henry, however, have managed to elude all of the Radio fans who are seeking to learn their true identity.

Practically every listener within range of the powerful WGN transmitter is acquainted with the whimsical and carefree Sam, and sagacious Henry. Many of their sparkling expressions are being heard more and more frequently in public places. Sam's "ain't that somethin.'" Henry's "Don't argue wid de gent'man," and his expressive "Oh, oh," that greets each faux pas on Sam's part, are among the most popular.

"BIG RABBIT"

(Continued from page 8)

branches far out, half roofing the cleared space.

The sawdust covered ground had been packed by the tramp of thousands of feet. Evidently it was an island, slighty higher than the swamp, for all along the sides, water showed between the trees. Gigantic live oaks, cypress and between them huge magnolias, now in full bloom, towered. The trees seemed rooted in the water itself, or the swamp slime.

The spreading limbs of the oaks formed a roof, open in the center as if a section had been thrown back—and through this stars shone. Moss hung like filmy drapery from the limbs. Giant pendants of fragrant jasmine trailed downward through the interstices of foliage. Along the sides of the weird forest nave at intervals the pink of the Judas trees and the white, feathery bloom of the wild plum added the color touches to the decorations.

Strange and weirdly beautiful as the scene was, it was forgotten at sight of the congregation gathered within it. Almost a thousand negroes, half wild men and women from the turpentine camps, the lumber mills, and the fisheries were congregated.

THERE were sullen, beastial human animals from the lumber camps, graduates of the convict labor system of slavery, mingling with the river negroes; their rivals in strength, their superiors in intelligence. Hundreds of them were deformed by years of lifting, hauling and sawing, and from the abuse of brutal overseers.

The women, brazen, screaming, chattering, circulated through the throng; wilder, freer and more terrible in their utter abondonment of the shackles of semi-civilization than their males.

Almost every man bore a huge pine torch. The flaring lights and the resinous smoke added to the weirdness of the scene, such as none but an insane Dante could have pictured. A low, growling undertone filled the air, above which pierced shrill screams and savage, snarling voices. At intervals the wild screeching of women, rising in anger or in more terrible mirth, broke the monotone.

Danforth and I, bewildered at first, were becoming able to think clearly and distinguish individual scenes. As our eyes pierced through the red glow of pine knot flames and the fog of resinous smoke, we discerned at the opposite end of the natural woodland cathedral, a crude, stage-like structure. It was open at the side facing the clearing, and occupied almost half the width of the swamp-island.

It was built of rough lumber and was set on piling which raised it amost five feet above the level of the ground. Set on the ground at either side of the stage were large kettles, discarded by some turpentine still, and now filled with turpentine chips which blazed furiously, sending up two columns of fire and smoke, rising straight in the still air with such volume of heat as to set the moss hanging from limbs fifty feet above them swaying. A large chair, rudely carved, occupied the exact center of the stage and at the right of it was a smaller chair which was elevated on a small dias. We could not distinguish objects clearly from our station near the rear of the assemblage because of the heaviness of the smoke and the glare of flares and torches.

"Come on," Danforth said. "We're safe. Lets get closer. The show is about to commence, I think, and we want seats closer to the stage. We may want to take part in the performance."

I started as if he had struck me. The wild scene, the constant motion of the people, the surf beat of sound from human throats, the moving panorama of hideous faces, had hypnotized me. For several minutes I had forgotten the object of our presence and Danforth's voice close to my ear aroused me from the spell.

"COME on then," I said quickly. The spell was gone. A shiver of repulsion came with the realization of what it meant to the girl to behold such a scene. I drove a hand nervously into the side pocket of my coat and made certain the automatic was safe, then led the way.

We pushed steadily forward through the throng, avoiding the denser groups, and moved toward the stage. No one appeared to give us even the slightest attention and, reassured and emboldened we went forward until we were near the front, gazing upon the stage itself, as our amazement increased.

Wide stairs led from the floor of the stage down to the ground and at each end of these stairs narrow platforms extended four or five feet out from the stage itself and at the same level. These platforms were made of hewn railroad ties. Two gigantic negroes, naked to the waist, stood one at each end of the stairs, each holding a huge torch. Lying upon the railroad ties, with heads toward the crowd, were two immense alligators, their eyes blinking. Heavy chains had been welded around their necks and the chains were fastened to the ties by railroad spikes driven deep into the wood.

Suspended over the throne chair in the center of the stage was a thing which made me start back shuddering with horror and disguest. A bundle of writhing, twisting rattle snakes, bound together by wires looped around their necks, hung by a chain from the cross beam of the canopy. The snakes hung but a few feet above the chair itself and the constant whirr of their rattles could be heard over the din of the crowd.

"Don't go any further," Danforth said in low tones. "Don't cross that line drawn there. Evidently the hoi polloi isn't permitted to go nearer the stage than that."

"What is it all about?" I asked. "I can't make out what the object of all this is."

'Don't know. It's something big. The negroes are intensely excited. Wait here. I'm going to find out."

DANFORTH sauntered away carelessly and presently I saw him walk into the edge of one of the largest groups, where two men appeared to be the center of some fresh excitement. Then I remembered with sudden terror that, disguised as we were, it was probable neither of us would be able to recognize the other in that throng, even if we should chance to meet.

Fear that we would be unable to locate each other in case of sudden need disturbed me. Separating had been a mistake. It was too late to rectify it, and I determined to remain near where I was standing for a time at least, hoping he would return. The consciousness that I was accomplishing nothing, learning nothing, doing nothing to aid the girl we sought caused me to writhe inwardly.

Suddenly there was a seemingly spontaneous movement in the crowd, a murmur of expectancy. My ears had become accustomed to the din and were able to distinguish words and sentences from the jumble of noises. In that babel of voices I heard; "Big Rabbit," "White Gal," "Big

Use the

Bradleyohm

PERFECT VARIABLE RESISTOR

for B-Eliminators

WHEN you build your B-battery eliminator, follow the recommendations of leading radio engineers by using the Bradleyohm for your variable voltage control. Several Bradleyohms can be used to advantage in every B-eliminator, whether factory-built or homemade, to obtain several steps of voltage for detector, radio frequency and audio frequency circuits.

The Bradleyohm with its scientifically-treated discs provides a marvelous range of control without steps or jumps. The turning of the small bakelite knob gives you instant control over a wide range.

Be sure to investigate the advantages of the Bradleyohm and other Allen-Bradley radio devices for your B-eliminator.

"BIG RABBIT"

(Continued from page 28)

Rabbit done cotch 'em in de trap." A surge of bitter remembrance of my ridicule of Borton's 'superstition' came to me. A savage fear, a wild desire for action, seized upon me. The idea of waiting for Danforth was abandoned. I could not remain standing a futile spectator, while the girl I loved was in danger.

Danforth could shift for himself. I felt certain that, somewhere on the other side of that dead line, probably at the rear of the stage, Miss Tonneson was captive with her uncle, and that the giant negro, Trimble, was their jailer.

I determined to get behind the scenes and spoil the drama about to be staged. To attempt to cross the open space meant exposure and destruction, so I determined to make the effort to reach the rear of the rude structure by a flanking movement. No guard had been placed and it was evident the swarm of savages were being held in check by awe and superstition rather than by force.

SKIRTING along the fringe of the crowd I reached the side of the clearing without attracting any attention, stopped for an instant in the deep shadows of a live oak to see whether anyone was watching me, and hurried out of close range of the flaring lights of the open.

I found myself on a hard, beaten path, perhaps the extension of the one upon which we had entered the open glade, running close to the edge of the swamp water. Almost straight ahead, perhaps fifty yards back of the stage-like structure, was a single flaring light, and near it could be discerned by its flames, some sort of a structure.

Toward that I moved cautiously, holding my automatic ready for action, and keeping as closely as possible in the darkness of the tree shadows. I had almost reached the spot where the flare was burning when I stumbled and half fell over a body huddled at the base of a tree. Startled, I sprang back, and an exclamation burst from my lips.

"Who dar?" a frightened voice asked in a tense whisper. "'Tain't no niggah—I heerd yo' voice."

"Don't move, or I'll shoot!" I hissed, raising my gun with a feeling of desperation that my voice had betrayed me, and, perhaps ruined all our plans.

"Doan shoot, mistah, doan shoot!" It was the voice of a woman, hysterically sobbing from fright and nervousness. I groped with my hand and touched her. Her body shook and quivered with sobs.

"Who are you?" I whispered. "I'm desperate. Better answer quickly and don't scream."

Sobs and unintelligible words formed her reply. I seized the huddled figure and shook her. She was slight and her face was buried in her hands, as her body shivered with dry, gulping sobs. I dragged the hands from her face, half lifted her to her feet and at that instant the faint glare from the pine torch imbedded in the soft ground, illuminated her features.

"Tillie! Good Lord, is it you?"

IT WAS Tillie, Roberta Tonneson's colored maid. As I spoke her name her entire attitude changed. She sprang at me, alert and tigerish, grasped my arm so hard the nails bit into the flesh and in a hoarse, frightened whisper asked:

"Who is yo'? How cum yo' hyah?" Dey'll kill you."

"Where is your mistress, I've come to save her," I said, shaking her again, fearing a return of her hysterics.

"Dey'll kill you! De Big Rabbit'll kill you," she whispered in terrified tones.

"Where is she?" I repeated, shaking her again and again. "I must find her."

"Oh mistah, take us away, take us away," she implored. "Miss Bob she locked up in de cabin wif de majah, back yan."

She pointed back past the pine torch in the ground.

"Big Rabbit, he gwine hurt dem," she went on, clinging to me with the strength of terror. "He say he gwine humiliate dem. He gwine show dem who is de massah."

She sobbed again, and suddenly flared with anger.

"He tol' me he ain't gwine hurt dem," she said. "He done tol' me he gwine make me queen, dat's why ah help him. Now he say he all gwine whip de majah, and make Miss Bob bow down to him."

She was angry now; inspired with the fury of the woman scorned.

"Who is this Big Rabbit? Where is he?" I urged rapidly. "If you want to save your mistress help me."

"King Solomon, de Big Rabbit," she said cryptically. "Dat niggah, Trimble, he King Solomon. He say he was King ober in Afriky and he gwine be King hyah. He gwine whip de majah, and he gwine make Miss Bob tell de people he am de King."

Her love of her mistress, her indignation and jealousy were conquering her superstitious dread of the negro, and her fear of him.

I was almost as excited and upset as she, but steadied myself with an effort and drew her deeper into the shadows of the trees.

"TILLIE," I said as calmly as possible, "you must help us. There are three of us here to save the major and Miss Tonneson and you. You must show me where they are. If possible you must tell your mistress that help has arrived and that she must keep her courage. Trimble must not suspect we are here."

"He slap my face and say I ain't fit to be queen," she said sullenly.

"He say I ain't good enough to 'sociate wid him. I'll git even."

Her hysterics were gone. The knowledge that white men were present nerved her, and her desire to revenge herself upon Trimble for the manner in which he had treated her, steeled her. She led me rapidly back of the stage structure, which cut off most of the light from the clearing, and into a smaller clearing, in the center of which stood a small log cabin.

Telling her to hide close under a clump of underbrush I scouted, crawling forward until my hand touched the logs, and crept around two sides of the cabin striving to peer through chinks, from which faint light emerged.

Voices sounded inside, and, crouching low and pressing my ear to the logs, I strove to hear what was going on inside. It was impossible to distinguish words, but there were three voices, one deep and scornful, one high-pitched as in anger.

Suddenly I thrilled and started, as I recognized the clear, ringing laugh of Roberta Tonneson. The utter contempt of that ringing, scornful laugh told the story. There was a quick exclamation of anger which sounded like a curse, followed by the voice of Trimble raised in threats and imprecations.

I crawled around toward the front of the cabin, with some wild idea of trying to burst through the door, but before I could reach it the door suddenly was flung open, Trimble emerged, and, jerking the door shut, turned to lock it.

He never before was closer to death than at that instant. I crouched lower, the revolver clutched in one hand, ready to spring, the desire to kill making me see red. Before Trimble turned, strong hands grasped me from behind, a hand went over my mouth and a voice, which I recognized instantly as Borton's spoke tensely into my ear.

He held me quiet until Trimble, springing down the steps, hurried away.

"Don't make a fool of yourself. Do you want us all killed?" Borton whispered.

"Can't we pry the lock, get them out and make a run for the boat?" I asked excitedly.

"I'VE been working at it for half an hour," he said. "It is fastened with a log chain and a padlock. We can't even dent it. I've been laying for a chance to knock Trimble out with a club, while the door is open—but can't reach him while he is at the top of the steps."

"What'll we do?" I asked, helplessly.

"Go back out into the crowd, keep near the front and to the side nearest the path. If the worst comes to the worst shoot Trimble, and try to get the girl to the boat."

He crawled away into the darkness while I crept back to where Tillie was crouched under the bushes waiting. She was calm and revengeful. The knowledge of the present of white men had restored her courage and I knew we could rely upon her.

"Can you get near Miss Bob?" I whispered.

"Trimble gwine let me be Mammy Bammy," she replied.

"Mammy Bammy?" I repeated, puzzled. "What's that?"

"Dat mean I'll be on de stage wif him," she said. "I'll be dar."

"Stay as close to your mistress as possible," I said. "If anything happens help her to this path and move toward the river. We'll be there to help you."

Rapidly as possible I told her of the boat, and of our plans.

"I'll be dar. I'll show him," she repeated threateningly.

Completely restored to calmness she arose and walked bodly toward the back of the stage, to seek Trimble. I crept back into the path, dodged along it and mingled again with the blacks. I felt a sudden chilling fear that the perspiration would wash the black from my face and expose me. I found a point of vantage at the position designated by Borton.

The blacks, now showing signs of rising excitement, were pressing closer and closer to the deadline and all attention was centering upon the stage. If my color had run no one observed it—as I maneuvered into a position from which I could most rapidly extricate myself from the pressing throng.

Three white men against 3,000 black fanatics! That is the situation with which the next installment of this enthralling story of "Big Rabbit" will begin. Will Roberta step out on this barbarous stage and face that mob? What will happen to her? Will it be a battle of bullets or wits? See Radio Digest Mid-June number.

The Reader's View

(Continued from page 15)

rest if they receive it. Some people have gone so far as to discard their sets entirely. I know of one instance where a beautiful 7-tube super was relegated to the attic because of this. I believe this to be representative of thousands of working people, to whom Radio would be more beneficial than to any other class. A good 7 to 9 p. m. program would be highly appreciated by them, I believe.—R.S.R., Louisville, Kentucky.

Hoggish Stations Main Trouble

The responsibility for the vitally important WJAZ decision rests neither with Judge Wilkerson nor with the "offending" Radio station. Sheer hoggishness on the part of station owners who insist on broadcasting during the entire twenty-four hours may be blamed for the present chaotic and unsettled conditions.

Despite all the noise being made concerning silent night violations and "blooping," the paramount issue in Chicago may be summed up as follows: Shall the twenty odd Radio stations now operating in the Chicago district be permitted to clutter up the atmosphere without any regard for each other's, or the listening public's, rights or desires in the matter?

Newspaper advices are to the effect that a score of applications for broadcasting licenses in the Chicago district are now on file in Washington. If any considerable percentage of the applicants are successful, Chicago set owners may get ready to throw their sets in the lake.—J. D. C., Chicago, Ill.

S-O-S RECEIVER PANEL LAYOUTS

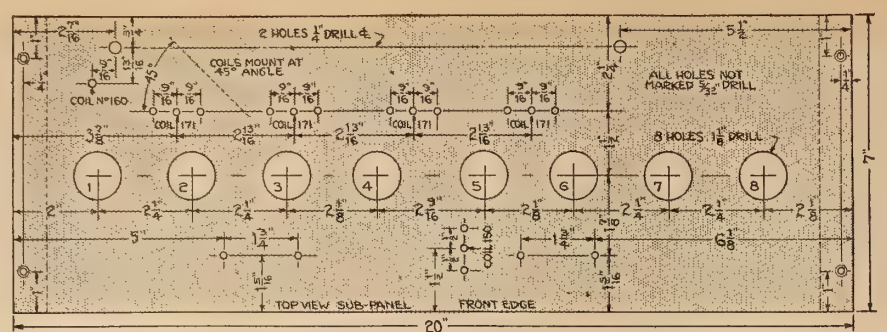

Figure 4. Sub panel drilling layout. Note wooden panel supports.

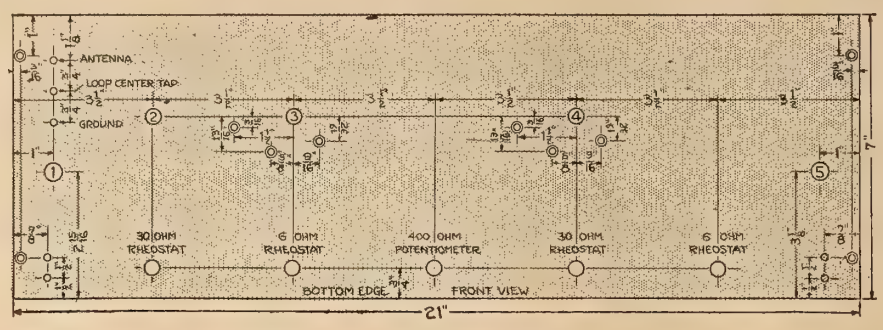

Figure 5. Layout for drilling front panel. Careful measurements are required.

S-O-S PORTABLE SUPER

(Continued from page 10)

possessed both primary and secondary resistance together with turn ratio which left little to be desired. In addition, its selection by a great many manufacturers of receivers also carried much weight, while the fact that it was possible to secure them in a mechanical design which permits sub panel mounting made their selection final. The transformers thus selected were the No. R180 Thordarson Super Amplifiers of 3½ to 1 ratio.

Figure 1 is a front view of the portable case in which the receiver is mounted. It is shown with the cover removed ready for operation. Figure 2 represents a bottom view of the sub panel assembly indicating the method of mounting the Benjamin sockets. The C battery, and also the fixed condensers which are used in this circuit, have been intentionally omitted in order that this sub panel view may be made as clear as possible. The constructor will note a series of numbers upon this panel which are placed upon the photograph for your greater convenience when the wiring instructions are given.

Figure 3 is another view of the sub panel as taken from the top of the receiver and showing clearly the general arrangement of the parts used both upon the sub panel and operating panel. These, with the exception of the audio frequency transformers, are likewise numbered for your added assistance. The audio frequency transformers were omitted from this view so that the constructor might secure an accurate view of the sockets as they protrude up and through the sub panel.

In figure 4, the sub panel drilling layout, all dimensions are given for the correct assembly of the parts listed. Just below this layout is shown the two wooden supports for the sub panel which are located at its ends. Their heighth is 1 13/16 inches and length, 7 inches. Figure 5 is likewise a detail plan layout for the front panel. It is important that each location be followed with care and exactness. Full size blue prints covering both sub and front panel are available for those desiring them at 25 cents each or 50 cents for the pair.

It has been the author's experience that constructors attempt to make changes in the apparatus specified, not realizing that the total success of the receiver depends largely upon the correct correlation of the parts used. One therefore should use only the parts listed and appreciate that space factors and efficiency have been carefully considered. These are not flexible enough to permit substitution if one would secure a pleasing success in the construction.

(In the next issue the circuit used and the entire wiring instructions will be given. This concluding article will also embrace hints on operation.—Editor's Note.)

Following the instructions of the Columbus (Ohio) Radio club, bids have been requested and received from two consulting engineers for conducting a Radio interference survey of the city. It is estimated that the expense will total $1,200.

A "RADEX" Tuning Chart
Shows by dial numbers, wave length to which set is tuned. Tells where to place dials for any station. Identifies programs received without announcement.

Radiophone Broadcasting Stations

Corrected Every Issue—Part III

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

NOTE.—The third part of the schedule list appears below. The fourth part which consists of the remainder of the list will appear next issue.

WDEL, Wilmington, Del. 265.3m-1130kc. 100 watts. Wilmington Elec. Spec. Co. Slogan, "The First Broadcasting Station of the First City of the First State." Tues, Thurs, 8-10 pm. Sun, 7:30-9 pm, service. Eastern daylight.

Grebe Developments Keep the Synchrophase in the Lead in Quality of Reception

THE quality of Grebe reception is still the standard. Exclusive Grebe developments — *Flexible Unit Control, "Colortone", Low-Wave Extension Circuits, Binocular Coils, S-L-F Condensers*, etc.—keep it far in the lead.

The way to satisfy yourself of this is to

Ask your dealer to demonstrate the Synchrophase in comparison with other sets.

SHORT WAVES

By Marcella

Well, here I am, back in the studio, and ready to broadcast my next number which will be about Harry Geise, whose travels and tribulations my best inquirers seem to follow with much interest. I signed off last issue by saying that Harry was unofficially connected with any Chicago station as yet, but that he was in the city of his origin. Thereupon he staged a "prodigal son act" while last edition was still on the press, and returned to WQJ, Chi-CAW-go, in his old-time position of studio accompanist and assistant announcer.

* *

It's verra, verra difficult to get out with the news before something else happens and changes it all. Take that dear Phillips Carlin, for an example. This popular WEAF announcer was described in a late March issue as being married but having no children. The following week the stork visited his wife and left a darling baby girl who has been named Virginia Claire. But such things will happen, even in the best regulated families!

* *

No, Ruth, William T. Pierson, your favorite announcer who is heard at WCAP, is not married, although he admits having a slightly bald spot right on top of his head. He is about 5 feet 10 inches tall, weighs medium to heavy, and has brown hair and eyes. He is well known in Washington and elsewhere as a musician and composer, having written a number of popular songs, including "Washington," "Calling for You," "Be Still and Know," "When You Are Near Me" and "A Toast to the Flag." The Washington Rotary club boasts proudly of his membership. Violet Warren Pierson, whom you have heard reciting poems from WCAP, is Mr. Pierson's sister.

* *

"Blue Eyes" from the "Blue Grass State" stored up a lot of questions before she wrote, but here are all the answers. Last reports indicate that while "Willie the Weeper" (Ernest Rogers) of the WSB staff is not yet married, he is hunting around lonesomely for the "lucky" girl. Send in your applications. He's just as cute as he looks, auburn hair and everything, and about 30 years old. Who is WBAP's announcer? Regularly up to several weeks ago, C. B. Locke, but that gentleman is now in a commercial Radio sales position. Roland Perry is his successor. However, the best "regular" announcer of the Fort Worth Star-Telegram station is the famous "substitute" announcer, the Hired Hand. At WSM the announcer may be either George D. Hay, who is the boss and station director, or Jack Keefe, who wears the title of announcer.

* *

Now Sue, tune in WLS every Friday night and you will hear Grace Wilson. Yes, she was away from WLS for a long time and sang occasionally during her absence at KYW. As a pleasant Radio contralto, her voice is hard to beat, I agree. Ford and Glenn are still at WLS. Their frequent disappearance is accounted for by the number of personal appearances they have been making all over the country.

* *

Helen Hughes, of the Reese-Hughes orchestra, familiar to WHO and WOC listeners, is in New York, combining business with pleasure, she tells in a letter to me. The orchestra is resting, but listen in soon for Helen, her popular partner, Bob Reese, and their orchestra broadcasting from a big eastern station. More information later.

* *

Hilda would know of Stephen Cisler, late of WDGY, Minneapolis, and now announcing for WAMD in the same city. He is a southerner, with all the accent, and has played around with Radio since it became the idol of the public. Fortunately for my fair readers, he is not married, so there are hopes. He is studying engineering at the University of Minnesota, and incidentally, he has been heard before the mikes of WHO and WOC.

* *

Elizabeth Ann, always bubbling over with admiration of some invisible Radio personality, asks the important question regarding Neal Helvey, entertainer at

(Continued on page 13)

GIRL ON COVER HAS INHERITED TALENTS

THE charming confection of chiffon, silken straw, raven hair, blue eyes and pearls on Radio Digest cover this week is a lady with an inherited voice—Miss Margaret Libbe, 22-year-old daughter of Mrs. Frances Carey Libbe, well-known professional singer of Chicago.

Miss Libbe is gifted with a soprano voice that melts into the microphone with purity and clearness. She has presented five specially announced Radio concerts through Stations WJAZ and WGN. On some of the occasions she has been accompanied by her mother. Miss Libbe is a pupil of the famous Francesco Dadi and was recently awarded first prize for her accomplishments by the musical division of the Chicago Woman's club.

Looking Ahead

Plantation Humor and Southern Romance are features that make WSM of Nashville stand out as one of the most popular stations in the Middle West. George D. Hay, the Solemn Old Judge, who selects and directs, knows his people and what they like. He tells about it in the Radio Digest out June 30.

What Makes Detroit Famous? Hark! Wait! Just a Minute, Mr. Ford, and all you other automobile manufacturers! There are other claims. For instance, it is a great broadcasting center. In Radio Digest of July 1 you will read and see something of the famous WGHP.

Speed in Delivery Is One of the Big Essentials in Efficient News Service, whether it be the press, motion pictures or Radio broadcasting. The latest thing to accomplish this end in Radio is the floating broadcast auxiliary, MU-1 of the Grebe organization, for relaying nautical sports direct from the field of action. Complete story and pictures of this remarkable boat in our next issue.

Sheila of the Vaudeville Scored a Perfect Hit—with the Male Headliner, but what could she do about Bobby? Then Jadwin, the booker, tried rough stuff when he thought he had her alone . . . . It's a snappy little story of love behind the footlights and Harry Van Demark is the author. In next Radio Digest.

Hugh Fullerton's Big Rabbit serial comes to an end in the July 1 issue of Radio Digest and he keeps you guessing right up to the last word. Don't miss it.

There's Magic in the Word "Raytheon." In next issue, out June 30, the Raytheon-Aerovox-Thordarson B eliminator, and how to build it, will arrest your attention. It works wonderfully well.

To Squelch Demon Static, Milo Gurney Digs up an Old Timer—a "Ham" who was building underground antennas when two dots and one dash constituted real reception. How he builds his best subantenna will be told in detail in next issue.

BROKENSHIRE CLOSE TO MAY IN CUP RACE

EASTERNER THREATENS TO CAPTURE FIRST POSITION

A. S. Kyne, Henry Field and G. C. Arnoux Stage Big Climbs— Lillian Shaw Leads Canada

June weddings, 500-mile auto races and opening of swimming season notwithstanding, the 1926 Gold Cup Award has been running along merrily since the appearance of the last Radio Digest. Not a few changes have come about since the last published standing, and at this time we find Norman Brokenshire of WJZ nosing within 13 votes of taking the long-held lead of Earl E. May of KMA. The popular easterner is showing speed and may top the field at any moment.

Probably the most unexpected change took place when A. S. Kyne of KMMJ climbed into third position from out of the cellar where he has been hiding his light during the earlier days of the competition. How much power Mr. Kyne has is unknown, but this surprise gain makes his name one to be considered.

Field Rises; Would Withdraw

Next of importance is the rise of Henry Feld of KFNF from twelfth to fifth position. Seemingly indifferent to this striking gain, Mr. Field has sent out press notices and broadcast the word that he is withdrawing from the 1926 Gold Cup Award in favor of Mr. May of KMA. Mr. Field in withdrawing asks to put the full strength of his supporters behind Mr. May of KMA which station is in the same city as KFNF, Mr. Field's broadcaster. While Mr. Field may work for Mr. May's victory, a spirit which the Gold Cup Editor is sure everyone will admire, his name cannot be withdrawn on account of a previous ruling that only former cup winners may withdraw. Mr. Field finished second in 1925.

Fourth of consequence in the news of the contest for selection of the best announcer, is the gain of G. C. Arnoux, of KTHS, Hot Springs National Park, Ark., who gained seven notches since last issue, arriving at eleventh from eighteenth place. The Gold Cup Editor wishes to apologize to Mr. Arnoux for the two different times his station has been listed erroneously as WGY instead of KTHS, and promises that it shall remain K-T-H-S hereafter.

Standing of Leading Contestants

While better gains were made by the candidates whose names have been mentioned, three other cup aspirants deserve credit for climbing from the cellar to places in the first twenty-five. These men are Edw. B. Husing of WRC, Eugene Konecky of WOAW and E. L. Tyson of WWJ, who are now eighteenth, twenty-second and twenty-fourth respectively.

The present standing of the first twenty-five candidates is given below. The figure in parentheses following the name and station of certain announcers, indicates their order in the standing last issue if they were in the first twenty-five:

1. Earl E. May, KMA (1).....15,122
2. N. Brokenshire, WJZ (2).....15,109
3. A. S. Kyne, KMMJ.....12,736
4. Pat Henry Barnes, WHT (3)..11,381
5. Henry Field, KFNF (12).....10,804
6. The Hired Hand, WBAP (4).. 5,143
7. Phillips Carlin, WEAF (6).... 3,299
8. Peter MacArthur, WOC (5).... 3,205
9. Louis J. Johnen, WLW, (7).... 3,010
10. Clyde R. Randall, WSMB (8).. 2,917
11. G. C. Arnoux, KTHS (18)..... 2,706
12. Lester Palmer, WOAW (9).... 1,958
13. Gayle V. Grubb, KFAB (10).. 1,853
14. Robt. W. Griffin, WHO (11).... 1,821
15. Lambdin Kay, WSB (13)..... 1,776
16. Chester Gaylord, WTAG (14) 1,624
17. Wm. (Bill) Hay, WGN (15).... 1,492
18. Edw. B. Husing, WRC..... 1,417
19. Jerry Sullivan, WQJ (16)..... 1,274
20. Harold Isbell, KNX (17)..... 1,252
21. Paul Johnson, WCCO (19)..... 1,175
22. Eugene Konecky, WOAW..... 1,026
23. The Janitor, WFAA (20)..... 1,022
24. E. L. Tyson, WWJ..... 1,015
25. Sen Kaney, KYW (24)..... 1,002

Canadian Silver Cup Standing

The standing for the 1926 Canadian silver cup, to be awarded to the most popular Canadian announcer, has changed but little since last publication. Bert Hooper of CKCK, who was then fourth, has jumped to second place. Lillian Shaw of CKY still leads. The standing is:

1. Lillian Shaw, CKY (1).....1,571
2. Bert Hooper, CKCK (4)..... 638
3. H. C. Fricker, CKCL (2)..... 522
4. Geo. A. Wright, CNRY (3)..... 396
5. C. W. Darling, CFCF (5)..... 104

Five new candidates were nominated recently, bringing the total now very close to 200. The names will not be published at this late stage of the competition, but nominations made or votes sent in for unlisted announcers, will be credited in the book of the Gold Cup Editor.

(Continued on page 13)

WGY MAY BUILD GIGANTIC STATION

EUCHARISTIC CONFAB FROM SIX MIKE LINK

CHICAGO STATIONS JOIN TO GIVE GREAT SPECTACLE

Angels Mass with 50,000-Voice Choir and Chicago Symphony Among Many Big Features

CHICAGO.—When the Eucharistic congress convenes here Friday, June 18, four local stations will cooperate to broadcast all the principal events including the opening reception June 18 at the Coliseum, the entire inaugural mass at Holy Name cathedral and the address of the papal delegate on Sunday, June 20, the Sunday evening vesper services, and the various masses at Soldiers' field June 21 including the mass of the angels with a choir of 50,000 voices.

Splendid cooperation of Stations WEBH, WLS, WMAQ and KYW makes it possible to present all the important parts of the congress on from one to four of their wave lengths simultaneously.

Famous Musical Organizations on Air

The many musical attractions of unusual quality and magnitude will make the broadcasting an event of interest to persons of denominations other than the Catholic faith. The Chicago Symphony orchestra of fifty pieces will play in many of the programs and other equally famous musical organizations will be heard.

Speeches in all languages will be broadcast during the congress, and the speakers heard will represent the highest ranks of Catholic nobility. Cardinal Bonzano will make the opening address and the final benediction.

One announcer, acting for the Chicago Broadcasters' association, will announce each service, aided by Father Pernin, of KYW's "Twenty Minutes of Good Reading" series fame, who will check the technical correctness of announcements. Local stations linked for the occasion will make their own station announcements.

WLWL SUBLETS TOLL BROADCASTING HOURS

John Shepard III Takes Charge; WNAC Link to Come

NEW YORK.—John Shepard III, well-known broadcasting station manager, has taken over the booking of commercial programs for Station WLWL of the Paulist Fathers in New York city.

Several hours each week will be reserved for the especial programs of the Paulist league and the famous choir of that organization will continue to be heard regularly. Other features of the Paulist organization will continue to be available to Radio listeners, Mr. Shepard explains in outlining the plans for future programs.

A hook-up with Station WNAC of Boston, where Mr. Shepard is in charge, as well as WEAN, the Shepard Stores station in Providence is to be perfected.

A number of features that have appeared on the Shepard stations in Boston and Providence will be introduced on WLWL in New York and the application of the high class program selection that has made the Boston station one of the most popular in the East will doubtless result in increasing listeners for WLWL which is one of two 5,000-watt stations in the metropolitan area. Special efforts will be made to build up programs for the summer months.

Joe Laurie, Jr., Helps Open New Air Theater

Dedicates New Studios and Organ of Station WBBM, Chicago

CHICAGO.—Joe Laurie, Jr., noted star comedian of many musical comedy successes, was guest of honor at the recent formal opening of the remodeled and enlarged $50,000 studio of WBBM, the Stewart-Warner Air Theater.

The event included the formal dedication of the new $25,000 Barton pipe organ. On the special dedicatory program one of the stars heard was Al Melgard, organist at the Parthenon theater in Berwyn, whose reputation is national. Mr. Melgard is connected with the Bartola Musical Instrument company, manufacturers of the organ.

A number of public officials and members of other studio staffs were in attendance.

JOKER WITH MOBILE MIKE ANGERS SPAIN

MADRID.—Spain's Radio programs lately have been rudely and mysteriously dislocated by donkey brayings, seditious speeches, and ridicule of General de Rivera, the dictator, and his government. The authorities confess they are baffled in their attempts to find the interrupter, who is believed to have a powerful broadcasting set aboard an automobile. He is aware he is being hunted and has broadcast a message offering to wager anyone $7,500 he will never be caught.

PROSPECTOR SKIS 24 MILES TO THANK KGO

SAN FRANCISCO.—Snowbound in the mountains of Idaho, two prospectors have listened to KGO programs for two years until conscience finally drove one of them to ski twenty-four miles to the nearest post office to mail a letter of appreciation, "to express our gratitude", their letter states, "to you and all who broadcast. We have listened for two years, and we can wait no longer. Even if it does mean a trip of twenty-four miles on skis, we are going to write."

SHE STARS FOR KANSAS CITY STAR

The beauty of Miss Fredda Josephine Brown, an entertainer heard over the microphone of WDAF, the Kansas City Star, is equalled only by her versatility. Among her accomplishments one will find that the she plays the violin, often in string ensembles, gives readings, and plays the piano masterfully. Photo by Hixson Studios, (K.C.Mo.)

WPG GETS 5 KW. SET; PLANS BIG PROGRAMS

WPG, WIP and WGBS Chain Is Now in Operation

ATLANTIC CITY, N. J.—A new 5,000-watt transmitter will be dedicated early in July by WPG, "The World's Play Ground" station here, according to the announcement of Director Edwin M. Spence.

Coming on the heels of the recent wire linking of WPG, WIP at Philadelphia and WGBS at New York, the news assures listeners that the very best music and other Atlantic City features will be available all summer long.

Small tube and crystal set owners over a large area will be able to enjoy the programs from the chain which include symphonic orchestras, concert ensembles, bands, dance syncopators, choral societies, minstrel shows, leading soloists and novelty studio presentations.

WPG in link with WIP, Gimbel's Philadelphia station, will also be a vital part of the official chain of stations selected by the Sesquicentennial committee to broadcast the outstanding features of this great exposition.

Pleasure Resort Hotel Puts In Elaborate Receiving Set

PLEASURE BAY, N. J.—Although the idea of utilizing a Radio receiving set to supply or supplement dance music is by no means a new one, probably the most elaborate application of this idea is planned for the new Casino Biarritz, on the banks of the Shrewsbury at Pleasure Bay, New Jersey, which is to open June 24.

Although the place will feature Emil Coleman's orchestra, now heard through WHN, there will be installed a powerful six tube receiver with Western Electric amplifier. Besides the large cluster of loud speakers in the main dance room, the private dining rooms will each contain a loud speaker. The porch and lawn will also be wired, and it is planned to equip several small boats with portable sets.

HALF MILLION WATT OUTFIT IS DISCUSSED

Term Superpower Is Hit

Engineer for General Electric Company Calls It Misnomer—Really No Superstations Exist

SCHENECTADY, N. Y.—Superpower, applied to Radio broadcast transmitters operating on fifty kilowatts of power, is a misnomer, according to Harry Sadenwater, engineer in charge of the broadcasting stations of the General Electric company, at Schenectady, N. Y., Denver, Colo. and Oakland, Calif. He intimates that WGY may soon have a 500,000-watt or 500-kilowatt transmitter.

Mr. Sadenwater, in an address recently, said that the use of the term "superpower" is misleading and inaccurate, for actually fifty kilowatts of power is often used in lighting an electric sign, and when one considers the large amount of service that a broadcast station is called upon to deliver to a large number of listeners, it seems ridiculous to call this amount of energy superpower.

Explodes Fallacies of Listeners

Discussion of superpower led many listeners to expect impossible results from fifty-kilowatt transmission. Many feared to turn up their tubes for fear the expected influx of power would destroy the tubes. Others expected that the increased volume would shatter their sets and cause a bedlam through the loud speakers.

In reality, a tenfold increase of power from five to fifty kilowatts developed approximately three times the signal strength, according to Mr. Sadenwater.

The department of commerce has estimated that the range of a five-kilowatt station is approximately thirty miles for ninety per cent service to the listeners. This means twenty-four hours service every day of the year. Mr. Sadenwater believes this is a fair estimate in view of his knowledge that there are places within 100 miles of the fifty-kilowatt transmitter of WGY where satisfactory service cannot be received because of interference and strangely low signal levels.

Predicts Tenfold Greater Power

He also believes that the next practical step forward is to increase again the power of the broadcast transmitters by a factor of ten. First the stations went from 500 watts to 5,000 watts, and now two 50,000-watt stations are providing more reliable service to their listeners. The next step to give any gain in volume to the broadcast listeners should be 500,000 watts of 500 kilowatts.

"Such an increase in power would markedly increase the cost of operating the station," said Mr. Sadenwater, "and we do not know if such a step is practical. The five-kilowatt station may be operated successfully using three UV-207 tubes, but in the fifty-kilowatt transmitter twenty-two UV-207 tubes are needed. The rate at which the maintenance cost increases is high. We are now working on the problem of replacing the eight radio frequency amplifier tubes that are operated in parallel in the WGY fifty-kilowatt transmitter with a larger type of tube and possibly, with this, it will be economically practical to increase the power to 500 kilowatts.

"But even then there is no justification for terming such power as superpower. The station will only be more nearly equal to its task of supplying signals well above the noise level over a reasonable range of 250 miles."

Mother Hears Voice of Son She Hadn't Seen in 9 Years

SEATTLE, Wash.—When Mrs. S. D. Armour twirled the dials of her receiver in New Orleans, she accidently picked up KTCL, Seattle. As she listened the announcer said, "The next number, a solo by Cyril Brown." The song proceeded and Mrs. Armour recognized the voice of her son, whom she hadn't seen for nine years. She did not know he had become proficient in music. A letter to KTCL told of the aerial bridge established between the long-parted mother and son. So a complimentary program was arranged and again she heard her boy sing.

Pictures Are "Eyes of Radio"

THIS Page Is to Help Those Who Say, "Yes, I Know Them By Ear Only," When Speaking Of WSMB, New Orleans, Artists

By H. P. BROWN

WHEN Radio broadcasting first stepped out on the air with infantile, untried powers the publisher of this magazine perceived an important need for the listeners of that day and the future and proceeded immediately to supply it. And, forthwith, Radio Digest came into being with the announced purpose of being the "eyes of Radio."

That idea has been kept to the front from the beginning. On this page you find a creditable example of what that phrase, the "eyes of Radio," means. You see here, through the eyes of Radio Digest, some of the artists whom you perhaps have heard or will hear over Station WSMB of New Orleans. It is a typical example but not an extraordinary one.

Perhaps you have heard the soft, resonant voice of the fair young matron at the top of this page and wondered if she could be as pleasing to the eye as she was to the ear. This is Mrs. Philip Werlein, III, a charming daughter of the South whose home is in New Orleans. She is modern, progressive and does the things that many women wish they could do but don't know how.

When she first saw an airplane skimming through the sky she was thrilled. "I think I would like to fly," she said. So she did. And when she had flown as a passenger she thought she would like to fly as a pilot. So she flew and continues to fly as a pilot, where and when she wills. That's Mrs. Werlein for you—the same Mrs. Werlein whom you may hear speaking of civic welfare and educational extension over WSMB.

It was wonderful to go whirring off over the tree tops, the houses and hills at tornado speed—but—but—how would it be to just soar quietly, gently without noise and without the terrific rush of wind—a balloon? She tried a balloon and qualified as an aeronaut! Yes, the same lady whose picture you see at the top of this page!

There are many more interesting things about this wonderful woman whose soft, southern voice comes to you through your Radio receiving set. We would like to tell you of her adventures as a lion and tiger hunter, some of her experiences in foreign lands, her success as chairman for the Liberty Loan drive for the city of New Orleans during the World War, how she organized the Red Cross Canteen, and worked out staggering problems as financial chairman of the Council of National Defense, and is now director of an educational movement through a chain of sixty motion picture theaters scattered through five southern states, but space is limited.

Out of her multifarious duties Mrs. Werlein finds time for a chat with her Radio audience every Wednesday evening and she says, "the Radio and motion picture are revolutionizing education, amusement and family life throughout civilization."

Now let your Radio eyes consider the little barefooted miss, just below Mrs. Werlein. This is Miss Marcella Roth, aged 10, and her assistant, Miss Ophelia. Marcella is the Twilight Story Girl and at this particular moment you are permitted to see her—"them," I should say—broadcasting to some 10,000 or more of little friends that stirring narrative, "The Three Bears." Marcella has just exclaimed, "Somebody's been sitting in my chair and broke it all to pieces!" You see, Ophelia had her tonsils out a few days ago so she can't talk and that's why she's got her arms spread to show how the little bear's chair went down in a heap. Wouldn't you just love to have a broom straw and tickle that little foot where the toes are peeping out beneath Marcella? She has been one of the WSMB broadcasters every Friday evening for the past year. Marcella has 47 dolls and 47 hundred freckles that you can't see in the picture.

Below is the celebrated Castro Carazo, conductor of the Strand Theater Concert orchestra, famed for its classical concerts.

Mrs. Philip Werlein (above), who flies airplanes, balloons, hunts tigers and talks civic welfare on WSMB Radio. Marcella Roth (right), "Twilight Story Girl."

Clyde R. Randall (left), WSMB program director and announcer and "assistant" to little Miss Marcella as "Twilight Story Man." Famous Owls orchestra (below) of Roosevelt hotel and lower right are the "Six Musical Misses."

Did you ever wonder what kind of a looking chap stood up in front of that Strand Theater Concert orchestra and waved the baton when those wonderful cadenzas came sweeping into your room from the loud speaker? Well, here he is in the circle in front of Marcella—Sgr. Castro Carazo. Young, vigorous, intelligent, he blends the spirit of the younger generation with the skill and grandeur of the generations of music masters that have gone.

In the mysterious depths of velvet curtains and shaded lights that enshroud every broadcasting station there sits or moves a genius who brings all the elements together for the day on the air. He is the program director whose duties often are combined with those of the announcer. Sometimes he must fill in as a singer, monologuist or instrumentalist—a very versatile person. In the picture beneath Marcella is Mr. Clyde R. Randall, program director-announcer at WSMB and at the moment you are loooking at him in this picture he is filling in with (*Continued on page 29*)

Unmasks Little Ol' Professor

GRIDLEY DOLMES, the Great Detector, Deducts for Friend Watty that WIL Announcer Is Handsome Young Vaudevillain—Not Weazened Old Man with Watery Eyes and Overslung Brow.

"AND now what?" I asked with shameless curiosity shortly after I had entered the Oriental apartment of Gridley Dolmes, the Great Detector, and Hari Singh had relieved me of my hat and cane.

"You are just in time," said Dolmes. He nodded significantly toward a queer looking cabinet of teak, or it may have been mahogany or black walnut. It occupied all of a small table about five feet long beneath which I could see electrical battery apparatus with wire attachments reaching up to the back of the cabinet. A cable extended from one end of the cabinet to the floor and beneath a heavy velvet portier that screened the adjoining room.

"I think you will agree that my deductions were faultless in revealing the mystery of the Solemn Old Judge; I proved conclusively that he was not corpulent, that he did not have a wart on the side of his nose, that he did not sit on a bench and talk into a microphone balanced on a pile of musty law books. In fact—but never mind that. Tonight I am going to rip off the mask of the Little Ol' Professor." The Great Detector tapped a slender screw driver all mounted in silver and gold on the tips of yellow stained fingers and looked at me gravely through the narrow slits of his heavy eyelids.

"And I think, Watty, old horse," he added after a thoughtful silence, "we are going to find out what's going on in the WIL broadcasting studio. Are you ready?"

I felt the corrugated butt of the small automatic in my coat pocket and said with some reassurance: "I'm ready, Dolmes; let's go."

Without another word he tossed his Scotch plaid smoking gown to Hari Singh and turned abruptly to the cabinet which I now observed had a panel with three or possibly five or six protruding knobs and various calibrated arcs inscribed with figures and indicators. With both hands operating simultaneously he rapidly began twisting and turning these peculiar thumb pieces. Often I had seen him work at a safe combination with that same dexterity.

Suddenly there was a shriek as of ten thousand ghosts suddenly evicted from their tombs.

Not hard to detect that Leora Thomure (right) is this nice looking after hearing her pianologues and accompaniments at WIL. Frank Tritz (below) is the owner of that fine baritone where Leora plays.

Yes, indeed, Professor; we recognize these musicians as the original St. Louis University Hawaiian Serenaders from Hawaii and none other than.

Billy Knight (top) the "Little Ol' Professor," himself—proving herewith that Gridley Dolmes was right. Just above are the Four Aces of Harmony, whose voices have that satisfying blend. Eugene Meyer (below) concert pianist.

"What's that?" I whispered huskily at the same moment jerking my automatic and pointing it toward the room behind the portiers from whence the sounds eminated.

"Hetrodam! Blooperstatic!" gritted Dolmes. He took one of the knobs between his two palms and rotated it with lightning rapidity. The sounds increased and I was about to fire when he stopped suddenly and I caught the unmistakable murmur of a human voice from the darkened room.

"I got him, I've got him now," Dolmes stepped back with a look of relief, although beads of perspiration stood on his forehead.

"This is the Little Ol' Professor." Dolmes pressed a button that lighted the room as he entered. I heard the words myself as I followed at his heels. They seemed to come from a drum-like device, supported by a pedestal, on the mantel. The voice continued to articulate from this metallic object.

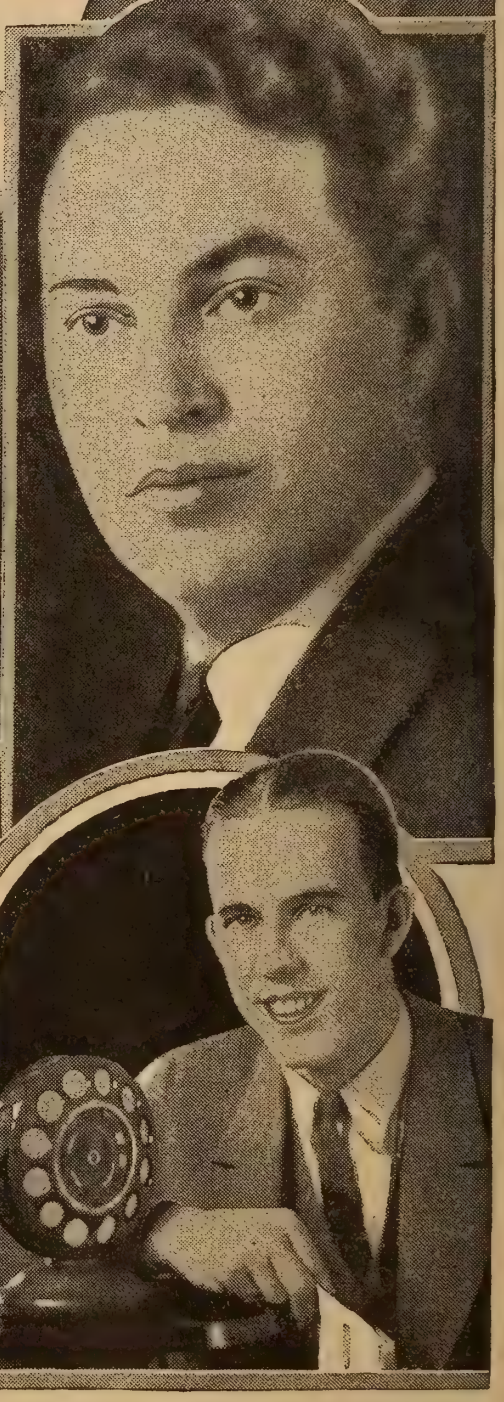
"Station WIL of the St. Louis Star. I wish to present to you tonight at this time our headliner act —the St. Louis University Hawaiian Serenaders—"

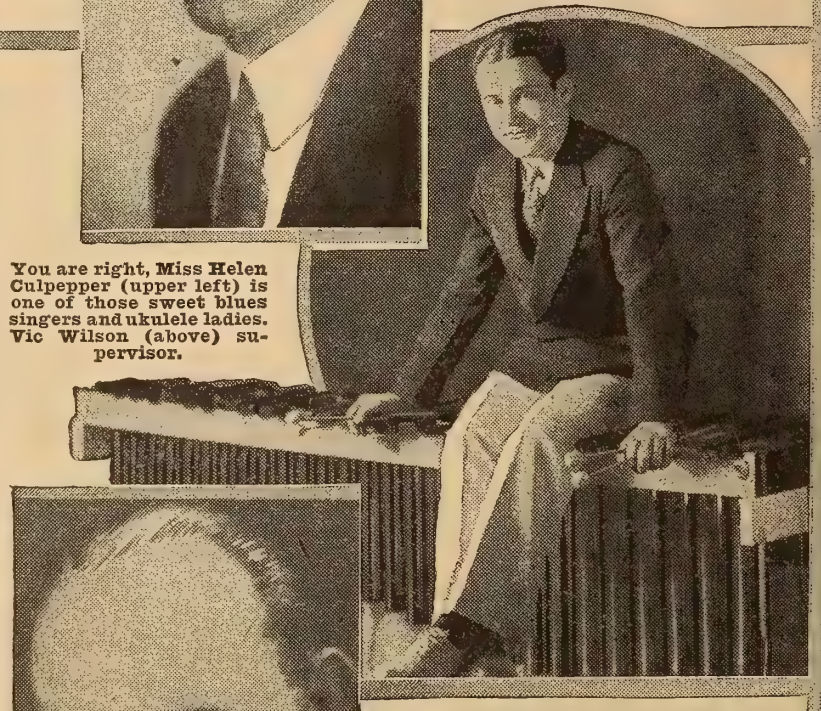
(Continued on page 14)

WRR Second Licensed Station

DALLAS Radio Fans Pass the Hat After City Contributes $10,000 and Collect Funds to Resume Municipally Owned and Controlled Station, First on Air After KDKA

J. Elliot Frank (upper right), poet laureate of WRR. Dr. James Wood (right center) staff singer, formerly with San Carlos Opera.





You are right, Miss Helen Culpepper (upper left) is one of those sweet blues singers and ukulele ladies. Vic Wilson (above) supervisor.

Virgil Whitworth (above), "Wizard of the Piano." At lower right, John Thorwald, chief WRR announcer.

Adolphus Hotel (below), home of WRR, Dallas. Paul E. Ashley (right), director of Magnolia Dallas band, consisting of fifty pieces.

By W. J. REID

Secretary Radio Commission, Dallas, Texas

HAVE you heard the call letters WRR, the City of Dallas, the city of achievement, sent out in continental code, also announced by voice a few seconds later? If not, tune in between the hours of 8:00 to 9:00 p. m. Central standard time, on 246 meters any evening except Wednesday, which is silent night, and you will hear the first municipal broadcasting station in the world and the second licensed station in the United States, KDKA, Pittsburgh, Pa., being first.

Radio development began in Dallas with amateur wireless telegraphy. Several amateur wireless stations were in operation before the World war, during which period they were closed down. The war department assumed control of all such equipment. After the war the amateurs began once more. The young amateurs led by several older heads, who were experts, patiently plodded away, little dreaming of the reward in store for them.

Frank M. Corlett, Western Union telegraph expert, was the local leader of the amateurs. At his home he rigged up a powerful wireless sending and receiving set. He found that the police department of New York was making good use of wireless in broadcasting descriptions of criminals and he proposed to police Commissioner McGee to do the same work for Dallas. His offer was accepted.

Ben Emerson, another Western Union man, had become keenly interested in wireless. As soon as the wireless telephone was discovered he built a Radiophone at his home. This was late in the year 1920. He had both sending and receiving equipment. Mr. Emerson volunteered to broadcast messages for the police department at the same time they were being broadcast by Mr. Corlett in code. The spare room in his home where he set up his apparatus became a station. With a phonograph he began to put music on the air.

In July 1921, Mr. Emerson sold his broadcasting set to the city and WRR, the municipal Radio station, was established on the second floor of the central fire station.

The first music broadcast over WRR, was from Victrola records. This music was appreciated by the public at that time and was used up to the closing down of old WRR by orders of the United States government April 1, 1925, on account of obsolete equipment.

The first speech over Radio in Dallas, was delivered by former Mayor Sawnie R. Aldridge. In the evening of election day, he was taken to Mr. Emerson's home as soon as the returns showed that he was victorious. From there he thanked the voters of Texas for their support. Several thousand persons were listening in, for by that time receiving stations had become numerous and loud speakers were in use.

One of the first programs broadcast was a Sunday morning sermon by Dr. George W. Truett from the First Baptist church. Arrangements were made to continue broadcasting his sermons. Later, music programs were out on the air.

One of the best advertisements WRR had in the early days was a big roadster used by Superintendent Henry Garrett in his duties with the signal system. He equipped the machine with a receiving set so that he could listen in while driving around and receive fire alarm signals which were broadcast automatically from Corlett's station. Music issuing from the car as it passed down the street aroused much curiosity.

While Radio was developing in Dallas, it was likewise making rapid advancement in other cities. Broadcasting stations were established faster than inventors were able to meet the needs of the new conditions. The government was forced to step in and regulate the music and (*Continued on page 29*)

Wichita Calls to Charleston

STATION KFH, New on Air, Has Heard from Mexico, Alaska, Canary Islands and Every State in Union Except South Carolina. Serves Large Area Between Kansas City, Omaha and Ft. Worth. Presents Artistic Programs.

ATTENTION, South Carolina DXperts! KFH of Wichita, Kansas, 268 meters, is calling. It is a comparatively new station, but it has heard from every state in the Union except South Carolina. Will some sharp-eared dial twister in the Charleston state nick into this wave and send for a confirmation card from Mr. Richard M. Gray, manager of the Hotel Lassen, and papa of Radio Station KFH?

It was Dick Gray who really put this section of the country on the Radio map and he is deserving of a reasonable amount of credit. You see Wichita is a trade center for a wide section of that vast area generally called the "Southwest." The people who live in the small towns and the country for a hundred miles round about can buy almost anything in Wichita that they could in Kansas City, which is the nearest metropolis and is located about 160 miles away.

For people who live in the large cities Radio broadcasting is regarded chiefly as a source of entertainment. For the farmer it has become a genuine utility—almost an absolute necessity. He needs it to keep abreast of the market quotations for his produce. It tells him when to sell and when to "hang on" to the best advantage. He gets the news of the world as it happens, without waiting for vicarious deliveries of the rural mail.

Out of the pressing need for a broadcasting station in Wichita, a 50-watt transmitter was installed by the Wichita Board of Trade and the Wichita Chamber of Commerce. It was used almost exclusively to inform farmers about the wheat market for, be it known, the state of Kansas is the greatest winter wheat state in the nation. The next nearest broadcasting stations of any size were at Kansas City, on the east; Dallas and Fort Worth, on the south; Denver, on the west and Hastings and Omaha, on the north.

"Thousands of people live around Wichita with small sets and they are unable to use them except to get the local market reports," said Mr. Gray as he talked the matter over with Merle K. Bennett and J. L. Fox of the Adams Music company and other Wichita business men. "There is plenty of good talent in Wichita and it is a public duty to our city and our community that we install a broadcasting station that will give our people the same advantages other communities enjoy."

The upshot of it all was, that Mr. Gray took the 50-watter off the hands of the trade boards along with the efficient operator, Amos Dadisman. Then he bought a new 500-watt outfit and went down to Washington for his call letters. The bureau recognized the actual need of a station in Wichita and he had no trouble getting the call letters KFH and the 268-meter wave.

Then Mr. Bennett and Mr. Fox bustled around working up the entertainment features. By the time the 110-foot towers were in place on top of the hotel and the station house and its contents were established on the roof, all the needed talent was in line and ready to take the air.

The grand inauguration was held last January 29, Kansas Day. On the program was the very charming Miss Dorothy Crewe, who, despite all that has been said about sopranos on the air, simply took her Radio audience by storm. Her voice has that soft, seductive quality that seems to coo like a dove through the receivers. There were scores of letters and cards complimenting the McVicar-Howard ladies' quartet. Some said they were the "best on the air anywhere." Of course Harry Hunt's Imperial orchestra, which plays regularly at the Hotel Lassen, furnished its share of the entertainment. Solomon M. Kaiawe, Clifford M. Smith and Gage K. Brewer put on a Hawaiian feature that brought a flood of requests for "repeats." And the Coleman string quartet was another feature that delighted the listeners throughout the Southwest.

These entertainers still are features of KFH and since that day many new ones have been added.

And you will please make note of that, Mr. DXpert of South Carolina. If you should chance to be dialing on a Sabbath morning when many of the other stations are silent it is probable you will hear a sermon by the Rev. W. H. Rogers of the First Baptist church. Alaska and Mexico have reported long ago and now Mr. Gray will be glad to hear from you.

Imagine what KFH could have done in the old days when the notorious James boys were roaming through these parts making large bank collections with the aid of blue steel and cold lead! "The James boys are now heading west from Winfield," the announcer would say. Farmers, posses, sheriffs, deputies would be quickly mobilized to form an iron ring that would bring their bandit careers to a speedy end.

It was the dulcet voice of Miss Dorothy Crewe (top) which won many of the first friends to the new Kansas station, KFH, Wichita. At left is Richard M. Gray, manager of Lassen hotel, who launched Station KFH. Below, Hawaiian Entertainers, left to right: C. M. Smith, G. K. Brewer and Solomon M. Kaiawe. In circle, Merle K. Bennett, director.

At left is J. L. Fox, assistant program director and announcer. Below is the Coleman String quartet. Left to right they are: Ivan Streed, Terry Ferrel, Edward Turner and Frank Hollowell.

BIG RABBIT

by Hugh Fullerton

SOMEWHERE behind that proscenium of arching trees and swaying Spanish moss, beyond the maddening babble of these wrangling, half-barbaric blacks was Roberta, beautiful and imperious. Was she? A sickening thought that she may have been overwhelmed by Trimble, Big Rabbit, the self-elected chief of this horde of zootheistic fanatics caused me to gasp and yearn for some decisive action.

But I knew that Borton, the efficient, my very capable buddy, was also back there and I felt reassured. It was my place to stand and wait.

We had followed her from Atlanta to Florida, after she had been virtually kidnaped by Trimble and her guardian, Major Gaskill. They had vanished into the jungle wilderness of the upper St. Johns. Borton had discovered their hiding place by desperate stalking, wading and swimming the treacherous swamps. He found that Trimble was a haughty and greatly feared mystic of the superstitious negroes, known as "Big Rabbit."

Once he had reached the jungle depths he assumed control and Gaskill, who had formerly used him and his followers in a big lumber steal, was in his power along with the pretty white girl, Roberta Tonneson, his ward.

Danforth, a New York detective, sent to investigate the timber thefts, had joined us. He and I had disguised ourselves as negroes to mingle in the throng at this great assembly called by Big Rabbit. Borton was working, literally, behind the scenes. The negroes were waiting for their chief to appear on a great stage, erected in a cleared amphitheater.

While Danforth had gone around listening to the group conversations I had prowled a little behind the stage and found Tillie, Roberta's maid, now sick of Trimble and ready to assist in his downfall. She was scheduled to have a part on the stage in the forthcoming demonstration.

The fireworks were about to start and I joined the throng, ready to shoot in defense of the girl, whose part in the performance I could not foretell.

CHAPTER X

The Rabbit Appears

HOARSE murmurs of half repressed excitement throbbed through the strange assemblage, as the excitement increased and the weird, mystic inherited memories of tribal rites in African jungles stirred within the black breasts. Pressed toward the front of the swarm of negroes I felt my own pulses quicken with some strange fever which seemed suddenly to seize upon all. What it was I could not tell. It seemed as if some strong, mysterious emotion passed from man to man; a fever that set the blood racing, and tensed the muscles.

The bedlam which had endured for an hour commenced to subside; the sound of the mob took on a deeper tone. The shrill cries and laughter, and the screams of overwrought women became less and less frequent. No announcement had been made, no message flashed, yet everyone, by common impulse was pressing forward, closer and closer to the barrier line marked upon the ground to hold them back from the stage which soon was to be the scene of a strange drama of superstition and barbarism. In spite of my efforts to keep calm and to control my thoughts I felt the mysterious force which seemed to direct the mob.

Suddenly I remembered Danforth and strove to pick out from the nearest of the vicious, beastial looking blacks the form of the little detective. Once I thought I saw him in a group near the front rank of the crowd, but as I looked the man drew back and was lost in the press.

The scene was becoming more impressive, fantastic and barbaric as the noise subsided. Still there was no action. Then, without notice, a single blow was struck upon a drum. A roar swept, wavelike, over the crowd. Two small doors opened at the back of the stage and two huge negroes, attired in long, white cotton tunics, ran out at either side of the stage and threw arm loads of turpentine-soaked pine into the big kettles.

In a moment the flames leaped thirty feet high into the air, flaring almost to the limbs overhead and setting the moss high above swaying with grotesque effect. The firelight danced a devil's dance with the shadows along the edge of the swarm. The crowd, murmuring now with a lower note, muttering with suppressed excitement and expectation, pressed a step closer toward the stage. There were few audible cries. It was a heavy, muttering undertone, a rumbling of pent passions, a thousand voices, gutteral and deep, speaking as one.

SOME mystic rite was about to be performed. The thought flashed through my mind that this ceremony was the offshoot of some great religious rite celebrated perhaps hundreds of years ago among the savage tribes of Africa and handed down, generation after generation, to the sons and grandsons of slaves captured when rum and negroes were the chief imports of the Massachusetts traders.

The door at the rear, exactly in the center of the stage, was thrown open. A gigantic black, bearing aloft a great, flaming torch, entered and, after remaining motionless, facing the crowd for an instant, as if in silent salutation, slowly elevated the torch until its flames leaping upward, struck upon the writhing, twisting cluster of rattlesnakes suspended above the throne. As the heat beat upon them the serpents twisting, striking at each other, rattling in agony, hissed and fought until the mass became a living pinwheel of venom and death. The deep, sibilant breathing of the massed negroes changed. Half hypnotized they expelled the air from their lungs in sympathy, and a hiss like that of the snakes, multiplied a thousand fold, arose. A woman, overwrought, screamed wildly somewhere in the crowd.

The two torch bearers at the side of the stage who had stood, motionless during this scene, stepped forward, plunged fresh torches into the seething cauldrons of turpentine flames, drew them flaring from the fire, and, advancing with measured steps toward the heads of the shackled alligators, thrust their fiery weapon against the snouts of the saurians. The cavernous mouths opened wide and the bellowings of rage and pain of the tortured things smote upon the air until it shook. As the mouths opened the torch bearers plunged the flaming firebrands into them. The huge tails flailed the air and beat hollowly upon the logs to which they were shackled. Like the echo of their bellowings the throng voiced its approval; the voice of the mob deeper and more terrifying than was the rumbling of the bull alligators.

AGAIN, as if unconsciously, the crowd surged forward a space as though drawn closer by some strange force. I felt myself pushed close to the dead line, nearer the stage and quietly resisted, looking around quickly. All eyes seemed fixed upon the stage, seemingly incapable of seeing anything else. They were gazing at the scene quite hypnotized, held in thrall by their own emotions which were being played upon in this fantastic fashion.

Mummery and hocus-pocus although it appeared to me to be, I understood now the vast power over the negroes acquired by Trimble by his play upon their primitive passions and their ancient superstitions. The turning back to idolatry of these atavistic beings of the swamps was easy of accomplishment. I felt suddenly helpless realizing the desperate nature of our undertaking to capture Trimble and rescue the prisoners. As long as the spell cast over them by the weird ceremony and the barbarous surroundings endured we were safe. But if we were detected every negro in the crowd would be ready to tear us to pieces at the slightest indication of Trimble's wishes. The insanity of superstition, the remnants of the zootheism of their African forefathers was upon them.

The crowd was waiting now for the bigger scenes of the spectacle and I grew uneasy, wondering why the master of mummery had not made his appearance. Suddenly the entire crowd, as if by some instinctive impulse, vibrated with a new emotion and surged forward again.

"Ai-i-i-YI-!"

This wild yell of greeting and expectation burst from a thousand throats at once. The final, sharp, staccato note crashed upon the ear drums like a blow. Men bellowed hoarsely; women screeched and shrieked in a frenzy of half hysterical excitement.

"Ai-i-i-i-YI-!"

THE indescribable howl arose again. The swamp seemed flooded with noise. The heavy trees which walled the open space sent the sound crashing and reverberating around and around the devil's cathedral of the woods, and the wide stage, acting as a sounding board, hurled it back. The snakes writhed, rattled and hissed unheard.

"Ai-i-i-i-YI-!"

The half wail, half cheer, exploded from the lungs of the negroes for the third time, louder and wilder than before.

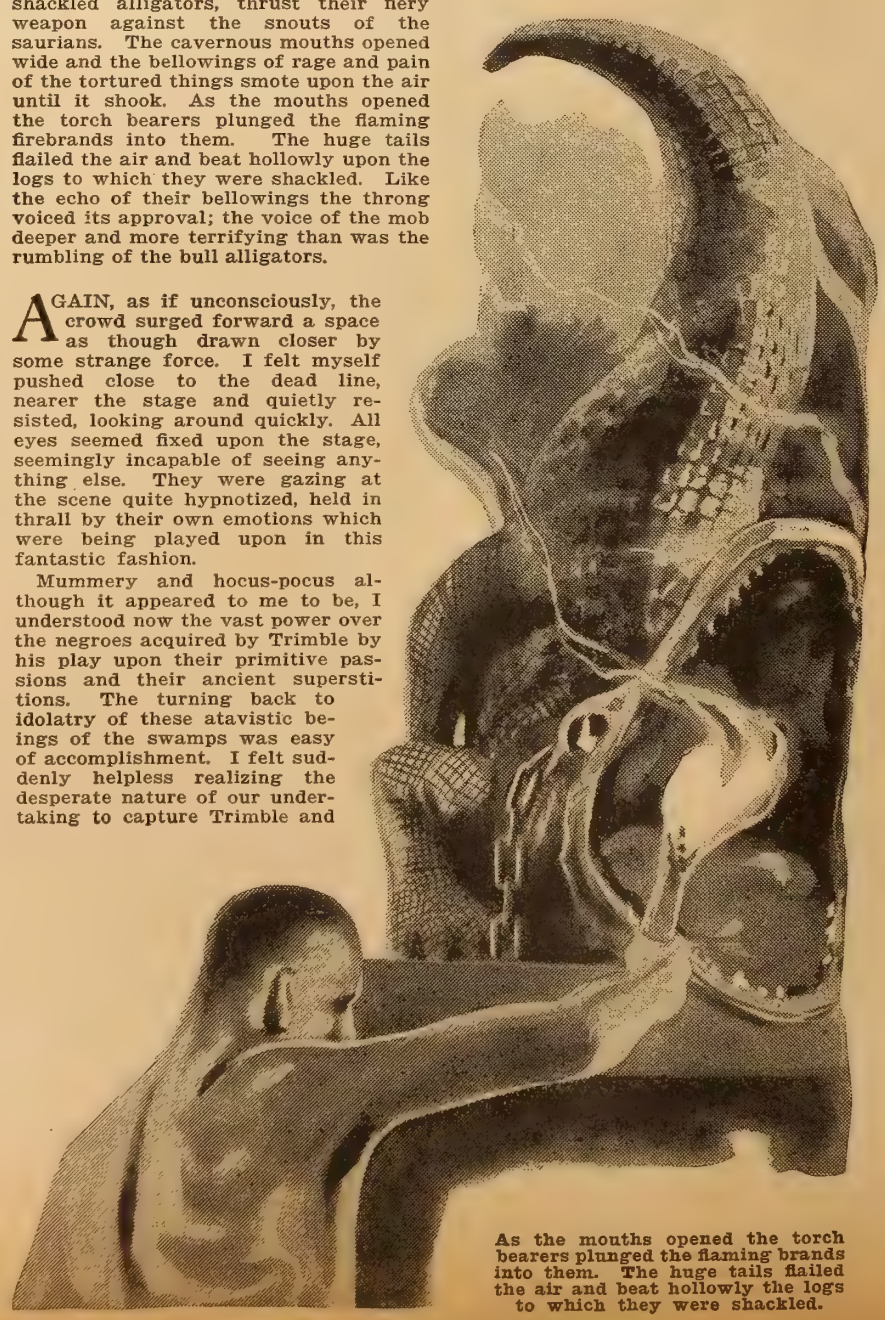
Suddenly a silence which seemed thunderous after the indescribable din, fell upon the assemblage.

Again a single, reverberating blow upon a drum. The door again opened. Before I could see what it was that was slowly entering upon the stage the crowd went into a paroxysm of screams, screeches, shouts, cries and frenzied yells.

"Ai-i-i-i-YI! De Big Rabbit! De Big Rabbit! Ai-i-i-i-YI!"

At the door there appeared a figure entirely clad in the skins of rabbits, two huge ears sticking straight up, the fore paws drooping from the wrists. The creature hopped several times then straightened, and walked erect with pompous strides. Almost at the first movement I recognized the form of the arrogant, egomaniac negro, Trimble.

"King Solomon," as he called himself, had come into his kingdom. Wilder and wilder grew the excitement; louder and louder the din. The bellowing of the men, the screams of the women, the affrighted roars of the tortured alligators, the flailing of their tails upon the logs, mingling, stunned the ears.



As the mouths opened the torch bearers plunged the flaming brands into them. The huge tails flailed the air and beat hollowly the logs to which they were shackled.

THE scene was beyond description. Men tore themselves free from the packed ranks and hurled their bodies prostrate in the open space before the stage. Women, tearing their scanty garments from ebony bodies, flung themselves down onto the ground, or knelt, beating their breasts with their fists and chanting some weird refrain. A hundred were on the ground in the open space, some with heads close to the flaming kettles. A fat wench, standing near me, with face upraised, shouted as if at camp meeting. A madness seized upon the multitude the madness of fanatical hysteria. Few words were distinguishable. In their emotional frenzy they were speaking in the language of their barbaric ancestors.

Somewhere to the left of where I stood a big negro, bare to the waist, commenced booming out in a deep bass voice, a chantey frequently sung by the river negroes. Evidently that chant was the modern version of some savage African hymn. The words were meaningless, but the swing and rhythm of it as sung by the frenzied crowd sent chills through the blood.

"Ho Riley, Ho Riley, Ho Riley
Ho, Riley, Ho!
Come Riley, Come Riley, Come Riley—
Ho, Rabbit, Ho!

In an instant the throng had taken up the strange, unmeaning refrain and the words rolled through the forest with something akin to solemnity in them. The hysteria commenced to pass as the overwrought feelings of the mob quieted under the influence of savage harmony.

For perhaps five minutes the weird monotony of the chant continued. Then silence fell, as the rabbit, standing and stretching to full heighth, upraised a huge rabbit's foot and performed some mysterious incantation with it making slow movements under the cluster of writhing snakes. A murmur greeted the act, deep throated and gutteral.

THE torch bearers plunged fresh torches into the fire pots, raised them and tortured the alligators and snakes, goading them into new outbursts of frenzy.

The drum sounded once more.

The mood of the crowd changed. A roar as of applause, laughter and raillery succeeded the tense undertone. Comedy was to succeed tragedy. As the door at the rear opened again a smaller figure, clad in rabbit skins, hopped out onto the stage. The figure was graceful and lithe, the movements quick and saucy. The rabbit face mask in contradiction to the lissomeness of limb and body, was weazened and old and the pert position of the ears, together with the wrinkles of the comical face, gave this rabbit the appearance of preternatural wisdom.

"Ai-i-i-i! Mammy Bammy!"

The crowd yelled in almost childish delight.

"Ai-Yi—Hyah de Big Money! Hyah! Mammy Bammy! Mammy Bammy look wise!" Evidently Mammy Bammy was popular and well liked while Big Rabbit was some symbol of power to be dreaded. Even I, ignorant of superstition and of negro tradition, understood that.

The Mammy Bammy hopped pertly across the stage, preened her fur and squatting, facing the crowd, wiggled the nose while the crowd yelled in delight.

I understood at last. The person inside that coat of rabbit skins was Tillie.

She hopped in front of the throne chair, cocked her head first one side, then the other toward Trimble. Hopped to the smaller chair, onto the dias and into the chair, seating herself and mov-

ing the head from side to side, each droll effect bringing a roar of glee from the crowd.

Big Rabbit waited, restless, impatient. Twice he made motions with his paw, jealous that Tillie should hold the center of the stage and appear to defy him.

The drum sounded hollowly—one deep stroke.

THE crowd fell into silence again. Trimble, stretched to his full height, took one step forward, holding aloft in one hand the huge rabbit foot which seemed his sceptre or symbol of power. For an instant he stood motionless, allowing the silence to add to the effect. Then he took one more step forward—and stood statue like—.

The drum boomed.

For a full half minute the big negro stood rigid. Then he spoke, his tones vibrant.

"Big Rabbit is free."

A murmur ran through the multitude, although it seemed that not one man or woman had moved or spoken.

"The white man who tried to tame Big Rabbit is caught in his own trap."

A deep rumble of approbation answered him.

"The timber belongs to us. This time we take it for the big rabbit and the big rabbit's children."

A long mutter of admiration and assent ran through the throng. Trimble stood erect, arm outstretched, waiting for the murmur of approval to subside.

"This time each rabbit will gnaw two pine trees."

The suppressed excitement and murmured assent increased.

"Next week, on Tuesday, gnaw one tree and float it to the nearest raft. Friday gnaw another tree. Twice a week we will gnaw, and the white man's mill will saw the trees. This time the money is ours. The white rabbit is in our trap."

A WILD outburst of excited voices followed the announcement. Again Trimble raised high the Rabbit's foot, commanding attention. A man had been pressing close against me and twice I had moved slightly to avoid contact. As Trimble issued his order to his follower the man gripped my arm tightly, and as I started to jerk free from his grip I whirled and saw it was Danforth.

"That rabbit is my meat," he said in a low tone. "He's the one I've been chasing."

Before I recovered from the start he had given me he was wriggling away through the crowd. I would have followed, but my plan already was made. I determined to remain at that place, watch every movement of Trimble, and to shoot if the necessity demanded it.

I understood the situation clearly. Major Gaskill, authority on negro customs, had used his knowledge to gain power over them and get them to aid him in vast thefts of timber. Trimble, his tool, had turned upon him.

The negro was talking now, rapidly, passionately, his voice raising and falling as he preached the wrongs and the rights of the colored man. The man was a consummante actor. Scarcely a sound came from the savage crowd save the heavy breathing of men under strong emotion. Trimble explained how this great theft of timber was to be accomplished.

The torches were burning lower and the pitch-pine fires in the big kettles were dying down. A strangling pall of resinous smoke was commencing to settle heavier and heavier over the scene. The chances of escape by a sudden dash improved with the declining light.

It is impossible to reproduce the words of the big rabbit. Half of them, after he became frenzied by playing upon his own emotions, were meaningless jargon. He delivered a tirade against the white race, and as his excitement increased he lapsed into the dialect of the negroes. The man was beyond doubt insane, crazed by morbid pride and hatred of the man who had been his master, drunk with his power over the negroes.

IT WAS evident Trimble was working the crowd up to some climax and I shuddered as he played upon the superstitions of his followers, invoked their slumbering hatred of the whites, goaded them with a desire for wealth and freedom from the labor that had brutalized them and made them lower than the beasts of the field or forest.

His tirade became wilder and wilder until his voice rose almost to a shriek. His audience, swayed by his savage eloquence, moaned, groaned, shrieked in rage and snarled in furry. The woods seemed to shake as they voiced barbaric resentment to the wrongs of the blacks of a dozen generations.

Gradually the fear was growing within me that Trimble's intention was to wreak his vengeance upon the white man and the girl he held captive. I shivered with horror and gripped the automatic tighter. The nature of the vengeance became more clear when he drew a many lashed whip from the folds of his rabbit skin costume and made its throngs hiss through the air to emphasize his words. He intended to break Major Gaskill's spirit, to flog the aristocratic, overbearing white man who had scorned him while using him. He would whip him for the gratification of this throng of frenzied negroes, now mad with hatred. He would show them he was master.

The drum thundered. The whip hissed through the air. The door opened. Major Gaskill entered, followed by Roberta Lee Tonneson, and a sick dread of what was to come seized upon me.

Major Gaskill walked erect, scornful, disdainful. Even the knowledge of his dishonesty and his crooked methods did not keep me from thrilling with admiration at his bearing. He faced Trimble, his lip curling with scorn, and spoke sharply. In spite of his brave words the negro flinched and gave way. Ignoring the presence of the multitude the major stepped protectingly between the negro and his ward. What he said to Trimble no one save those on the stage could hear—but it cut deep.

The negro, maddened by the fact that he had flinched and by this movement acknowledged the superiority of the white, stepped forward angrily, raising the whip as if to strike. My hand tightened around the butt of the automatic. Before the blow could fall an uproar which made the din preceding it seem small, arose and announced the strangest scene of that night of weird happenings.

CHAPTER XI

Jedge Terrapin

MAJOR GASKILL, drawn to full height, his white hair uncovered, stood unflinching, a look of sneering contempt on his face. A growl of rage and savage desire arose from the crowd; the cry of the oppressed suddenly armed with power. Big Rabbit had stopped as if paralyzed, the writhing thongs of the whip still swaying as he held it aloft. Miss Tonneson stepped forward a pace, her little foot stamped the platform and she spoke sharply. The imperious gesture of her hand interpreted her words which none save the actors in the strange tableau could hear.

The door at the rear had opened again, but none on the stage, save Trimble, saw the figure which appeared in it. The crowd saw and a murmur arose. As the girl spoke to him Big Rabbit drew back, wincing. Her words had stung him out of the paralysis of surprise that seized him as the door opened. Her words appeared to lash him into fury. Raging, he stepped toward the girl, with whip uplifted. My automatic leaped from my pocket. I was determined to fire before that lash could fall, regarding his ground a moment, backed slowly away as the turtle advanced upon him. Mammy Bammy, crouching, was scared. The beautiful white girl and the tall, stately man with the white hair and mustaches, seemed out of the cast. The turtle, waddled slowly toward Big Rabbit who retreated, step by step, as if afraid.

The rabbit had backed almost to the side of the stage when the turtle upreared itself upon its hind flappers, its head wagging and faced the rabbit. Trimble suddenly emitted a cry of rage, lifted the whip and leaping forward lashed at the head of the tortoise.

A howl as of maddened animals greeted the act. The crowd surged forward angrily. For an instant it seemed as if they would rush the stage, seize the rabbit and tear him to pieces. It was plain the rabbit had committed an act of sacrilege in striking the tortoise.

But the forward surge of the crowd stopped short. A shrill scream of appreciation and delight arose. Like a flash, as the whip was falling, the terrapin, swinging its right flipper, had hit the unprepared Trimble squarely on the jaw and the giant negro, in his rabbit skins, dropped like a stricken thing and lay kicking on the boards, for all the world like a dying rabbit.

A THRILL ran through me. Before I could figure out what the reaction of the blow would be the crowd screamed applause.

"Ai-i-i-i-YI! the crowd yelped, "Ai-i-i-i-YI—Ol' Jedge Terrapin too much foh Big Rabbit!"

That lightning like blow of the flipper struck me almost as hard as it struck the rabbit. In the motion I recognized a punch which had often landed on me in friendly boxing contests. The man in the terrapin shell was Borton. As the crowd screamed applause of his act in knocking Trimble down I realized that, for the time being, he was safe and the sympathy of the throng was with him. The half crazed crowd, aroused because the rabbit had dared strike Judge Terrapin with a whip, was ready to defend him.

Big Rabbit had backed almost to the side of the stage when the turtle upreared itself upon its hind flippers . . . . swinging its right flipper, hit the unprepared Trimble squarely on the jaw and the giant negro in his rabbit skins dropped . . . kicking for all the world like a dying rabbit.

A HUGE turtle, its shell almost five feet across, its head protruding ludicrously, light flashing from its eyes, waddled slowly out to the center of the platform, its big flappers slapping the floor.

"Jedge Terrapin done come! Jedge Terrapin done come to hol' court"

The negroes were in a frenzy of excitement. Some laughed, some shouted, others wailed, expressing a new emotion I could not understand. A few flung themselves again and shouted:

"Jedge Terrapin—! "Jedge Terrapin—! De Jedge! De Jedge!"

I stood amazed, incapable of action, bewildered, wondering what next was to happen, understanding only that something had happened to Trimble's drama.

It was like some scene from a fantastic pantomine, which was incomprehensive to me but which the negroes appeared to understand. Big Rabbit, holdless of consequences. But the shot never was fired.

"Ai-i-i-i-i-YI!"

The savage yell of the multitude, higher pitched and shriller than ever, announced the new development. The lash dropped from Trimble's hand and he drew back bewildered and terrorized by the unexpected turn. Major Gaskill and Miss Tonneson, turning quickly to see the cause of this new outbreak, stepped backward, as in amazement. The Mammy Rabbit slipped down from her chair and crouched, half hiding, and trembling beside her dias.

Emerging from the doorway was the strangest figure of that nightmare phantasmagoria.

"Ai-i-i-i-i-YI!" "Jedge Terrapin—" "Jedge TERRAPIN!"

The negroes, excited to a higher pitch than ever, screamed wildly.

The terrapin stood erect, wagging the head with comical effect, as if boasting of the feat. With a raucous laugh he spurned the rabbit with a backward kick of one flapper and waddled across the stage. The crowd broke into appreciative guffaws. The terrapin stopped directly in front of Major Gaskill, extended the neck and pushed its sharp nose close to Major Gaskill's face, wagging the head drolly.

"Ai-i-i-i-YI!" yipped the delighted crowd.

The ungainly monster waddled a few paces, approached Miss Tonneson and, stretching his neck, turning the head sideways, appeared to be examining her face closely. The negroes, delighted, yelled again. The girl started, shrank back then stiffened suddenly and stood still. I knew from her actions that Borton, under cover of his coarse comedy, was explaining the situation to her and telling her how to escape. She moved a trifle closer to the major, instinctively for protection, but made no move to depart.

THE turtle waddled to the prostrate colored girl, dropped to all fours and appeared to be looking at her. Tillie, who had shrunk from him suddenly, became active, rose to all fours and hopped around the stage, stopping close to Miss Tonneson.

Trimble was commencing to recover from the effect of the blow and was starting to sit up when the terrapin waddled to him and half lifted him from the floor. I did not know until later that an automatic, pressed against his ribs and a rapidly hissed warning was the chief propelling force. The strange pair moved across stage to the rear door where the rabbit disappeared; the ter-

(Continued on page 28)

S-O-S: New Portable Super

DESCRIBING Wiring in Most Simple Manner Possible. How to Add the Finishing Touches Told in Detail.

By MILO GURNEY

IF THE Rev. Abner Hitchcock—hailing from Massachusetts—doesn't put down a long "good mark" for me, one that I can show the doorkeeper when I leave this vale of tears, then I'll be "offa" preachers for life. The reverend wrote to me that circuit diagrams meant just about as much to him as a treatise upon hygiene would to a hog. Which merely prefaces my remark that in place of furnishing a wiring diagram for the connections of the S-O-S Portable, a numbered and lettered wiring plan is given herewith, while the wiring instructions will follow this "point to point" system.

Assuming that you have mounted all of the apparatus including the audio transformers, which are of the sub panel mounting type, we are then ready to begin the wiring. Celatsite flexible wire has been specified, because it is so convenient and for its special fireproof spaghetti covering. Other insulated flexible wire may be used but the size used should not be over 16 gauge.

Referring to figure 4 of the last issue, drill holes were shown beside of the Victoreen transformer mountings as well as beneath the variable condensers and at other points wherein the wiring passes through the sub panel. This allows all of the wiring to be concealed.

The Thordarson transformers mount just back of Benjamin sockets 7 and 8. Holes are drilled to permit the posts of the transformers to pass through the panel where connections may be made. The locking studs on the transformer posts fasten the transformers to the sub panel. Each grid leak and its associated condenser is shown as mounted either upon the face of the sub panel or underneath it if desired, while the C battery is intended to lie flat upon the base of the portable cabinet underneath the sub panel.

The Wiring Operations

We are now ready for the wiring which will be given in alphabetically lettered operations and from point to point. Refer to the large drawing below.

A.—Connect G terminal of Victoreen 1 to terminal 2 of socket 2; G terminal of Victoreen 2 to 3 of socket 3; G terminal of Victoreen 3 to 5 of socket 5, and G of Victoreen 4 to one terminal of the Aerovox grid condenser. Remaining terminal of this condenser is attached to 6 of socket 6.

B.—Connect P of Victoreen 1 to 9 of socket 1; P of Victoreen 2 to 10 of socket 2; P of Victoreen 3 to 11 of socket 3, and P of Victoreen 4 to 13 of socket 5.

C.—Connect + terminal of Victoreen 1 to the + terminals of Victoreens 2, 3 and 4, and from + on the latter connect plus B terminal of Thordarson transformer T-1.

D.—Connect F terminals of Victoreens 1, 2 and 3 together, and from F terminal of 3 connect to 47 of potentiometer C. Connect together the terminals 17, 18, 19, 20, 21, 22, 23 and 24 of sockets 1, 2, 3, 4, 5, 6, 7, and 8.

E.—Connect terminals 26, 27 and 29 of sockets 2, 3 and 5 together. Connect 26 of socket 2 to 39 of rheostat B. Connect terminals 30, 31 and 32 of sockets 6, 7 and 8 together, and from 31 of socket 7 connect a wire to 37 on rheostat E.

F.—Connect, in order, by means of a long wire, 33 of rheostat A, 34 of rheostat B, 35 of potentiometer C, 40 of rheostat D, and 41 of rheostat E.

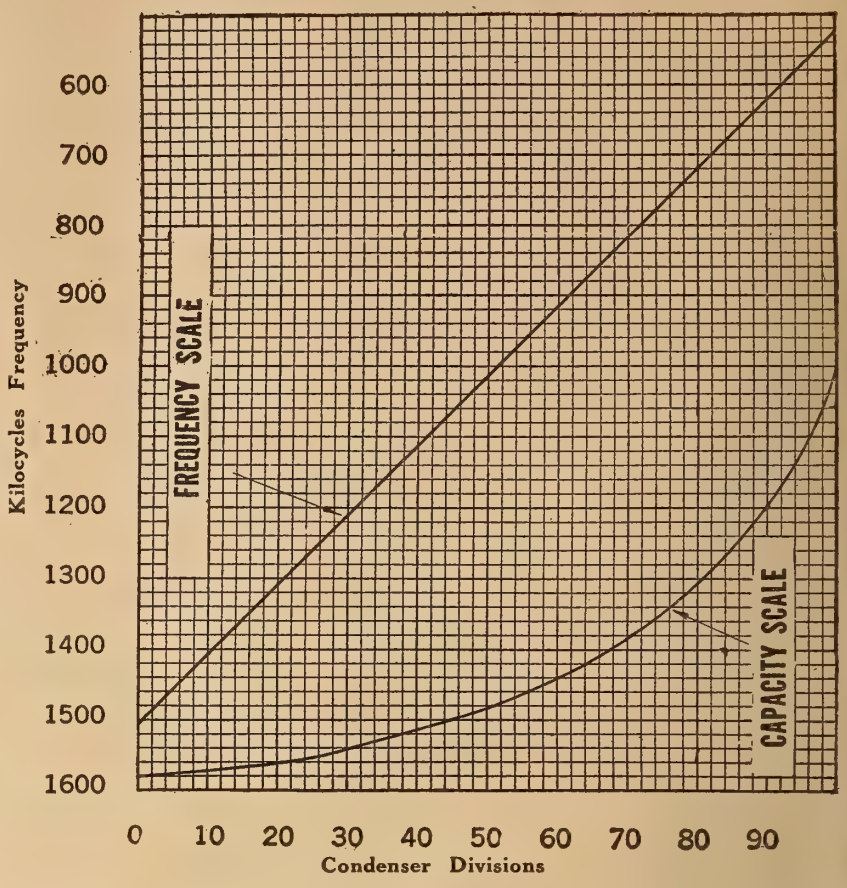
G.—Connect 25 of socket 1 to 38 of rheostat A; also 34 of rheostat B to F of Victoreen 6 and from here to one terminal of the 1 mfd. Aerovox condenser. Connect the + terminal of Victoreen 6 to remaining terminal of the 1 mfd. condenser and also to + of Victoreen 2.

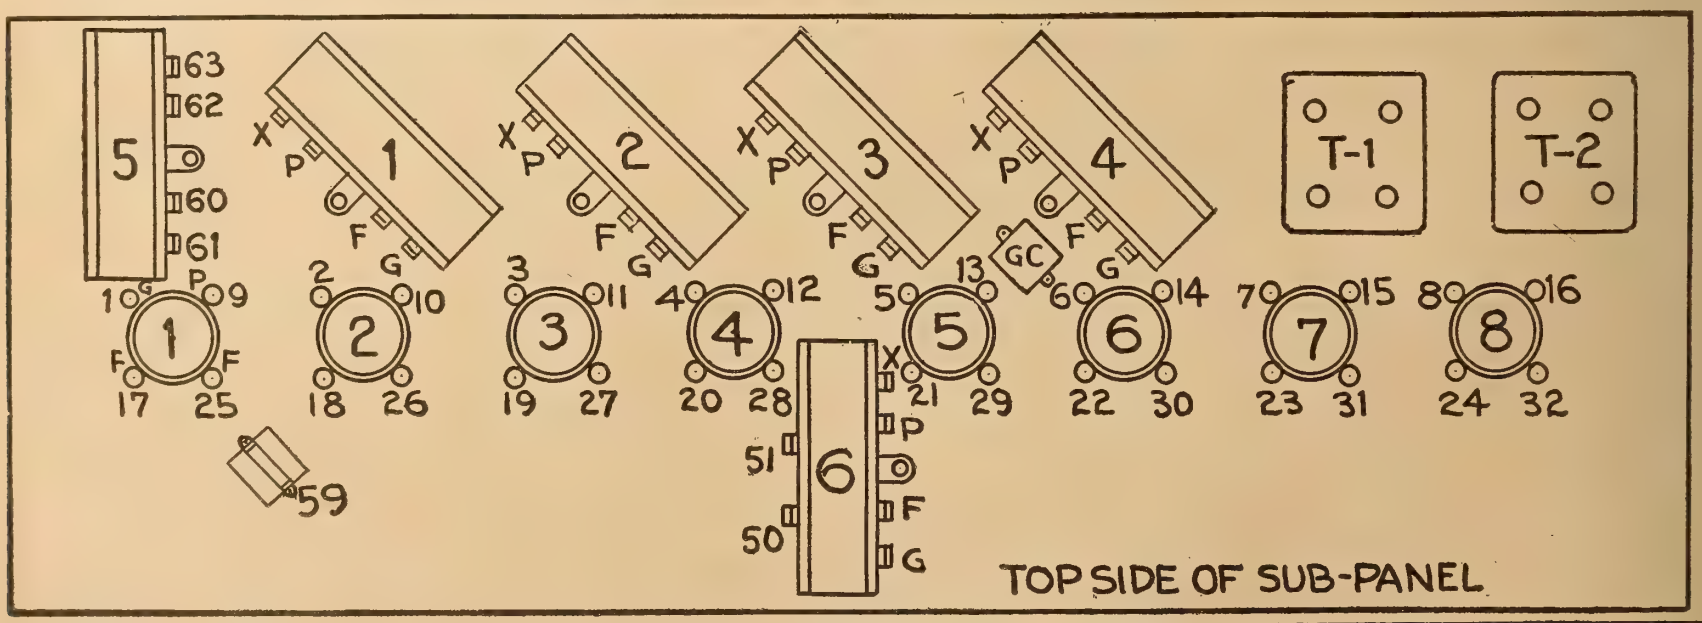
H.—Connect the P of Victoreen 6 to 12 of socket 4 and on to 45 of Amsco variable condenser F-2. Connect G of Victoreen 6 to 4 of socket 4 and on to 46 of condenser F-2.

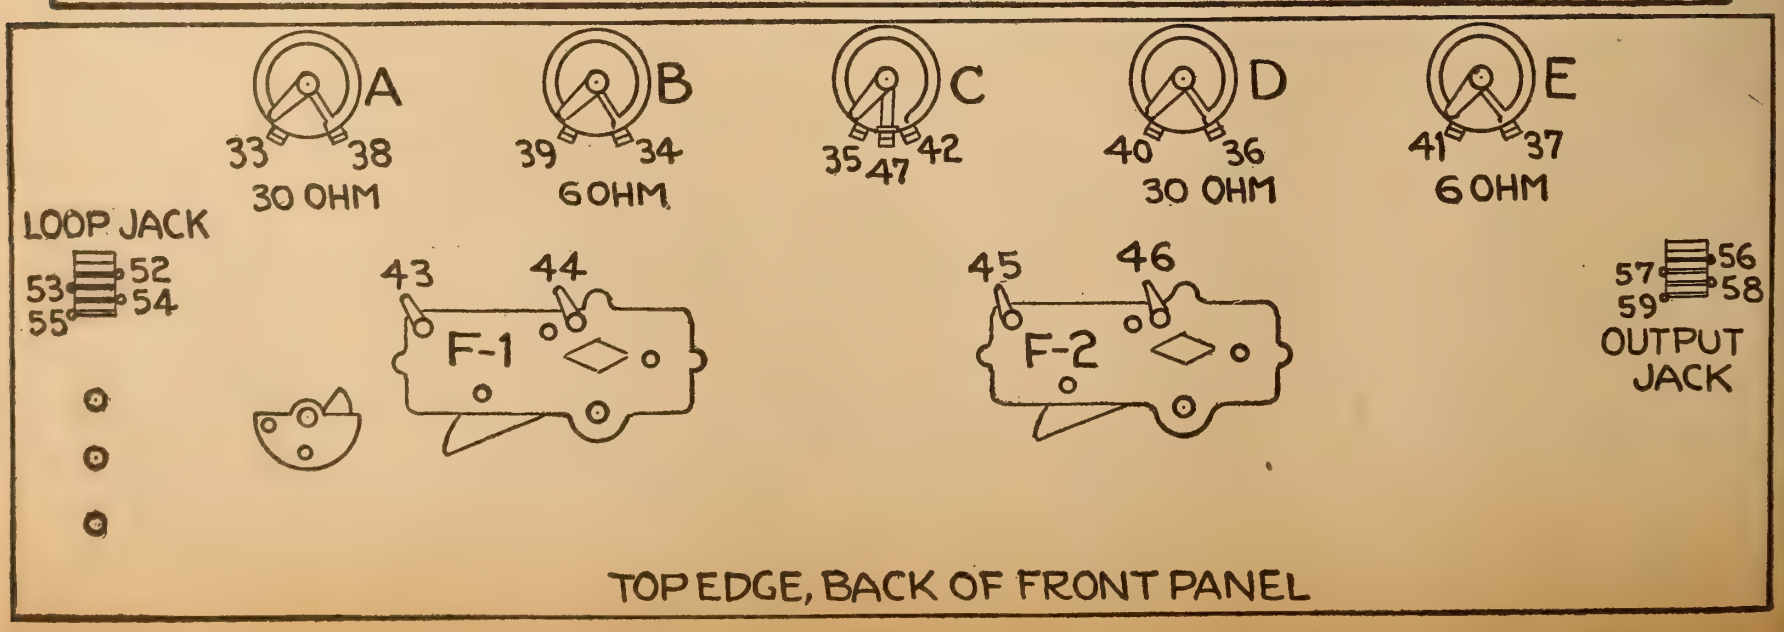
I.—Connect 50 of Victoreen 6 to 20 of socket 4, and terminal 51 of this Victoreen to 44 of the condenser F-1 and on to 55 of Carter loop jack. Connect 43 of the condenser F-1 to 52 of Carter loop jack, and then to one terminal of the Aerovox condenser 59. The other terminal of this condenser connects to 1 of socket 1.

J.—Terminals 60 and 61 of Victo-

(Continued on page 30)







Old Man Static's Funeral

PART IV: Here Is the Famous "Crock" Antenna of B. L. Lowe. Claim Method Reduces Static. Experiment in Horizontal Antennas.

By MILO GURNEY

"ONCE upon a time," as all bedtime and other stories should start, a fellow named David Harum typed the remark that "Fleas were essential to a dog as an ever reminder that he was a dog." The author is going to borrow this soothsaying by remarking that experiments with underground antennas which do not work in your location are an essential proof that you are an experimenter. If each experiment was successful, one would soon tire. The novelty would diminish and Radio would have but little interest to you.

Because any of the types of buried antennas previously described have failed to function, does not in any manner prove that they are not efficient in all localities, but may indicate that they won't function where you live. The whole thought back of the experiments is that of presenting for your information some of the work that has been done, and to create an added interest which would spur many listeners into entering this most fascinating work.

To illustrate, were you B. L. Lowe, R.R. 2, Dickerson Road, Nashville, Tenn., who has "fished" in 37 distant stations upon the underground antenna which

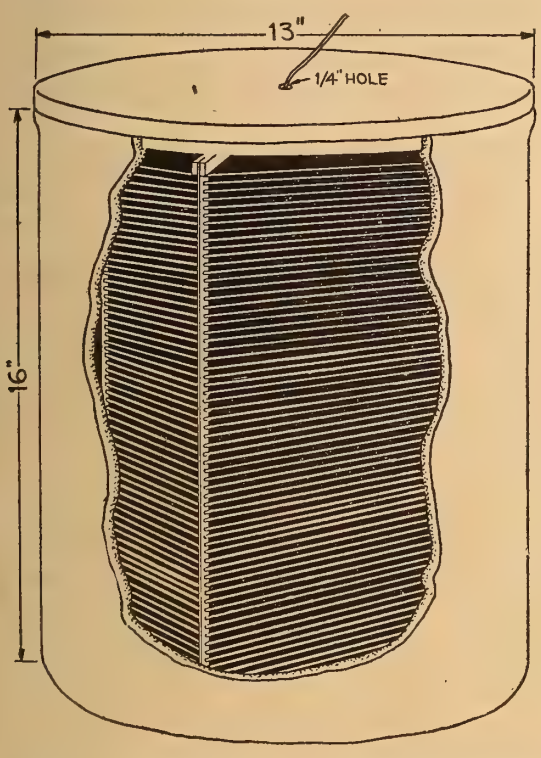


Figure 1. The scheme of B. L. Lowe for a buried antenna, which requires a ten-gallon crock, is illustrated here. Broken view shows interior.

will be now described, it appears you would have called it a perfect day and the experiment a success.

B. L. Lowe's Earthen Crock

Mr. Lowe uses the scheme shown in figure 1 which comprises an ordinary ten-gallon earthen crock obtainable at the grocery or variety store. The novelty of the device arises from the method employed and the manner of construction, while its operation, according to Mr. Lowe's report, is such as to indicate that the device is hard to beat.

Picking out a few of the 37 stations which this gentleman in Nashville has brought in on loud speaker, we find KFOA, WBAP, KFKX, WJZ, KMA, and a host of other stations well distributed over the country. Visualize KFOA as located at Seattle, Wash., WBAP at Fort Worth, Texas, and WJZ on the Atlantic seaboard, and then you will agree that his experiment was a huge success.

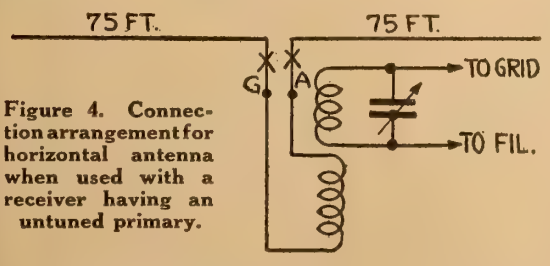

Figure 4. Connection arrangement for horizontal antenna when used with a receiver having an untuned primary.

The earthen container which Mr. Lowe used measures 13 inches inside diameter, with a total height of approximately 16 inches. These measurements one will find about equivalent to a ten-gallon crock. The winding skeleton consists of an oblong framework composed of two cross pieces of hardwood whose length may be 10 to 11 inches, or just small enough to fit loosely into the crock, and four ½-inch strips of No. 10 gauge copper or brass 14 inches long. See figure 2. Each of the strips are drilled for their total length with ¼-inch holes upon ½-inch centers according to Mr. Lowe, but notches similarly spaced instead of holes are recommended by the writer. These strips form the upright section which maintains the wooden cross pieces, and are securely fastened to the respective ends of such pieces. Figure 2 is a detail plan which makes the correct construction of the winding form clear.

Winding Lowe Antenna Form

You will require from 80 to 90 feet of No. 14 solid copper, rubber covered wire for winding the form. The starting end, which is at the bottom, is sealed off by placing it in a small bottle which is afterward filled with paraffin or sealing wax or, if one prefers, this starting end may be covered well with electricians' tape. Each turn of the wire should pass through the spacing holes (or rest in its proper notch, if the strips were notched), in order that the turn-to-turn spacing will be uniform. Reaching the finish or top of winding, a half turn should be taken around the wire in order to fasten it securely. After making this locking turn leave twelve inches to be passed up and through the center of the cover for connection to the lead-in wire to the receiver.

The completed underground antenna is now ready for insertion into the earthen crock. Next, some form of cover must be designed which will fit closely over the jar opening. Mr. Lowe made his cover of concrete, leaving a hole through its center just large enough to allow passage of the end of the wire, after which the hole about the wire and the edges where the cover rests on the crock were then sealed with sealing wax. Those of you who cannot go to this trouble may use a well-paraffined hardwood cover. It is only important that the lid fit securely and water tight so that when covered with dirt it will remain in place.

Connections and Lead-In Laying

Next, dig a hole five feet deep and large enough in diameter to take the crock. Also dig a trench about 18 inches deep from the location of the hole to a point as near as possible to that where the lead-in will be brought up to the receiver. Secure a sufficient length of No. 14 lead-covered, insulated, copper cable and solder one end of the copper wire within this cable to the exposed wire in the center of the jar cover. Be certain that this connection is well soldered, then tape it well. Sealing it with wax is wise. You may now lower the covered jar carefully into the hole and fill about it and on top with moist earth until within a

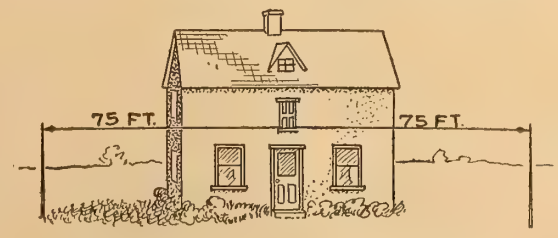

Figure 3. A typical horizontal antenna.

short distance of the top when the earth used should be semidry and well tamped into the opening. Lay the lead-covered cable in the 18-inch trench and cover thoroughly. After leaving the ground as close as possible to the point where it enters the building, fasten this cable with cleats to the side of the building, pass through the building wall, and connect the free end of the copper wire inside to the antenna post of your receiver. The ground wire which you have been using previously will remain connected to the ground post. That is all. Now tune in coast to coast when a "bad night" won't permit you to do so on an ordinary aerial.

Horizontal Aerials

A further experiment which carries much of interest and which will particularly appeal to those who dislike digging holes in Mother Earth is found in the horizontal type aerial. This idea has been the subject of considerable discussion and favorable comment of late. To date most of the reception using this system has been on short waves, and the writer is indebted to QST, the official organ of the American Radio Relay league, for the data published.

This subject no doubt will interest a major portion of the fans who are interested in possible improvements in antennas. Bear in mind that the following experiment offered is purely an experiment. Suffice to say that reports show that a horizontal antenna performs very well upon wave lengths from 100 meters down. What it can do over the broadcast band, while less explored, is of equal interest now that there seems to be some merit in the split wave theory recently reported by a prominent company.

The general idea of the horizontal aerial about to be described is that it should be on an approximate level with the receiver. In other words, if your receiver is located upon the second floor of your home, then the aerial should be at a height close to that of the receiver, as shown in figure 3. No ground connection to the receiver is used. One-half of the aerial passes in and connects to the antenna post while the ground post is attached to the remaining half. This arrangement in effect couples the receiver to the antenna at its center.

Figure 4 shows the connection arrangement as it would appear within the receiver when using an untuned primary input, while figure 5 shows the same arrangement when the antenna is connected directly to a tuned secondary input.

For experimetal purposes it is suggested that each half of this aerial be 75 feet long, or a total length of

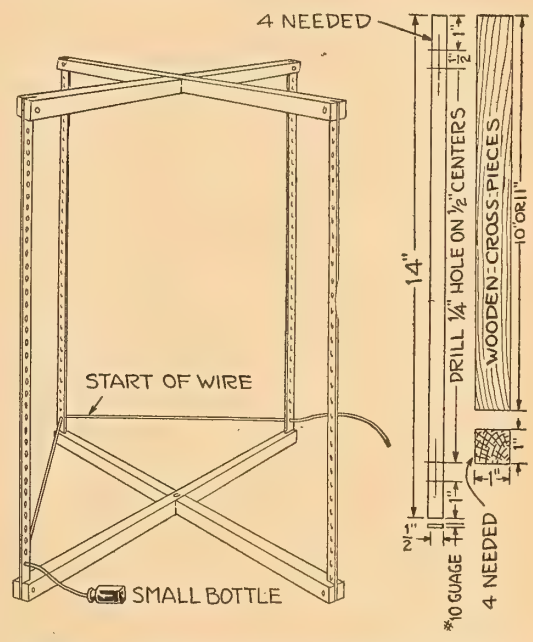

Figure 2. Details of the construction of the interior framework and winding form.

150 feet not counting the lead-in loop which length is neglible and should be as short as possible. As a receiver tunes either broad or sharp according to the length of aerial used, and signal strength is also determined in the same manner, the author has specified the extreme lengths which will be required. This is done because it is much easier to shorten each half if required, than to add to the lengths given.

Points marked x in each of the figures indicate the locations of fixed condensers which may be inserted in case it is necessary to reduce the effective wave length of each half of the aerial. Such condensers may be .0001 or .00025 mfd., it not being likely that larger capacities will be required. Points A and G upon each drawing indicate the attachment of aerial leads to the ground and antenna posts of the receiver. Standard single or stranded aerial wire may be used. The lead-in should be well insulated where it passes through the window to the receiver. As previously stated, this form of antenna has no ground connection and it is therefore quite evident that some relief from excessive static should be experienced. However, results alone will tell.

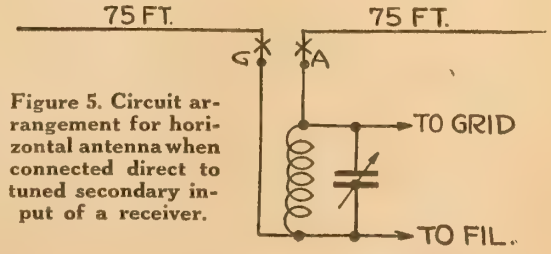

Figure 5. Circuit arrangement for horizontal antenna when connected direct to tuned secondary input of a receiver.

The response to my appeal for experimenters has been very pleasing, and among those responding are many listeners mentally equipped to do their own thinking so far as Radio is concerned. It is from the reports of these willing workers that I anticipate everyone of us will profit materially. As the possibility of reducing static through so-called static eliminators appears considerably distant, one's only recourse toward relief must of necessity concern the collector medium.

We need not be surprised to hear that the silent

Two Cents for a Program

TWO cents is all that a good program, costing the station perhaps several thousands of dollars, may cost the appreciative broadcast listener, yet it seems that the great majority of fans are unwilling to spend even this meager amount. We mean to say that listeners are lax about writing stations and telling them what pleased them, what displeased, and why certain things reacted on them in either fashion. The investment of two cents in a postage stamp is all that is necessary, yet perhaps ninety-nine out of a hundred people won't make that investment.

H. A. Bellows, director of WCCO, writing for the Gold Medal station's news bulletin, states the situation clearly. We take the liberty of reproducing herewith what he has to say:

"Don't put off writing until tomorrow, or next week, or next year; don't think that because you sent a postcard to Station WXYZ six months ago, you have done your full duty by Stations WPDQ, WIOU and all the other letters of the alphabet. Make it a rule to send a word of commendation everytime you hear a good program.

"The stamps, the paper, the ink and the labor represent a sound investment, for they mean more good and better programs in the future. And if you can't get programs of the kind you like, don't blame the broadcaster unless you are perfectly sure that you have done your share by helping him with your suggestions. A two cent stamp today may mean a thousand dollar concert later."

In our opinion the reasoning of Mr. Bellows is very sound. The correspondence received by a broadcasting station is the barometer and yardstick by which the programs are measured and planned for the future. If your letter, your vote, isn't there to help in the planning, by what right can you criticize the programs of the station which displease you?

And don't forget that a cowardly, anonymous letter is usually given just the consideration which the lack of signature and address deserves—it is thrown away, forgotten, because it carries no weight of conviction.

So We Bought a Portable Set

IN SOME ways we prefer the broadcast programs of the summer over those of the winter. Many of our friends attempt to convince us that the summer programs are not worth while; that they do not compare with the broadcasts of the cooler months; that the stations "let up" considerably in the months of sunshine.

Looking over the programs or tuning in, we cannot say that this discouragement by our crepe-hanging friends is justified. The summer programs have all to offer that the winter had and more. Actually more and, we believe, better liked features are announced by the stations.

For instance there are the hundreds upon hundreds of important sport events which are carried by microphones all over the country. We have but few of these in the winter. Then again the weather, road conditions and touring services are more necessary and deeply appreciated by ourselves during the summer.

We also have always liked bands. Summer is band season. Of course, some people may not like to hear a good band, but we can sit by the hour on the veranda and listen to the careful broadcasting of a well-conducted band. And only in the summer months are band concerts featured extensively by the majority of stations.

We have made it a point to inquire of all stations what parts of their schedules would be discontinued for the summer. After listening to some of the "crepe-hangers," we had become convinced that perhaps there was some truth in their statements. But when an overwhelming majority of the broadcasters replied to our inquiry that instead of discontinuing features, all the winter and added summer programs would be given, and nearly all remaining stations answered that nothing would be discontinued, we turned about face and decided that the myth of inferior summer programs was, to revert to American venacular, "all wet."

RADIO INDI-GEST

Railroad Radio

If your set is in the country
Near a railroad track,
You will hear some telegraphing
With a click, clack, clack.

And if a railroad motor car
Should come very near,
Its spark discharge will sound like guns
Shooting in your ear.

Then when a train goes roaring by
You will hear some squeals,
Caused by the great vibration of
The iron rails and wheels

But when 'tis still and silent like
You note with a smile,
Your reception beats the city sets
By many a mile. GEORGE

Intermission Idiosyncrasies

A.C.S. Announcing

"Some fellow in Sheldonville, Ohio, who signs his name Vinegar, writes in stating that in his opinion, our last week's Tuesday concert was decidedly on the Fritz. In our opinion this gink is in about the same predicament as the elephant that tried to hide behind a raspberry bush. As they say at a bargain sale, jump over or walk around but don't block the aisles. Tomorrow we are going to hit the trail for Sheldonville and if we can locate this guy, we'll find out what he means by using a hammer on our carefully arranged programs." ARTHUR C. STOWELL

Old Rep. Cole Chases the "Blues"

Representative Cyrenus Cole (Ia.) before the house committee considering the ban placed by England on the importation of American Jazz artists, not only favored England's attitude but added, "Jazz music is a very sore affliction upon America."—News item.

Old Rep. Cole was a dreary old soul,
A dreary old soul was he,
He called for his resin and he called for
his bow,
And he called for his fiddlers three.

"We gotta razz this darned old jazz,
This darned old jazz," quoth he,
"Has started to grow and is liable to go
To the countries over the sea.

"It's gotta stop or the world will flop,
The whole world will flop," says he,
"So fiddle it down and fiddle it low—
Save the world for posterity."

THE NIGHT HERD

Then Prospero Was Its Daddy?

Dear Indi: When I was sailing back from your side last week a Tempest broke out, and when it was at its height the Radio operator on the ship received a message that his wife had given birth to a baby. They are going to call it Ariel. LONDON BOBBY

Back to the Tomb

Dear Indi: In one of the recent issues you want to know where I bin, and lowed has how you hadent heerd from mee for 3 thousand years. Wall I admits that it has been quite a spell, cause I bin dead for 3 thousand years, and

I bin dead three thousand years
And just came back to life
To take a part in this old world
Of work and fight and strife.
But there's been a lot of changes,
Since they locked me in my tomb,
For instance, there's the crystal set,
It's surely met its doom.
And also the triple circuit
That's made to regenerate,
It's like the reflex circuits,
'Twill soon be out of date.
In place of these what do we have?
We have the super-het
And super this and super that,
That raises He—ll you bet
With all the sets of nearby fans
And makes them buck and rear,
Which makes us ask in accents wild
Where do we go from here?

OLD KING TUTT
(Not of WSB)

This Makes You "Red"

Dear Indi: For many months I have enjoyed your column and now I would like to nominate, as a member of the Famous Fan's Club, "Red" Grange, for it was through the grid that he made both fame and fortune.

I also might mention "Babe" Ruth for he makes trouble for a lot of "batteries" nowadays. If you can find room for these you will find me tickled pink.

RAY D. O'PHANN

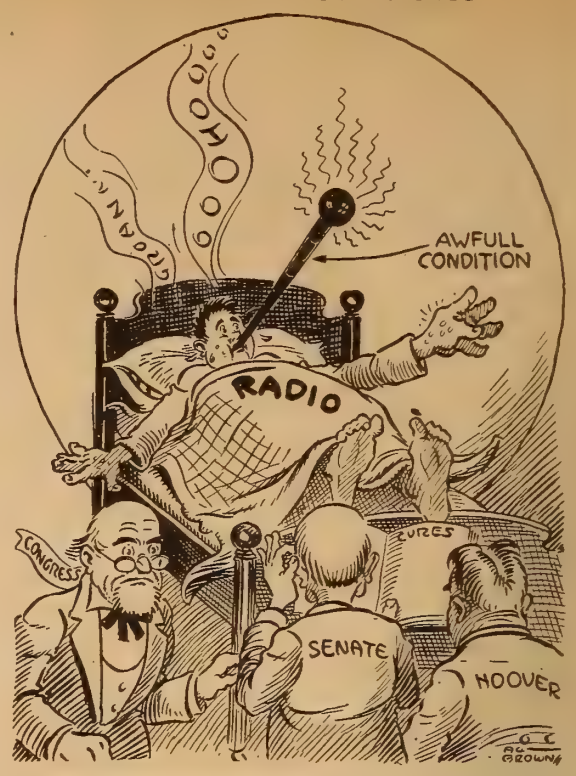
Which also reminds us—no this isn't a joke you've heard long ago—that the Famous Fans' Club membership list is growing quite large. Y'see all the star Florida realtors, coming northward to sell wide-awake, live-wire property such as cemetery lots, have joined in a group, claiming membership because they have a large quantity of grounds, well-watered.

FRANQUE'S FILOSOFEE

He who tunes, so shall he receive.

INDI

Let's Hold a Conference



Condensed

BY DIELECTRIC

Glee clubs composed of women are heard far less frequently than men clubs, although the latter are not flooding Radio programs by any means; in fact, it would not be disappointing to many listeners in should this feature be listed by more stations. However, we are reviewing now a very pleasing concert given by the Russell Sage College Women's Glee club, presented through broadcasting Station WHAZ, Troy, N. Y. Possibly these ladies' voices would not be classified as exceptional, but their singing of the various numbers making up a select program was certainly spirited. One selection, "Swing Along," was admirably rendered.

During the period devoted by Station WTAM, Cleveland, to what they term as "studio recitals," you may be assured of features bearing some marks of merit. The orchestra selections are nearly always well played and offer a variety, catering to differing tastes in music. Appearing as soloist recently was a tenor of robust voice, whose singing of popular numbers called one's attention to a manner in which these may be rendered without the eternal habit of sliding —more or less insecurely—from one note to the next. His vocalizing was a marked feature.

It isn't necessary to dwell on the beauty of Irish timbre displayed every time Allen McQuhae chooses to sing, for most Radio audiences are quite familiar with that quality; nor do his auditors have to be reminded of the expression put into his work. That Mr. Kent selected this popular tenor to "carry on" shows the discretion of a Radio public benefactor. Even when Mr. McQuhae sings airs lacking that typical lilt of the music of Erin, there is no charm lost for he is as much at home with compositions originating in other lands as with those of his native heath.

There can be no mistake that this summer static will have to be very powerful to drown out a Florida station that intends to keep the state before the minds of next winter's sojourners. Station WGBU, at Fulford, has the far-floating ethereal message in the guise of their slogan, "tropical America," and of softly rhythmic dance melodies. Frankly, the soloists this time of year are not so engaging as have been heard during the rush season.

Our old friend in Atlanta, Ga., Station WSB, finds listeners in distant states just as pleased to hear his programs and drawling announcements as when the thermometer registered much lower than at present. We listened to a singer whose nerves were master at the time, or diaphragmatic lassitude caused the weak tones to barely register. Her singing of Irving Berlin's hit, "Remember," otherwise had much to commend it, but it is to be hoped later appearances will show improvement.

A concert given under the auspices of the Minneapolis university was well conceived and executed to the enjoyment of all fortunate enough to tune in Station WCCO. Evidently it was the purpose of the sponsors to leave a good impression with all Radio listeners on the eve of baccalaureate celebrations, at any rate, that was the effect.

There is nothing to say particularly of dance programs, unless they are abominable or remarkable, so the comment on WSAI, Cincinnati, will be confined to merely mentioning the fact that that station was heard by your reviewer broadcasting a dance feature of usual interest.

RADIO POPULAR AND FATTENS ON STRIKE

BRITISH LABOR TROUBLES AID SALE OF RECEIVERS

Broadcast Bulletins Appreciated by Strike Supporters and Public—Station Staffs Deserve Credit

By Jack Broadcaster

LONDON, England.—Radio broadcasting proved itself of immense value in the recent British general strike crisis, being largely instrumental in preventing the outbreak of serious disorders and panic.

Even strike supporters found the broadcasting service valuable in giving the official announcements of the trade unions and general news of strike progress.

Broadcasting kept the country cool and well in touch with the situation when the newspapers were perforce silent, and the country owes much to the devotion of the staffs at the various stations. Emergency staffs stood by day and night, and in many cases slept upon the premises.

In the London Station

On one of the momentous days I was able to spend a short time at the London station from whence all the news was broadcast.

News was being received from all over the country—by telephone, telegram and tape machine, while special messengers brought in the official announcements from the trade unions and the government. Communications were being made by the railway companies, various governmental departments, and in some cases by the individual trade unions.

All this information was compiled into one gigantic bulletin and then sifted to its final form which millions heard every day.

Of course, the various stations were guarded lest the irresponsible element should attempt any attack, and most of the officials got what little sleep they could there or at nearby hotels. I saw a group of officials enjoying their first meal of the day in the Savoy Grill at nine o'clock one evening.

How Artists Fared

A word must be said for the broadcasting artists all over the country for the way in which they managed to keep their appointments with their thousands of listeners, and also for the way in which they held themselves ready in case a breach should occur if someone should be unable to arrive.

Though the strike affected most industries adversely, there was a tremendous boom in Radio during the first two or three days. There was a very quick sale for head sets and also for crystal receivers.

New batteries were in great demand, and many people who had apparently been contemplating the installation of a loud speaker set decided that this particular occasion warranted its immediate purchase, so that the whole family could listen to the latest bulletins.

The Radio industry was fortunate in being the one bright spot in a very dark firmament.

CUP RACE GROWS WARM

(Continued from page 2)

As a reward for saving consecutively numbered ballots and casting them at one time for the same candidate, a bonus vote, with size depending on the number in consecutive order, is credited to that candidate.

Each of these ballots will count for one vote when sent in separately. You can hold these ballots until you have four that are consecutively numbered and when they are sent in, a bonus of eight votes or total of twelve will be granted.

The larger number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. For a complete series of ballots, including one from each issue from March 27 to September 1, a bonus of fifty votes will be allowed.

WAIU Soon to Be Highest Station in United States

COLUMBUS, Ohio.—The highest broadcasting station in America will be dedicated here shortly when the American Insurance Union station, WAIU, is moved into the insurance company's new building soon to be completed. The building will be 555.5 feet high, taller than Washington Monument or the tallest skyscraper outside of New York city.

WAIU will occupy a special story 500 feet above the ground.

A theater seating 3,100 persons and a hotel with 1,000 rooms will occupy space in the new American Insurance Union citadel.

QUEER MULTIPLE TUBE DOES MUCH

WHEN David L. Loewe of Berlin, brother of the famous German scientist, Dr. Sigmund Loewe, arrived in the United States not long ago, he brought with him samples of a multiple receiving tube which does the work of three or more tubes. One type of Dr. Loewe's multiple tube does the work of two stages of radio frequency amplification and a detector, another type acts as a detector and two stages of resistance coupled audio amplification, and still a third type functions as one stage of radio frequency amplification, a detector, and one stage of power audio frequency amplification. Left picture shows closeup view of the tube and its base. Top picture shows the multiple tube in place in special German receiver.

10 COWS PLUS RADIO SET GIVE MORE MILK

FROST, Minn.—"Radio music increases milk production of a dairy herd approximately twenty per cent," says T. H. Gullord who installed a set in the barn of Oscar Mundale of Rome Township, Minn. A thirty day test indicated that Radio music in Mundale's dairy barn increased the creamery check from ten cows $28.70 a month. The New York programs through WCCO brought the most generous milk flow, while WHO, Des Moines, and WOAW, Omaha, programs were tied for second.

Checker Fans Tune in Match Miked by CKY

Manitoba Station Describes Play of "Jump" Champions

WINNIPEG, Man.—Taking out draughts boards and following the moves of the two players as numbers of squares were announced, thousands of people in Winnipeg and beyond recently participated, practically speaking, in the first Radio game of checkers ever played in Canada.

The match actually was between R. Thomson, editor of the Free Press checker column, playing in the Lisgar hotel, Selkirk, twenty-five miles from the city, and G. H. Collins, at CKY, the Manitoba station in Winnipeg. Mr. Collins, playing "white," was the winner. Listeners had no trouble in following the game.

Mr. Thomson played beside a loud speaker and a microphone, and the numbers of his "shifts" were announced by Ed. Dusang, while the moves made by Mr. Collins were announced by D. R. P. Coats.

SHORT WAVES

By Marcella

(Continued from page 2)

KWCR, Cedar Rapids, Iowa. No, he is not married, Elizabeth Ann, and all the other nice things you have said about him are quite correct. He lives with his married (and equally popular) partner, Ray Basch. You may invite Neal to parties by addressing the invitations care of Ray Basch, Marion, Iowa.

* *

Some news for Chicagoans and other members of the WMBB, Trianon, audience: Clyde Hager and Lindsey McPhail, both formerly at WMBB, are now entertaining the listeners of KFQZ, Hollywood, Calif. The wave length is 226 meters, if you want to hear them again. Mr. Hager is announcer and studio director of the new station.

* *

Matrimonial note: "The Singing Cowboy" or Carl T. Sprague and "The Bluebonnet Girl" or Laura Bess Mayo, often heard in the past from WTAW, A. & M. college, WFAA, the Dallas News and Journal, and KPRC, the Houston Post-Dispatch, have hitched in double harness this spring. Mr. and Mrs. Sprague plan a tour of eastern stations during the summer months.

* *

"Is Bill Eastwood always at WSMB and is he really as happy as he looks?" Not knowing, we typed a note to C. R. Randall, WSMB's chief, and this is what he had to say:

"The picture which appeared in Radio Digest recorded one of the few instances when Bill ever smiled. He rarely ever has anything to say, probably due to the fact that he is married and used to keeping quiet. The razzing which I administer to him frequently over the air has done much to loosen him up, but he still doesn't do any laughing—only gives an occasional smile. As for his likes and dislikes, I am afraid they are a bit too personal for yours truly to comment on, and regarding the answer to your specific question, 'Is he really as happy as he looks?', will answer that looks are very deceiving and that he would probably make a very good teammate with that popular ballad, 'The Lonesomest Girl in Town.' Yes, he is always at WSMB. He is a tall, good-looking fellow, loves his banjo and tries out a new one every week."

* *

Miss Alta, here are Floyd and Bernard Ruby's measurements. Bernard, 5 feet 11 inches tall, brown eyes, 155 pounds, 22 years of age. Floyd, 5 feet 9 inches tall, blue eyes, brown hair, 160 pounds, 20 years old. Both of the young KMA stars are good fellows, hard workers, mixers, have lots of pep, play popular and old-time music. Home is Weeping Water, Nebr. Live on a farm. Floyd plays the trumpet and fiddle; Bernard plays the saxophone and banjo. And, to be sure, both are UNmarried.

* *

Hah, the "secret" of Jack Smith is out. Those of you phonograph record purchasers who have records of Jack Smith, the "Whispering Baritone," and have wondered whether or not he and our beloved Jack Little are one and the same, are to be answered. They are two distinct stars, a statement which is proven beyond a doubt by the fact that Jack Smith is now in London, England, broadcasting over the British stations and appearing at the New Princess restaurant. Jack Little now being in America, there can be no doubt as to whether "Little Jack" is Jack Smith or vice versa.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

SPECIAL BUS TAKES KFAB TO KFNF

When KFAB, Nebraska Buick station at Lincoln Nebr., and KFNF, Henry Field station at Shenandoah, Ia., arranged recently to exchange their entire staffs for an evening's broadcast, the above special bus was chartered by Gayle V. Grubb and Harry Sidles of KFAB to transport that broadcaster's entertainers to Shenandoah. Standing at the right and rear of the bus are the two announcers, Mr. Grubb, in the dark suit, sometimes known as "Gloomy Gus", and Mr. Sidles.

KFSG'S CHIEF LOSES LIFE IN OCEAN SWIM

AIMEE McPHERSON DISAPPEARS; BODY NOT FOUND

Thousands of Radioland Followers Miss Cherished Personality—Her Work Organized to Go On

LOS ANGELES.—Radioland's loving Sister, Aimee Semple McPherson is no longer at the microphone of KFSG. On Tuesday, May 18, radiantly happy and perfect in health, she went for a few hours rest at the side of the sea which she loved; there to play, swim and in the intervals, prepare her messages for the coming services.

With her was her secretary and her Bible. After a quiet season of study and making preparatory notes for her sermon she enjoyed a brief swim in the water, later coming out and directing her secretary to phone her mother regarding a musical program that evening.

She then went into the water. The secretary returned after phoning, spoke to her and after being greeted by Sister sat down to read. She saw her playing in the water and dashing through the waves. After some moments the secretary missed her and after a vain search of the sea and inquiries gave the alarm that Mrs. McPherson could not be found.

KFSG Built by Followers

To the moment of writing her body has not been located. Every effort has been made by government, police and her own beloved people.

Station KFSG was given to Mrs. McPherson by her countless friends that her messages might go out to the world. She had come to be a well-known figure in Radio. At first those unaccustomed to such services wondered, but as her messages and services went on, providing the best in music, song and sermon, every day added to the popularity of KFSG.

The work is organized in every department and detail. It is hard for the temple workers and members to even realize that the founder will not walk in the door, smile her way down the aisle, bow in prayer and say:

"Good evening Radioland. This is KFSG, Angelus Temple, Church of the Foursquare Gospel."

WEEI Tells Listeners of Best Distant Broadcasters

BOSTON.—New England listeners who care to roam the ether and pick up the best DX broadcasters may now tune WEEI, the Edison Electric Illuminating company here, immediately following their last feature program nightly except Sunday at about 11 o'clock, and learn what stations are coming in the best. P. W. Harrison, sponsored by the Peerless Motor company, is engaged in the task of expert, trial listening, and making the reports.

LITTLE OL' PROFESSOR

(Continued from page 5)

"You hear?" whispered Dolmes.

"Marvelou—ouch!" The Great Detector kicked sideways at my shin.

"Shut up! I told you I'd do it. That's the villain. He's not little, nor is he old or a professor."

"How do you get that way?" I demanded, rubbing my shin.

"He is young, good looking, fairly tall, neatly brushed hair and always ready with a smile—"

"What do you mean, 'he's a villain?'"

"Very simple—a vaudevillain. He said 'headliner act.' He's an actor. Did you note the tone, the manner of self assurance in which he said 'I wish to present to you'? That was the manner of a man making an introduction to a lady. It was the voice of a man who moves confidently among the social elect. He must therefore be popular. Little, dried-up, weazened professors are not particularly adroit or admired by the fair sex. By process of elimination he must be of the opposite type, as I have described."

"And his name?" I asked, amazed beyond further expression.

"Billy Knight," said Dolmes. "But listen and we'll get the rest of this."

Dolmes dropped into a Turkish chair and crossed his long, lanky legs. I began looking around, rather cautiously. There were no concealed persons behind the chairs or other furniture. I discovered no hidden panels. But still the sounds, and, incidentally the sweetest music from those Hawaiians, continued to come from the drum on the mantle. Suddenly a great light dawned on me.

"I have it! I have it!" I tapped the Great Detector on the shoulder.

"So have I but what have you got?" he replied.

"It's a Radio receiver! This is a program from the St. Louis Star—"

"Right-o! Watty, old chap, you astonish me with your perspicacity. If you will control yourself in the light of this discovery I promise you shall hear those Four Aces of Harmony, Al Boswell, Jack Lehr, Ralph Jones and Bruce Renick."

However he could foretell this event I did not at the time understand but his prophesy proved quite correct. In fact there followed a number of well-known vaudeville acts borrowed from the various local theaters. We heard the Georgia Melody Makers and excellent classical piano selections by Eugene Meyer.

Miss Leora Thomure, we were informed by the so-called "Little Ol' Professor," accompanied the singers and presented a few piano selections by herself.

"And on some of the programs," said Dolmes after we had listened for an hour and a half, "one may hear the Coronado Hotel orchestra, Frank Tritz, the baritone and the Hausman Brothers Banjoteers. But, as I told you in the beginning we would unmask this Little Ol' Professor. You see he is not so little. He is not bald with overslung forehead and watery eyes. He does not have a long white beard nor wear a mortar board for a hat."

"Marvelous!" I turned for my hat and cane as Hari Singh appeared in the doorway, a quizzical, enigmatic smile on his bronze countenance.

"Nothing at all," said Dolmes with a deprecatory wave of his slender hand. "Wait until you see the next Radio mystery I am going to uncover."

Univ. of Minn. Studio Is Latest WCCO Link

Gold Medal Station Now Has Four Complete Studios

MINNEAPOLIS, Minn.—The third, or rather the fourth, link in the broadcasting system of the Gold Medal station, here, WCCO, was completed during the past month when the new studios of the University of Minnesota campus were opened for service. This gives the Gold Medal station modern, completely equipped studios and operating rooms in the new Union depot at Saint Paul, on the University campus, and on the roof of the New Nicollet hotel, Minneapolis, all linked with the transmitting station at Anoka, 18 miles northwest of Saint Paul and Minneapolis.

Programs may be sent from any one of the studios by specially built telephone wires to the transmitting station. While the studios on the University campus may be directly connected with WCCO, as they are during the University hour from 8:00 to 9:00 p. m. Central time, every Monday evening, they are also part of the equipment of the university broadcasting station, WLB. This equipment was that formerly used by the old station, WLAG, and was loaned to the university by Washburn Crosby company when the new 5,000-watt broadcasting equipment was purchased for WCCO.

KMTR, known as the "high hat" Hollywood station for the reason that most of its offerings have been along classical lines, has at last succumbed to the lure of the movies and will present each Saturday night from 10 to 11 p. m. Pacific time, a motion picture jollification. The first few programs will present Hal Roach comedy stars. Tune in and see if their gags go as well over the microphone as they do on the celluloid strip.

The Berlin "Funkstunde" has started a complete course in astronomy as part of its broadcasting programs. The arrangements to this end have been made with the Berlin observatory authorities.

MRS. LABBITT EARNS HOUSEWIVES' FAVOR

WWJ'S WOMEN LISTENERS KEEP MAIL MAN BUSY

Household Editor of Detroit News Builds Her Popularity from Thousands of Letters

By Ella Gordon Smith,
Woman's Editor The Detroit News

ONE year ago last December, at 9:30 a. m., an audience of women turned the dial on their Radio sets expecting to hear a familiar name announced to be followed by a voice that had become known to them during the years past. Instead of this they heard:

"This is Station WWJ."

Old stuff. Nothing startling about that. But let's go on. Mr. Tyson's voice continued:

"Now, Mrs. Myrtle E. Labbitt, Household Editor of The Detroit News, will give you a little talk and tell you what to have for tonight's dinner."

All the "old applesauce" except—who was Mrs. Labbitt?

Nobody who listens in on WWJ at 9:30 a. m. today asks that question. They all know, and there is no announcement more eagerly listened for over WWJ than when the housewives tune in for the morning talk and menu broadcast by this Radio favorite.

No Problem Is Too Small

Mrs. Labbitt is fair, tall (her hair is bobbed) and despite the notation in parentheses, she creates an impression of capability. She was born on a farm near Minneapolis, and is a graduate of the University of Minnesota. She has a sense of humor, but of a kind that never makes people uncomfortable.

No problem is too trivial to merit her full consideration, and every housewife who writes or who listens to her voice over the Radio may feel perfectly certain that she is imbued with a deep and earnest desire to make life easier, better and happier for each of them. Every ounce of effort she can muster is put to this purpose.

Mrs. Labbitt's activities do not end when she leaves the "mike" in the broadcasting studio of WWJ. Here the day's work merely begins with the half-hour program to her listeners. Then she goes to her desk where letters from every part of the country await her attention. If the mail doesn't show nearly two hundred letters or better, she feels that the day has gone decidedly wrong. Her total for the week runs considerably over a thousand, and every letter is given her personal consideration.

Listeners' Letters Build Her Work

In her files are a most delightful assortment of friendly notes which have come from the extreme north, south, east and west. That is the way she learns about the work she is doing for her family of listeners, whether the results are what she has hoped for. Questions on every phase of life, from entertaining to feeding the baby, are her daily problems, and she plans a party with the same zest that she turns the baby over to a specialist, for she knows full well that no person in Detroit, however competent, can decide what is good for a baby in Portland, Ore.

Every day she is building "better and better." She depends upon the letters she receives for direction in her work. Those who are pleased must write their notes of appreciation. Those who have criticisms to make, must also write. And Mrs. Labbitt welcomes the adverse critic's note just as warmly as she does those of commendation.

"TONIGHT'S DINNER BEGAN HER CAREER

A little over a year ago, Mrs. Myrtle E. Labbitt was introduced over the WWJ microphone. She told her fair listeners what to have for "tonight's dinner." Since then her careful and personal study and handling of the thousands of letters she receives from women fans, has made her daily morning feature one of the most popular of the Detroit station.

The Reader's View

Another Answer to J. M. H.

In your column I noticed an article where C. E. V., Boston, Mass., picks up a 10-watt station in Mississippi, and J. M. H. of Lousiana wants to know what kind of a set he uses.

Well, I've got a 4-tube reflex and I get this same station, WREC, Coldwater, Miss. (10 watts) on a loop and through loud speaker. WREC's slogan is, "The Most Powerful 10-Watt Station in the World." It is a fitting slogan, don't you think so? —L.W.L., Dukirk, N. Y.

Radio a Home Builder

Radio means so much in our farm home that mere words fail to adequately express our appreciation.

Radio has ceased to be a luxury, but has become a necessity second only to the auto. We live near the seashore on a stock farm and ranch, midway between Victoria and Port Lavaca, connected as we are with long distance and living on a busy shell highway, yet we enjoy the Radio.

Last winter we were warned just in time before the severe blizzard swept down upon us, freezing and killing in one day 15,000 cattle of others in our county alone.

The market news is most appreciated during the day. But we enjoy the delightful programs in the evening until we are so sleepy we must "turn in," since our ranch rising bell rings before day.

The Radio is touching almost all phases of human interest and welfare; in our farm homes more especially, and we are depending more and more upon the Radio for diversion, instruction and amusement so much so that it is a home builder. The Radio keeps our children more contented on the farm, less inclined to seek amusement in town.

The Radio raises the standard of mental culture, giving us food for thought, retrospection, broadens our viewpoint, extends our horizon, enlarges our vision and brings us in closer contact with the whole United States.

Radio is a mental stabilizer, a physical director, and a spiritual instructor.

Radio is a home builder.—J.W.McK., Port Lavaca, Texas.

The Announcing Question

A frequent reader of your good paper, I have frequently read and sympathized with brother fans, who complain of announcers not announcing their stations frequently enough between numbers. If this fault were only committed by those broadcasting continuity programs, little could be said, but you must know, as well as I do, that such is not always the case by a long shot.

Who wants to listen in to a poorly given program? And it is frequently announcers of such programs, who do not give proper data. If one gets such station, one does want to get "distance" and location before changing his dials. I have often wondered why some fan did not suggest in your columns the publication of names of announcers, who are so carless—or ignorant. I am sure that you will always find a majority of fans who like to get not only good programs but distance; and what are all the great broadcasting stations reaching out for if not distance?—J. H. M., Sewickley, Pa.

Here's Another Cure

After reading C. C. T., also O. W. T., in first May issue, also many other letters in the past, regarding the station announcers, I wish to say that I am at a loss to really know what such people want with a Radio. I am inclined to believe they prefer to hear the station call letters to the music or program.

I am satisfied if they announce once every fifteen minutes or only as often as they see fit to announce. If the program is good I don't care where it comes from. When you consider the efforts of the studio to serve the public, preparing a good program, then think of the audacity of some selfish DX hound whose only ambition is how many stations he can log and how much interference he can make for others, it is disgraceful.

So let each of us see what he can do not to interfere with other's tuning, rather than criticise the announcers.—R. E. H., Rochester, N. Y.

WOMEN'S PROGRAMS INDEX

Tuesday

Atlantic	Eastern	Central	Mountain	Pacific
10 a. m.	9	8	7	6

WIP (508.2m-590kc), Menu, Anna Scott.

10:30	9:30	8:30	7:30	6:30

WWJ (352.7m-850kc), Tonight's dinner.

10:45	9:45	8:45	7:45	6:45

WTAG (267.7m-1120kc), Talk to mothers.

11	10	9	8	7

KDKA (309.1m-970kc), Domestic Science. Arts for the Housewife.

11:30	10:30	9:30	8:30	7:30

WMCA (340.7m-880kc), "Beauty."

12 n.	11	10	9	8

WEAO (293.9m-1020kc), Housekeepers' half hour.
WEAR (389.4m-770kc), Home service talk.
WHT (399.8m-750kc), Women's club, Jean Sargent.
WMCA (340.7m-880kc), Home Makers' club.
WQJ (447.5m-670kc), June 15, Hat talk, Gardening talk. June 22, "The Injustice of Returned Merchandise." "Planning Your Vacation in the West."

12:30 p.m.	11:30	10:30	9:30	8:30

WEBH (370.2m-810kc), Fashion and household talks.
WGN (302.8m-990kc), Home Management period.

1:15	12:15	11:15	10:15	9:15

KPRC (296.9m-1010kc), Beauty talks.

2	1	12 n.	11	10

KGW (491.5m-610kc), Household Helps, shopping guide.
WGBF (236.1m-1270kc), Garden talk.

2:45	1:45	12:45	11:45	10:45

WQJ (477.5m-670kc), Home Economics. Style chats, June 22, "Quick Summer Baking." "Coal." "The Market Value of Men and Women."
WGBF (236.1m-1270kc), Garden talk.

KGO (361.2m-830kc), "Character Training in the Home," E. Anderson.

CHICAGO BROADCASTERS COOPERA

HIGH LIGHTS OF THE AIR

ONE of the biggest broadcasts of the year has been made possible by the Chicago Broadcasters association. Through the unselfish cooperation of these eleven stations fans all over the U. S. unable to attend the Eucharistic Congress in Chicago during the latter part of June may keep in touch with the meeting. Four stations, KYW, WEBH, WLS and WMAQ will broadcast. The events to go out over the ether are briefly, the civic reception of the Papal Legate, June 18, from 8 to 11 p. m., Central daylight saving time; the morning service of welcome at the Holy Name cathedral June 20 and the vespers at 8 p. m.; the Mass of the Angels at Soldiers' Field, an outdoor broadcast which includes a children's choir of 50,000 voices and speeches by important clergy June 21; the men's service June 22; and the procession at Mundelein at 1 p. m. June 24.

June shows no summer lull in important Radio programs at other stations. Tuesday, June 15, marks the return of WIP to its summer home. Among the new features which will remind the listener of fragrant salt sea air are Creatore and his band, Earl Bonawitz and the Silver Slipper club revue.

Young artists, winners of medals in the 1926 British Columbia music festival, will contribute to the success of the June 15 program at CNRV. Many of these young musicians will meet the invisible Radio audience for the first time.

Wednesday evening, June 16, the Travelers Jongleurs, those melodious minstrels of WTIC return to the air bringing with them a newcomer without a name. This Unknown Troubadour is said to have a voice of unusual tenor range.

Turn the aerials westward Thursday, June 17, to pick up a program in San Francisco and a meeting in Los Angeles. Although saxophone solos are not allowed to monopolize the air at KPO, an ensemble of twenty of these instruments will slip past the Radio censor Thursday evening, June 17, and put on a concert at 9 p. m. Pacific time. Harry J. Waters directs this band. The Los Angeles program is a salon and reception in honor of Charles Wakefield Cadman, one of America's foremost composers. Many prominent people will confront the mike of KHJ to show their appreciation of the work of Mr. Cadman. His Indian love lyrics have found a permanent place in American music.

Just as spring brings Mother's Day and everyone remembers it in candy and flowers, so does June 18 bring Father's Day. Even if sons and daughters do not say it in either neckties or socks, WEAF and chain will say it with a special musicale.

Vice-President Dawes, the Swedish Consul and Mayor Dever are only a few of the prominent people of Illinois who will welcome Crown Prince Gustaf Adolf of Sweden to Chicago. The prince will talk in English at 9 p. m. Central daylight saving time over Station WJJD, June 23.

Instead of sitting out in the park among the crowds these warm summer evenings, retire to the cool vine-covered porch and dial for WBAL's Tuesday broadcast of the Baltimore City Park orchestra and the Friday program given by the Municipal band. Both are popular Baltimore organizations.

LEADING lady and directo Madge Tucker, left. M Radio favorite in Washing was telling bedtime stories to last great dramatic success was Next year she plans to book th year. KFI, Los Angeles, Calif. (467m-642kc), 7-8 p. m., Virginia Ballroom orchestra; 8-9, Korean Artists string

CHICAGO BROADCASTERS COOPERATE TO GIVE EUCHARISTIC EVENTS

HIGH LIGHTS OF THE AIR

ONE of the biggest broadcasts of the year has been made possible by the Chicago Broadcasters association. Through the unselfish cooperation of these eleven stations fans all over the U. S. unable to attend the Eucharistic Congress in Chicago during the latter part of June may keep in touch with the meeting. Four stations, KYW, WEBH, WLS and WMAQ will broadcast. The events to go out over the ether are briefly, the civic reception of the Papal Legate, June 18, from 8 to 11 p. m., Central daylight saving time; the morning service of welcome at the Holy Name cathedral June 20 and the vespers at 8 p. m.; the Mass of the Angels at Soldiers' Field, an outdoor broadcast which includes a children's choir of 50,000 voices and speeches by important clergy June 21; the men's service June 22; and the procession at Mundelein at 1 p. m. June 24.

June shows no summer lull in important Radio programs at other stations. Tuesday, June 15, marks the return of WIP to its summer home. Among the new features which will remind the listener of fragrant salt sea air are Creatore and his band, Earl Bonawitz and the Silver Slipper club revue.

Young artists, winners of medals in the 1926 British Columbia music festival, will contribute to the success of the June 15 program at CNRV. Many of these young musicians will meet the invisible Radio audience for the first time.

Wednesday evening, June 16, the Travelers Jongleurs, those melodious minstrels of WTIC return to the air bringing with them a newcomer without a name. This Unknown Troubadour is said to have a voice of unusual tenor range.

Turn the aerials westward Thursday, June 17, to pick up a program in San Francisco and a meeting in Los Angeles. Although saxophone solos are not allowed to monopolize the air at KPO, an ensemble of twenty of these instruments will slip past the Radio censor Thursday evening, June 17, and put on a concert at 9 p. m. Pacific time. Harry J. Waters directs this band. The Los Angeles program is a salon and reception in honor of Charles Wakefield Cadman, one of America's foremost composers. Many prominent people will confront the mike of KHJ to show their appreciation of the work of Mr. Cadman. His Indian love lyrics have found a permanent place in American music.

Just as spring brings Mother's Day and everyone remembers it in candy and flowers, so does June 18 bring Father's Day. Even if sons and daughters do not say it in either neckties or socks, WEAF and chain will say it with a special musicale.

Vice-President Dawes, the Swedish Consul and Mayor Dever are only a few of the prominent people of Illinois who will welcome Crown Prince Gustaf Adolf of Sweden to Chicago. The prince will talk in English at 9 p. m. Central daylight saving time over Station WJJD, June 23.

Instead of sitting out in the park among the crowds these warm summer evenings, retire to the cool vine-covered porch and dial for WBAL's Tuesday broadcast of the Baltimore City Park orchestra and the Friday program given by the Municipal band. Both are popular Baltimore organizations.

LEADING lady and director of the WRC players is Madge Tucker, left. Miss Tucker first became a Radio favorite in Washington two years ago while she was telling bedtime stories to the Capital children. Her last great dramatic success was in "The Step on the Stairs." Next year she plans to book the best Radio dramas of the year. Charlotte Meyers, right, is the right-hand man of the Merry Old Chief himself at WJR, Pontiac-Detroit. Her sweet voice has a way of singing itself into the heart of many a Radio fan and her popularity shows in her applause mail. Below are two very serious entertainers at WHAD. No, Milwaukee is not what it was. Perhaps that is the reason Doc Dorword, right, looks so sad. However, Wally Seitz is cheer himself. Tune in any night for this station and judge for yourself if this pair is not funny.

EDUCATIONAL FEATURES

Monday

Atlantic	Eastern	Central	Mountain	Pacific
6:30 p. m.	5:30	4:30	3:30	2:30

WNYC (526m-570kc), German lessons, V. H. Berlitz.

Improve Your Audio Amplifier

and Get Astonishing Results!

The main point of difference between new sets to be marketed this Fall and sets in use is in greatly improved and refined audio frequency amplifiers.

You can easily improve the audio systems of present sets and bring them up to date. Our book will teach you how.

Four years research are embodied in our new 40 page book covering all systems of audio frequency amplification. The good and bad points of each system are clearly described and everything is illustrated to help readers bring their sets up to date.

Send 25 cts. for new book on Audio Frequency Amplification and bring your set up to date for new tubes.

America's Favorite

WHEREVER good reception is essential the new Tower Cone is fast replacing more expensive Speakers, as it exemplifies the supreme combination of all that can be desired in a radio reproducer. Its refreshingly superior tone quality and volume is winning new and lasting friends *everywhere*.

Only in Tower will you find the direct-drive unit with eight points of contact from unit to cone, *plus* an acoustically perfect, non-warping parchment cone—full 17 inches in diameter.

All can view its beauty. But only those who actually hear it can know its truly wonderful capabilities.

Microphonic CHOKES

Sensational discovery! Positively eliminates microphonics, renders tubes, elements inert. Don't be annoyed by microphonics. Send at once TODAY for set of five prepaid $1.00. Sets using over five tubes include 20c each additional. Send bill, check or money order. Money back guarantee.

Selectubes

New construction! Laboratory selected. Lowest internal capacity of any tube made. A special radio frequency tube for R.F., detector tubes for detectors and audio tubes for audio frequency. It should be clear to anyone that no one tube can be 100% efficient for all purposes and that SELECTUBES will improve any set. No tube noises—results amazing. Get a set of these at once specifying quantity of each type required. For Supers use R.F. tubes in all intermediates. They cost no more than ordinary tubes—$2.00 each post paid. Send check, bills or money order.

Phonograph UNIT

Latest design. New diaphragm assembly! Very loud, clear and sensitive—covers tone range from 24 to 15,000 cycles. Incomparable for definition. Sent prepaid on receipt of $2.85. Money back guarantee.

Omniformer

Amplifies all musical frequency on high, flat cerve. Guaranteed equal to any transformer up to $9.00. Big winding and core, high primary impedance. All trimmings eliminated. Just a plain, big, husky transformer and a bigger value. Get yours today, $2.75 each or $5.00 a pair. Money back guarantee.

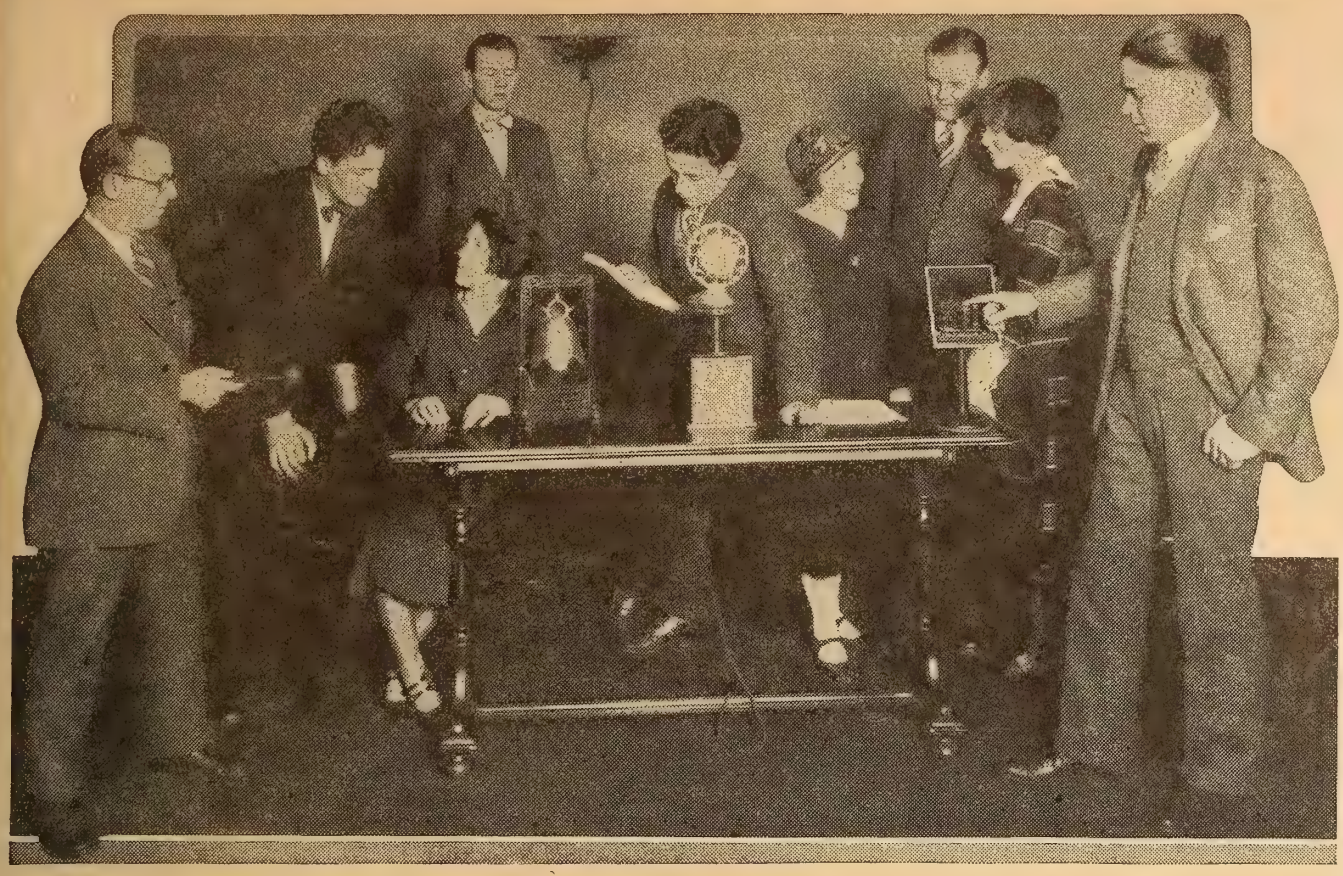
HOW IT LOOKS BEHIND SCENES WITH WOAW PLAYERS



WOAW discovered recently that a capable group of Radio players existed among the staff artists. Here they are as they appeared in "The Step On the Stairs." Notice Eugene Konecky at the left directing the players. Nor will the efforts of this dramatic group cease with the mystery play. They have many surprises in store for fans tuning in on this station during June.

Wednesday, June 30

EX-BOOTLEG STATION IS SOLD FOR $10,000

SEATTLE, Wash.—An unusual deal was comsummated recently at Seattle when the Station KTCL was sold to the Northwest Radio Service Co., operators of KJR. The big 1,000-watt station was sold for $10,000 cash, but was recently appraised at $85,000. It is said it cost $30,000 to build in addition to time and expert labor expended by noted electricians.

KTCL once operated under the letters KFQX. It was over its microphone that Aunt Vivian's bedtime stories went and then turned out to be alleged rum runner's signals and code messages. The station was confiscated by the government, and later, had its call changed to KTCL and was operated as a commercial station. Both stations will continue in Seattle.

Radio Applications Make German Hounds Act Queer

BERLIN.—Some extremely interesting observations on the reaction of dogs to Radio have been made by Mrs. Isa Nairz, the wife of a German Radio entertainer.

In her experiments she used a loud speaker because she found that even specially constructed ear phones annoy dogs intensely, and they spend their whole time trying to shake and scrape the contrivances off instead of listening. In some cases, indeed, the animals thus fitted actually shook with fear.

The first tests were made with sheep dogs and Griffens. The broadcasting of other canine yelps made them answer with joyful and yearning yowls, but the hearing of cats meowing and roosters crowing filled them with an intense indignation which voiced itself in furious barking.

During the recent broadcasting of the noises made by various kinds of wild animals from the Berlin zoological gardens, the tests were continued. The growls of lions and bears, which were unknown to the dogs, obtained no reactions from them at all. But when they heard through the loud speaker the well-known voice of their master, Herr Nairz, they showed every sign of puzzled recognition, rushed up barking and sniffling to the loud speaker, and then rushed enquiringly through the house hunting for their master.

For Your Garden

Some Bargains Ready Now

1—BIG PLANTS—CHRYSANTHEMUMS, CARNATIONS, SALVIAS, SNAPDRAGONS, PETUNIAS, VERBENAS, PARLOR IVY, LOBELIAS, DOUBLE STOCKS, ICE PINKS, HELIOTROPES, etc., regularly any 12 for $1.00; Special, any 15 for $1.00 or any 100 assorted for $5.00. Safe arrival warranted.

"BIG RABBIT"

(Continued from page 9)

rappin by pantomine informing the crowd he would return when called. Then, waddling to the throne chair, the terrapin backed to it, appeared to try to sit down, and while the crowd rocked with laugher at the comedy, stood, drawing his head into the shell, then poking it out.

It dawned upon my mind that Borton was playing for time, playing upon the child-like minds of the mob, to give us a chance to escape. The crowd sated with deeper emotions, appeared eager for more comedy.

I moved quickly, determined to reach the rear of the stage or the path in order to aid when the chief actors in the weird pantomine emerged.

Borton had commenced to talk. He summoned Major Tonneson before him—asked him whether he was prepared for trial, and waved him to depart from the stage—a moment later he appeared to examine Miss Tonneson and waved her away, then Tillie. The stage was empty save for the chief actor when I reached the path and Borton was haranguing them, promising them Jedge Terrapin would try the prisoners.

I reached the path in safety and ran along it, circling through the clearing toward the rear of the stage. Hurrying toward me were two figures and springing toward them I stretched out a hand—and felt fur—Tillie screamed as I touched her rabbit garb, and the girl with her stepped between us, as if to protect her companion.

"It is I—Hurry! We must escape!" I said hoarsely.

"Tek us away, tek us away," Tillie pleaded.

I SEIZED their arms and hurried them through the clearing to the path along the swamp. As I dragged them into the heavier shadows we could hear the voice of Borton still haranguing the crowd.

"Who are you?" whispered Miss Tonneson. "I thought it was you—who played the turtle."

"I'm Lindsey—Borton is acting the turtle," I replied, thrilling because, in spite of her question, she had known me. "We must hurry."

I half dragged them along the path. A hundred yards further Miss Tonneson tripped and fell, uttering a little scream and, lifting her in my arms, with Tillie clutching my clothing, I raced. The girl, after the first instant of protest, made no move, save to place her arms around my neck to aid me in carrying her.

A hundred yards further, in the blackness of the path, out of range of the lights from the clearing, I was breathless and put her down.

"Can you run?" I asked. "Hold to me and try to do it."

"Yes," she said, grasping an arm, "I knew you would come."

Not another word was spoken during that desperate flight through the black woods. I dared not strike a light. Tillie was recovering her courage and a hundred yards further along, was running at my side even trying to aid.

I knew we must reach the boat, for at any instant now the crowd might realize a trick had been played and commence a search. I was determined to place the girls in the boat, then scout back to see whether I could aid Borton. Roberta, her little hand now clutched tightly in mine, was striving to hasten. Panting, almost exhausted, I dragged them on over the rough path. Twice, fearing we had lost the way, I struck matches—then we hurried on, fearful that the instant of light might have betrayed us.

"ONLY a minute more," I pleaded as the girls gave signs of exhaustion—and, a few hundred steps further along I saw the glint of moonlight through some chink of foliage, shining on the black waters of the river.

With a final effort I dragged them out of the path, we slid down the side of the muddy hummock, and half fell, panting and exhausted into the boat screened behind the mass of Spanish bayonet.

For perhaps two minutes we lay there, while I regained breath and all that time Roberta's little hand rested trustingly in mine, her fingers pressing hard as if to gain reassurance. It was she who spoke first:

"I was sure you would come," she repeated.

"We followed—as fast as we could," I said, lost for words, eloquent with emotions.

"Lie still and wait. I must go back," I said.

Frightened and unstrung by suffering, as they were, neither protested.

I crept over the hummock and regained the path, leaving those two women alone in the heart of a beastly wilderness. Hastening my steps to a run I started back toward the clearing.

Scarcely had I gone two hundred yards before I heard something approaching, and stepped hastily out of the path. Two figures appeared. As they passed one ripped out a threatening oath, and I recognized Danforth's voice.

"Dan," I called softly.

He stopped and the figure ahead of him also stopped. I sprang toward them.

"I got him," said Danforth, grimly, as I spoke again.

The figure ahead of him was Trimble, his rabbit gard sadly torn and disarranged and he was obeying Danforth's orders with alacrity. As I came nearer I saw the reason. Danforth's big automatic was pressed against his back.

"Help me fix him," said Danforth, handing me a pair of handcuffs. "Did you get the girl?"

"YES—they're safe in the boat. Where's Borton?" I queried as I snapped the handcuffs.

"Still holding the crowd," he said. "We must hurry."

A few minutes later a handkerchief was knotted securely gagging the negro who, but a short time before, had thought himself king and, handcuffed and tied, we rolled him into the boat and forced him under a seat as unfeelingly as if he had been a sack of meal.

The girls, huddled together, stared through the darkness while we worked.

"Let's get Borton," said Danforth decisively. "Miss Tonneson," he added, "take this gun and blow his head off if he tries to kick loose before we return."

We climbed over the hummock again and reached the path.

"Where is the major?" I asked in low tones.

"Dead," he replied shortly. "I was too late. Trimble got past me. I followed him to keep him from warning the crowd. The major came off the stage and met him. He slashed him with his cane. The negro knifed him. The charge will be murder, instead of theft of timber."

"The major is better off," he added shortly after we had run a small distance.

For the moment the shock of the news of Major Gaskill's death scarcely was felt by me. I had little sympathy for the financial adventurer and never had known him in his more charming and prosperous days. Then I remembered his relationship to Miss Tonneson.

"Poor little girl," I muttered.

"Let's move faster," Danforth suggested.

We trotted along. The glow from the clearing became plainer. We had reached the place where the paths divided and where, earlier in the evening, which seemed years before, we had separated from Borton when a frenzied uproar filled the swamp. A savage howl of rage and disappointment arose ahead.

"THEY'VE found him out," Danforth said, briefly.

An instant later a second explosion of sound arose, followed by shots and then sounds of a chase.

"He's running," Danforth yelled. "They are moving toward the river, but not on this path. Back to the boat; they may cut us off."

Over trees and logs, through Spanish bayonets which tore our clothes and flesh we made a rapid retreat, crawled under the barrier of bushes and cacti to the boat. Danforth, untying the rope, waded deep in mud and water, shoving her out from the hidden inlet into open water as I reached the engine.

"Don't start her yet," he said, "we must pull clear first. The noise will bring them swarming."

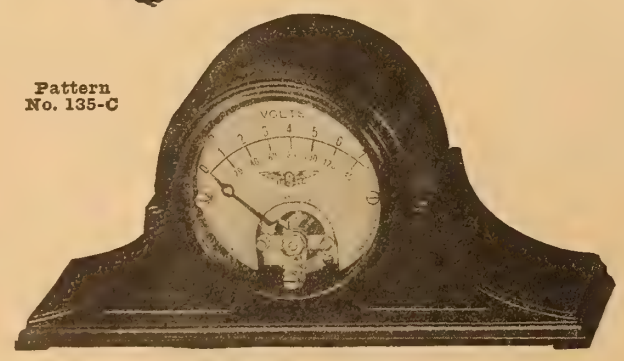
JEWELL



Pattern No. 135-C

Radio Voltmeter "De Luxe"

¶ The Jewell portable voltmeter is not only the most serviceable radio instrument made, but it is also the most beautiful. The entire case holding the movement is made of genuine black molded bakelite. The metal scale is silver etched with black characters and all visible parts of the movement are silvered to prevent corrosion. All Jewell radio instruments are furnished with zero adjusters.

¶ Two cords with phone tips are furnished for plugging into the jacks on panels of Radiola, Victor, Brunswick and other sets.

¶ The 7½-volt scale is used for adjusting filament voltage and by changing the connection the 150-volt scale is available for checking B batteries.

¶ Ask your dealer for our No. 739 circular describing this instrument. If you are building a set ask for 15-C radio catalog.

Photogravures of Your Favorite Artists
GALLERY OF RADIO STARS

By special arrangement, Radio Digest is able to offer its readers a great opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.
Radio Fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

Select Your Favorites from the Gallery of Radio Stars

1 Wendell Hall, king of ukulele ditties
2 Graham McNamee, 1925 Gold Cup announcer
3 Jack Little, popular wandering balladist
4 Billy B. Van, the Sunshine Man
5 Coon-Sanders' Original "Nighthawks"
6 George Hay, 1924 Gold Cup announcer
8 Ford and Glenn, Lullaby Boys of WLS
9 "Roxy" Rothafel of WEAF chain fame
10 The Hired Hand, famous "Substitute Announcer" of WBAP
12 Bob Emery, Big Borther of WEEI
13 "Bill" W. G. Hay, ex-KFKX, now of WLIB
14 Happiness Boys, jovial singers of WEAF
15 Lambdin Kay, "Little Colonel" of WSB
16 Leo Fitzpatrick, "Merry Old Chief," WJR
17 Henry Field, 1925 Gold Cup runner-up
18 Al Carney, organ favorite at WHT
20 Vincent Lopez, No. 1 Pennsylvania orchestra
21 E. L. Tyson, pleasing voice at WWJ
23 Art Gillham, "The Whispering Pianist"
25 Harry Ebrhart, "Dream Daddy" of WLIT
26 Correll and Gosden of "Kinky Kids Parade" fame, at WEBH and other stations.
27 Norman Brokenshire, popular at WRC, WJZ
29 Jane Novak, Blues Singer of Twin Cities, WCCO
30 Jean Sargent, the original, now at WHT
31 Ralph Emerson, popular organist at WLS
32 Edna Adams, of KPRC
33 Pat Barnes, vaudeville announcer at WHT
38 Walter Wilson, "Uncle Bob" of KYW
40 Ray-O-Vac Twins, known country-wide
41 Art Linick, KYW's Mrs. Schlagenhauer
42 Fred Hamm of WTAS, now WLIB, fame

"BIG RABBIT"

(Continued from page 28)

We dragged the boat along by clutching overhanging branches. A shout, which seemed to come from the river bank a few yards behind the boat, voiced the discovery.

"They've heard us— They're coming," Danforth said aloud: "Miss Tonneson, please hand me that shot gun."

We could hear pursuers crashing through underbrush and calling to each other through the swamp. Some plunged into the swamp or river in their headlong pursuit, splashing and crying for help. I had leaped to the motor and was turning the wheel desperately almost as soon as Danforth had called his warnng. The motor coughed several times hollowly, exploded rapidly, driving the boat in a wide arc, spat, missed, and scarcely fifty feet from the starting point, and in open water, stopped dead.

"Get her going. They're coming," Danforth said evenly. "You girls crouch low. They may start shooting if they see us."

He was crouched behind the hood, the sawed off shot gun, heavily loaded with buck shot, held ready for action.

Tugging, perspiring, I toiled at the wheel, turning it frantically striving to catch the lost spark. The negroes were coming closer. They had poured along the path to the river's edge and the light of pine torches showed at half a dozen places through the heavy growths, looking as if the swamp-forest suddenly had become alive with huge fireflies. They were crashing along unseen paths near the edge of the river, and evidently racing for hidden row boats.

SOMEONE fired a revolver twice from somewhere on the land and the bullets whined past and splashed in the river.

"Crouch lower," Danforth urged in low tones to the women. "They don't see us. They are firing at the sound."

Again and again I spun the wheel. Twice explosions raised my hopes but the engine refused to run. Perhaps in my haste I had flooded it with gasoline.

Somewhere, away in the blackness we heard a boat launched and men springing into it. Sweat ran into my eyes. I dashed it away with a hand soaked in oil and gasoline and bloody with fresh-ripped blisters.

I gave a mighty tug at the wheel. Two quick explosions came, it missed fire, caught again, and then the steady beat of regular explosions sounded like a sweet symphony to us all.

Dan raised the shot gun and sent two loads of buck crashing through the overhanging trees along the river edge, and seized the wheel.

Yells of rage, a scream of pain followed, and we heard someone floundering in the dark river. The Jason was gaining speed and racing for a curve in the river as I flashed on the headlight.

Straight ahead of us, driving out from under overhanging trees, was a rowboat filled with negroes. The white glare of light across the dark river silhouetted them clearly before us.

Three men were standing, blinded by the sudden illumination, while two pulled at the oars. One, shielding his eyes from the glare with an arm, bent toward the bottom of the boat and, as we raced down upon them he straightened up, a gun in his hand.

Danforth, when the boat shot out from the trees, had changed the course of the racing Jason, and we were headed to clear the row boat by ten feet. As the negro straightened up, gun in hand, the little detective, shouting a warning, hurled the wheel over, aimed directly at the boat and, as the negro lifted the gun to fire, he saw the peril and screamed in terror.

Before the echoes of the scream died the Jason struck the rowboat. Her sharp prow caught the frail vessel amidships. There was a momentary glimpse of black arms clutching wildly at her sleek sides, the Jason reared and leaped like a horse over a hurdle—splashed heavily upon the water, careened, righted and raced on.

Cries for help, cries of terror arose from the dark water behind us. An instant later we flashed around the bend in the river, safe from pursuit.

For nearly half a mile we continued the wild flight until all sounds of the chase were left behind. I throttled down the engine and, without a word, Danforth steered a wide circle.

"Shut off the headlight," he said, when the dangerous turning movement in the narrow channel was accomplished.

"We've got to go back for Borton," I said. "We can't leave him."

"That's why I turned," said the little detective, calmly. "They were chasing him toward the river. Evidently he made it—for there were no shouts of discovery."

"He probably swam the river and is waiting hidden on the other side," Danforth said. "We'll muffle that motor as much as possible and keep close in to the west bank. They won't be expecting us back, and if they try to reach us, put on speed."

Muffling the motor as much as possible we slipped back toward the scene of the strange drama. There were lights at intervals along the edge, but the negroes appeared to have abandoned the chase.

What became of Borton? Were the negroes entirely dispersed? Did Trimble escape? You will be interested in reading the thrilling conclusion of this remarkable story of Big Rabbit by Hugh Fullerton. It will appear in the July first issue of Radio Digest.

WRR SECOND STATION

(Continued from page 6)

oratory from sending stations. This all being true, WRR was crowded out of the air. Its obsolete equipment could not be replaced. Therefore the station was closed down by the government in April of last year.

On May 1, 1925, after the government had ordered the station closed down, Mr. W. J. Reid, a Radio fan, called on the police and fire commissioner, Mr. Turley and asked if there was any chance of getting WRR back on the air again. The commissioner advised Mr. Reid that the city did not have any funds to purchase new equipment or to support a first class station. He said that it could not be done unless funds could be raised by private subscriptions. Mr. Reid suggested that Mr. Turley call a conference of Radio fans to discuss ways and means to revive the station. This Mr. Turley did.

The enthusiasts gathered at the city hall one morning and wondered whom to make chairman. While they were discussing the matter Mr. James E. Forrest, president of the Central Bithulithis company came along. He was at once made chairman. The fans went to work earnestly and in less than ten days a petition containing more than 5,000 names was filed with Police Commissioner Turley asking him to revive the old station.

The city began the funds by giving ten thousand dollars to the station. This amount was about one-third the amount needed to put WRR on the air. The Radio committee went out and collected funds to complete the necessary amount. Several business concerns donated to the station. Soon the amount of ten thousand dollars was raised to purchase equipment for the station.

An ordinance creating a Radio commission of eight persons to have control of the operation of WRR was passed on by the city. The commission consists of J. E. Forrest, chairman; W. J. Reid, secretary; Louis Turley, Simon Linz, A. J. Balcom, M. L. Buckner, H. B. Beeler, and E. J. Keist. This commission, created by a special city ordinance, is said to be the only one of its kind in existence.

The set is of 500-watts capacity and the wave length is 246 meters. It is located in Fair Park, where towers and office equipment was furnished by the Magnolia Petroleum company. This station is viewed by thousands of people visiting Dallas during the fair. Mr. D. V Wilson is supervisor of the Radio plant in Fair Park.

A ten thousand dollar studio on the parlor floor of the Adolphus hotel was furnished by the hotel company. The studio is one of the most elaborate in this section. The walls are sound proof. A concert grand piano is installed in the studio.

Mr. John Thorwald, the announcer, is a talented baritone, who has been singing in Dallas for several years. His voice is especially adapted to Radio work. Mr. Thorwald is a native Texan but he has spent a large part of his life out of Texas.

He was with the twenty-second Omaha detachment entertaining squad during the World war. While in the front lines he was severely gassed. After returning home he had to spend a year in the mountains to recover his health. Mr. Thorwald has studied voice in several of the leading American schools.

With enough power to reach every section of the nation the plant was in readiness on the evening of October 10, 1925. The opening of the new plant has been heralded in the leading Radio magazines of the nation, and as a result it is believed that people from the gulf coast to the Canadian border were eagerly awaiting the return of old WRR.

It is hardly an exaggeration to say that WRR carries the voice of the "City of Achievement" into at least twenty million homes and we trust they will continue on and on to hear that voice.

PICTURES EYES OF AIR

(Continued from page 4)

Marcella, "assistant" Twilight Story Man.

New Orleans, good old New Orleans, beloved metropolis of the South for one century and more than a quarter of another, is a city of tradition. Music, gaiety and splendor were never lacking in New Orleans and in this swift, jazzy age New Orleans sets the pace as brilliantly as ever. Dancing along in her syncopating van is the famous Owls Orchestra of the Roosevelt hotel. They are men and therefore a little more vain of their personal appearance as they have paused for the moment for you to give them the once-over with your "eyes of Radio." Men should do that—they always need all the personal pulchritude they can summon for the purposes of a picture. Being Owls, these gentlemen of the midnight syncopators are wise; they are showing you their smiles and how they look between numbers at the studio.

With girls it is different. They have a wonderful grace of line and symmetry as you may see by studying the Six Musical Misses, lower right hand corner (page 4). As the press agent says, "every Miss is a hit." You can well believe that now that you actually see them. Take the lady at the drums and imagine a man in that position. He would be spurting perspiration and his collar would be climbing over his ears while she is the soul of music personified. Then take Miss Lilly Marphis with the cornet—sylph and grace from the tip of her tiny black slipper to the curve of her crown. A man playing? His cheeks would be distended, his elbows up and there would be sharp, grotesque angles in every direction. This is the only girls' orchestra in the Crescent City but it plays for an audience that reaches to Canada and to the ships thousands of miles at sea.

Thus you see, through these eyes, the pictures, the faces, the personalities of the artists who talk to you, sing to you, and play to you through the medium of Radio whether you be in a wilderness or a palace of luxury.

WOK and WBCN Join C. B. A.

CHICAGO.—WOK, Neutrowound station, and Station WBCN, of the Southtown Economist, have been accepted to membership in the Chicago broadcasters association, according to an announcement by Jack Nelson of WJJD.

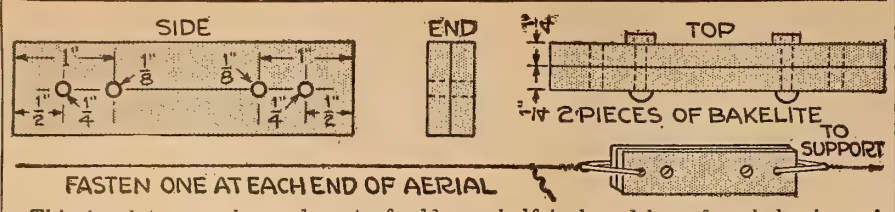
SCRAPS MAKE AERIAL INSULATORS



This insulator can be made out of odd scraps of bakelite that you probably have lying around. Cut one piece 3 inches long and 1 inch wide and then make three more just like it. These four pieces make two insulators, one for each end of the wire. Measure in from each end, one inch and one-half inch and bore four holes in each piece. Put 6-32 machine screws through the holes one inch in and put on hex nuts. The remaining two holes are for antenna wire and support wire respectively.—Frank Falvo, 2 Blanck's Way, Pittsburgh, Pennsylvania.

S-O-S PORTABLE SUPER

(Continued from page 10)

reen 5 connect to terminals 53 and 54 of Carter loop jack, while remaining terminals 62 and 63 of Victoreen 5 connect to antenna and ground posts, respectively, upon the face of the panel. Connect terminal 42 of the Carter potentiometer C to 20 of socket 4, and 36 of rheostat D to 28 of socket 4.

K.—Connect F of Victoreen 4 to 23 of socket 7, and 14 of socket 6 to P of Thordarson transformer T-1. Connect 14 of socket 6 to one terminal of the .001 mfd. Aerovox condenser. Connect remaining terminal of this condenser to + post of 4½-volt C battery.

L.—Connect 7 of socket 7 to G of transformer T-1 and 15 of socket 7 to P of transformer T-2. Likewise connect 8 of socket 8 to G of transformer T-2. Connect 16 of socket 8 to 59 of the Carter output jack (this is the terminal making connection with the frame of the jack). Connect 58 to positive or B+ terminal of T-2.

M.—A three foot length of wire is now connected to 23 of socket 7. This wire will form the connection to the plus or positive A battery. Another three foot length is connected to 56 of the Carter output jack to serve as negative or minus A battery lead.

N.—Connect terminal 57 to 41 of rheostat E and at this point attach the wire to the + terminal of the C battery. Next connect —F filament posts of both transformers, T-1 and T-2, together and to the — terminal of the C battery.

Battery Connections

This completes the wiring. Check back to see that all is correct. The A batteries are now to be connected, using 3 of the National Carbon No. 7111 type. Connect them in series (as shown in figure 9 on page 9 of the first June issue). These batteries are to be placed in the upper right (upper left if looking in the back), compartment of the portable case.

Next connect the four National Carbon No. 764 B batteries. They also are to be connected in series and placed in the upper left compartment of the case. The — or negative side of this B battery should be connected to the — or negative side of the A battery, while the other end or 90-volt tap of the B battery should be connected to B+ terminal of transformer T-2. A lead to the 45-volt B battery tap should be connected to B+ post of transformer T-1. The negative A battery lead, which is connected to 56 of the Carter output jack, is now connected to the negative terminal of the A battery, while the positive A battery lead, which is connected to 23 of socket 7, is connected to the positive terminal of the A battery.

Insert the tubes and grid leaks, connect antenna, and the receiver is ready for operation by plugging in the loud speaker. Please understand that the wiring of the output jack is arranged to act as a filament control. The receiver will not work therefore until a plug is inserted in jack. Those builders who desire to employ the loud speaker horn shown at the center of the cabinet need only fasten a head phone or small phonograph attachment type of receiver to the rear opening of this horn, and from each terminal of this receiver run wires to terminals 58 and 59 of the output jack. This arrangement permits the portable speaker to be used by inserting a dummy plug in the output jack, or the portable and an outside speaker in parallel if an auxiliary speaker is connected to the plug.

Should one desire to use only the auxiliary speaker, the connections outlined for the portable speaker may be ignored.

The completed receiver is now ready for tryout by connecting the aerial and ground to their respective posts upon the front panel. Tuning is accomplished in the usual manner with the exception that the potentiometer control will need to be varied carefully in order to determine its best setting.

Changes for Loop Aerial

No mention has been made for the use of a loop, although the binding post between the aerial and ground posts is installed for builders desiring loop reception. The ingenious set maker can wind a loop in one of the case's two covers, or a small folding center tapped loop can be carried. For loop reception the Hammarlund midget condenser is mounted on the front panel just to the right of the loop jack and the following changes in the wiring are made in order that either loop or aerial and ground may be used:

The wire connecting one side of the "pick-up coil" of the oscillator to the wave length tuning condenser is removed. Now connect the center binding post on front panel (used for the center tap of the loop) to pick-up coil of the oscillator. A connection is now made from the rotor plates of the wave length tuning condenser to stator of the midget Hammarlund condenser, and rotor of this small condenser is connected to the P or plate terminal of the first detector socket. This socket is connected to the input transformer. Slight adjustments of this condenser will have to be made, but once adjusted it will seldom require further attention. Its use with a center tapped loop will make the receiver more selective although it is advisable when using a portable to ignore the use of a loop, as a short length of insulated wire thrown over a nearby tree limb will be found an ample energy collector and saves the trouble of carrying a loop.

A word about tuning is added. Refer back to the graph (page 10) of the Amsco condensers in passing through the tuning range. If the builder will also use it for noting the wave lengths of stations he receives, in a short time an ideal tuning chart will be had. In addendum the writer wishes to remark that many builders are prompted oftentimes to use any old make of rheostats or jacks. Carter products are specified and used in this receiver with the assurance that their compact ruggedness and careful manufacture will yield satisfactory operation over a long period.

It is the author's desire to caution those of you who wish also to use the receiver in your home, that in so doing, the battery types specified should be replaced by those types recommended by the National Carbon company for heavy duty service. The types specified in these articles are, of course, ideal for portability, but they are not intended to withstand such long usage as would be encountered in the home, where the heavy drain of many hours per day require special types of larger and heavier batteries.

OLD STATIC'S FUNERAL

(Continued from page 11)

We need not be surprised to hear that the silent members of the west coast have been biding their time and may furnish us with a superior device of some special type. Murmurings of such an event have reached my ears, and I hope to give some very valuable information from California in an early issue.

(The recommendations of an experienced "Ham" Radio man will be disclosed in the article on subantennas which will appear in the issue of Radio Digest on the news stands June 30.—Editor's Note.)

A&B Battery Charger ONLY $2

Satisfaction Guaranteed

Charges any type of storage A or B battery, using a few cents worth of ordinary house current, either alternating or direct. Cannot injure battery. Complete instructions enclosed. Anyone can operate. No expensive "extras" to buy.

Why pay $10.00 to $15.00 for a charger when you can get this splendid GUARANTEED R. B. Charger by mailing us two dollars (bills, money order, check or stamps) plus ten cents in stamps or coin to pay mailing costs. Charger will be sent postpaid. If you are not satisfied, return within five days and we will refund your money. Order at once—TODAY.

Radiophone Broadcasting Stations

Corrected Every Issue—Part IV

FIND MISTAKES AND YOU'LL GET DOLLAR

ONE DOLLAR will be paid to the Radio fan reader of Radio Digest submitting the most errors in any one station's listing in the Directory of Radiophone Stations, which appears in six parts, serially continuously on the next to last page. Letters must reach Radio Digest's office not later than one week from date of issue corrected. Readers are not limited to correcting one station, but such corrections must be verified by the stations themselves, and NOT by comparison to other so-called accurate Radio directories or lists. Verifications must accompany corrections. Turn in corrections for as many stations as you can find—if you can find errors! Use separate sheet of paper for each station submitted and place name and address on each sheet. In case of tie, duplicate awards will be made.

United States (Cont'd)

NOTE.—The fourth part of the schedule list appears below. Part five appears next issue.

WLIT, Philadelphia, Pa. 394.5m-760kc. 500 watts. Lit Bros. Announcer, Harry E. Ehrhart. Club, "Morning Glory." Daily ex Sun, 12:02 pm, music; 2, music. Mon, 4:30 pm, 7:30, 8, 10. Tues, 11 am. Wed, Thurs, 4:30 pm. Wed, 7:30 pm, 8, 10, 11. Fri, 7:30 pm, 8:45, 10. Eastern daylight.

WLS, Chicago, Ill. 344.6m-870kc. 5,000 watts. Sears, Roebuck & Co. Slogan, "World's Largest Store." Announcer, Donald F. Malin. Daily ex Sun, 6:30-8 am; Y.M.C.A. 9-2:30, half hour markets; 1-2 pm, farm program; 2:30-3:30 pm, Homemakers' hour; Wed, Fri, 6-12 mid; Sat, 6:30-1 am; Tues, Thurs, 6-8 pm; Sun, 10:50-1 pm, U. of Chicago, Church and concert; 7-9 pm, Little Brown Church. CROSLEY

On June 8 and 9, the Fourth Annual Convention of the Crosley Distributors was held in Cincinnati.

Powel Crosley, Jr., announced the most startling line of radio receiving sets in the history of the industry.

Every radio dealer is urged to get the story from his nearest Crosley distributor immediately.

STUDY OUR COVER GIRL—THEN GUESS

DID you take a psychoanalytical observation of the face on the Radio Digest cover this issue? Before you read any further do so and guess the color of her hair.

We call your attention to the calm, well-poised expression. Cover one half of the face with your hand, then study the other half. One is the twinkling taunt of a mischievous elf, the other is the classical serenity of Minerva.

And the crown of glory over all—did you guess it? Well, it's red gold. She was picked for the part of Hazel Stanton in the Radio Digest's famous mystery play, "A Step On the Stairs," at the Denver station of General Electric and her name is Miss Dorothy Reynolds. She has done many other noteworthy things at this mile-high broadcaster and is well known to all KOA listeners.

ARNOUX TOPS MAY IN SPECTACULAR CLIMB

VOICE OF HOT SPRINGS UPSETS GOLD CUP "DOPE"

Gaylord of WTAG Also Gives Thrill—Pat Barnes Holds His Own—Canada Is Dormant

Crashing up from eleventh place and upsetting the "dope bucket" by polling almost ten times as many votes as he had previously been credited with, G. C. Arnoux, announcer and director of KTHS, the New Arlington hotel station at Hot Springs, Ark., clinched first place this issue in the 1926 Gold Cup Award competition for world's most popular announcer. In so doing he took the lead away from Earl E. May who has occupied top position this year since actual standings have been published.

In the last previous standing, Mr. Arnoux had gained seven places by arriving at eleventh from eighteenth in order. The tremendous support being given the new leader by listeners all over the country indicates that he is one of the most popular and strongest contenders for the 1926 Gold Cup Award.

Gaylord of WTAG Gains

Almost as spectacular a rise as that of Mr. Arnoux is shown this issue for Chester Gaylord, announcer for WTAG, the Worcester (Mass.) Star-Telegram broadcaster. This easterner rose from sixteenth to sixth place by adding more than 10,000 votes to his total.

Other contestants for the most part added to their count but maintained the same order as previously, that is, allowing for their being nosed down several places by the radical jumps of Arnoux and Gaylord. On the other hand some few candidates even increased their advantage despite the forced downward movement.

Pat Barnes, of WHT, kept fourth place by topping A. S. Kyne, of KMMJ, who had gone above him last issue. Jerry Sullivan, of WQJ, gained two notches from nineteenth to seventeenth. John T. Schilling of WHB, came from obscurity to eighteenth in line. Paul Johnson, of Gold Medal WCCO, E. L. Tyson, of WWJ, and Sen Kaney, of KYW, each gained one place apiece.

Standing of Leading Twenty-Five

The present standing of the first twenty-five candidates is given below. The figure in parentheses following the name and station of certain announcers, indicates their order in the standing last issue if they were in the first twenty-five:

1. G. C. Arnoux, KTHS (11).....22,423
2. Earl E. May, KMA (1)..... ...19,514
3. N. Brokenshire, WJZ (2).....16,831
4. Pat H. Barnes, WHT (4).....14,456
5. A. S. Kyne, KMMJ (3).....12,753
6. C. Gaylord, WTAG (16).....11,688
7. Henry Field, KFNF (5).....10,916
8. The Hired Hand, WBAP (6).. 7,843
9. Phillips Carlin, WEAF (7).... 5,286
10. Peter MacArthur, WOC (8).. 3,802
11. C. R. Randall, WSMB (10).... 3,427
12. Louis J. Johnen, WLW (9).... 3,329
13. Lester Palmer, WOAW (12).. 2,884
14. Gayle V. Grubb, KFAB (13).. 2,535
15. R. W. Griffin, WHO (14)..... 2,520
16. Lambdin Kay, WSB (15)..... 2,186
17. Jerry Sullivan, WQJ (19)..... 1,683
18. John T. Schilling, WHB..... 1,584
19. Wm. (Bill) Hay, WGN (17).. 1,519
20. Paul Johnson, WCCO (21).... 1,457
21. Edw. B. Husing, WRC (18).... 1,417
22. Harold Isbell, KNX (20)..... 1,402
23. E. L. Tyson, WWJ (24)..... 1,294
24. Sen Kaney, KYW (25)..... 1,135
25. E. Konecky, WOAW (22)..... 1,026

Canadian Silver Cup Standing

Canada is dormant. Standings of the leading five candidates for the 1926 silver cup to be awarded to the most popular Canadian announcer, have not changed in

Looking Ahead

Speaking of the Big Pacific Coast Radio Show, did you ever hear the inside story of Major Lawrence Mott and his Radio activities on Catalina Island? Thousands of fans who have written to KFWO have received bags of silver ore taken from the mines near this island broadcasting station. Read it in the next Radio Digest, out July 14.

A Little Weather-Beaten Church in Oakland, California, suddenly found its field of usefulness expanded over a vast area through one of the San Francisco Radio stations. Then came a change of plans and the little church found itself alone with no place to go—such was the beginning of KTAB as told in the mid-July number of Radio Digest.

It Has Been Something of a Task to Unite the Junior Members of the Household into some common interest through the Radio. Big Brother Emery of WEEI, Boston, seems to have discovered the secret with his Big Brother club. Pictures and story in a coming issue of Radio Digest.

Down in "Santone," Texas, the City of the Alamo, the quaint little river and the ancient missions, is the home of Radio Station WOAI. From this station may be heard the distinguished Jose Conrado Tovar and the Gebhardt Mexican players. The story will appear soon.

Fiction Features in Our Next Issue will include the beginning of a new story that will attract wide interest throughout the country. Van Demark's "Sure-Fire Stuff" will introduce Bobby in a new light and you will like Sheila and Johnny better than ever. First installment this issue.

England's Radio Fans Are Ablaze over Sir Oliver Lodge's brand new circuit. What it's all about and why, will be a brand new story in the next issue, out July 14.

"Dos and Don'ts" is the subject of another interesting article by the Technical Editor. These are convenient, short and snappy helps for home repairs on your receiver and its accessories.

SHORT WAVES

By Marcella

From the heaps of correspondence WHT dialers have piled upon my desk, it appears that I will have to open the program today with a few numbers dedicated to the personnel of that station. We will first hear a wedding march in honor of Pat and his new bride.

Ta-ta-ta-ta. Yes, he's gone and done it! And the lucky girl was Eleanor Gilmour, who many of you have heard singing from the Wrigley building studio. Now watch his Marcella mail fall off! Brief sketch of Pat: handsome, brown eyes, straight black hair, tall and not too slender, dark sheik type brunette, but a man's man. Weighs 168 pounds, stands 6 feet tall, and is 32 years old. Was overseas in the A. E. F., and made fame in his "A Buck on Leave." Don't think he has ever written any music, "Linne."

And does Pat play around with Al Carney, asks "Betty." Probably so, Betty, as Pat and Al are just as good friends outside as in the studio.

Now a soft organ melody for Al. Our friend, Mr. Carney, is a smiling 195-pound bachelor, 25 years old and just living by himself in a cozy corner. For diversion he loves to drive his car about with both arms.

All right, the next is a tenor solo for Oscar Heather, "Radio's Smiling Tenor." For the benefit of "Anne," "J. M. R.," and others, I'll be very thorough. Oscar, besides having a personality-plus lyric tenor voice, is a tall, broad and heavy bachelor weighing 230 pounds, rising 5 feet 10 inches, and possessing blue eyes, brown hair, fair skin and beautiful teeth. His disposition is sunny, aversion is women, hobby is music and age is 30. Born in Mitchell, South Dakota, and was started in Radio by Morgan L. Eastman of KYW.

You will enjoy the classical piano solo Miss Helen Rauh, WHT's delightful accompanist and Saturday morning juvenile program conductor. Gee, she's dandy! Like her myself. Unruffled, smiling disposition that breaks out like rays of sunshine to meet you. Beautiful dark brown eyes and naturally curly brown hair, 5 feet 2 inches above the floor, 23 years old since she was born at Phoenix, Arizona, 110 pounds light—ah-h-h! Her pet aversions, to quote her, "people who can't be themselves, and dumb women." Her hobbies, sticking her finger in Jean Sargent's ice cream at lunch time, her music, outdoor sports and her fiance. Yes—it's true, but of course, competition still might have a chance.

And next let us have the noon farm report from Edwin Kemp, whose particular hobby this is. Edwin, when not exercising his dramatic tenor voice, is usually wondering what other people think he looks like. The picture, aided in quoted spots by Mr. Kemp's own imagination, is this: Eyes, "dizzy" blue; hair, "dirty" blond; complexion, fair but "hurts like the devil to shave"; weight, 165 pounds; height, 5 feet 8 inches; age, 28; disposition, happy; dislikes egotism, flies and going without meals; likes music, Lillian Knowles, children and other animals. Edwin was born in Louisville, Kentucky, with a southern accent, and while he is still a "happy" bachelor, methinks he is not long to be so.

Before signing off, we must hear last, but not least, from our own Jean Sargent, WHT's Jean, who will address the Women's club. Jean is one of WHT's best bets and most liked staff members. Personality is just what you'd imagine from listening to her; age, now getting less every year; matrimonial condition, unhitched; height, 5 feet 8 inches; weight, "it takes too many pennies," quoth she; hair, silver gray; likes her work first; dislikes snakes; plays bridge excellently; entertains royally, and is one of those few persons you can enjoy listening too by the hour. Incidentally she prefers Chicago to Boston.

It would not be fair to sign off without delivering the message that each and every one of the WHT "gang" (except Pat) gave to nosey Marcella when she sought them out for statistics. "Why talk about us?" they asked. "Tell everybody that Pat Barnes is the best in the world, is nice to work for, and he certainly should win the 1926 Gold Cup for most popular announcer." There—I have done as they asked. Marcella will adjourn to the next studio.

* *

Hah, smiling "Bill" W. G. Hay, the Scoo-ootchman who has been doing the main part of the announcing from WGN and WLIB, has received a deserved promotion to manager of the two stations. But he is still doing most all the announcing. Between his arduous duties he manages to squeeze in a few games of golf, each stroke of which he carefully recounts to me the next time I see him. You ex-KFKX fans surely remember Bill, don't you? At this point, I might as well answer "M. J." who asks about Charles Erbstein. Yes, Charlie is back again on

(Continued on page 14)

COOLIDGE TO BROADCAST JULY 4

PHILHARMONIC WILL OPEN AT WJZ JULY 7

C. B. POPENOE ANNOUNCES SUMMER ARRANGEMENT

To Give Stadium Concerts Wednesdays and Saturdays Over WJZ; Also Saturdays Over WRC

NEW YORK.—The Radio audience will have the opportunity of listening to the Lewissohn stadium concerts of the New York Philharmonic orchestra twice weekly during the coming summer, announces Charles B. Popenoe, manager of Station WJZ. WJZ will broadcast the splendid concert biweekly, on Wednesday and Saturday nights and WRC in Washington will also broadcast them on Saturday nights. Each of the concerts begins at 8:30 p. m. Eastern daylight saving time.

The opening concert will be given on Wednesday night, July 7, and the series will continue throughout the summer until September 1. As in the past few years, the New York Philharmonic orchestra will play at all of the stadium concerts.

An additional feature of the opening concert on July 7, will be an address to be given in the intermission by Adolph Lewissohn, donor of the Lewissohn stadium, who is often referred to as "the Andrew Carnegie of the Musical World,' having given generously of his wealth for the advancement of music in America in much the same way that Carnegie advanced literature through his policy of establishing libraries throughout the land.

Van Hoogstraten Chief Conductor

The chief conductor for the season will be Willem Van Hoogstraten who has led the stadium concerts for the past four years. The guest conductors will be Nikolai Sokoloff, of the Cleveland orchestra; Henry Hadley, associate conductor of the Philharmonic orchestra; and Frederick Stock, conductor of the Chicago Symphony orchestra. Messrs. Sokoloff and Hadley are already well-known to the Radio and stadium audiences; but Mr. Stock's appearance will be his first in the New York summer season.

Mr. Van Hoogstraten will open the season on July 7 and will conduct until July 28, when Mr. Sokoloff will appear until August 3. Henry Hadley will lead the concerts from August 4 until August 10, with Mr. Van Hoogstraten reappearing for the week of August 11. Mr. Stock is to conduct during the week of August 18, and Mr. Van Hoogstraten will conduct the concerts of the final week, beginning August 25.

Listeners to Build Final Concert

As an added feature of the broadcast stadium concerts this year, the Radio audience is to be allowed to select the compositions to be rendered by the Philharmonic in the last Radio concert of the season. As the season nears its close, listeners will be requested to send in the names of the selections which they consider would make an ideal farewell concert, or a selection which they have particularly enjoyed, and from these selections of the Radio audience, the program of the final concert will be compiled.

This announcement by the head of Station WJZ, is a direct refutation of the common assertation that the summer is "dead season" for Radio. In discussing the coming summer, Mr. Popenoe expressed himself of the opinion that this summer will bring to the listening audience bigger and better programs than they have ever before experienced, excelling in most cases even the mid-winter programs of seasons past.

"Hoover Should Not Be Only Head"—Colleges

University Broadcasters Prefer Commission for Radio

UNIVERSITY PL., Nebr.—Broadcasting should not be left entirely in the hands of Secretary of Commerce Hoover, unanimously declare the forty members of the Association of College and University Broadcasting Stations. All members, however, expressed themselves in favor of the general provisions of the White bill, announces J. C. Jensen, secretary, if adequate machinery for a court of appeal is provided to which disputed questions may be referred, with assurance of prompt decisions and minimum expense.

As between establishing a separate Radio commission and referring Radio questions to the interstate commerce commision, the members are almost unanimous in favor of the separate commission.

WJZ "IMPS" RECEIVE IVORY IMP CHARMS

NEW YORK.—Some member of the Radio audience was so favorably impressed with the concerts given by the Imperial Imps from Station WJZ every Wednesday night that he wanted to send them a token. As they all live in separate parts of New York, one gift could not be given to all of them, so he had made four little imps. The charms are about an inch tall, fashioned from real ivory and identical. The four imps are now proudly displaying the gifts on their watch chains.

JULY 4 BANGS WILL BE HEARD ON WAAM

NEWARK, N. J.—Summer broadcasting literally will be inaugurated with a bang when WAAM broadcasts Independence Day fireworks here, direct from the chamber of commerce Fourth of July celebration at the South Orange village center. Several microphones will be placed in advantageous positions for picking up the entire pyrotechnic display with maximum effect. Since the Fourth of July this year falls on Sunday, the celebration will be on July 5 at 8 p. m. Eastern daylight saving time.

CINCINNATI GIRL IS RADIO PLAYER

The charming, intelligent appearance of Miss Helen Nugent is not deceiving. Her ability at interpreting various dramatic roles has been employed to the fullest extent by Crosley Station WLW at Cincinnati. Her last role their was in "Gondoliers," played several weeks ago. She played a leading part in WLW's version of "A Step On the Stairs." Miss Nugent also sings with a pleasing contralto voice.

RADIO SECTION TELLS OF STATION CHANGES

WEW Increases Power—Three Stations Change Hands

WASHINGTON, D. C.—An increase in power, a new station at Vera Cruz, Mexico, and three changes in ownership are announced by the Radio division of the department of commerce.

Station WEW, owned and operated by St. Louis University, at St. Louis, has completed the installation of their new 1000-watt equipment and has been given permission to increase power accordingly.

The new Vera Cruz, Mexico, station has a wave length of 337 meters, power of 50 watts, and call letters CIC.

Ownership of WHBD of Bellefontaine, Ohio, has been changed from Charles W. Howard to the chamber of commerce of that city; ownership of WDBZ at Kingston, N. Y., has been changed from the Ulster County Council of the Boy Scouts of America to the Kingston Radio corporation, and WOKO, of New York city, formerly owned by Otto Baur, has been transferred to H. E. Smith at Peekskill, N. Y.

Friday Night Is Amateurs' Night at Hartford, WTIC

HARTFORD, Conn.—Have you made your Radio debut yet? This is the question which many talented amateur performers are asking each other ever since WTIC inaugurated its amateur tryout period, officially known on the program as "The Debutants."

These contests take place at 9:45 p. m. Eastern time on Friday evenings, and are open to all amateurs. Nor must they necessarily be of any one category, as songs, skits, instrumental renderings, in fact anything that will serve to amuse the Radio audience, is in order.

In case you feel the urge, and have an idea you might perform creditably before the microphone, don't hesitate, but write the WTIC Studios.

SESQUICENTENNIAL TO HEAR PRESIDENT

JULY 4 ADDRESS MAY GO ON ETHER NATION WIDE

Nation's Head Expected to Jam Exposition Grounds—E. A. Davies Is Official Announcer-in-Chief

PHILADELPHIA.—July 4, 1926, means much more than only another Fourth of July, for it marks the 150th anniversary of the signing of the Declaration of Independence. In this city a great sesquicentennial celebration of that event is being held. On July 4, President Coolidge will testify to the importance of the occasion by delivering an address at Municipal stadium, here, to more than a capacity crowd of 100,000 people.

The address will be broadcast through many stations. At the time of going to press the complete chain carrying the president's speech had not been announced. However, it is definite that WIP of Philadelphia, WGBS of New York, and WPG of Atlantic City will carry the address.

In addition it is practically certain that many regular WEAF chain stations will be linked and broadcast the message simultaneously.

E. A. Davies Exposition Announcer

Hundreds of Sesquicentennial exposition events have been and are yet to be enacted and broadcast by the Philadelphia-New York-Atlantic City chain. Several score of national organizations are holding their 1926 conventions in Philadelphia so as to enjoy the exhibitions, pageants and activities of the exposition. The Shrine convention has just closed here. The American Legion will hold its annual gathering here in the fall.

Edward A. Davies, director of WIP, Gimbel Brothers Philadelphia station, is the official announcer-in-chief of the Municipal stadium and exposition grounds events of the Sesquicentennial exposition, and he finds himself a busy man. Mr. Davies enjoys a splendid reputation for having broadcast all the important musical and sport events in the past for WIP. He is well qualified for descriptive announcing and is an accomplished musician. His keen sense of humor and large fund of up-to-date stories make his services much sought after to act as toastmaster at banquets and the like.

HE GUESSED THEY TOO WOULD GUESS

And They Did—WGBF Listeners Determine Sources of Miscellaneous Noises

EVANSVILLE, Ind.—Here's a new one! Of course, they've tried almost everything on the Radio, but maybe not this one. WGBF's program director sat holding his head, despondently attempting to think up a new skit, a new wrinkle that would tickle the ears of the jaded invisible audience.

To those not so well informed, we will inform that WGBF is the broadcaster of the Finke Furniture company here.

As the program director, Harold Finke, cogitated in vain, a crash sounding like the proverbial bull in the legendary china shop, greeted his ears.

"What was that?" he shouted, awakened from his lethargy. Unanswered, he exclaimed, "Ah-hah, I have it! We'll have a noise guessing contest. We'll make all sorts of noises and let the listeners guess what causes them."

So WGBF did. The furniture store being well stocked, it wasn't difficult to make a noise like a man bumping his shins on a footstool, a buffet full of china coasting downstairs, or many other things. Rehearsals—noise rehearsals—were given listeners prior to the event. Prizes were given for the real event. Thousands of letters came from the aforementioned jaded audience.

"It's a weak noise," concluded Mr. Finke, "that doesn't wake somebody up."

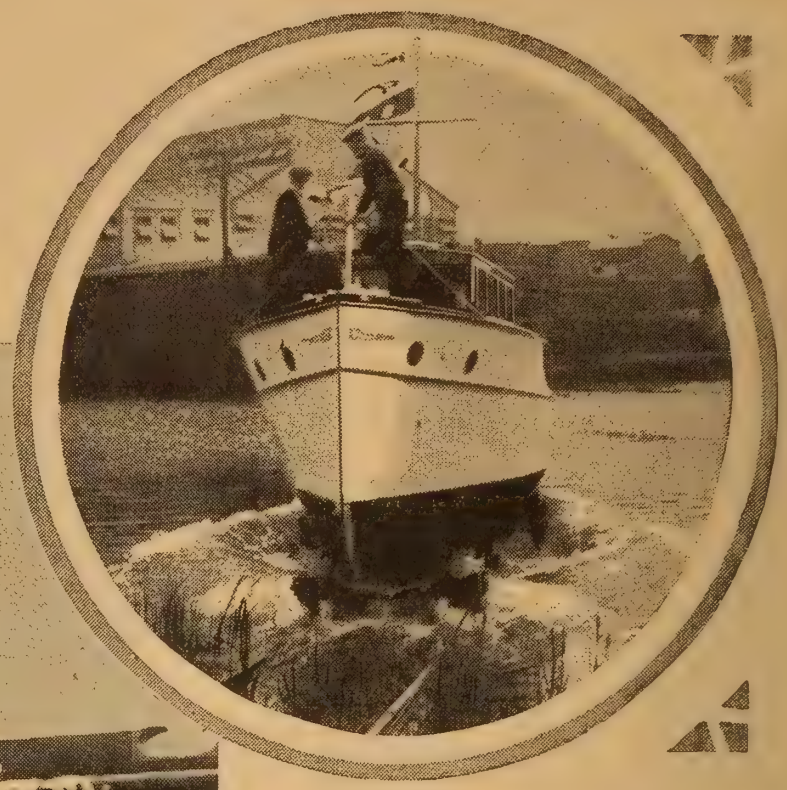
Like WGN Piano Lessons

CHICAGO.—Piano lessons over WGN are becoming quite popular. Hundreds of pupils listen each Friday at 5 p. m. Eastern time for them. Here is the way Edward Barry does it:

An illustrated copy of each lesson is sent to everyone who enrolls in the Radio Class. This the pupil has on the piano before him while he listens. With Mr. Barry in the studio while the lesson is being given is a pupil, who asks questions.

Launch New Broadcast Cruiser

GREBE Station WRMU, Aboard the MU-1, Begins Career as Event in News History. Will Follow Water Sports and Announce Direct and by Relay.



"I christen thee, the MU-1," said four-year-old Ruth Rigney crashing a bottle of champagne over the prow of new Radio cruiser. At left her dad, Douglas Rigney, owner; A. C. F. Kyle and Mrs. Rigney. Lower, Mr. Rigney. Sliding down the ways, in circle.

EACH decade marks a long stride in the efficiency of gathering and disseminating the news. Speed and more speed has been the fleeting goal. Yet in the span of one human life has marched a brilliant pageant of progress from the era of the Pony Express to modern Radio.

The days of the covered wagon are not so remote. Uncle Ezra Meeker heard the news of Abraham Lincoln's election through the medium of the dispatch rider and he obtained the news of the last presidential election from the period of the national convention to the president's inauguration speech over the air as it happened. And Ezra Meeker with his ox cart helped blaze the trail to the Northwest for the railroads!

The parade moved along. On came the telegraph, railway mail, then air mail. Old flat-bed presses were elbowed out of the line by the new high-speed web rotary presses, coupled in multiple units, with a capacity of a million newspapers between daylight and daylight. Motion pictures joined in step bringing to the eyes of the world news of great events with visual reality—in action, life-like; Byrd and his monoplane, Amundsen and Ellsworth on the Norge flying across the Arctic wastes to conquer the North Pole.

Then descending out of the air came the microphone to serve the news. First it relayed the casual news from the editorial rooms of the newspapers. Later it followed the camera into the field of action and conveyed the news as it happened. More recently this has been particularized in sporting events. Escorted by a staff of operators, announcers, engineers and assistants it has taken its position at the race track to convey the sounds of the pattering hoofs on the turf, the throbbing roar of the motor and the whine of spinning wheels at the speedway, the crash of bone and brawn on the sidelines of football fields or the crack of the bat connecting with a baseball at a world's series game.

Somehow it seems that the Radio has adapted itself better to the service of sport news. That is where speed is needed most. Sport gives the reader something to anticipate, a thrill of suspense. Skill meets skill. Champions challenge champions. Who will win? Which is the greatest team? Can this one or that one make good against those others? Always an anxious, waiting moment for the outcome of supreme effort of physical perfection.

With the advent of summer come the water sports—not so easy for the microphone to follow. But now, even that contingency has been conquered. It will not be necessary to string relay wires through the water or post a confusing flank of microphones along a course. We have now the floating broadcaster, the fleet little monitor of a parent station located in the heart of New York City, Station WRMU, aboard the de luxe cabin cruiser MU-1.

Flecked with sparkling foam from the bottle with which it was christened the MU-1 slid down the ways to its historic career just four weeks ago. It was launched at the Jackson & Sharp yard of the American Car & Foundry Co., Wilmington, Delaware. Following is an extract of the formal announcement sent to Radio Digest:

"Ruth Rigney, four-year-old daughter of Douglas Rigney, Treasurer of A. H. Grebe & Company smashed a bottle of champagne on the bow, christening the vessel the 'MU-1'. Instantly the boat slid down the ways proudly into the waters of the Delaware.

"Many Radio fans will be interested to know that in this cabin cruiser is contained the completely equipped marine broadcasting station, WRMU, designed to operate on 63 meters for relay work and on 236 for direct broadcasting. The boat and transmitter have been principally designed to broadcast aquatic sporting events as did the original marine broadcaster last year, also called the MU-1. Many race events for the Radio public were covered, including the Gold Cup Regatta, held under the auspices of the Columbia Yacht club of New York. The Gold Cup races will be repeated this year at Manhasset Bay, Port Washington, Long Island, under the same auspices.

"Other events on the schedule of the MU-1 include the New York-Bear Mountain race on the Hudson River; the New York-Block Island race; the race from Larchmont Yacht club to Glou- (*Continued on page 28*)

Solemn Old Judge Likes South

ANTHOLOGY of Announcers and Artists at Memphis Station. King Writes About Hay and Hay Writes About Keefe. Uncle Dave Macon Shares Limelight, Historic Character of Tennessee.

IT'S the personality before the microphone that gives personality to a Radio station. Fortunate is that station which shines with outstanding personalities. Such a station is WSM of the National Life and Accident Insurance company, at Nashville, Tenn., where George D. Hay, "The Solemn Old Judge," holds court and guides the destinies of the little ether waves summoned before him "for a hearing."

Almost every Radio fan has read or heard something about "Old Judge Hay," but in this anthology of the personalities at WSM we are going to present the gleanings of Mr. George A. King.

* * * *

"A STORY OF THE SOLEMN OLD JUDGE"

By George A. King

GEORGE DEWEY HAY, known to the Radio fans of the country as "The Solemn Old Judge," now director of Radio Station WSM, Nashville, Tennessee, won his way to fame and popularity not only through his original ideas of broadcasting and novel stunts, but because of strict adherence to his Radio slogan, "Never Fail to Broadcast a Smile." Mr. Hay is now living up to his reputation at WSM, where he is guiding genius of the station as well as chief announcer, for "The Solemn Old Judge" still keeps in touch with his large Radio following over the microphone, in addition to directing the activities of WSM.

"It isn't so much what the announcer says into the 'mike'," declares Mr. Hay, "as what he doesn't say, that counts toward popularity." And a host of Radio fans put their seal of approval on this philosophy when, through the Radio Digest popular announcer contest, they voted him the most popular Radio announcer in the world in 1924. "The Solemn Old Judge" is a newspaper man who recognizes the importance of the Radio as a news medium; a humorist who appreciates a joke when it is on himself as well as when it is on the other fellow, and who understands without being cynical that people and their doings are always amusing; a psychologist who knows the importance of putting himself in a position of middleman between the artist and the listeners.

Mr. Hay was born in Attica, Indiana, and spent ten years of his life in the Hoosier town. Before his debut as a Radio announcer he was a newspaper reporter and feature writer on the Memphis Commercial Appeal. He brought every bit of this experience to his Radio work and regards Radio as practically a new kind of newspaper, with a circulation running into the millions. "The announcer must have a nose for news," he says. "Radio is the world's newspaper and the announcers are its reporters."

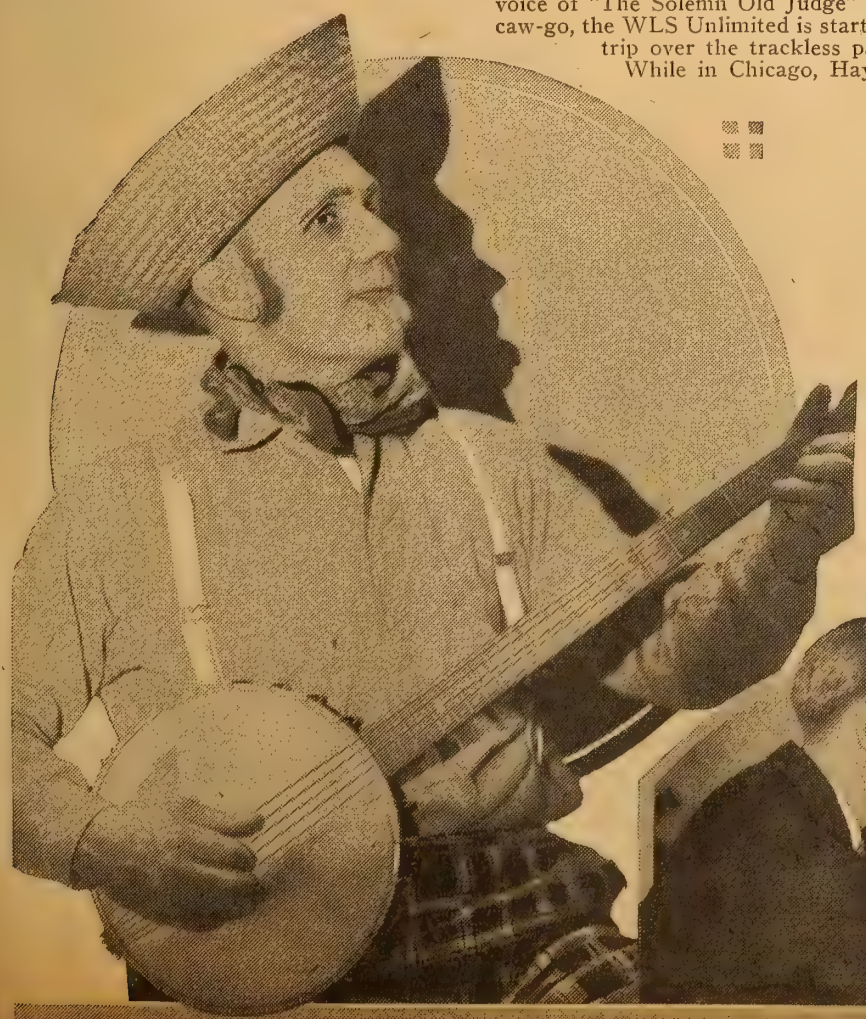
"The Solemn Old Judge" took his first Radio steps as chief announcer for WMC, the Commercial Appeal station, at Memphis, Tennessee. Everybody in the Southland listened in on George Hay when he started down the Mississippi river from WMC with his "Hushpuckiny," a river boat whistle. Within a year both the announcer and the Memphis station were known wherever people talked or listened "via Radio." The "Hushpuckiny" was Hay's original idea and it floated over the Southland like an invisible boat steaming down the inland streams.

When Hay deserted the South for Chicago about two years ago to become chief announcer for WLS there, he left the "Hushpuckiny" in Memphis and started cross country with the locomotive as his Radio vehicle. Radio listeners soon learned that when they tuned in on the long, hoarse whistle of the locomotive they would hear the familiar, cheery voice of "The Solemn Old Judge" in another second; "WLS-Chicaw-go, the WLS Unlimited is starting on its daily transcontinental trip over the trackless paths of the air."

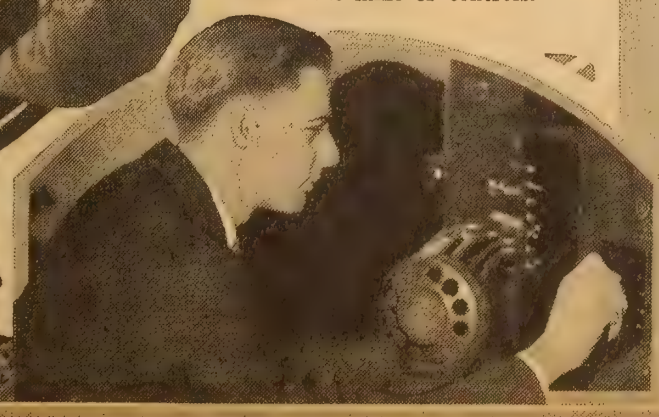
While in Chicago, Hay was the chief cog in a human appeal sent out over Radio following a tornado which cut a swath of death and destruction in Missouri, Illinois, Indiana, Kentucky and Tennessee. "The Solemn Old Judge," with the quick judgment and action acquired through his newspaper training, immediately started to broadcast appeals for financial aid for the victims over WLS. A relief fund was started, and night and day "The Solemn Old Judge" was at the microphone with little

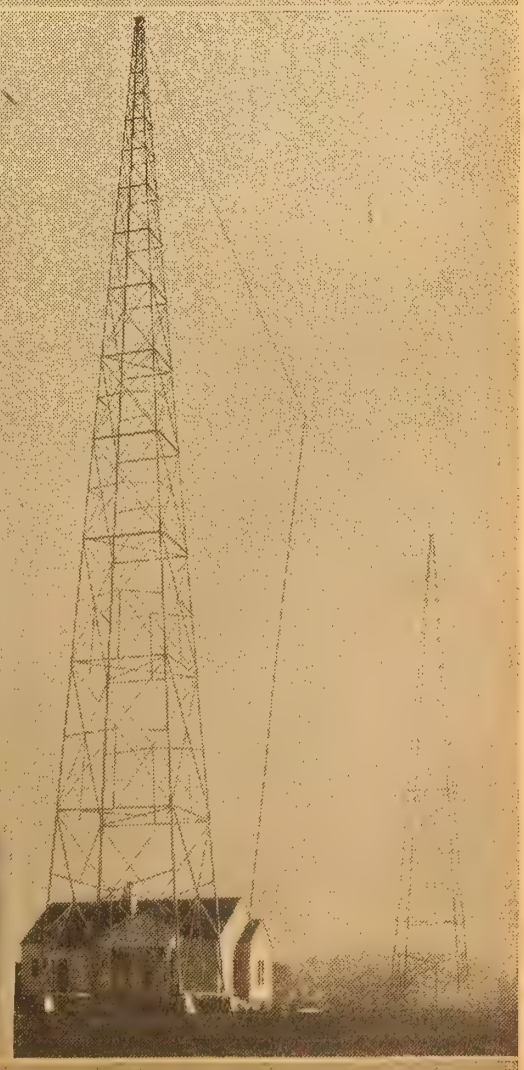
(*Continued on page 28*)

Kindly and "folksy" sorta man is Solemn Old Judge Hay (right), first winner of loving cup. Jack Keefe (below), associate director. WSM station towers at lower right.



"Dixie Dew Drop," is popular name given to Uncle Dave Macon (left) who has plunked his banjo in the ears of millions. Thomas L. Parkes (below), WSM engineer, is equally handy at the mike or controls.





Radio Plays Motor Obbligato

DETROIT, AUTOMOBILE Capital of World, Seeks New Laurels as Broadcasting Center with Station WGHP Leading Way in Adroit System of Air Exploitation.

T. Stanley Perry (left), directs musical features at WGHP. Mr. and Mrs. Eddie McGrath (below), stars in the Wolverine Frolics.

By HAROLD P. BROWN

EVER since Henry Ford quit the farm, moved to town and started in business for himself, Detroit has been bowling along with the pace makers of American cities, getting "bigger and better."

Automobiles and more automobiles has been her motto until now, it would seem, she can justly claim to be the automobile capital of the world. Yet Henry Ford cannot claim all the glory. No single automobile industry could fairly flaunt such a phrase as "the car that made Detroit famous." Detroit is famous for all kinds of cars—from twin-twos to twin-sixes. "Detroit" and "automobiles" are the real twins so far as name identity is fixed in the motoring mind.

Indirectly, out of this association, the Michigan metropolis seems now about to achieve a new kind of fame. The great indoor sport of Radio is weaving a laurel wreath for her brow.

Less than a year ago a keen-minded young man who had already made his mark in the world, literally as well as figuratively speaking, came home from a strenuous day in the office and stretched himself out in a comfortable chair in his house. He observed, rather curiously, against the opposite wall a new object of furniture. It was a new top-notch Radio receiver. He never had taken much interest in Radio because the few that he had heard did not seem to reproduce very satisfactorily. They lacked the true artistic relay of the original sounds.

Rather indifferently he watched a member of the household adjust the dials. Music, sweet and gentle, drifted melodiously into the room. It was a bit of opera from the Detroit Symphony orchestra. George Harrison Phelps sat up abruptly and alert. He was more than surprised. He was positively startled.

"I didn't know Radio was really like that," he observed, still listening. "Why that is real music! I can scarcely believe it. It seems incredible! Why that must be the magic rug and I am actually in the presence of the orchestra! How can it be?"

FROM that moment the man who created and acquainted the world with the unique style of advertising of the Dodge Brothers motor cars was a Radio enthusiast. He hailed it as a triumph in the way of a new vehicle for entering the American home with treasures from the world of art. He saw the practical side of it, too, for he was the head of a great advertising concern bearing his name. Yet he scorned the thought of utilizing Radio to cheapen the works of the masters harnessed irreverently and irrelevantly with petty exploitation.

At last he devised a way and Station WGHP, Detroit, came into being. It was inaugurated last autumn, dedicated to the best that Radio could produce. Its mission would be to convey, unostentatiously, a tribute of appreciation from the united clientele of the George Harrison Phelps, Inc., national advertisers, to patrons and the public in general.

(*Continued on page 26*)

Talented musicians who are capable of playing the best in unison or in solo make up the operatic features and the Little Symphony orchestra. Among the several who have particularly distinguished themselves are the ones whose pictures are seen here: Mildred Carner Johnson (extreme left), contralto; Albertine Schmittke (second), soprano; Leona E. Mitchell (center), soprano; Mme. Gizi Szanto (third), pianist, and William D. Laurie (right), managing director.

Travelers Hear Station R. R.

SCENE: Waiting room of a metropolitan railroad station a few years hence. Broadcasting studio seen through a window from the main waiting room. Loud speakers placed about big room convenient for a thousand or more passengers. Announcer at mike.

"LADIES and gentlemen: While we are waiting for the Pullman boys to get sleepers ready for the Nighthawk Express to Chicago we will listen to a few negro melodies by the George Brothers of Georgia."

Four white jacketed colored men may be seen through the transom taking their position before the microphone. Soon the vast waiting room is resonant with their voices intermingled with strains from banjos and guitars. The singers finish one song and then another. People come in from the street until every seat is filled. The big waiting room is transformed into an auditorium. The announcer steps again to the microphone. His voice is heard from the loud speakers.

"Twenty minutes before the Nighthawk sleepers are ready. I have some very good news. Mr. Tito Curci, the famous tenor of the Metropolitan opera, has just come into the station on his way to Chicago and has consented to sing for you."

The great artist is observed removing his overcoat and a moment later he is heard and his golden voice thrills the audience that now nearly fills the station for it happens that nearly every evening now some celebrity may be depended upon to be heard in this station. Sometimes a program may be heard brought in from a distant broadcasting station.

Is this mere fancy? No, sir, it is not. The idea was conceived some time ago by J. O. Hackenberg, superintendent of the Philadelphia terminal division of the Pennsylvania Railroad. In a modified form it already has been installed in the Broad Street station of that line in Philadelphia.

John R. Harper, an employe of the railroad whose voice had been heard from various of the local broadcasting stations was selected to announce and direct. The expressions of surprise and satisfaction on the part of the waiting passengers seemed to warrant all that had been hoped for. K. D. Pulcipher, editor of the Pennsylvania News, was asked to prepare the following report of the experiment:

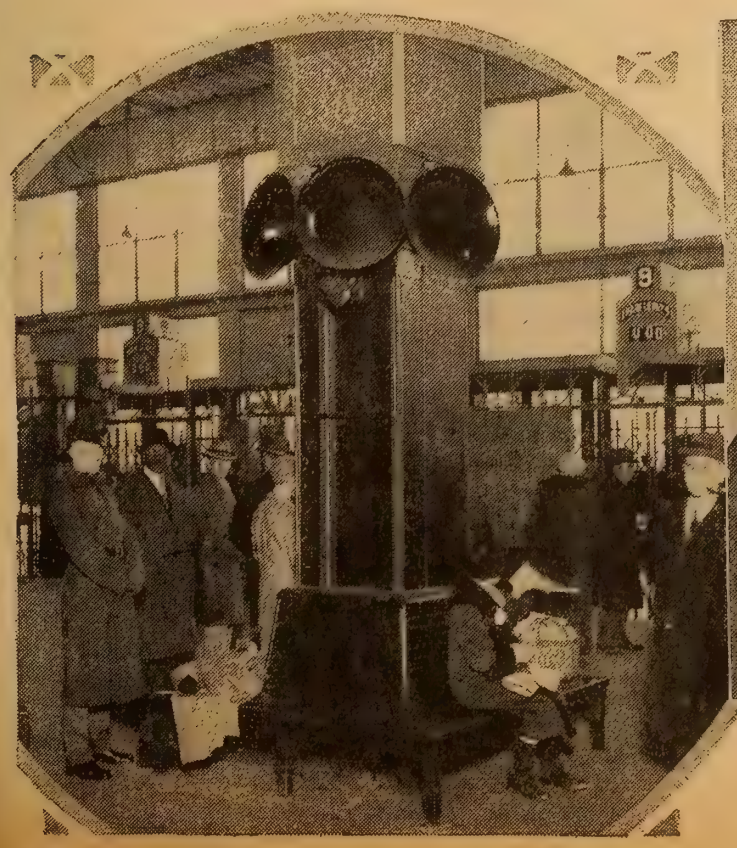
PENNSYLVANIA Lines Install System to Inform and Entertain Passengers in Philadelphia Waiting Room. Broad Service May Follow.

Above may be seen the first "Station R. R." in America with uniformed announcer at microphone located at Broad Street station, Philadelphia. At right is near view of announcer at microphone. Only antenna is missing. Lower pictures show loud speaker arrangement.

By K. D. PULCIPHER

Editor of The Pennsylvania News

A MINIATURE broadcasting system is now being used with marked success for train announcing by the Pennsylvania Railroad in Broad Street station, Philadelphia. An experimental test made several weeks ago, in which temporary equipment was used, clearly demonstrated the advantages of broadcasting train (*Continued on page 30*)



John R. Harper of Penna. Lines, experienced Radio broadcaster, is first "Station R. R." Announcer. He jokes and chats over mike.

SURE-FIRE STUFF

by HARRY VAN DEMARK

IT WAS TOUGH LUCK When an Accident Broke Up the Vaudeville Team of the Dancing Shambaughs. Sheila Had to Carry On Alone, Make a Living and Pay the Doctor Bills for Bobby. Then Johnny Clavering, the Headliner, Saw Her, and Just in Time—. It's a Peppy Romance of Love and Danger Behind the Footlights—This SURE-FIRE STUFF by Harry Van Demark.

JOHNNY CLAVERING paused in the wings as a deafening round of applause came from the auditorium. Appearing in the next-to-closing position at the Palladium, billed as "the world's greatest monologist," Johnny had finished dressing and strolled upstairs some time ahead of his turn as he frequently did. It was the opening matinee of the week, and on such occasions he often watched the other acts from the wings, or through the little square hole in the tormentor.

Out in "one," singing syncopated melodies before a silk drop, was about as charming a bit of femininity as Johnny had ever seen.

"Clever kid, ain't she?" queried the stage electrician. His eyes were glued on the cue sheet, as he gradually adjusted the dimmers, and made the transition from "whites" to "blues," as called for on the light-plot.

"Seems to be," Johnny returned. "Who is she?"

"Some new gal from the West. Name's Sheila Shambaugh. Took the place o' Hindle and Harrington, outa the bill on account o' sickness."

Johnny nodded. "A nifty little hoofer," he observed.

Sheila Shambaugh was small, not in height so much as in extreme slenderness. Her lithe body had all the hard gracefulness of a boy's, with the delicacy of a young girl's fragile bones. She had a head of glorious brown hair, bobbed in the prevailing fashion, and curling close to her neck, and brooding, black, velvet eyes that suggested Latin forebears. Her tilted chin and indeterminate nose matched her curly locks.

Her slender, but graceful limbs, spick and span in black silk tights and dancing pumps, flashed through the concluding number of her routine, as she bowed herself off but a few feet from where Johnny stood.

"That's the way to do it," Johnny called encouragingly. "Take a bow now like a nice little girl."

She nodded toward him unsmilingly, flashing a look of resentment from her somber eyes. She took three bows, waved a dainty hand to the orchestra leader, signifying that she was through, and made her final exit.

"You could 'a' took an encore," growled the electrician. "However, that ain't none o' my affair."

"You're right; it isn't!" she snapped.

"MAYBE you'll be good now, Tom," laughed Johnny.

The girl turned the same unsmiling gaze upon him again.

"I don't know who you are, and I don't care. But I resent flip comment from stage hands and if you don't behave I'll report you to the front of the house."

For an instant Johnny was nonplussed. Then he laughed. "All right, sister, if you think that will do any good," he advised. Then to the electrician: "The younger they come and the greener they are, the more upstage they get—eh, what?" And Johnny walked away.

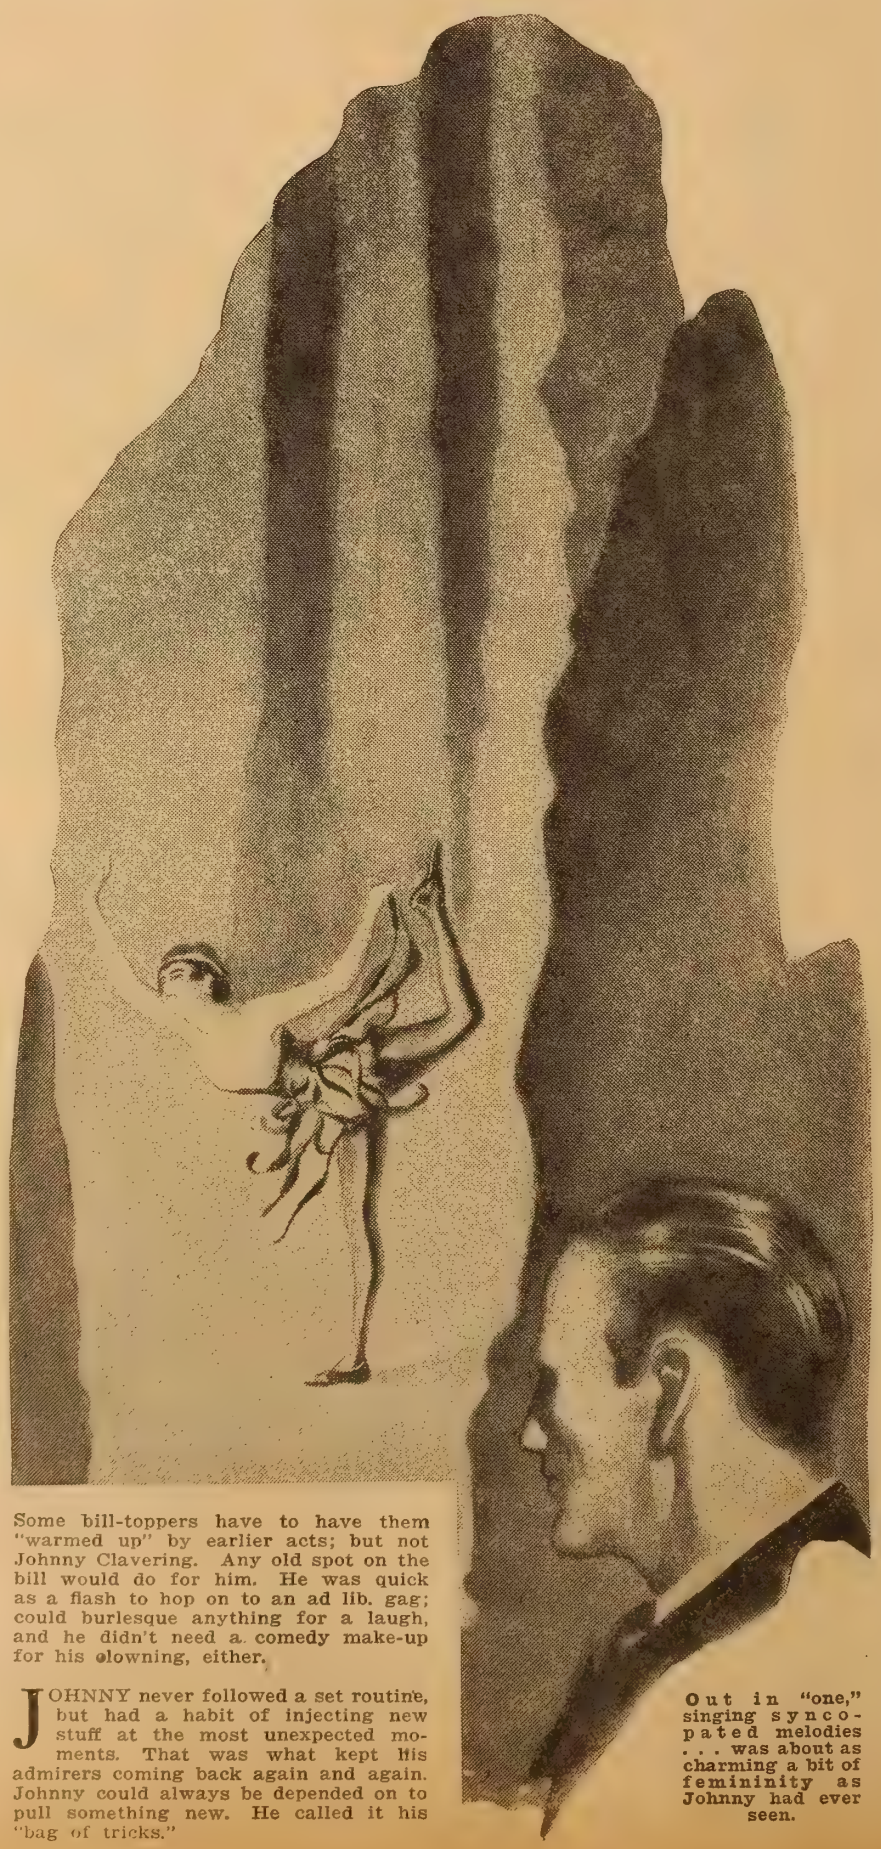
"Mr. Fresh!" the girl flung after him. She paused at the head of the stairway leading down to the dressing rooms. "Who is he, anyway?"

"Him? Oh, that's only Johnny Clavering, the headliner on this bill," returned the electrician in mock gravity.

"Johnny Clavering? The—the monologist!" gasped the girl.

"Yep; that's him. And say—you think they liked you out there. Wait till Johnny goes on and sets 'em wild. And say, Miss Shambaugh, there wasn't no sense in your talkin' to him the way you did. Why, if you was in trouble he'd be the first person to help you out. Everyone in the show business knows Johnny. He's helped more sick actors get well, an' more down-an'-outers get work than any dozen other fellers put t'gether."

The girl did not reply, but after a moment went slowly down the stairs, a serious look on her face. Fifteen minutes later, while Johnny was doing his act, Sheila Shambaugh, a dressing-gown draped about her, stood in the wings and heard him "wow" them.



Some bill-toppers have to have them "warmed up" by earlier acts; but not Johnny Clavering. Any old spot on the bill would do for him. He was quick as a flash to hop on to an ad lib. gag; could burlesque anything for a laugh, and he didn't need a comedy make-up for his clowning, either.

JOHNNY never followed a set routine, but had a habit of injecting new stuff at the most unexpected moments. That was what kept his admirers coming back again and again. Johnny could always be depended on to pull something new. He called it his "bag of tricks."

Out in "one," singing syncopated melodies . . . was about as charming a bit of femininity as Johnny had ever seen.

At the night performance Sheila was more civil. She seemed to be trying to make amends for her hasty words of the afternoon; and, with it all, she looked tired and worried.

Johnny was standing in the wings again when she came off, and she turned a rather shame-faced gaze in his direction as she bowed a contrite recognition.

"They liked you even better tonight," he said, in a friendly tone.

"Do you think so? I thought they were rather cold."

"Audiences are that way. Sometimes we work our heads off and they're undertakers out in front; then, again, they go wild over nothing."

She started for the steps, then turned and frankly extended her hand. "Mr. Clavering, I'm terribly sorry for the way I spoke today. I—I didn't recognize you, and—well, I was irritated over something, and——"

"That's all right, Miss Shambaugh. Suppose we lunch together after the show and see if we can't be friends."

There was just the slightest hesitation before she replied:

"Very well—and—thanks!"

Across the table that night in a modest little coffee house—Sheila had steadfastly refused to go the Ritz as Johnny urged—the headliner eyed his companion keenly as he sought to fathom the reason for those melancholy eyes.

She ordered modestly and sensibly. "I don't eat much after the show," she said half-apologetically.

"NOR I," returned Johnny. "As a consequence my sleep is usually free from the nightmares so often associated with lobster and other dainties of the fish and animal tribes. Come now, little girl," he urged, suddenly serious, "what's the big trouble about?"

"The—big trouble?" she faltered, surprised at the query.

"You're not happy. Any complications in your bookings?"

"Well, I haven't played as often as I'd have liked to; that seems to be a general complaint of performers. But you, Mr. Clavering—you're booked all the time."

"I've been rather fortunate. Good agent. That means a lot. Who's yours?"

"Barnes Jadwyn."

"Jadwyn!" exclaimed Johnny. "You don't mean to tell me that—" He broke off and drummed in nervous fashion on the table.

"Evidently you do not like Mr. Jadwyn." This a little resentfully.

Johnny's reply was evasive. "I don't know him well enough to either like or dislike him.

"But you started to tell me something about him."

"On second thought, perhaps I'd better not."

"Who was it wrote something about it being better to leave a thing unsaid than tell but half?" she chided.

"I don't know. That's a new one on me. Longfellow, or Bobby Burns, or some of those poetical chaps, I'll bet. Whoever wrote it, it's a sure-fire gag."

"Tell me why you dislike Mr. Jadwyn."

"I don't, unless I've developed an instinctive dislike for him because of the way he's treated some of my friends."

"I'm sorry to hear that. But, of course, there are two sides to every story. In my case. I'm sure Mr. Jadwyn is square. He—well, he is a friend of Bobby's—and——" She broke off and bit her lip. Was it confusion—or regret at having said so much? Johnny could not tell.

Sheila did not divulge who Bobby was, either believing that Johnny knew, or because it was not a subject she cared to discuss. She continued: "So when the—the accident occurred, he told me to go right ahead—to leave everything in Mr. Jadwyn's hands. He's been fair with me so I have no cause for complaint."

She laughed—a forced laugh, Johnny thought—and turned the conversation into other channels. Johnny tried artfully to steer the talk back to Bobby, but each time she forestalled him by some inconsequential remark. There was a note of frigidity in her manner by the time the waiter brought the food.

BIG RABBIT

by HUGH FULLERTON

IT WAS a dramatic moment on that broad, open air stage in the Florida jungle. Major Gaskill, proud and erect, stood defiantly between the giant negro, Trimble, and his beautiful ward, Roberta Tonneson. The rumbling mob of negroes behind us watched the developments expectantly. Trimble, in his regalia as Big Rabbit, had raised a vicious whip to bring the lash down over the white man's shoulder when the attention of the mob was diverted to a new entrant on the stage. From one side there waddled forth a tremendous turtle. Big Rabbit whirled about in amazement and immediately recognized an enemy. The turtle brought a roar of welcome from the noisy horde. Big Rabbit sprang to attack the new arrival with his whip. The mob growled its displeasure but the turtle proved he could take care of himself. Rearing himself on his hind flippers he delivered a crashing blow at Big Rabbit's mouth. I recognized the fist of my indomitable buddy, Borton. Big Rabbit collapsed and lay kicking feebly like a dying rabbit should. In the melee that followed Danforth and I seized Roberta and her faithful maid from behind the stage and rushed them to our boat. We were hotly pursued but soon eluded them all. Trimble was trussed in an ignoble heap beneath the seat. When all was still from the shore we quietly turned about and retraced our course in the hope of picking up Borton. Cautiously we crept along in the darkness, hoping that the half savage fanatics had dispersed.

CHAPTER XII

Borton Grins

FOR a mile we crept along, dangerously close to the bank, not daring to use the searchlight for fear of discovery. Then, from the darkness a voice hailed:

"Hello—over this direction."

"Dick—" I called hoarsely.

"Here—in the river," he called, guiding us. Twenty feet out from the trees, swimming towards us was Borton. I grasped his hand and helped him as he clambered over the side.

"Thank God—you're safe, Dick," I said, getting mellow with sentiment, "I was afraid—"

"Heard you go past a mile a minute. Knew you'd be back," he said, panting a little. "I swam the river and climbed a tree. Heard you returning, so dropped in and swam out."

I could not see his face, but gripped his hand hard. He was grinning—I felt that he was grinning, even though I could not see him. Then, with a chuckle he said:

"Say, wasn't that a peach of a wallop I handed that Rabbit?"

THE rising sun was laying a pathway of red and gold along the broad St. Johns, tinting the lotus pink, and gilding the water it touched when our overloaded boat, threatening to become disabled any minute, limped under the railroad bridge at Palatka. The negress, Tillie, still wearing her rabbit skins, was asleep, her head pillowed on the knee of her mistress.

Trimble, sullen and frightened, lay cramped and shackled in the bottom of the boat, Borton, plastered with mud and utterly exhausted, was curled in an uncomfortable arc, his head on a gasoline tank, grinning in his uneasy sleep.

Danforth was at the steering wheel, smoking to keep awake. In front of me Roberta was so close I could have touched her as I strove to keep the crippled motor going. She scarcely had spoken since I told her gently as possible, of Major Gaskill's death. She had wept silently for a few minutes and then said:

"He was good to me when I was small. Money drove him mad, I think,"

"I fear he lost heavily," I said, thinking how to soften the blow. "He speculated. I fear your money is lost."

"The money does not count," she said. "He was my best friend when I was a little girl."

I repressed a smile, which came because she looked so small and childlike as she spoke as of a far distant time.

"You have relatives, and friends?" I asked.

"None that I care for, excepting Mr. Kincaid. I will not be a burden. I must think."

She fell silent, thinking, almost motionless. She had not slept during the slow, perilous trip through the Ocklawaha and down the St. Johns. Now, as the sun rose, she turned her face to me.

"It is beautiful," she said quietly, her soft, southern tones more tender because of sorrow and trouble.

She seemed so brave and so helpless I longed to tell her I loved her, and beg her to permit me to care for and protect her. The sight of the sullen negro watching us as we talked, and of Danforth's hunched shoulders silenced me. Then the thought that I, penniless and out of work, should offer her succor made me glad I had not spoken.

"It will all come out all right," I said inanely.

OUR landing at Palatka was observed only by a few negoes who had gathered to load freight for the early morning boat. They gazed curiously at the dethroned and shackled king, and at our disguises, now half washed away, but did not move. We hurried the women from the boat and waked Borton to escort them. Danforth and I took Trimble to the nearest store where we telephoned, delivering him presently to the sheriff, who relieved us of the prisoner and agreed to summon the coroner and to send a posse to bring the body of Major Gaskill. That duty done I hurried to the telegraph office and sent a telegram to Mr. Kincaid which read:

"Miss Tonneson safe. Major murdered by negro Trimble, who is under arrest."

Then I went to Putnam, fell into bed and slept until four o'clock in the afternoon. My first inquiry after I awoke and sent bell boys skirmishing to bring me clean raiment, was for Miss Tonneson. I found her on the porch, pale and a little worn by grief and fatigue, but calm, and she greeted me with a wan smile. Borton was lounging lazily in a big chair, drawn close to hers. His athletic body was now clothed in white flannels, his face wreathed in its customary grin. A little pang of jealousy smote me as I saw how handsome he appeared even in makeship togs from the nearest store, and I prepared to plead business with the sheriff and leave them together.

"I have been trying to thank Mr. Borton," said Roberta, offering me her hand but making no effort to change her easy position, "I have waited to thank you."

"Let her do it, Wen," said Borton, grinning joyously. "She piles it on thick and rubs it in. It is quite the most delightful experience I have had."

He arose as he spoke, lazily, but with his inimitable grace.

"It is best to be alone when she thanks you. I'm off to find Danforth."

"Bring him back with you, Mr. Borton," she commanded smiling at his quaint mannerisms. "Then you must tell us how you found me."

"Yes, do Dick," I urged. "I have been puzzled to try to figure how you ever worked out your theory."

"Back in a quarter of an hour, if Miss Tonneson can finish thanking you in that time. I had half an hour myself."

He grinned and sauntered away, and I blessed him for leaving me alone with her, even for so short time.

Instead of speaking we both sat gazing out toward the river.

"I understand how you feel," I said, breaking the silence. "Please do not try to thank us. We are all glad you are safe."

"I felt all the time you would come," she said quietly. "I never doubted it."

"Knew we would come; how?"

"I did not say 'we'—I said you," she replied steadily. "I knew only you. I feared at times you had not received my message."

"Did you know we were in the car that night?"

"No—not until Trimble turned on Uncle, then Uncle told me. It was all like a dream until we were on the boat in the river."

"We never could have traced you but for Borton," I said, with a jealous pang.

"I knew you would try. It seemed all the time as if you were coming closer."

WE TALKED calmly of the weird events of the fortnight, of her alarm when she discovered Major Gaskill in the conspiracy with Trimble and herself being carried away in the car, of her change of fortunes. With every accent of her soft voice my wild hopes rose higher.

"Miss Tonneson—Roberta," I said, using the stilted form of the novelist.

"Now that you are no longer wealthy I—"

"Mistah Lindsay—Mistah Lindsay."

A colored boy, bearing a telegram emerged onto the porch. Storming inwardly I tore open the yellow envelope and read:

"Good work. Inform Miss Tonneson principal investments saved. Market turned. Ship body here. Keep mouth shut. Kincaid."

I stared at the telegram as its meaning became clear, and passed it to the girl.

"I congratulate you," I said dumbly, "You are again wealthy."

She paid no attention, but commenced to weep softly.

"Poor Major," she sobbed. "If, he—"

At that instant Borton and Danforth returned.

"All arrangements made," Borton said cheerfully ignoring the distressing tableau. "Nothing to do, so I'll take great satisfaction in relating to you the inside story of the great rabbit hunt. I say great delight for the reason that my little playmate, Wendell Phillips Lindsay, scoffed at my theories and even went so far as to insinuate that my mind was affected."

"I apologize, Dick," I hastened to say, "I'll admit I was an ass—but how did you figure it; I cannot understand yet?"

"WHEN I was a kid," Borton commenced, stretching himself comfortably in a chair, "I had a black mammy on our place in Alabama. She was from the Guinea coast and she told me the folk lore and traditions of her people until I used to creep into bed and shiver with fear. Since then I have read as much as possible about the negroes of the South. Most of the tales on Southern plantations are garbled forms of the zootheism of African tribes; the worship of animals. Some of the animal gods are good, some bad, some serious, some humorous. The Rabbit is the best known. I suppose in this country he'd be the god of Big Business. He is the smartest and shrewdest of the zootheistic deities, and usually wins by trickery. He is also a luck bringer, which accounts for the superstition that the left hind foot of the rabbit killed in a graveyard brings good luck. Big Rabbit is associated with Mammy Bammy, sometimes called Big Money by the American negroes. Possibly Mammy Bammy means Big Money. Big Rabbit is also called Riley Rabbit. Perhaps all the names are corruptions of African tribal words. If you have read Uncle Remus you have heard of the doings of Riley Rabbit and his Mammy."

Borton paused to ask permission to smoke, then continued:

"As soon as we heard of this case we heard of rabbits. The disappearance of Major Gaskill, his returns with money, his intimacy with Trimble, the evident fear and respect of Trimble by other negroes, and Trimble's unnatural

Miss Tonneson sat in a steamer chair, wrapped in a rug. . . . "I'm afraid Mr. Borton is right about—about—your mulishness," she said. "I beg your pardon," I answered stiffly. "I do not quite understand." She made a little gurgling sound, her eyes danced and she broke into a nervous, light laugh.

influence led me to the conclusion Major Gaskill was playing upon the superstitions of the negroes and using Trimble to get money.

"When I discovered Major Gaskill had rabbit signs all over his library and that he was an authority on the subject of negro superstitions I jumped to the conclusion he had set Trimble up as a sort of deity, and was using him to control many of the ignorant negroes. When Trimble, at orders of Col. Gaskill, abducted Miss Tonneson to prevent exposure of their plans, I was alarmed, convinced that Gaskill had trained up a Frankenstein who would assume the power and turn upon his master.

"Trimble was a victim of self hyp-

Old Man Static's Funeral

WHAT SIR Oliver Lodge Has Recently Said About Forced and Free Vibrations, and Why a Good Ground Is Necessary. Part V.

By MILO GURNEY

WAY back in the days when Mr. Edwin Armstrong was having a "heck" of a time trying to persuade the "Hams what were" that they should own a license to use his circuit regenerative at ten dollars per privilege, two "brass pounders" made the best galena survey Dubuque County, Iowa, ever had. Every inch of ground which had a rock upon it that might possibly prove grade one to twelve galena was tramped over a dozen times—and we got our "hunk." Oh boy, if you old hammers know what I mean!

Those two ambitious little trampers were a fellow named Le Vin and the writer. Le Vin claims that he cannot write a story to his wife that gets by, hence he delegated me to go ahead but leave his name out, which I have, so far as the first part of it is concerned.

With this "golden nugget" we copied calls and messages—sometimes. Then came the big night when a CQ rolled in, distant almost forty miles. CQ was enough. What he may have wanted to say was of no consequence. We had his call, and inasmuch as it was miles further than we had ever hoped to receive for the next fifty years, we called it a night, stuck out our manly chests and refused to converse with the ordinary mortals.

But the next afternoon came the big surprise. Overly kind and considerate painters when working on the home the previous fall, had broken the lead-in and wrapped it around a convenient nail. To make a long story short, our first big time reception had been accomplished with about seven feet of lead-in and—well, it must have been a whale of a ground. What phenomena had done the trick and how were we able to receive at all was quite beyond two small boys. In place of broadcasting the facts, we were careful to keep very quiet about them realizing that if we mentioned that we had used practically no aerials—then both of us would have been liars instead of but one.

The Mystery Solves Itself

Yet, you who are interested will appreciate that years after, altogether too many years—the reason why has been made clear and from this early experience the simple underground aerial which will be described in this article has been evolved. In reality, it is not an underground aerial, but in truth a mighty good ground with a touch of Clerc Maxwells gray matter added to the batter and the finding of Sir Oliver Lodge put over it for the crust.

It works well in more localities than the other types that have been described, while its usual performance is such as to warrant the statement that the system is a correct step forward to the solution of the static bugbear. Before describing its installation, the author feels that a more clear understanding of the word "resonance" is desirable, as well as "oscillator excitation."

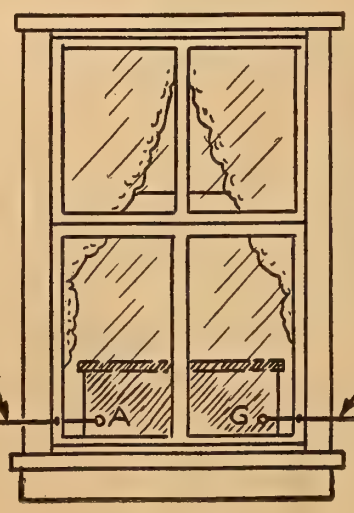
These words need not alarm you as they constitute the first and last attempt to use technical phrases in this article. Webster defines the state of resonance as "a result from the repetition of small impulses which, when two bodies are in tune, have a purely additive effect, but otherwise tend to neutralize each other. Electrical resonance occurs when an electrical circuit has a natural period equal, or nearly equal to the period of the source of alternating electromotive force." Or in other words, this means to vibrate in sympathy or synchronism with some other source of sound or electrical oscillation.

"Forced" and "Free" Vibrators

There are two classes of vibrators, viz, "forced" and "free." A "free" vibrator is one with a definite frequency of its own and not coupled to an influencing or driving medium. Once excited and left to itself, the vibrations will gradually die away. A tuning fork is an example of a free vibrator. Electrically, any closed circuit possessing inductance and capacity, such as an inductance used in Radio receivers, is a free vibrator so long as their is no driving agent near it.

Conversely, any such circuit coupled to an exciting circuit immediately becomes a "forced" vibrator. Receiver circuits are always forced vibrators, with the strength of the excited oscillations depending upon the tuning. Any mass may be caused to vibrate, however, independent of tuning by the application of sufficient stimulus. A child can readily cause a church bell to ring irrespective of the strength of its blow, if such blows are properly timed. This is because of additive power at the point of resonance.

Sir Oliver Lodge points out a most unusual observation which is often noticed when tuning one's receiver. He says that in such cases when tuning, the free vibrator tries to vibrate at its own period and does so until the driver or impressed frequency dominates. When at this point, that which is thought to be a heterodyne whistle occurs. In effect it is a true heterodyne, for the two frequencies are superposed. Once the driver dominates, the free vibrator synchronizes and we secure a response at a given amplitude.



The best asset a Radio installation can have is a good ground. Yet this point is most often ignored.

Strong Signals Not Needed

It is obvious, however, if one will but follow the anology of the child causing the church bell to ring, that extremely strong driving signals are not required from the antenna to bring the input into resonance, as its directed power is additive, or builds up. It matters little how weak the received signal may be. If the acceptor circuit is of the correct design, the received signal may be worked up through the power of resonance to a desirable value. Bear this statement in mind as it has much to do with the underground antenna which is offered herewith later.

This further, interesting statement should also be rehearsed until one is letter perfect in his understanding of it:

"When two circuits are coupled together, neither of them are free vibrators, and each interferes more or less with the other, while the combination of such circuits cannot hope to attain the energy of a free vibrator. Successful amplitudes are therefore to be had only when the circuit used is of very low resistance and so arranged that it will be driven or disturbed by the forced vibrations arriving from the station tuned to, in a slight manner." My authority again is Sir Oliver Lodge, inventor of tuning, and Sir Oliver is not to be denied.

Reducing to Layman Language

What does all of this mean in language of the layman? This and this only: (1) We are using altogether too much antenna. (2) We should not conductively couple to the grid input. (3) A fixed condenser of some value should be inserted between the aerial and its connection to the receiver. (4) Any tendency for the existence of magnetic coupling should be avoided.

That is a pretty big order. One cannot well change their present set or the coils to enlist the advantages of this ideal, but in direct ratio to the efficiency of your receiver is the lack of any antenna required. What you will do then, unless you have the crack performer in the Radio receiver line in your town, is to forget the installation of other than a husky outside aerial and suffer in silence. How are you to determine this point? Build the best ground connection possible, attach it to your receiver and go to it. If it pulls in the average of the important stations, you have something; if it doesn't, you have something coming—a trip back to the overhead.

Therefore, with the above information, which is but a scratching of the surface of wonderful Radio reception under ideal receiving conditions, we will now tell you how to build a real ground, and you may call it your underground antenna, for without a ground connection, many Radio Digest readers will reap satisfaction from its use. The failures have also gained unintentionally for they have constructed the type of ground which the receiver always begged for. That's fair enough, is it not?

The ground, or as it may be proved, the underground

This B Eliminator Is Good

EVEN Mr. Alladin Would Sit Up and Take Notice of the Marvelous Even Supply of Plate Current Which Is Furnished When You Harness the Wonder Raytheon Rectifier Tube with Thordardson, Potter and Bradley Accessories. This B Power Unit Is Easy to Make.

By the TECHNICAL EDITOR

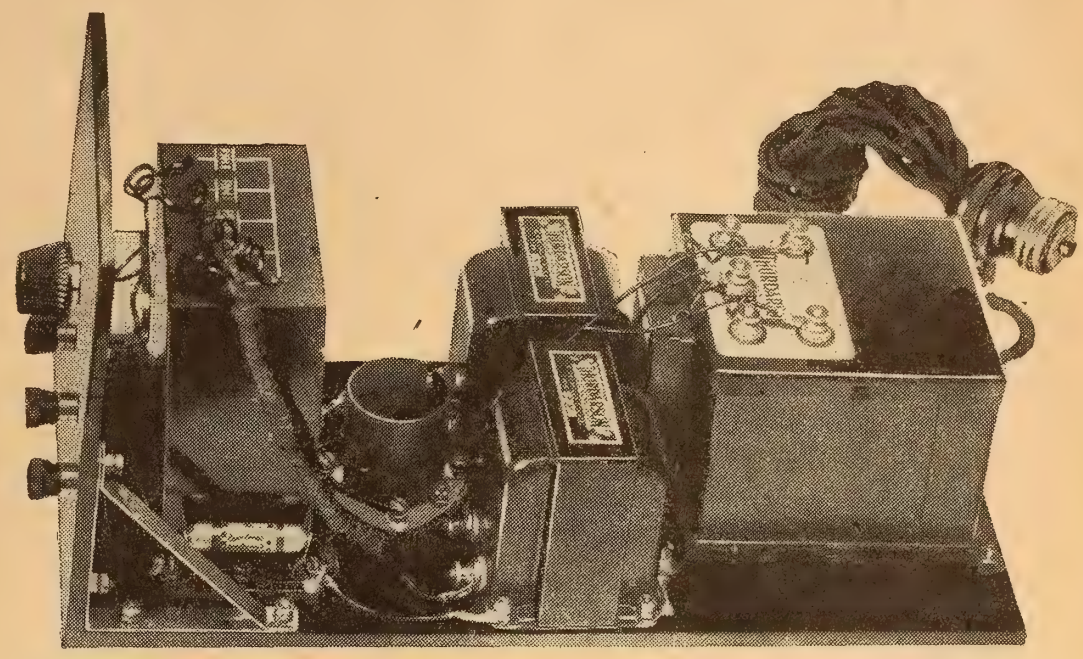

Figure 1. View of completed Thordarson-Raytheon-Potter eliminator showing the assembly. The shape may be changed to suit available space.

REMEMBER Alladin, that Arab boy who had but to pass his hand over his wonderful lamp and the Giant Genii would appear to do his bidding? Outside of the story books, however, progressive Radio has produced another wonder called Raytheon, which is nothing more than a gaseous rectifying tube so designed as to rectify the ordinary, everyday, 60-cycle electric lighting house current, and in this process of rectification, change the house current to direct current suitable for replacing B batteries for the plate supply current on the tubes of your receiver.

There's much in a name. The name Raytheon, according to Miles Pennybacker, chief engineer of the Raytheon Manufacturing company, is no exception. The word is compounded from the word Ray, analogous to ray or glow discharge tubes, and the word Theon, signifying "The Gods", hence the compound word Raytheon means "Ray of the Gods" They tried very hard to give C. G. Smith, inventor of the well-known S tube, a place in the sun when naming this new rectifier, for it was his work which paved the way for the present Raytheon, but the Smith's, so far as names are concerned, are an exclusive lot. "Smithson" would never do as the name of a tube and "Double S" showed promise yet might lead one to believe that all of the other Smith's in these United States were in on the secret. Therefore, they treated the subject as Kelly did his list of men whom he could whip—scratched off all the possible names and ran a dark horse, Theon, a Greek whose first name was Ray. Such is the destiny of fame.

TO THOSE interested, it appears that the construction of a satisfactory Raytheon is a rather complicated process. The most important of the operations is the "bombarding". Bombarding a tube means subjecting it to extremely powerful currents having frequencies of several million cycles per second. This process brings the metal parts of the tube to a brilliant orange-white heat, which drives whatever residual gasses may have been in the metal out into the tube so that the vacuum may draw them out through the exhaust. Once a tube has been bombarbed four times, it is filled with the desired amount of pure gasses and sealed. From this point on, it has little chance to go out into the world unless it can pass with flying colors a multiplicity of tests. If the tube successfully passes each of these rigid tests, it is labeled, based, and the next we hear of it Alladin himself is gasping with wonder as the little giant shoves a pure unadulterated flow of rectified alternating current into the plates of his Radio tubes.

THIS little giant is however helpless unless associated with an input transformer, the proper value of chokes and a battery of filter condensers. The requirement is obvious that such associated parts not only be designed by manufacturers of mature experience, but that the history of these manufacturers show an ever zealous endeavor to construct apparatus under the most rigid of specifications. Our selection of the parts for this eliminator has been equally rigid with the result that the No. R-195 Thordarson transformer and two Thordarson No. R-196 chokes are specified with the assurance to the builder that they represent unquestioned quality of a very high order. For illustration, the No. R-195 transformer is wound upon an oversize or generous shell type core, which after placement in its steel housing is filled with a special, stable insulating compound. Exact measurements are taken at the factory to insure that the secondary of this transformer is tapped at its electrical center. On either side of this electrical center, secondary voltages of the proper value of output are supplied to correspond with the B current consumption of the receiver. Realizing that any overloading of a transformer used in B substitute devices but spells final disaster, the Thordarson engineers have designed this transformer so that it will supply a plate voltage of 140 volts at 40 milliamperes, and of 90 volts at 60 mils, which is far and beyond the requirements of any Radio receiver now in general use. A further proof of its reserve power is found in the observation that even under continuous service the transformer will not heat.

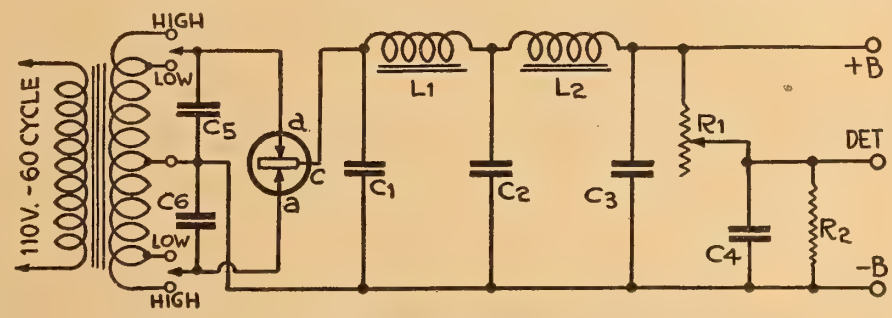

Figure 2. Circuit of Thordarson-Raytheon-Potter eliminator.

The chokes display an equally careful design. Their inductance value is 30 henries, while their current carrying capacity is of the order of 60 milliamperes with a direct current resistance of 280 ohms. One can ill afford to experiment when constructing B eliminators, and this information clearly indicates that the apparatus selected represents that which is entitled to unbiased recognition.

POSSIBLY no part of an eliminator circuit is so dependent upon successful operation with complete absence of alternating current hum as is the fixed condenser filter system. This must be such as to withstand indefinitely not only normal demands placed upon it but the surge strains which often occur. Because the insides of all fixed condensers are well hidden, and the outward appearance of many makes look very much alike, the constructor is not to blame for assuming erroneously that any old make of filter condenser will do. Don't gamble! One condenser which decides to" go west" in a filter circuit can create more profanity and trouble than a one-armed man would have with the prickly heat.

In selecting the Potter condenser block, manufactured by the Potter Manufacturing company, for the filtering system in this B eliminator, samples of the linen condenser paper and tin foil, as well as the impregnating compound which Potter employs, were secured and put through rigid tests for quality. In addition the No. 350 block, which is specified in this assembly, was given a breakdown test that was quite beyond any abusage which might occur when in service. The results of this careful selection will be enjoyed by the listeners who build the eliminator. Capacity ratings of the Potter block were found very accurate while a summary of the care taken in their manufacture is evidence of this company's evident determination to command recognition through building under modern factory inspection methods.

CIRCUITS in mystical Radio come and go, like the Arab. Today's popularity may be followed by their absence on the morrow without anyone having seen them fold their tents and silently vanish into the night. B eliminator circuits, however, are not subject to change. There is but one circuit using the Raytheon tube and that is as offered by the tube manufacturer. It is shown here in figure 2. All filter condensers are keyed in the drawing, and the wiring diagram is so simple that the greenest tyro cannot make a mistake in its assembly. C1 and C2 are 2 microfarads each; C3 is 8 mfd.; C4's value is .5 mfd.; and C5 and 6 are .1 mfd. in value.

It should be understood that the condenser blocks Nos. 350 and 385 of the Potter make contain all of the condensers required for the filter shown in the diagram, and in addition, a condenser is included for the use of those who desire voltage between Det. and +B for special circuits. In the latter event, it is only necessary to connect one side of the extra 1 mfd. condenser in the block to —B and the other terminal of this condenser to one side of a 100,000-ohm maximum variable resistance. The remaining terminal of the added variable resistance is then connected to the point marked +B on the drawing. As a hum prevention device, it may be wise in constructing the eliminator to ground the —B wire to the metal cases of the Thordarson transformer and chokes. This may be accomplished by soldering to the cases or fastening the grounding wire under the mounting screw heads of the cases. If your A battery is not grounded from either its + or — terminal this should also be done.

THE socket employed to hold the Raytheon tube is standard. The +F and —F terminals are connected together and in turn connected to one terminal of the first choke. The grid terminal of the socket connects to C5 while the plate terminal of the socket connects to C6. To each of these C5 and C6 connections short flexible leads are connected and equipped with clips in order that these connections may be made to either the low or high side of the Thordarson input transformer.

A photograph of the completed unit is shown as figure 1. Here it is noted that an oblong shaped assembly plan was carried out. This may be changed to any convenient form the constructor may desire in order to fit into some special cabinet. However, if the oblong form is used, the baseboard dimensions are 6½ by 14 inches and the front panel 6 by 6½ inches.

R2 is a fixed resistance of 10,000 ohms while R1 is a variable resistance of 100,000 ohms maximum. A word about the Allen-Bradley resistances specified for this eliminator will save many a constructor much grief and dodge trouble in the offing. The Allen-Bradley company, as many of you may know, are resistance specialists. Their entire organization has for years made an intensive study covering this field of apparatus. If they do not know how to make efficient resistances of all types, it is only fair to assume that their business never would have been able to survive. The writer's experience with their products, covering a period long before Radio became popular, has been such as to select both their variable and fixed types for the construction of this B substitute without equivocation.

BUT OH—what a lot of trouble these little devices have in store for the person who attempts to abuse them. Each variable resistance is operated by a knob attached to a plunger

Vol. XVII July 1, 1926 No. 8

Let Congress Adjourn

AS THIS issue of Radio Digest goes to press, we learn that congress, the body of so-called legislators in Washington, is thinking seriously of continuing its session through the first week in July. In that event the senators and representatives will still be profoundly legislating as this edition passes into your hands.

The reason is that the boys "on the hill" at the Capitol are somewhat chagrined and panicky at current events. The primaries have been too much for them, and the congressmen feel that maybe this man Coolidge hasn't been such a prophet as their own good judgment might have been. The constituents in many states have been taking their pounds of flesh, and while the operations always have been proclaimed a success, nevertheless the patients died.

And who wants to be an ex-senator or ex-representative?

In the meantime, before congress has adjourned, we wonder if any Radio legislation will have been passed by both houses.

We have just glanced over a revised copy of the White-Dill bill, No. H.R. 9971, as reported out to the senate by the committee on interstate commerce. It looks very little like the original bills sent into that committee. Its amendments are so many that Mr. White and Mr. Dill would probably have great difficulty in recognizing it.

With all its changed and added features we are led to believe that careful consideration should be given to this measure by the public, the broadcasters and the Radio industry. To date the chiefly interested parties have proven to be broadcasters. The public doesn't care much, and the industry seems content to wait and see how any new Radio law would work, once it is enacted and enforced.

Whether or not we want Secretary Hoover or a commission in charge; if the latter, how large a commission; shall broadcast stations be declared common carriers; shall stations be denied the right of censorship of their own programs; who shall regulate the sale of stations; for how many years shall licenses be granted—what is the answer? Have you thought it over? Yet, all these questions will be decided by the impending legislation.

Yes, we believe it best after all, that congress forget about Radio for the remainder of its session and devote its time to such things as farm relief, the world court, prohibition and other vote-threatening issues.

A Proof of Progress

A RADIO manufacturer has become indignant over the statement of a "smart Aleck" paragrapher that Radio photographs look like most Radio sounds. We cannot become indignant over the paragrapher's comparison because we feel that the poor fellow is merely uninformed. We ask him to correct his statement to say, "Radio photographs look like Radio once sounded."

Certainly reproduction in Radio has been vastly improved during the past four years. Atmospherics, of course, have yet to be overcome, but these do not figure in reception from local or nearby stations. A modern, medium quality receiver and loud speaker nowadays is superior to the phonograph in tone.

Let us prove the latter. For nearly ten years prior to the wave of Radio popularity, talking machine manufacturers were content with what they considered very good results.

But since Radio has become an everyday necessity in many middle-class homes and Radio reproduction was improved to such a high quality that inroads were being made on the phonograph industry because the current model phonographs could not match the quality of Radio receivers, the manufacturers of talking machines got busy. In the past year we have noted revolutionary improvements in their reproducing systems. These improvements were forced by Radio!

As Radio sound reproduction has forced improvement of the phonograph, so will Radio picture transmission, perhaps, cause the motion picture photography to search for better means.

RADIO INDI-GEST

The Answer
To George's "Indi-Gest Poets"

The Indi-Gest poets come and go,
And so do people, don't you know?
Folks sail the seas of life awhile—
Then one by one pass on in file.

Sometimes, the moods are verses light,
Sometimes, the sadder tones take flight;
Now, life seems an airy bubble,
Next, a weight with heavy trouble.

Whatever niche in the world we fill,
Here's to the winds that blow no ill;
In our homes may we find a friend
In Radio Digest till the end.

RHEA SHELDON

So it seems that Rhea is back with us once more, thanks to our friend George. The latter is batting 1,000 and has so many good poems on Indi-Gest's hook that we hardly know what to give you first. Guess we'll let you have a comical little bit of doggerel this time. Look below.

"You're Next," Exclaimed Barbara

West Milwaukee, in the merry month of June.

Mr. Indi: I am writing you to tell you that I much enjoyed "Short Shaves." May I therefore be permitted to ask "Barbara" a few questions? Thank you, dear.

Dear Barbara: Me and my boy friend Boniface are just dying to get the low down on some of them Radio artists. Tell me, dear, does Radio Soprano Hulda Bandsaw honestly get paid for singing? How much does she get? And where does she get it? Answer me quick before I get one of my attacks.

And listen, who picks them covers of beautiful girls for this magazine? Wot a choice, wot a choice. They don't live long on them kind of jobs—the heart gives out. And say, do you think that bloomers will ever come back in style? I think they're just darling, providing you ain't too fat, it shows off the hips so.

What think of Conon Percival Eveningbreeze, the guy wot sings "Forever" from Station POOH? Honestly, dear, I feel foolish all over when he sings that, really, I am thrilled to tears. They tell me he subscribes to the Homely Ladies Journal and is a bear at tatting: His wife, they say, runs the cozy cottage on Cottage avenue.

And then there is the Marked Tenor, who sings from OBUNK, tell me, was he born in that one Buick town, Red Hank, N. J.? My dear, I would not believe it if you told me so. Say, who are them Eskimos from the Kicko Club? I suppose they play for ginger ale and sassyperunilla and get all blown up about it. How would you like them warm their cold feet on your back all thru a polar night?

My girl friend wants to know whether it is proper for her to listen to a man singing in her kimono? Get me right, I mean listen to her Radio when she is in her kimono? Answer this quick, better death than dishonor. Don't you get tired listening to the Silvertown Cord Band? Tell them to send me some too—34 x 4 is the size. Well, I must stop now, it is time for my croquet lesson. Love and kisses from

THE THIRD TROMBONE PLAYER

Barbara being busily engaged snooping around and sticking her nose in Radio artists' businesses, we pause to reply, in cadence, one-two-three-four: No, not for singing. Nothing much. Where do you guess? From her friends. Indi-Gest. We're agin 'em. Why think when it's so unusual for us. Tattlin, correction. Sure, it musta been Red Hank. Six months and they'd warm up. Okay, if he sings bass. No, more like a blowout. I challenge you to a Swedish match.

Mike Fright

He stood before the microphone;
His heart was in his throat.
He tried to sing in baritone,
But blatted like a goat.

GEORGE

Intermission Idiosyncrasies
A. C. S. Announcing

"Colonel Westfall Dombarton of Louisville, Kentucky, will favor us with the Colonel's favorite after-dinner ballad, entitled, 'Oh Where Is My Wandering Joy Tonight'. We might state by way of explanation that the Colonel, who is spending a couple of weeks in New York, has three cases somewhere between Louisville and 33rd street. We're reasonably sorry for this situation as well as the Colonel is a very close friend of ours.

ARTHUR C. STOWELL

Mary's Little Radio

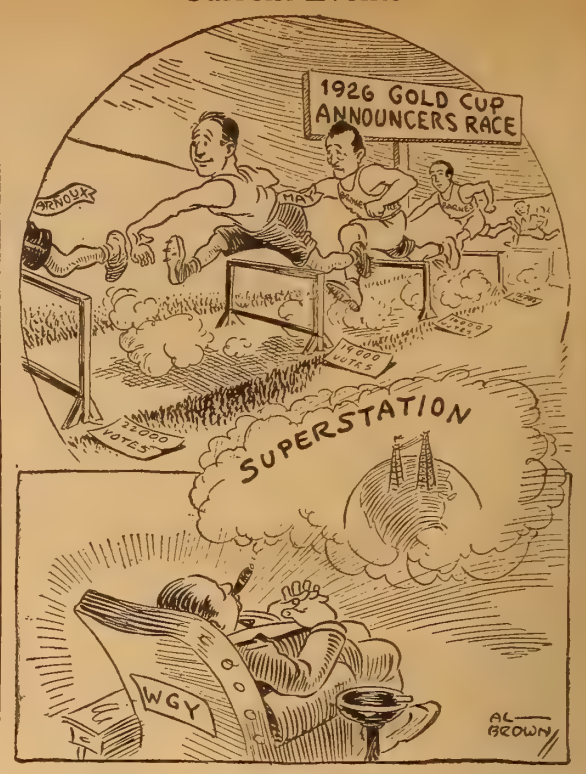
Mary had a Radio
And it was very small,
And everywhere that Mary went
You heard it's gentle call.

She took it into school one day,
The kids were wild with joy;
And when it got the teacher's goat,
Did he butt in? Oh Boy!

JEAN McMICHEAL

Every one of my "listeners" who put on a bib in the morning to keep the juice of the hen fruit from leaving canary yellow polkadots on his chest or her bosom, will appreciate learning that "Interesting Information Concerning the Marketing of Eggs" was broadcast recently from KGO by Mr. H. G. Hamann *INDI*

Current Events



Condensed
BY DIELECTRIC

No matter how sultry the night nor how much the static with it, there is one musical feature most any of of us are willing to listen to, a feature that strikes a vital blow at discouragement and gives four singers a chance to display their ability at team work. Male quartets can nearly always charm with a few solo airs introduced by the basso, if nothing else in their efforts cause one to applaud. One of the best male quartets heard in some time sang before the mike in the studio of Station WTAM, Cleveland, rendering songs familiar to our aunts and grandmothers and still appealing to the rest of us. These old numbers have a certain simplicity of melodic and harmonic content wholly enjoyable. There can be but one requirement—no "barber shop" chords.

Station WGY, Schenectady, is noted far over the globe for the excellence of transmission, Radarios and other features, placing the director in an enviable position of freedom from complaint. I don't intend to say that their programs are entirely free from censure from those who always have some excuse for finding fault, but that so far as your humble reviewer is concerned they satisfy in most particulars. Having followed carefully and with interest many varied programs from this station it seems appropriate to mention the character of dance music presented. While the selections presented are not unusual nor distinctive from other broadcasters one characteristic is pronounced, which is the near approach to perfection in rhythmic observance.

If you never heard that famous song before entitled fifteen men reclining upon the chest of a deceased partner—before, I mean—hearing it sung from the studio of Station WJAZ, Chicago, you have a genuinely authentic record of how it should be sung. As a counterpart to that, what more appropriate than that this station should be responsible for putting "on the ether" a pirate song in true, bloodthirsty, buccaneering style, which it did. Fame is won in many devious ways.

There is not a great deal that I can say, without forcing unduly the elasticity of a complimentary nature, about the programs arranged for Radio listeners to Station WRVA, Richmond, and shall confine comment to that portion of their programs devoted to the playing by the Hotel Richmond orchestra, as pleasing to listen to as any musical organization of its class. That may not be saying much, or considerable.

Of the large number of Radio listeners delighting in jazz there should be a large proportion of them tuned to that well-known broadcaster located in the "city of beans," Boston, under the call caption of WNAC. Here again we find all of the current jazz classics presented with true contorting swing and meeting the tastes of each devotee of the art. Tune to the Shepard Stores' station for jazz.

Station WJZ, New York, has sufficient power to compass many miles across the continent and possesses directors capable of judging the excellence of any feature—so far as it applies to the exigencies of broadcasting—and I wish to compliment them upon the uniform character of their offerings. Another phase of broadcasting, which is equally important, is the ability to transmit in a manner to win the encomiums of all listeners. This may not be said for the R. C. A. station. Its features are interrupted for the space of many seconds and the power is not uniform throughout an evening's entertainment. Why this condition should be allowed to continue is beyond my ken.

ALL OF RODEO TO BE PUT ON AIR AT WOOD

GRAND RAPIDS TO PICK UP ROUNDUP JULY 2 TO 6

Steer Wrestling, "Bronk" Riding and Wild Horse Races Are Booked by Michigan Station

GRAND RAPIDS, Mich.—Steer wrestling, "bronk" riding, wild horse races and what not in the line of sports from the wide open spaces will take the air July 2 to 6, from WOOD, station of the Grand Rapids Radio company on the Hotel Rowe here, when the roundup at the West Michigan State Fair Grounds is broadcast in entirety by direct wire.

On this occasion, believed to be the first complete broadcast of a rodeo, "Tex" Sherman, cowpuncher extraordinary, will be at the microphone. Mr. Sherman has undoubtedly witnessed more rodeos than any other living person, except perhaps "Wild Jim" Lynch, producer of the show and winner of thirteen world championships at rodeo sports.

Cash prizes aggregating $10,000 will be awarded to the winners of the various event, day and grand prizes. There to defend their titles and compete for the prize money will be Patty Ryan, Bob Askin, Mike Hastings and his wife, Mrs. Fox Hastings, and other cowboy champions.

Many Thrills to Come

Mrs. Fox Hastings is the only lady wrestler of steers in the world. Incidentally, steer wrestling is considered the most hazardous of all rodeo sports. Her husband, Mike, is present holder of the steer wrestling championship.

Another thrill will be given Radio listeners and spectators when "Wild Jim" Lynch wrestles a steer from a motorcycle and also from the running board of a speeding automobile. Mr. Lynch is the originator of this event.

Probably the most amusing of all events is the wild horse race in which wild horses serve as the steeds for cowboys who first must saddle them. Inasmuch as a wild horse is not to be steered but goes where he pleases, luck plays a large part in deciding the winning rider.

Maurice Wetzel, director of WOOD, who arranged for the roundup broadcast, is confident he has something brand new in the Michigan rodeo to amuse the general listening public.

Tongues Centuries Old Teach Mexican Indians

"Education by Radio" Is Policy of Broadcasters

MEXICO CITY, Mexico.—Languages that were thousands of years old when Cortez first conquered this country 400 years ago, are now being used in the broadcasting of instructive talks for the benefit of the many natives throughout the Mexican republic who still cling to an Indian language.

"Education by Radio" is the slogan for most Mexican stations, chief among the latter being CZE, here, the department of education broadcaster.

The government has distributed receiving sets to Indian villages and districts. From all the surrounding regions men, women and children tramp to the place where a local headman has charge of the government's "magic box which catches winged words from afar."

New Halifax, Nova Scotia, Station Is Proud of Self

HALIFAX, N. S., Can.—Coming on the air late in May and being heard in Chicago in June, the new 100-watt transmitter here, CHNS, operated by the Halifax County Radio association, feels quite proud of itself. According to William Coates Borrett, director, CHNS is on the air Wednesday and Sunday evenings from 7 to 10 p. m. Atlantic standard time.

The new broadcaster, aided by local booster organizations, is aiming to show the world what Nova Scotia has in the way of talent and attractions for tourists and permanent residents. A wave length of 322.4 meters is employed.

WOR and WNYC Greet Byrd

NEW YORK.—Station WOR in conjunction with WNYC here, had the distinction of broadcasting the ceremony of welcome extended Lieutenant Commander Richard R. Byrd, which took place here, on Monday, June 21. Three states—New York, New Jersey and Virginia—participated in the welcome ceremonies and were represented by Governors Alfred E. Smith of New York, A. Harry Moore of New Jersey and Harry Flood Byrd of Virginia.

W. G. HAY BECOMES HEAD OF WGN, WLIB

"Bill" (W. G.) Hay

BILL HAY, whose real initials are W. G. and who has aptly been dubbed "the announcer who puts the English language in a dress suit," has been promoted to manager of WGN, the Chicago Tribune station, and WLIB, the Liberty Weekly broadcaster. And his friends, thousands of whom have twisted their dials to follow him from KFKX to WOK, thence to WGN and WLIB, are happy and congratulating him.

Bill was born in Dumfries, Scotland. This wee town was put on the map years and years ago by Bobbie Burns, whose poetry tells of its beauties. Bill remained in Scotland long enough to acquire three outstanding characteristics, namely, the burr in his voice which tells of bonnie Scotland, the habit of smoking a pipe inveterately, and the love of the grand old game of golf. Concerning his voice, ... well, everyone knows it. Concerning his pipe, we might remark that it is one of the most aromatic in Chicago. And concerning his golf we have nothing to say.

First Lived in Chicago

When Bill came to America about seventeen years ago, he went immediately to Chicago. He spent a considerable part of his time in the study of music, an experience which was destined to stand him in good stead in years to come.

Later Bill went to Hastings, Nebraska. Some time after this the Westinghouse Electric officials decided to open a high-power Radio station there and it was Bill who did the announcing. Now his musical experience proved immensely useful. He had been doing choral work and conducting the Hastings Lyric Glee club, and the Westinghouse officials decided that he was the man to take care of the programs of their new station. It was obvious shortly afterwards how well they had chosen. Night after night, some of the finest programs on the air emanated from KFKX, Hastings.

In less than three months the Hastings station and Bill Hay were known from coast to coast. Mail came from the four corners of the country, and Bill was the recipient of thousands of fan letters. The novelty of this station, hidden away in a small mid-western town, might have worn off but for the excellent quality of the programs. Bill maintained a high standard of entertainment. KFKX was one of the first stations to have a regular male and mixed quartet, and Bill was a member of each.

Has Been Doing Major Announcing

Since coming to WGN and to WLIB, Bill has been announcing all the regular features. It was he who did the announcing when WGN broadcast "The Miracle." He possesses a voice that lends itself to any kind of program presented. It is clear and dignified and very pleasing to the ear. Perhaps there is no type of program which Bill announces more effectively than the classical. And that may be the reason why WGN's classical programs have so great a depth of dignity and distinction. But schedules of so long and varied a type as WGN and WLIB present daily require versatility, and Bill is perfectly at home in announcing entertainment of a lighter nature.

Some listeners know, and some don't, that Bill Hay and "Auld Sandy," WGN's amiable Scotch entertainer, are one and the same. Twice a week "Auld Sandy" appears before the microphone in a sketch of Caledonian songs and stories, given in the dialect of old Scotland. And these are all the more delightful because of the brogue in which they are presented.

"BOSS" ERBSTEIN RAISES VET FUND

Will Stage Second Annual Radio Benefit for Forgotten Disabled Soldiers July 11

CHICAGO.—A great collection of Radio and stage stars will be gathered together on Sunday afternoon, July 11, at the Auditorium theater, here, when Charles E. Erbstein, former WTAS and WCEE owner and now announcing several programs over WLIB, stages his second annual Disabled Soldiers' benefit.

The program will consist of the leading artists of the different local stations as well as the stars of the current attractions playing at that time in Chicago. The entire receipts of this gala performance will be distributed among the different government hospitals to buy smokes for the men who are still under treatment resultant from the world war.

"No one," says the "boss" of the famous "Willie-Tommie-Annie-Sammie" station, "can appreciate the countless representatives of American young manhood still lingering between life and death at the Speedway hospital. Men without arms and legs, gassed and demented soldiers patiently waiting for the end—those valiant heroes who fought and bled at Flanders front—are pretty well forgotten by us who are too busy to even give them an occasional thought."

The "boss" will be the master of ceremonies the day of the performance. The price of admission is $2. It will, with the stars, be a $25 show. The "boss" will have his famous Boss' Own orchestra, under the direction of Fred Hamm, especially imported for the occasion.

McNAMEE AT POLO GOUNDS MIKE

When WEAF broadcasts the diamond sport from the Polo Grounds in New York, you can depend on it the Radio box looks something like this. Graham McNamee is addressing the "mike" at the right. Note the novel wire frame "fender" in front of it which keeps "Mac" from getting too close in exciting moments and blasting the microphone. To the left of McNamee with the headset on, is George McElrath, an "outside" operator for WEAF. McElrath in this picture bears a close resemblance to McNamee. At the extreme left is Howard Luttgens, another "outside" operator.

150 STATIONS FORM UNCONNECTED CHAIN

N. G. BAKER, KTNT OWNER, TELLS OF ORGANIZATION

American Broadcasters Association Co-operate for Toll Broadcasting Minus Land Wire Inter-Connection

MUSCATINE, Ia.—A new broadcasting "chain" to be what is declared the largest tie-up of stations in America, is promised by Norman G. Baker, of this city, owner of KTNT and president of the American Broadcasters. The new link will include 150 or more broadcasters.

Stations are not to be connected physically by telephone wires or by Radio relay, Mr. Baker explains. He frowns at the wire link method and maintains that listeners become annoyed at hearing the same identical program at fifteen to twenty-two places on the dials of their receivers. Each station will broadcast its own program, and the firms taking advantage of this system of advertising will be announced at the same hour and date from all stations in the chain.

"The American Broadcasters association fought bitterly against monopolizing the dials with simultaneous broadcasting," Mr. Baker states, "and we would not care to place our chain in operation on any plan that would interfere with the pleasure of the listeners."

He plans to make Muscatine, Iowa, headquarters for the organization.

WCCO Studies "Dead Spots" During Summer

Jansky and Sweet Hope to Perfect Transmission

MINNEAPOLIS.—The past month, July and August have been set aside by the engineers of the Gold Medal station, WCCO, for an intensive study of Radio transmission problems, with a view to still further improving the signal strength and quality of the Minneapolis-St. Paul broadcaster.

Radio broadcasting is still in its infancy, although most listeners seem to expect the infant to work with the efficiency of a full-grown man. Many of its problems are still unsolved, and tremendous advances may be expected within the next few years, or even months. Every large station, even those using experimentally as much power as fifty kilowatts, is troubled with "dead spots" and with marked irregularities in reception. So much seems to depend on special geographical conditions that general rules for improving transmission have a very limited application.

Prof. C. M. Jansky, Jr., of the electrical engineering department of the University of Minnesota, is devoting his full time during the three summer months to investigating the special transmission problems of WCCO, and Ray Sweet, chief engineer of the station, is directing the experimental work. A corps of observers throughout the northwest has been recruited, so that regular reception reports will be submitted from points where reception so far has been unsatisfactory.

Roxy Joins "Captain Jinks" For Two Weeks as Devil Dog

NEW YORK.—Major Samuel L. Rothafel, U. S. M. C. R., has been ordered to report to the Marine barracks at Quantico, Virginia, for active duty and two weeks training. Major Rothafel will leave July 2, and will return on July 19. Major Rothafel served in the regular Marine corps many many years ago on the U. S. S. Bancroft, before he came to New York and became prominently identified with theatrical activities.

On January 20, 1925, he was sworn in as Major in the Marine Corps Reserve personally by the Major General Commandant John A. Lejeune.

McGee to Arctic Again

WISCASSET, Me.—Paul McGee, of Mattoon, Ill., who was Radio operator for the recent MacMillan-McDonald arctic expedition, is again the honored amateur to make the arctic trip, this time with the MacMillan-Rawson expedition, which sailed from this port recently.

McGee perfected arrangements for two-way transmission and was on the arctic end of an interview which had been arranged with Commander E. F. McDonald of the S. S. Peary, while that ship was at Etah, Greenland.

WOOD to Be Remote Controlled

HUDSONVILLE, Mich.—Construction of a remotely controlled transmitting station for WOOD, Grand Rapids broadcaster, is proceeding here.

SHORT WAVES
By Marcella

(Continued from page 2)

the air from WLIB. He is announcing Fred Hamm's orchestra and is the same as ever—ha, ha.

* *

The Ray-O-Vac Twins, "M. J.," made their last appearance for a month at WFAA, Dallas, on June 26. They are on a vacation, but will be back touring the stations again in August. Yes, both are married. Both sing, but Russell Wildey is the pianist. Both are natives of Chicago, still young, of medium build, and have dark complexions and hair.

* *

To forestall many questions, I will give you the news about "Little" Jack Little, who is now on vacation until October. His last appearance on the air this summer was on June 7, at WSAI, where he helped with a dedication program. He will spend his summer in rehearsal of a larger repertoire of programs and in trying to write several song hits. For the benefit of "Betty," I will repeat the Bertillon of Jack: 5 feet 3 inches up, little in weight as well as name, good looking; 25 years old or maybe 26 by now, happily married, birthplace Waterloo, Iowa.

* *

Ralph Emerson, popular WLS organist, caused lots of trouble when he played that organ duet marriage sketch with Grace Clark. No, "E. B. L.," "F. L. S." and "Mrs. B. M. V.," that was not a real ceremony. He and Grace just did it to entertain you. The next stunt, which they may have done by the time this reaches your hands, is a divorce sketch. Ralph is a died-in-the-wool bachelor of 30 years, thus differing from Ford and Glenn who are both benedicts. Ralph is blue eyed, inclined to be blond, 185 pounds in weight and 5 feet 10 inches tall. Incidentally, I have here an announcement of the marriage of Miss Helen McLeod of Missoula, Montana, to David Dudley Richards, who happens to be assistant director of WLS and announces ofttimes when Announcer Donald Malin is not on duty.

* *

Speaking of marriages and the usual run of things, William C. Stoess, who announces at WLW with Louis J. Johnen, became a father several weeks ago. His wife was formerly studio accompanist at the Crosley station.

* *

All sorts of news, yes indeed. For instance, "Roxy" Rothafel, whose Capitol theater announcing and "gang's" program over WEAF made him famous, is to spend the first two weeks in July at the training camp of the Marines at Quantico, Va. Roxy is now a major in the U. S. Marine Corps Reserve. During the Boxer rebellion in China he served for seven years in the Marines with rank of Corporal.

* *

Clyde Hager, I repeat for "Wilma," is now announcing at KFQZ, Hollywood, Calif. Glad, Wilma, that you have discovered the hiding place of Gene Rouse. "W. S." hasn't been so fortunate. To him I will advise tuning between 340 and 400 meters, east of Omaha, at a large station.

* *

Herbie Mintz has been handling the afternoon programs at WENR, Chicago, until recently, but now is on his way to Europe with his wife for a tour of the old country. Tune in England, "Lillian." The other announcer you hear at WJAZ is probably Ralph H. G. Mathews. The organ concerts of the Uptown theater broadcast by WEBH are announced by Carl F. Strodel.

* *

Why "Alice," if you've got it as bad as your letter indicates, you'd better hike over to WGR and look up "Pat and Moe." Really, Pat is very good looking and young, according to his picture, and I imagine Moe likewise is attractive. And then—both are single! Pat or Kenneth Fickett is WGR's chief announcer. He's tall, very blond, blue eyed, handsome featured, has a light complexion, is square shouldered, and wears his clothes well. His native home is Rochester, N. Y. Moe or Lester Erlenbach, director of Erlenbach orchestras, is director in charge of the afternoon program broadcast from WGR under the auspices of the Buffalo Radio Trades association. He is curly locked, darker in complexion than Pat, and musical to his finger tips. His native home is Buffalo. The "Pat and Moe" sketch you have heard is also known by the name of "The Journeyman Plumbers." It is a chatty song and fun making recess in an otherwise classical program. The new announcer you have observed is Mr. Hardy, second announcer, whose native home is in Virginia. He also spent six years in Boston, prior to moving to Buffalo, hence his "cutest little accent" which you admire. Mr. Hardy is rather short, has dark hair and blue eyes, and weighs about 140 pounds. There you are. Now visit the studio.

* *

Facts regarding Miss Ruth Paterson, of KPRC, are earnestly requested by "Harold" from Indiana. Harold, I'm sure you'd fall in love with her disposition and beauty once you saw her. Ruth is one of a large family of natural blondes from Chicago. Has the gloriously full and resonant soprano voice so essential to concert work and church soloist that she is. She smiles all the time, drives a high powered car, and for a hobby spends her spare time at the bayshore motoring and swimming. She loves to dress in white, which becomes her so perfectly, and her wardrobe includes some of the most spotlessly white apparel imaginable—sport suits, evening gowns and the like, all of moonlight, shimmering materials. But her eyes are NOT blue, instead they are a most wonderful light brown, a shade so unusual for a blonde type. As for her age, I dare not guess such sacred things, but will say that she is past the flapper age and not yet a bachelor maid. So there!

(Continued on page 27)

FISHERMEN AND ALL SPORT FANS—READ

HERE'S SUGGESTED RATION LIST FOR THE BIG TRIP

Also WQJ's Helen Harrington Downing Tells You How to Fry Three Good Things

By Helen Harrington Downing
Director of Day Programs at WQJ

THE season is fast approaching for the camper to start on the annual summer tour and camping trip. Sky and earth both conspire to lure the lover of outdoor into the open, and many plans are now being made for motor trips. Some few people prefer to stop at the hotels along the way, but many enjoy going in a well-equipped touring car with camping outfit and the necessary food supplies to camp near a lake for a day or two.

Of course, if women are included in the camping party, the planning of the lunch is left to them, but not infrequently four or five men like to go on a fishing trip by themselves and try their own hand at preparing meals. When this is the case a few suggestions are usually appreciated in making the list of necessary supplies. Following the several recipes I am going to recommend, is a suggested two weeks' food supply for four people.

Griddle cakes baked in the open seem to have particularly fine flavor, as well as hamburger meat cakes with onion, so here are recipes for both:

Griddle Cakes

Required: 3 cups flour, 3 level teaspoons Calumet baking powder, ½ level teaspoon salt, ¼ cup sugar, 2 cups milk, 2 eggs, 2 tablespoons melted butter.

Method: Sift flour, measure, then sift three times together with the baking powder, salt and sugar. Beat egg, add milk, and pour slowly into first mixture. Beat thoroughly, and add butter. Drop by spoonfuls on a greased hot griddle. Bake on other side. Serve with butter and maple syrup.

Hamburger Meat Surprises

Required: 2 pounds hamburger, 4 tablespoons water, 4 level teaspoons Calumet baking powder, 1 small onion (cut fine).

Method: Mix all together and shape into flat cakes. Cook until brown in two or three tablespoons of fat in a hot frying pan.

Fried Biscuits

Required: 2 cups flour, 2 level teaspoons Calumet baking powder, ½ level teaspoon salt, 2 tablespoons shortening, ¾ cup milk.

Method: Sift flour and then measure. Add salt and baking powder and sift all together three times. Mix in shortening with a knife or fingers. Add milk gradually. Mix lightly. Roll out ½-inch thick on floured board and cut into rolls. Have griddle or frying pan well greased and hot. Then lower heat. Brown on one side, then turn and brown on the other. Time for cooking, 7 to 10 minutes. Makes fourteen biscuits.

Two Weeks' Food Supply for Four

The following list is offered as a help in shopping to those persons wishing to assemble rations suitable for two weeks' food supply for four people. The same list can, of course, be used as a basis for figuring the amount of food needed by two, six, eight or more people on a one, two, three, four or more week's trip. Unless one is going into the wilderness, however, certain of the supplies can be replenished from week to week:

Dry Staple Foods: 10 lbs. flour, 10 lbs. sugar, 1 box salt, 1 box pepper, 2 lbs. coffee, ½ lb. tea, 2 lbs. powdered milk, 1 lb. Calumet baking powder, ½ lb. cocoa, 1 pkg. powdered sugar, 1 pkg. minute tapioca.

Cereals: 2 pkg. corn flakes, 1 pkg. shredded wheat.

Dried Fruits and Vegetables: 1 pkg. raisins, 1 lb. prunes, 1 lb. apricots, 2 envelopes each of dehydrated spinach, beets, carrots, potatoes, and onions.

Meat: Fresh meat for the first few days, 1 side of bacon, 5 to 6 lbs. ham—butt end, chipped beef, wieners, 1 baked ham, 2½-lb. pail lard.

Butter and Eggs: Obtain fresh at last point possible.

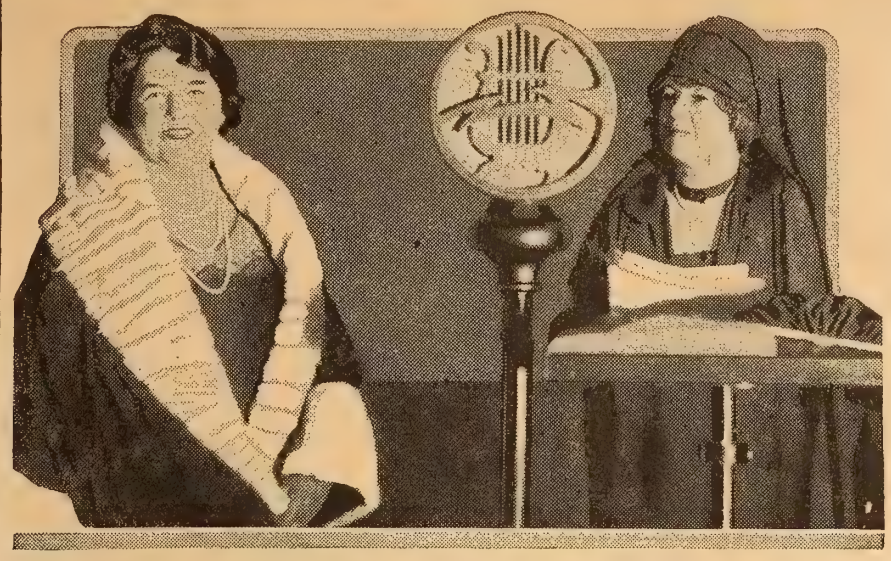
Canned Foods: 6 pts. condensed milk, 6 cans tomato soup, 6 cans corned beef hash, 6 cans baked beans, 6 cans chili con carne, 2 cans tomatoes, 1 bottle prepared mustard, 1 pt. pickles, 2 bottles chili sauce, 6 cans peas, 6 cans of corn, etc., 6 cans fruit.

Fresh Vegetables and Fruits: Potatoes, cabbage, lettuce, lemons, oranges, apples, bananas, and many other fresh fruits and vegetables that will keep for first few days. Some, such as cabbage, will keep for two weeks if iced.

Miscellaneous: 1 pt. vinegar, 2 pkgs. cookies, 12 glasses jam and jelly, 1 qt. homemade (or bottled) salad dressing, 2 lbs. cheese, 2 lbs. crackers, bread and buns.

And Don't Forget: Matches, candles, paper plates, paper napkins, paper drinking cups.

CONGRESSWOMEN DEBATE AT WRC



Not long ago women were not thought of in terms of the senate or house of representatives. Now—well, here are Mary E. Norton (left), of N. J., and Edith N. Rogers, of Mass., both members of the house of representatives, as they appeared prior to a political debate at Station WRC, Washington.

The Reader's View

More Flowers for the Hired Hand

Down there in the great open spaces of Texas he stands. Modest, retiring, cringing that he is, he doffs slowly his ten-gallon hat, gazes sheepishly into it, and thinks, "would that I could crawl into your crown and so hide forever from the admiring eyes of the world. My lot is most unfair."

His watch tells him it is program time. This brings a heavy sigh as he realizes he must again leave his beloved open spaces and submit to the ogling of mankind. He mounts the steps of the Star-Telegram plant. Just as he suspected, ogling eyes are waiting to devour him in front of the WBAP studio. The young Texan drops to his haunches, grasps a flannel cloth kept handily by for no other purpose, and starts massaging the floor, slowly working his way into the studio, janitor like.

Yes, he must take the air. There is no other course or recourse. The studio clock demands it. He slinks to the microphone, snarling noiselessly. At first his voice doesn't come, but it's so used to it that finally it does, and the young Texan whispers:

"Please, if you do not mind, I will announce the program. And about that contest—I withdraw my name as a candidate—do you all hear me—you in Canada—you in Hawaii—you in Kansas—do you all understand—I withdraw my name in this contest to pick the most popular announcer in the world. If you vote for me

PRES. COOLIDGE'S INDEPENDENCE

HIGH LIGHTS OF THE AIR

AMONG the first visitors to the Sesquicentennial exposition this summer will be President Coolidge whose Independence Day talk will be given in the Philadelphia municipal stadium. Complete broadcasting plans concerning the transmission of this speech to the public have not been given out as yet. At the present time only WFI expects to go on the air.

Another interesting event to take place in Philadelphia this month is the opening July 1, of the suspension bridge, called the largest in the world, connecting the states of Pennsylvania and New Jersey at Philadelphia. WLIT will broadcast the early morning program which will take place at the dedication of this important piece of engineering. Among the speakers will be Governors Gifford Pinchot of Pennsylvania and A. Harry Moore of New Jersey.

Hordes of cowboys and cowgirls are invading the peaceful agricultural state of Michigan, a state hitherto famous in the spring for the beauty of its blossoming fruit trees. However, all these wild riders of the western plains will be confined within the Michigan State Fair grounds where they will take part in the first Michigan rodeo. The entire spectacle will go over the microphone of WOOD. Tex Sherman, rodeo veteran, will describe the events which take place July 2-6.

Hotel Shelburne makes its Radio bow, July 2, via WPG, with the S. Wheeler Wadsworth players, twelve of whom are internationally known. Mr. Wadsworth prior to his organization of this group was musical conductor of several successful musical comedies, notably "Little Jessie James" and "The Rainbow Girls." His Radio programs promise to show the same kind of pep.

Summer brings the return of the New York Philharmonic orchestra to the air. Wednesdays, July 7 and 14, WJZ will broadcast this program at 8:30 p. m. Eastern daylight saving time. Saturday, July 10, WJZ and WRC will both broadcast.

Songs of the sea, luring the inland listener to the Atlantic coast will be the feature of the Wednesday, July 7, program at WRVA, Richmond, Va., when the Marines quartet takes to the ether. The only remedy on the Radio horizon this same evening to offset the roving effect of these songs is the medicine show at WLS, Chicago. Kruger and Dillon will reproduce the old-time medicine show and only the airline distance will save the listener from buying old-time favorite patent remedies.

A deaf man has been selected to sell the idea of a symphony orchestra over Radio. Arthur S. Garbett, famous for his contributions to musical literatures in notes and print, will give a short talk about a concert to be played by the San Francisco Symphony orchestra the day following, and his remarks will be illustrated by an instrumental trio before the KGO microphones, Saturday night, July 10, between 9 and 9:30 p. m. Pacific time. Although a composer of wide experience, and an expert on the orchestra, Garbett is about fifty per cent deaf, and hears only with the aid of mechanical devices.

Another departure from the conventional studio offering will be made Monday evening, July 12, when KOA, Denver, broadcasts a special burlesque program, the scene of which will be laid in the imaginary "Midwest Lyceum Bureau and Booking Agency." Two hours will be devoted to rehearsals, assembling of acts and judging aspiring professionals. Tune in and give your opinion.

PRES. COOLIDGE'S INDEPENDENCE DAY TALK FROM SESQUICENTENNIAL

HIGH LIGHTS OF THE AIR

AMONG the first visitors to the Sesquicentennial exposition this summer will be President Coolidge whose Independence Day talk will be given in the Philadelphia municipal stadium. Complete broadcasting plans concerning the transmission of this speech to the public have not been given out as yet. At the present time only WFI expects to go on the air.

Another interesting event to take place in Philadelphia this month is the opening July 1, of the suspension bridge, called the largest in the world, connecting the states of Pennsylvania and New Jersey at Philadelphia. WLIT will broadcast the early morning program which will take place at the dedication of this important piece of engineering. Among the speakers will be Governors Gifford Pinchot of Pennsylvania and A. Harry Moore of New Jersey.

Hordes of cowboys and cowgirls are invading the peaceful agricultural state of Michigan, a state hitherto famous in the spring for the beauty of its blossoming fruit trees. However, all these wild riders of the western plains will be confined within the Michigan State Fair grounds where they will take part in the first Michigan rodeo. The entire spectacle will go over the microphone of WOOD. Tex Sherman, rodeo veteran, will describe the events which take place July 2-6.

Hotel Shelburne makes its Radio bow, July 2, via WPG, with the S. Wheeler Wadsworth players, twelve of whom are internationally known. Mr. Wadsworth prior to his organization of this group was musical conductor of several successful musical comedies, notably "Little Jessie James" and "The Rainbow Girls." His Radio programs promise to show the same kind of pep.

Summer brings the return of the New York Philharmonic orchestra to the air. Wednesdays, July 7 and 14, WJZ will broadcast this program at 8:30 p. m. Eastern daylight saving time. Saturday, July 10, WJZ and WRC will both broadcast.

Songs of the sea, luring the inland listener to the Atlantic coast will be the feature of the Wednesday, July 7, program at WRVA, Richmond, Va., when the Marines quartet takes to the ether. The only remedy on the Radio horizon this same evening to offset the roving effect of these songs is the medicine show at WLS, Chicago. Kruger and Dillon will reproduce the old-time medicine show and only the airline distance will save the listener from buying old-time favorite patent remedies.

A deaf man has been selected to sell the idea of a symphony orchestra over Radio. Arthur S. Garbett, famous for his contributions to musical literatures in notes and print, will give a short talk about a concert to be played by the San Francisco Symphony orchestra the day following, and his remarks will be illustrated by an instrumental trio before the KGO microphones, Saturday night, July 10, between 9 and 9:30 p. m. Pacific time. Although a composer of wide experience, and an expert on the orchestra, Garbett is about fifty per cent deaf, and hears only with the aid of mechanical devices.

Another departure from the conventional studio offering will be made Monday evening, July 12, when KOA, Denver, broadcasts a special burlesque program, the scene of which will be laid in the imaginary "Midwest Lyceum Bureau and Booking Agency." Two hours will be devoted to rehearsals, assembling of acts and judging aspiring professionals. Tune in and give your opinion.

GENTLEMEN could have no objections to the little lady on the right even if they did not prefer blondes. Peggy Mathews, owner of this golden hair, is a favorite singer at KFWB. She won a silver loving cup for being the most popular entertainer at this station. On the left is your French teacher, Madame Ida Tcimpidis, who has been giving lessons in this language for the past two years at WLW. Tune in every Tuesday at 4:10 p. m. Eastern standard time. Fans who have enjoyed the Atwater Kent programs all winter will like the semi-classical concerts being given Sunday evenings over the WEAF chain by the popular Irish tenor, Allen McQuhae, and the Atwater Kent orchestra. Mr. McQuhae may be seen at the microphone, above. Nicholas Beresowsky leader of the orchestra is standing at the right.

Thursday, July 1

Balkite "B" and the Balkite Battery Charger

give your radio set unfailing power from the light socket

With full, noiseless, even power, always exactly as required, your set will give you a quality of reception to be secured in no other way. Balkite "B" at $35* and the Balkite Battery Charger at $19.50* give you this power, with maximum convenience, from the light socket.

Balkite "B"—the noiseless "B" power supply—replaces "B" batteries entirely and supplies "B" current from the lighting circuit. Unlike any other "B" device, it requires no replacements and will not deteriorate with use. It will outlive 20 sets of "B" dry cells. With over 75,000 in use, on all types of sets, to our knowledge not one has ever worn out. It is tested and listed as standard by the Underwriters' Laboratories, and *guaranteed to give satisfaction.*

The Balkite Battery Charger is the popular charger for "A" batteries. Its high charging rate makes it ideal for heavy-duty sets. Entirely noiseless, it can be used while the set is in operation. If your battery should be low you merely turn on the charger and operate the set.

Add these permanent Balkite Radio Power Units to your set and secure unfailing radio power from the light socket. Ask your dealer.

**Prices slightly higher west of the Rockies and in Canada*

KFH, Wichita, Kansas, surprised fans recently by giving the opera "Martha." This production was so credible, plans are being made for a series of concerts. The artists in costume, above, are from left to right, Roy Campbell, tenor; Sybil Johnson, soprano; Sue Fulton, contralto, and Lester Weatherwax, baritone. J. L. Fox, announcer, is standing in the center of the group.

New Schedule for Baseball Scores Announced by WJZ

NEW YORK.—The sports loving element in Station WJZ's audience are warned of a change which has occurred in the time of broadcasting of the final sport returns.

The station has found that it will be possible to give the final baseball returns to the fans half an hour earlier than has been the practice during the early part of the season. In other words, WJZ will broadcast their sports final at 7 o'clock Eastern daylight time every day, including Sunday. The early sports broadcasts will be given at intervals every day except Sunday, starting at 4 o'clock, followed by a more complete return at 4:30. Then there will occur a lapse of one hour until 5:30 when a third report, which should include complete returns on all baseball games played under Eastern daylight saving time. The fourth sports report which will be given at 6 p. m. each week day will include the complete returns on all major league games played under Eastern daylight saving and standard time.

The final report at 7 o'clock will cover all baseball games and other major sporting events of the day. If by chance any major event has not been completed by 7 p. m. the returns on that event will be given a supplementary report as soon as the report is received.

Radio Fish Stories, True Or Not So True, Published

MINNEAPOLIS.—A booklet entitled "Fish Lies and Liars" has just been published by the Minnesota division of the Izaak Walton league. It contains the prize fish stories entered in the Radio contest sponsored by the league during the Tuesday night talks from the Gold Medal station, WCCO. The fly leaf of the booklet carried the very pertinent question, "Does Fishing Make Men Liars or Do Only Liars Fish?"

The first letter published in the booklet is purported to come from one "Ananias," whose address is given as "Hades." Mr. Ananias admits that after listening to these fish stories told from WCCO, he is hopelessly outclassed and that he is ready to relinquish all claims and tearfully hand over his crown to the Izaak Walton league champion.

The prize story was written by H. B. Haskell of White Bear, Minn. It is written in the Swedish dialect, and describes the capture of a blue catfish.

The booklet was compiled by Deane Rundlett and Miles Durkin, Minneapolis officials of the league.

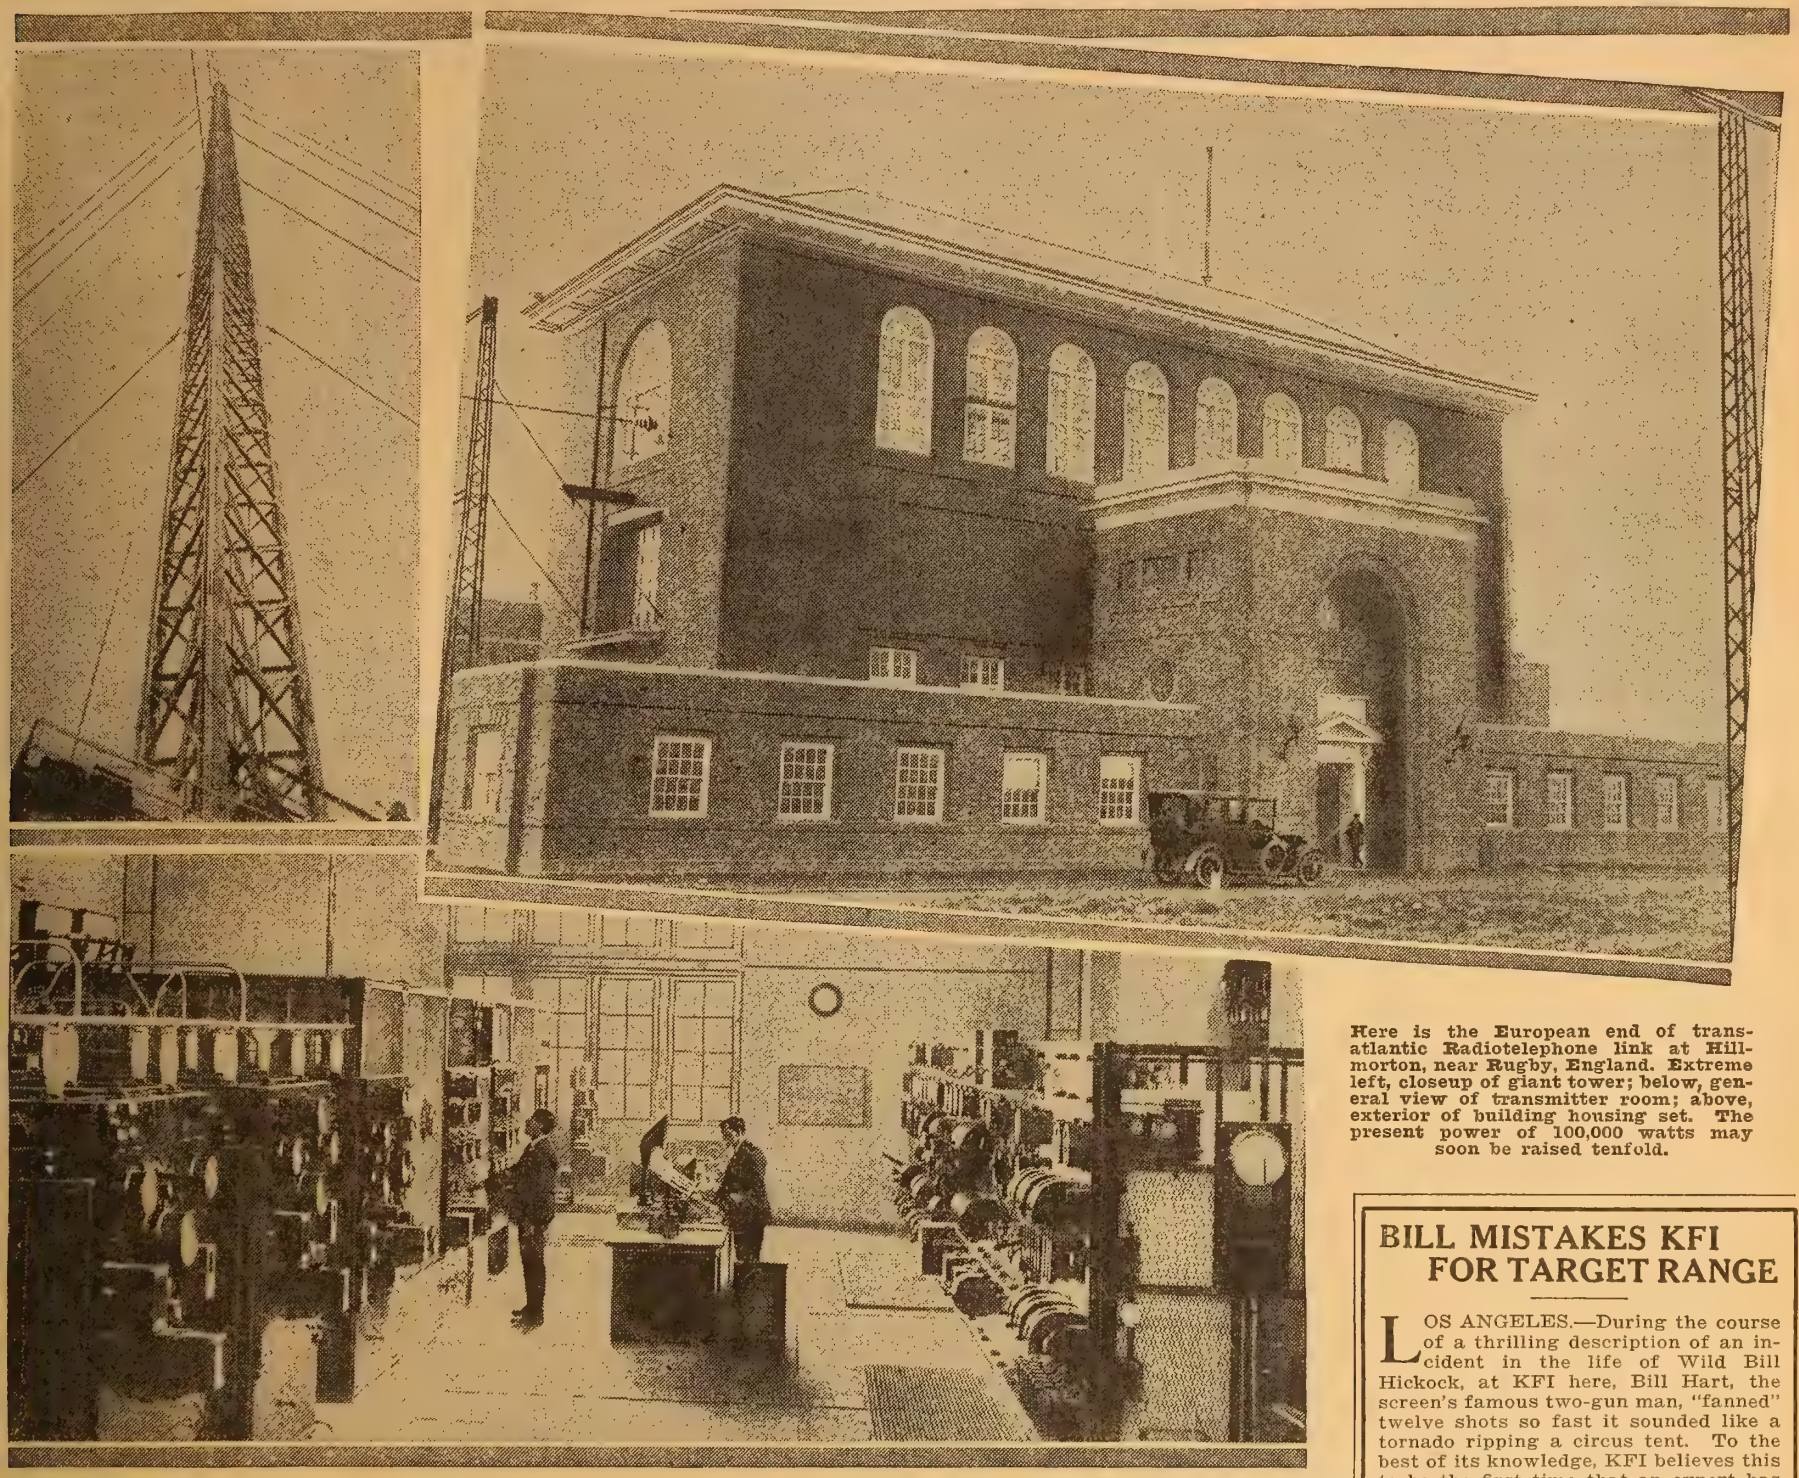
"HELLO AMERICA, EUROPE CALLING"



Here is the European end of transatlantic Radiotelephone link at Hillmorton, near Rugby, England. Extreme left, closeup of giant tower; below, general view of transmitter room; above, exterior of building housing set. The present power of 100,000 watts may soon be raised tenfold.

Fifty Years After Telephone's Debut Words from It Wing Across Atlantic

By J. G. Forrest

NEW YORK.—Fifty years to the day after the first patent was issued for the telephone—considered the most valuable patent ever issued by the United States patent office—two-way Radiotelephonic communication was established across the Atlantic ocean.

For four hours voices flew back and forth across the ocean, while newspaper men on both sides of the Atlantic marveled at the clearness with which they could hear each other. The speakers might have been a block away instead of 3,400 miles apart, for the audibility was better than that in an ordinary telephone communication.

The demonstration was the result of years of experimenting on the part of the American Telegraph and Telephone company, the Radio Corporation of America and the British General post office, to determine the feasibility of commercial service between this country and London. While experts have conversed before, this is the first time that a definite schedule of conversation between groups has been arranged.

Londoners Ask About Prohibition

The tests here took place in a large room on the second floor of the telephone company's building at 24 Walker street. The room was furnished with chairs; a pair of ear phones being placed at each chair. In one corner of the room a booth—similar to a telephone booth—was equipped with the apparatus used for ordinary telephonic communication. Here the visitors went when they spoke to the parties in London.

While the person in the booth was talking, the others in the chairs could hear him carrying on the conversation. Several persons in London asked if it were possible to get liquor here. It was quite the popular joke. A young woman was in the booth when one such question was asked. She replied that it was impossible. Some of the men sitting in the chairs smiled in reply.

Route Conversation Took

In transmitting from America, the speech followed a different path from that coming from London. From this city, sound was sent over the telephone wires to the Radio transmitting station of the Radio Corporation at Rocky Point, L. I., a distance of seventy miles, and from there it was transmitted by Radio 3,300 miles to a receiving station of the British General post office at Wroughton, England. From this point it was carried over telephone circuits a distance of about seventy miles to London.

Coming from London to America, the speech was carried over telephone wires a distance of seventy miles to the Radio station at Rugby, England, and thence by Radio a distance of 2,900 miles to a receiving station at Houlton, Me. From Houlton the speech was carried over telephone circuits a distance of 600 miles to this city.

100,000 Watts Power Used

The transmission from Rocky Point was on a wave length of 5,260 meters and the transmission from Rugby, England, was on a wave length of 5,750 meters. The power used in transmitting from each end was about 100 kilowatts—100,000 watts!

In view of the many difficult problems involved, it is not possible at the present time to make any statements regarding the date when transatlantic Radio telephone service can be made available regularly to the public. About all that can be said is that the tests thus far carried out are encouraging. Complete service may be had soon.

When that time arrives, a 'phone subscriber in San Francisco will be able to talk to anyone in Europe.

BILL MISTAKES KFI FOR TARGET RANGE

LOS ANGELES.—During the course of a thrilling description of an incident in the life of Wild Bill Hickock, at KFI here, Bill Hart, the screen's famous two-gun man, "fanned" twelve shots so fast it sounded like a tornado ripping a circus tent. To the best of its knowledge, KFI believes this to be the first time that an expert has made a shooting gallery out of a broadcasting studio.

For the benefit of bloopers a new terror has been introduced by the British post office. This is an automobile, fitted with a receiver and the latest type of direction finder, to be used for patrolling London areas and hunting down radiating sets.

Televocal QUALITY TUBES

Dependable and a Technical Triumph

A RADIO TUBE that is non-microphonic — won't short. Sold in matched units; tested, balanced and plainly marked detector, radio frequency or audio frequency.

Ask your dealer for this new and better radio tube that costs no more. If he can't supply you with Televocals, send us his name and address on attached coupon.

The Reader's View

(Continued from page 15)

I do not know what I will do—unless it will be to thank you."—CHIEF OF THE WDAF NIGHTHAWKS.

P. S. Anyway, Digest, the old Hired Hand is a blamed good announcer, and to prove I mean it, enclosed you will find my ballot for him. The Nighthawk Chief knows talent when he sees it, whether it be in the matter of singing, announcing, or polling votes, and assures the world that in another year he will know better how to conduct his campaign.

Call the old Hawk a jealous bird if you want to, but let me tell you what the Hired Hand did. The Kansas City Star, home of the Nighthawks, was recently advertised for sale, in compliance with the will of its founder, William Rockhill Nelson. This Texan wired in to the managing editor his bid, offering for the newspaper a green top, his two "snotty" agates and a ball Babe Ruth gave to him, and adding the line (this is what got me) "with or without the Nighthawks." I haven't gotten over that last crack yet.—H. D. F., Kansas City, Mo.

B SUBSTITUTE IS GOOD

(Continued from page 11)

screw. This screw is cut with a minute micrometer thread which affords extremely fine resistance graduations. There is no reason for removing the plunger carrying this thread, but if you do, then be very certain in replacing it that you start absolutely true in its housing. If you do not do this, you will wreck a wonderful resistance and you alone are to blame.

As complete assembly and operating instructions are included in the cartons containing the parts used in this eliminator, exhaustive construction data appears as superfluous. It's a real eliminator—better build it.

WGHP IS "AD" STATION

(Continued from page 6)

Even the purposeful business of advertising, cleverly done, is an art requiring fitness and sympathetic treatment. No one understands this truth better than Mr. Phelps who skillfully balances the scales to a hair's breadth so that the message is accepted as wholesome and not rejected as unpalatable. Listeners who tune in the WGHP programs are invariably pleased because the artistic part comes clean and untainted. At the conclusion of the program the names of the advertising clientele are announced for the first time as the sponsors of the entertainment. It is a matter of reciprocity to the public. Buyers have been good to the firms; the firms respond with a serenade, as it were.

"We make no secret of the fact that we are advertising agents," said a representative of the Phelps organization, "and, frankly, WGHP is an organ of our concern. But advertising by Radio requires an infinite appreciation of the listener's viewpoint. He must not be offended or more harm is done than good. To interlard the program numbers with bald advertising would be comparable to smearing a proud mountain peak with a glaring sign. The effect would be ruinous; for the scenic effect would be destroyed and the observer would bitterly resent the presumption of the owner of the sign. The beauty of an artistic rendition by Radio would be smudged and the listener would resent the cause of the smudging."

That the WGHP policy is a success seems to be confirmed by the fact that after six months it has expanded into larger quarters. There is a new broadcasting station just outside the suburb of Mt. Clemens and an enlarged studio in the new building erected as the permanent home of the organization at Jefferson and Joseph Campau avenues.

This building stands apart unique as a business block. It is distinctly Italian in architectural design, an old Roman castle with courtyard, abounding shrubbery and a fountain. The whole effect is an appeal to the artistic and an inspiration to those who come there to broadcast.

William D. Lauries has been delegated as managing director and it was through his personal efforts that the station has been launched according to the ideas and ideals outlined by Mr. Phelps. Harry C. Browne, station director and announcer, comes from the theater where he established a name for himself over the footlights from one end of the country to the other. This talent and experience is being used to advantage in presenting programs according to the ethics and demands of good showmanship. He has devised a number of unique and noteworthy features which have established character and individuality with the WGHP station.

T. Stanley Perry, musical director, has also contributed largely to the distinction of this new station. His voice was a favorite with Radio listeners throughout the Detroit area long before the establishment of WGHP. One of the rigid demands of this station has been that its music must be interpreted with authority and understanding so that the most fastidious listeners might consider the technique above reproach. The Little Symphony orchestra, under the leadership of Dirk Van Emmerik, represents a selection of artists from the Detroit Symphony orchestra. All are soloists on their respective instruments. Twice each week they present a two hour program of the favorite classics. Two dance bands provide the daily menu of modern music. One is the Gerald Marks Hotel Tuller orchestra and the other, the Skylark Dance band. Among the favorite feature numbers is the Motortown trio, Bert Hall, Frank Turner and Harry Reid. Sometimes they are joined by Miss Gladys Sanderson and her ukulele.

Madame Gizi Szanto, concert pianist, is one of the special soloists heard each week with the Little Symphony orchestra. Included in the operatic group are Miss Leona E. Mitchell, soprano; Albertine Schmittke, soprano; Mildred Carner Johnson, contralto; Mona Perkins, contralto; T. Stanley Perry and Richard Rolph, tenors; William A. Kerr and John L. Dickinson, baritones, and Tom Perry, juvenile. The WGHP Frolickers are Harry C. Browne, Mr. and Mrs. Eddie McGrath, "Heck" and "Mack".

The dinner hour and evening program artists are: Marvelle Payette, Winifred Huntoon, Ann Patterson, Vivian Downey, Fredericka Sims Hull, sopranos; Charles Hargreaves and C. Herbert Peterson, tenors; Hubert Haussler, Chas. Hutton, Chas. Coates, baritones; Wm. F. Bartels, basso. The studio accompanists and pianists are Wayne Frary, Loraine Lancey, Helen Fairchild and J. Franz Miller. The WGHP entertainers who enact the playlets are drawn from the light opera group. The WGHP male quartet is composed of T. Stanley Perry, John Koneczny, tenors; Archibald C. Jackson, baritone; O. Henry Albert, basso. On the occasion of the opening of the new studio, DeWolf Hopper, Charles Hart, Lieut. Gitz-Rice, Frank Moulan, Lilliebelle Barton, Adele Marcus and Mary C. Browne were brought from New York. They presented a program especially arranged in honor of the event.

Such is the standard set by this new broadcasting station in Detroit. Mail returns have indicated that there is a rapidly growing audience of listeners not only in the Detroit area but throughout the United States. Automobiles doubtless will continue to bear aloft Detroit's fame for many years to come but they will have to share part of the honors with Radio—the hum of the antenna a pleasing obbligato to the song of the motors.

To Show Historic Receivers

NEW YORK.—Radio equipment used in the Byrd and Wilkins airplane expeditions to the frozen North will be displayed at Grand Central Palace, New York city, on September 10, when the Radio show opens.

WJZ's massive structural steel antenna towers are insulated at the base to prevent them from absorbing even a small amount of the energy radiated by the antenna.

"We give our sets about the same amount of use, but your 'B' batteries always last longer than mine. What's your secret?"

"WHY, there's really no deep, dark secret about it. It's simply knowing what are the right size batteries to buy for your set."

"Yes, but what do you mean by *right* size?"

"The right size depends on the number of tubes in your set. The more tubes you have, the bigger the 'B' battery you need to give you long, economical service. Just follow the rules laid down by Eveready and you can't make a mistake." These are the rules and the results:

On all but single tube sets—Connect a "C" battery. The length of service given below is based on its use.*

On 1 to 3 tubes—Use Eveready No. 772. Listening in on the average of 2 hours daily, it will last a year or more.

On 4 or more tubes—Use the Heavy-Duty "B" Batteries, either No. 770 or the even longer-lived Eveready Layerbilt No. 486. Used on the average of 2 hours daily, these will last 8 months or longer.

The above rules will give you the maximum "B" battery life and economy. Of course, if you listen in more than 2 hours a day, your "B" batteries will not last quite so long, and if you listen less they will last longer. Eveready "B" Batteries give the pure, steady, noiseless current that is absolutely essential if you prize pure tone.

Send for booklet, "Choosing and Using the Right Radio Batteries," sent free on request. There is an Eveready dealer nearby.

Manufactured and guaranteed by
NATIONAL CARBON CO., Inc.
New York San Francisco
Canadian National Carbon Co., Limited
Toronto, Ontario

*NOTE: A "C" battery greatly increases the life of your "B" batteries and gives a quality of reception unobtainable without it. Radio sets may easily be changed by any competent radio service man to permit the use of a "C" battery.

Tuesday night means Eveready Hour—8 P. M., Eastern Standard Time, through the following stations:

WEAF—*New York*

KSD—*St. Louis*

LEFT - *No. 486, for 4, 5 or more tubes. $5.50.*
RIGHT - *Eveready Dry Cell Radio "A" Battery, 1½ volts.*

NEW WEBH MUSIC IS PLEASANT SURPRISE

BEST MUSICIANS ENGAGED TO FILL VOID OF ORIOLE

Famous Russo-Fiorito Orchestra Leaves for Aragon Ballroom and WIBO—On Air August 1

CHICAGO.—The new Edgewater Beach hotel orchestra, every member of which is a master musician, is the pleasant surprise which greeted WEBH listeners recently in place of the famous Russo-Fiorito Oriole orchestra, whose strains have made the "Voice of the Great Lakes" one of the most popular stations on the air.

The Oriole left WEBH and the hotel to take a long time contract with the new Andrew Karzas "Aragon" ballroom, a gigantic dance palace which is to open here August 1. At that time the Oriole orchestra will again be on the air broadcasting through WIBO, the Russo-Fiorito Orchestras and Nelson Brothers station.

The void was expected and for months past the country has been scoured to find the best musicians in the world to replace the famous Oriole. No money was spared in the attempt, and it is now claimed that the new musical organization of the Edgewater Beach hotel is paid higher than any other orchestral body in the world.

"We are proud to introduce the new Edgewater Beach hotel orchestra to our listeners," announced Robert D. Boniel, WEBH director. "We will leave the audience to judge for itself."

Introducing Its Members

Members of the new orchestra are as follows:

Joseph Gallichio, director, for six years concertmaster for Balaban & Katz theaters, conceded to be one of the greatest violinists in the country. For five years he was with the Tip-Top Inn sextet, two years with the Minneapolis Symphony orchestra and two seasons with Chicago grand opera.

Roy Bargy, pianist, recently returned from an extended tour abroad with Isham Jones' orchestra; organized the famous Benson Victor Recording orchestra; a favorite of two continents when at the Kit Kat club in London and internationally known also as a Brunswick recording artist.

Frank Siegrist, trumpet, introduced the stage form of entertainment for a jazz band, hails from the Pacific coast, where, prior to the war, he was an orchestra leader. He is the only man in the world to successfully play above high "C," a range higher than any human voice.

Frank Quartell, trumpet, late of Isham Jones orchestra, conductor of own orchestra at Montmarte cafe, Okeh record artist, with Paul Biese six months and the Oriole orchestra one and one-half years.

Charles Wagner, drum and tympany, late star of Al Short's orchestra at the Capitol theater.

Ed Vito, harpist, will play first harp for the Cleveland Symphony orchestra next season, has been with the Chicago theater orchestra since the opening of that playhouse.

Al Armer, string bass, tuba and bass sax, former principal bass in Akron Symphony orchestra under Edouard Perrigo, and later with Victor Herbert's orchestra, member of Paul Whiteman's orchestra during concerts in Aeolian and Carnegie halls, New York.

Louis Sarli, violinist, eleven seasons with Minneapolis Symphony orchestra, two with the St. Louis Symphony orchestra and once with Victor Herbert.

C. R. Heidke, saxophone, formerly with Isham Jones, Roy Bargy and Arnold Johnson orchestras; a favorite in New York.

Emerson J. Both, saxophone and clarinet, formerly of the Chicago and Tivoli theater orchestras and of the Arnold Johnson and Charley Straight orchestras.

David Bennett, sax, clarinet, flute and piano accordion, a recording artist with Fred Hamm and Art Kahn orchestras and former member of Gus Edwards' Terrace Garden orchestra.

L. D'Amico, accordion, vaudeville star, member of Rainbo Gardens orchestra up to joining Edgewater Beach hotel orchestra.

Bernard Sigert, cellist, first cello at Riviera, four seasons with Philadelphia Symphony orchestra and engaged for next season by the Chicago Symphony orchestra.

Orville Rennie, vocalist, lately in the "Student Prince" singing leading role.

Harry Perkins, viola, with Chicago Symphony orchestra for five years.

Charles Barbera, trombone, just closed season with famous Brown orchestra at Louisville, Ky.

E. Robertson, first trombone, late of the Gus Edwards orchestra, and of Olson's orchestra, recording artists with great New York reputation.

AT-LAN-TAH GAWJUH LOOKS OVER RECORD

Here's "Colonel" Lambdin Kay, WSB's famous director and announcer, examining a phonograph record of his voice made in New York by Francis R. Hoyt, inventor. Mr. Hoyt just tuned in WSB one night, waited till Mr. Kay was announcing, and turned on his Radio-phonograph recorder. Result—"Colonel" Kay heard himself talking to himself when he visited New York.

WGBF Erects New Antenna

EVANSVILLE, Ind.—The Finke Furniture company station here, WGBF, has recently completed the erection of a new 85-foot steel tower and vertical cage antenna system. A greater range is expected. The wave length is 236.1 meters.

SHORT WAVES

By Marcella

(Continued from page 14)

"O'Flannigan and O'Hara," otherwise Jerry Sullivan, WQJ's director, and Harry Geise, his assistant, are doing their turn again since Harry is back at the Calumet-Rainbo Gardens station. Listen in for their new "Howdy, Hello" song. Same old Jerry and Harry.

* *

"Is Ruth Etting of WLS single, and if not why?" asks Eugene. No, because she was too pretty and nice to stay single. I'll ask Ruth (if she ever gets single soon again) how she would like to gamble her blue-eyed, blonde little 112-pound self on a "fat and bald-headed man."

* *

Lew Farris, "The Eiffel Tower of Radio," is a roaming balladist traveling for the Ted Brown Music company of Chicago. He is liable to turn up most anywhere, a facility permitted by the long strides of his nearly 7 feet of anatomy. Will give a more intimate sketch of this young giant later, "Louella," just as soon as I can put my finger on him.

* *

No, "A. F. C.," Travis Hale and Juanita Collins are not WDAF announcers. Travis Hale is heard frequently with his banjo on the Nighthawks program. He is a popular WDAF entertainer and is noted particularly for his rendition of "A Cowboy's Lament." Juanita Collins is really Mrs. H. Dean Fitzer, wife of the announcer, who sings and plays with him in popular jingles from WDAF. The announcement always is, "Juanita Collins and the Announcer." And next issue, my friends, I shall tell you all about H. Dean Fitzer himself.

* *

Another dandy collection of "inside stuff" to appear next issue is that regarding the entertaining Ernest Rogers of WSB, alias "Willie the Weeper," alias "Old King Tut, the Radio Nut." You see I have covered so much space this time that I am afraid I will wear out my welcome. I said recently that Ernest was single and "looking around." His six-months bride almost took a train from Atlanta to make me retract this error. Ernie, Willie or King Tut—take your choice—tells me that Warner's Seven Aces are now trumping, I mean trumpeting regularly at the Peabody hotel of Memphis, Tenn.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

ARNOUX TOPS CUP RACE

(Continued from page 2)

order since last publication, and but few votes have been added. Miss Lillian Shaw, of CKY, who has maintained the lead since the start, is now convalescing from an operation for appendicitis, a note from Winnipeg informs. The standing is:

1. Lillian Shaw, CKY (1).....1,676
2. Bert Hooper, CKCK (2)..... 682
3. H. C. Fricker, CKCL (3)..... 653
4. Geo. A. Wright, CNRV (4)..... 396
5. C. W. Darling, CFCF (5)..... 104

Importance of Saving Ballots

As a reward for saving consecutively numbered ballots and casting them at one time for the same candidate, a bonus vote, with size depending on the number in consecutive order, is credited to that candidate.

Each of these ballots will count for one vote when sent in separately. You can hold these ballots until you have four that are consecutively numbered and when they are sent in, a bonus of eight votes or total of twelve will be granted.

The larger number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. For a complete series of ballots, including one from each issue from March 27 to September 1, a bonus of fifty votes will be allowed.

Pikes Peak to Denver Link First in Rocky Radio Chain

DENVER.—The first link in a Rocky Mountain broadcasting chain was recently formed by the hooking up by land wire of stations KLZ, (500 watts, 266 meters) Reynolds Radio Co., Inc., at the Shirley-Savoy hotel, Denver, and KFXF, (500 watts, 250 meters) the Pikes Peak station at Colorado Springs.

While only seventy-five miles apart, neither station has been heard consistently in the other city due to some peculiar geographic condition.

For Your Garden

Some Bargains Ready Now

1—BIG PLANTS—CHRYSANTHEMUMS, CARNATIONS, SALVIAS, SNAPDRAGONS, PETUNIAS, VERBENAS, PARLOR IVY, LOBELIAS, DOUBLE STOCKS, ICE PINKS, HELIOTROPES, etc., regularly any 12 for $1.00; Special, any 15 for $1.00 or any 100 assorted for $5.00. Safe arrival warranted.

2—OLD FASHIONED FAVORITES—DELPHINIUMS, FOX GLOVES, C. BELLS, LILY OF VALLEY, DOUBLE HOLLYHOCKS, HEPATICAS, and all the old-time garden BORDER FAVORITES, were any 12, Now Special, any 15 for $1.00 or 100 for $5.00. Order any you want—we have them.

3—BIG GERANIUMS, all colors, 12 for $1.50; BIG CANNAS, all colors, 12 for $1.50.

4—FANCY DAHLIAS—12 for $1.50; GOLD MEDAL GLADIOLI, 100 for $4.00.

5—SPLENDID 3 year old H. T. ROSES such as COLUMBIA, OPHELIA and 40 others—12 for $6.00; 100 for $45.00.

6—L. I. VEGETABLE PLANTS—100 for $1.50; 1,000 for $10, assorted. Cabbage, Lettuce, Egg, Tomato, Celery, etc.

Above a few Bargains. Order them now and also send for our full list. 10% extra free plants for mention of this paper with your order and check.

"BIG RABBIT"

(Continued from page 9)

nosis; he had played a part until he came to think it real. I feared his vengeance. Keenly sensitive, like most half-breeds, he hated those who were his superiors.

"MAJOR Gaskill made arrangements for the special car when Trimble told him they were suspected, and was in it. Trimble dared not act until he was beyond the reach of help. When the trail led to Florida I suspected the source of his wealth was stolen timber. A thousand negroes, scattered over miles of timber land, each stealing a few logs, could escape detection. It was no wonder Danforth could not find the thief."

Borton stopped to light the cigar and grinned.

"I stumbled upon the trail by overhearing two negroes talking on the boat of a big meeting. There was no use to try to employ force. A regiment could not have captured them in the swamps. Trimble, I learned was playing the part of Big Rabbit, cunningly combining superstition and business. The rabbit was the figure of power. But Trimble overlooked a bet. There is a zootheistic being higher than the rabbit—the terrapin. Among many of the African tribes, especially among the Congo tribes and the Guinea coast tribes, the turtle is the judge, the law giver, and is set above the other zootheistic gods. I determined to play terrapin and checkmate Trimble's rabbit, relying upon surprising him and then placing him in a position where he dared not defy me openly. I went to Jacksonville, had a big turtle shell built of canvas and wires—The rest you know."

"I apologize, Dick," I said. "But don't blame me for doubting. No one would have believed unless he knew negroes."

"There is one thing I'd like to know," said Danforth, "how did you ever manage to escape from the stage?"

Borton grinned happily.

"Easy, he said. "I made a lot of signs, told them I would have to think for a moment, pulled my head into the shell, then crawled out of the shell, crept to the door and dropped down to the ground. They waited five minutes for me to start again—by that time I was in the woods. You should have heard them yell when they learned the turtle was empty."

THERE were legal formalities to be complied with, arrangements to be made for the inquest. The sheriff and coroner dispensed with many formalities—and permitted us to go. I did not see Miss Tonneson until the following morning.

Borton and Danforth had engaged a yacht to convey our party to Jacksonville, and we left Palatka early.

The little white yacht with her varnished cabin, her shining brass work, her pennant and flags flying in the soft breeze curved away from the dock, and sailed down the lotus hemmed channel of the wide river. The sun was shining from a cloudless sky. Orange blossoms, jasmine and magnolia scented the sweet, soft air. The river rippled and danced to the music of the breeze.

I huddled myself in the cabin, taking refuge behind a Jacksonville paper.

The sunshine offended my eyes. The scent of orange blossoms was an insult to my sense of smell. The soft lapping of little waves against the vessel wearied my ears. I was enjoying a man sized grouch against fate and the world in general. The murmur of conversation from the forward deck where Miss Tonneson, Borton and Danforth were seated did not help dispel my gloom.

Presently the door opened and Borton, grinning as usual, stuck his head in.

"Miss Tonneson ordered all hands forward: you're not an exception," he said.

"Sunlight makes my head ache," I growled.

"Balky as a mule, he confessed he was," Borton called back to those on deck.

"Bray a couple of times for us," he taunted grinning at me.

I swore under my breath and tried to continue reading.

"Not loud enough," he said. "Folks outside couldn't hear you. Bray again."

I swore some more, but arose and went to join them. Borton would have kept it up all the way to Jacksonville if I had not. It always is easier to do what he wants done.

WE FOUR sat on the little forward deck, Miss Tonneson in a steamer chair wrapped in a rug. Borton did most of the talking. Finally as the yacht was passing Doctors Inlet he stood up and stretched his big frame.

"Come on Dan," he said, "let's tramp a bit. I'm getting stiff. Need exercise. An hour in that turtle shell cramped my muscles."

I tried to signal him, but we were left alone. Roberta looked at me seriously but her eyes were smiling and a little mysty. I shifted uneasily.

"I'm afraid Mr Borton is right—about—about your mulishness," she said.

"I beg your pardon," I said stiffly. "I do not quite understand."

She made a little gurgling sound, her eyes danced and she broke into a nervous light laugh.

"Excuse me," she said, still laughing, "but you are SO funny when you try to be dignified. I'm going to have a fine time teasing you."

"I'm afraid there will not be much opportunity for indulging in that amusement," I replied, trying to smile. "I shall go through to New York—and I fear we will not meet often."

"Oh!" she exclaimed, her eyes widening as if in consternation "I—we—Aren't—?"

She hesitated, and flushed as if confused. For an instant she said nothing, then she spoke naturally; or unnaturally naturally as only she can do.

"What was it you were saying about 'now that you are poor' yesterday when the telegram came?" she asked.

She dropped her eyes demurely and looked innocent. I stared at her.

Her eyes refused to meet mine and she seemed to be gazing guilelessly at the river.

"Roberta Lee Tonneson," I demanded sternly, "are you deliberately trying to goad me into proposing to you—when you know you are rich—and that I'm a poor dub of a reporter—"

"Well," she said, her voice shaking, "if a man is such a big goose, he will not tell a girl he—he—he loves her just because of some hateful money—"

"Oh Wen, don't! Not now. The man at the wheel may see—"

But I did. Just then Borton came around the corner of the wheel house talking to Danforth.

"Yet his ears do not show any signs of getting longer," he said as if to his companion. "In fact he sometimes shows signs of intelligence."

He grinned his most maddening grin as he swung the little detective about face and marched him back along the deck.

Just for that I had a notion not to ask him to be our best man this fall were it not for the fact Bob (that is Miss Tonneson) insists upon it, and her word is law. He'll be grinning when we are at the altar.

THE END

NEW FLOATING WRMU

(Continued from page 4)

cester, Massachusetts; the triangular event from Sheepshead Bay Yacht club-Jones Inlet-Scotland Light Ship, and various events near Philadelphia in conjunction with the Sesquicentennial celebration.

"To cover these feature events, the new MU-1, with Station WRMU built for greater efficiency and range, will be ready to serve the aquatic sport loving broadcast listeners.

"The marine broadcasting station WRMU was the first and is the only broadcast transmitter of this type in the country at the present time. It has done much to delight the sport world by covering events which heretofore it has been impossible to broadcast.

"The broadcasting apparatus for this work has been carefully designed incorporating features not found in the equipment on last year's yacht and from the experience obtained it has made possible the construction of equipment many times more efficient and powerful. Rugged features so necessary for marine installation, plus refinements for high quality broadcast transmission, have been incorporated. The transmitter has been designed with greater power output than that which ordinarily will be used to insure reliable transmission over good distances under extremely adverse conditions."

Thus the MU-1 takes its place in the magic procession, one more phase in the attainment of speed in gathering and conveying news to a waiting world. The pageant moves on. What will the next step show? Out of the limbo of mystic future it is being moulded. Fame and Fortune hold a crown.

OLD JUDGE LIKES WSM

(Continued from page 5)

sleep and drinking black coffee to keep him awake. His voice range with pathos as he told of the afflictions the tornado had wrought in the homes of hundreds of families and at the close of the Radio relief drive, WLS had raised more than a quarter of a million dollars.

But a few months ago, Hay's longing for the Southland caused him to return to Tennessee and he accepted the position of director and chief announcer of WSM. Although Hay is known everywhere as "The Solemn Old Judge," because of the quaint dialect stories he wrote for the Commercial Appeal under that name, he is really a most personable young man, with clear-cut features and eyes that show he is thinking about people, as well as Radio and that he never fails to find a lot of fun in everything that anyone else does.

Hay's popularity is not due alone to his originality and human appeal. His favorite slogan, "Broadcast personality plus a smile, if you would win your way into the hearts of a Radio audience," tells the rest of the story. It helped him win the first annual Radio Digest cup award as the most popular announcer in 1924, presented to him at the first Radio World's Fair in Madison Square Garden, New York city, and it is what makes him popular with the Radio fans now who listen in on WSM. Hay has his third whistle—a steamboat "tooter" which he calls "Old Hickory" for Andrew Jackson and Nashville.

* * * *

Our next WSM contribution is by Mr. Hay, himself. You can fairly hear his voice passing on these observations about his associate director, Mr. Jack Keefe, especially famed as a sports announcer but no relation to the big leaguer by the same name made famous by Ring Lardner.

* * * *

Judge Hay Introducing Jack Keefe

Jack Keefe, one of Nashville's most popular young men, combines with his daily practice of the ancient profession of law the gentle art of the newest profession, that of Radio announcing and entertaining.

Mr. Keefe has made thousands of friends since he began his career at WSM, the station owned and operated by the National Life and Accident Insurance company of Nashville, Tennessee. He is one of the most versatile men in the Radio game today. Here is a little background of his career:

After graduating from Harvard university, he held a chamber of commerce position in the West. His ability to make friends proved a great asset to him. Even in the early days of his career, the call of the stage soon caused him to enter that profession, in which he was engaged for many years. Mr. Keefe also served as a chemist before taking up the study of law.

His handling of the microphone during the football season was very unusual. His running fire descriptions of the Vanderbilt games brought much favorable mention from the Radio fans of the South.

Very often when he is not announcing, he steps up to the piano and sings a group

Improve Your Audio Amplifier

and Get Astonishing Results!

The main point of difference between new sets to be marketed this Fall and sets in use is in greatly improved and refined audio frequency amplifiers.

You can easily improve the audio systems of present sets and bring them up to date. Our book will teach you how.

Four years research are embodied in our new 40 page book covering all systems of audio frequency amplification. The good and bad points of each system are clearly described and everything is illustrated to help readers bring their sets up to date.

Send 25 cts. for new book on Audio Frequency Amplification and bring your set up to date for new tubes.

Bradleyunit

PERFECT FIXED RESISTOR

RADIO circuits frequently call for a fixed resistance unit. This is particularly true for B-battery eliminators which provide several B-battery voltage taps for the radio set.

Be sure to use Bradleyunits for this service, because Bradleyunits are solid molded fixed resistors calibrated with great accuracy and fitted with silver-plated terminal caps which can be soldered without damage to units. These units are made in more than 20 different ratings, and will not deteriorate with age.

For experimenters who prefer to build their own resistance-coupled amplifiers, a special set of Bradleyunits has been prepared and sold in a convenient carton ready for use in a resistance-coupled amplifier.

Be sure to order Bradleyunit Amplifier Resistors from your dealer, today.

OLD JUDGE LIKES WSM

(Continued from page 28)

of character songs which prove to be one of the big drawing cards of the WSM programs.

* * * *

Judge Hay Presenting Uncle Dave

"Whoop 'em up Cindy, and cook that possum brown, 'cause Old Dan Tucker is comin' to the log cabin in the lane, and we'll bile the cabbage down."

Uncle Dave Macon has been pickin' the banjo for nearly a half-century. His programs in the studio of WSM, the National Life and Accident Insurance company's station, Nashville, Tennessee, include the old-time songs of the South, still very much beloved by the older generation, and interesting to the younger people who listen to the barn dance programs on Saturday night. Uncle Dave is one of the many picturesque characters of the Tennessee hills.

From his farm every fall after the harvest, goes Uncle Dave with three banjos tucked under his arm, his wide-brimmed, soft, felt hat, chin whiskers and side burns, the veritable wandering minstrel. He sings and plays at the cross-roads and in the theaters. If he has an enemy in the world he doesn't know it. At any rate, he radiates sunshine and good will. Uncle Dave has been a big feature of the programs broadcast by WSM during the past winter.

Born on a farm in Warren County, Tennessee, in 1870, he learned the tunes of the darkies. When he was thirteen his parents moved to Nashville where his father bought the old Broadway hotel, famous during the Civil war, which catered to troupers and theatrical folk. Added to his native ability to sing and plunk the banjo, came training from wandering minstrels.

In 1884, Sam Jones held a tent meeting at Eighth and Broadway; then came Sam McFlynn with a ten-cent circus. There were twenty-eight men and four women in the company and they all put up at the Broadway hotel. In the company was one Joel Davidson. Uncle Dave, who was then referred to as Davie, was immediately struck with the idea of the minstrelsy. His mother bought him a banjo and he started out. While his avocation has been entertainment, he has made good as a farmer and operates a model place in Rutherford County, Tennessee. Being a born minstrel, he cannot refrain from singing and playing whenever the spirit moves him. He has appeared in some of the large theaters of the South and lately has been doing a great deal of broadcasting.

* * * *

"Mr. Tom Parkes—"

"Let's put the old pile of iron on the air and let her ride," says Tom Parkes as he refills his pipe at 7 o'clock every evening in the station of WSM, the National Life and Accident Insurance company's station, Nashville, Tennessee.

Tom has had wide experience in Radio and has brought that training to WSM where he serves as chief engineer. He has been around the world many times as a Radio operator on merchant ships. He is thoroughly familiar with Radio as it has developed today. Through his efforts and constant care WSM has remained on the air without a single break for the first seven months in its history.

"SURE FIRE STUFF"

(Continued from page 8)

FOR such an expert dancer, Sheila Shambaugh seemed in many ways quite foreign to the stage. Few words from the vaudeville dictionary came readily to her tongue, and there was an innate refinement about her that spoke subtly of other things.

Johnny Clavering was in no sense a woman's man. He had followed a set policy to "let 'em alone." Matrimonial entanglements had wrecked too many professional careers, he knew, and long since he had made up his mind to steer clear of the shoals. A good pal—yes, he'd be that to any nice girl; but when cupid began to hover around Johnny sought the first opportunity to make his get-away.

But in all his career he had never met a girl just like Sheila Shambaugh. A desultory conversation finally resolved itself into but an occasional remark, and before the end of the meal silence reigned supreme.

Johnny paid the check and helped Sheila on with her wrap. "Now I'll call a taxi and take you to your hotel."

"No—please!" she protested.

"No trouble; plenty of time; the night is young."

"It's impossible—that is—I—I am staying but a short distance away—and I'll enjoy the walk."

"Then I'll walk with you," he persisted as they went outside.

"Mr. Clavering, please do not force me to be rude. I've enjoyed the lunch immensely. It was nice of you to bring me out." She extended her hand. "Good night."

Johnny watched her trim figure until it turned the corner a half-block down the street. Then he snorted:

"They're all alike. Peeved at you if you please 'em; peeved at you if you don't. That's the so-called gentler sex in a nutshell. Well, give me peace—peace at any price!"

After that Sheila avoided Johnny except when they chanced to meet back stage. Once or twice he noticed little things about her act that could be improved, and stopped long enough to offer suggestions. She yielded to these overtures, was apparently agreeable and thankful—but the note of frigidity always intruded itself, if ever so slightly.

ONE evening Johnny left the theater at the same time as the Great Ganton, magician, whose act followed Johnny's and closed the bill. "I notice you've taken quite an interest in the Shambaugh kid," he said as they walked up the street.

"Oh, I've made a suggestion or two," Johnny returned, not anxious to pursue the subject.

"I'm glad of that. I guess she needs all the help she can get."

"What do you mean, Ganton?"

The magician raised his eyebrows in mild surprise. "Oh, I thought you knew. She's supporting an invalid husband—at least, so I've been told."

"Is that right? No; I hadn't heard."

"The story is that they were doing a double on the small time. Called themselves the Dancing Shambaughs. He was an acrobatic stepper and a clever one; lots of new stuff. They were grooming the act for the big time, when Bobby came out of an automobile crash with a broken hip. Been laid up ever since, and doubtful if he'll ever walk again, much less dance. It's a tough game sometimes, Johnny."

"Yes; it is."

The end of the week drew near. Johnny was descending to his dressing room after the Saturday matinee. It had been an unusually cold audience. He had worked hard and was perspiring freely when he came off.

The passage between the dressing rooms downstairs was deserted. Ganton was upstairs doing his act. As Johnny was passing No. 5 he heard voices. The door was closed, but the transom was open. Blended with Sheila's shrill notes was a man's bass tones. Johnny stopped and listened. Yes, there was no mistaking that voice; it could belong but to one individual—Barnes Jadwyn.

"YOU'RE a sensible girl and you're not going to pass up a chance like this," he heard the agent say.

"I'd like to head your act, Mr. Jadwyn—but I can't—I just can't do what you ask of me," came Sheila's voice in protest.

Once Johnny's hand was almost on the knob. Then he shook his head and started on. None of his affair. He couldn't afford to play knight errant to every girl who crossed his path. Too many of them; and, anyway, the girl must sooner or later learn that vaudeville was a rough road for those not "in the know."

"I'll leave you to think it over; but I must have a positive answer by Tuesday night," he heard Jadwyn say.

A sudden ruse occurred to Johnny. He hurried back to the end of the passage, waited until the door of No. 5 went shut, then turned the corner in time to meet Jadwyn in the passage.

"Hello, Johnny Clavering!" was the agent's effusive greeting.

"Howdy, Jadwyn!"

"Understand you're the usual riot here this week." Soft soap. Jadwyn's stock in trade.

The agent was a man of forty-five or more, but looked younger, his careful grooming giving him the appearance associated with youth. His face was smooth shaven, and on close inspection lines of dissipation showed under the eyes and chin.

Johnny's eyes narrowed slightly. "What brings you here? Some of your artists on this bill?"

"Oh, yes—Sheila Shambaugh." Jadwyn winked. "Clever girl, eh, boy, what?" He gave Johnny a playful dig in the ribs.

Johnny's first impulse was to hand the agent a clip behind the ear. But that would only defeat his purpose. So he hid his resentment under his usual smile as he replied:

"Clever is right. If she keeps on at this gait, some production manager will be snapping her up."

"They may try, Johnny, but they'll not

(Continued on page 30)

YOUR receiver, whether it is an old model or the very latest type, can be improved by the installation of a high quality B-Power unit.
Everyone realizes the advantage of reliable B-Power, but few have the facilities or the time to select the right B-Power unit from the scores that are now offered.
The Raytheon Laboratories have simplified the choice. By selecting and approving only those that pass certain minimum requirements, we have made it possible for the radio owner to select his unit from a few good ones, rather than from a hundred of doubtful value.
Raytheon B-Power units are now made in a variety of styles that satisfy the needs of every receiver, and meet the approval of every pocketbook. Your dealer will recommend a Raytheon B-Power unit best suited to your needs. Raytheon spells reliable reception.

RAYTHEON, TYPE B, *is a non-filament rectifier of ample capacity to eliminate B-Batteries on even the largest ten-tube set.*

RAYTHEON B-POWER *units are manufactured by Companies selected for their excellent engineering and production facilities.*

THORDARSON

B-ELIMINATOR PARTS

The singer who exerts every last ounce of energy invariably makes his effort manifest in thin, strained tones.

The tubes are the larynx of your radio set. Unless they receive a sufficient and constant supply of energy the set will be faulty in its reproduction.

A B-supply built with Thordarson transformers and chokes will give you that reserve power so essential to good reproduction. Supplies a constant voltage to the plate regardless of the current drain. Sufficient voltage to operate power tubes UX 112 and 171. Actually eliminates the noises and distortion resulting from faulty B batteries.

Complete assembly instructions furnished with every transformer.

For sale at all good dealers or by mail.

THORDARSON ELECTRIC MANUFACTURING CO.

CLASSIFIED ADVERTISEMENTS

HOW about that new set you want to buy? What are you going to do with the old one? A Radio Digest classified advertisement will sell it for you.

Rates are twenty cents a word for each insertion. Five per cent discount for four insertions, 10 per cent discount for six insertions, 15 per cent discount for twelve insertions, 20 per cent discount for twenty-four insertions (each issue for 1 year). Name and address are counted. Two initials count one word. Cash must accompany order. Minimum of ten words. Objectionable and misleading advertisements not accepted.

Copy reaching us not later than July 12 will be in time for our August 1 issue.

BLUE PRINTS

NO MORE BATTERIES—Build "A" and "B" eliminator—operates any set on AC or DC, no hum, satisfaction guaranteed. Complete plans, $2. Engineers' Service Company, 25 Church St., New York.

Portable Super-Het Actual Size Template for 8-tube Super using 199 type tubes. Complete building instructions appearing in First and Second June issues of Radio Digest. 25 cents for template—30 cents for copies containing instructions. Book Dept., Radio Digest, 510 North Dearborn Street, Chicago.

Complete instructions for building the Simplest Possible Super-Het. 16-page booklet containing instructions for building and an exact size template for drilling panel and base. How to build a loop. 35 cents. Book Dept., Radio Digest, 510 N. Dearborn St., Chicago.

We still have a limited number of the actual size templates and blue prints for the following sets which have been described in Radio Digest; Super-Torodyne, 8-tube super-het; Fireside, 6-tube radio frequency; Grand Prix, 8-tube super-het; Counterphase, 6-tube radio frequency; DX Seven, 7-tube super; 4 Filter Super and the Straight-8, an eight tube super-het. Each set, 25 cents. Book Department, Radio Digest, 510 N. Dearborn St., Chicago.

DOGS

Beautiful registered bull pups, $15. Bulldogs, 501 Rockwood, Dallas, Texas.

FOR SALE OR EXCHANGE

Have about $100 of radio apparatus. Will exchange or sell. What have you? E. H. Ives, 2625 Hollywood Ave., Chicago.

FOR SALE

Here is your opportunity to obtain a real good buy on ¼-HP, 110-volt, 60-cycle, single phase, AC, enclosed dust proof new electric grinders and buffers, 6-inch emery wheel on one side and 6-inch buffer on the other, with cord and plug, at a low price of $15.75 each. Special price on brand new 1-KW or 1000-Watt, 32-volt, 1150 speed, late design, Westinghouse light and power generators with pulley, ready to run at $48.00 each. Largest dealers in new and used motors and generators in the Northwest. Send us your inquiries. General Distributing Co., Security Storage Bldg., Duluth, Minn.

succeed. Got her sewed up tight. Contract! For two years. I know talent when I see it."

"You must be getting something besides the usual percentage?"

Proud little Sheila, too independent to let her friend know the heavy financial strain that kept her spirits down, began to feel the web of Spider Jadwin winding about her. Her unapproachable manner made it impossible for Johnny to understand the situation. The story ends next week and Bobby will give you a surprise.

OLD STATIC'S FUNERAL

(Continued from page 10)

aerial which we are about to construct, comprises approximately a sheet of No. 10 gauge copper 3 by 2 feet planted 3 to 4 feet underground and as close to the building housing the receiver as possible. In digging the hole leave ample room in its dimensions so that a good job of tamping the earth may be done when the hole is filled again. Prepare a salt solution containing about two pounds of salt in a bucket of water, and in this dissolve shredded bits of newspapers until the entire mass is a pulpy, semi-thick mass. Next place a sheet of building paper in the bottom of the hole and allow it to lap toward the top 6 to 10 inches. Over this paper place the newspaper mixture to a depth of about 3 inches. Upon this mixture is laid the copper plate to which has previously been soldered the connecting wire which goes to the antenna post of the receiver. With the plate in place another 3-inch covering of the newspaper mixture is laid and over this is covered a layer of building paper. The hole is now ready to be filled, and it is important in filling that the earth be kept moist so that it can be packed quite solid.

The connecting wire should be lead-covered cable, encasing a single strand of No. 12 or 14 solid copper wire, this wire being rubber insulated from its lead sheath. This may be procured from most dealers in electrical supplies or they will secure it from the jobber for you.

Your present antenna should now be disconnected and the wire from the underground sheet connected to the antenna post of the receiver. The diagrammatic view also shows a ground connection which can be the present ground you are using, although in most cases one will find that no ground will be needed with the underground antenna connected to the receiver. In other words, the ground post of your receiver need possibly have no connection made to it. With some makes of receivers better results will be had if the underground antenna lead-in is connected to a .0001 mfd. fixed condenser and the remaining terminal of the fixed condenser attached to the antenna post of the receiver.

Of all of the underground schemes tried, the one described here has proven generally most satisfactory, but in conclusion I would not be fair did I not caution you that neither success nor failure can be promised in advance. Soil conditions, magnetic earth currents, and the type of receiver used and its efficiency have much effect on the degree of your success. The author has given to you the benefit of others' experiments as well as his own research, and giving all is the most anyone can do.

R.R. IS FOR TRAVELERS

(Continued from page 7)

announcements as compared with the former method, which involved train callers who used megaphones. When it became apparent, as the result of experiment, that greatly improved service could be provided for travelers, arrangements were made immediately to install a regular broadcasting apparatus. Instead of being hooked up with an aerial, like a Radio broadcasting station, this equipment is connected by wires with the various loud speakers throughout the station.

The chief features of the apparatus are a microphone, amplifying mechanism, and a total of twenty-seven loud speakers, which are distributed in clusters on four pillars in the concourse and also in the waiting rooms and the dining room. A special compartment, glass-enclosed and containing the microphone and other necessary transmission apparatus, was built for the announcer between the doors to the main waiting room in the center of the concourse. The apparatus builds up and amplifies the human voice and, as a result, the announcer's words can be heard distinctly in the concourse and in all other parts of the station covered by loud speakers.

Although the use of the broadcasting system for train announcing is an innovation in itself, a popular feature in regard to the way it is used also has been developed. The announcer does more than merely recite the time table.

He "talks to the public" immediately following the announcement of specific trains, and in addition broadcasts weather reports and news items relating to Pennsylvania Railroad affairs or to important current events.

He also frequently tells passengers boarding a particular train about historical places or scenic spots through which the train will pass. The announcer is constantly in touch with the chief dispatcher, and in case of interruptions in the service he immediately passes the information on to waiting patrons.

Besides, the announcer puts a personal or humorous touch in his remarks when the chance offers. A wedding party inspired this greeting: "To the bride and bridegroom at gate No. 12, about to start on their honeymoon, we extend our hearty congratulations. You are starting right in starting over the Pennsylvania Railroad. May your other journeys through life be made with the same wisdom."

The announcing system is in operation daily from 8 a. m. until midnight, and is under the general supervision of W. R. Jones, Station Master. J. O. Hackenburg, Superintendent of the Philadelphia Terminal Division, conceived the idea of broadcasting train announcements and put it into effect.

Improve Tube Manufacture

CHICAGO.—Recent laboratory investigations by the metallurgical laboratory of the Peoples Gas Light and Coke company, here, have resulted in a better Radio tube. The work done involves tubes in which the nickelplate in the grid of the tubes is degasified.

Nickel absorbs vagrant gases. When the necessary vacuum is pumped, the gases will come out of the nickel. This renders the tubes very unsatisfactory.

The gas company has perfected a process wherein these vagrant gases are driven out of the nickel before the vacuum is pumped. A hydrogen reduction furnace solved the problem.

The transmitting station of WJZ at Bound Brook, N. J., is entirely enclosed in a copper shield built into the walls so that energy radiating from the transmitter's oscillator and modulator tubes and circuits will not cause disturbance in neighboring receivers.

Yale GROUND HOG DOUBLES POWER AND DISTANCE

"The Perfect Ground"

Marvelous newly-invented ground gives 100% improved reception. Doubles power and distance. Stops leakage. Reduces static. Stops jangling even in mid-summer. Results never before equalled, users say. Satisfaction Guaranteed.

Proven absolutely essential to clear, powerful distance reception. Draws and holds moisture indefinitely. Highly sensitive to radio energy.

Fred W. Stein.

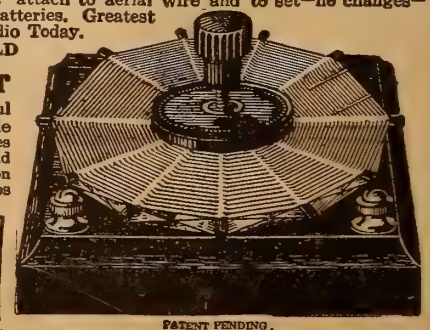
Steinite Low Loss Interference Eliminator

No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The *Steinite Interference Eliminator* shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.

OVER 300,000 SOLD

Improved Results With Tube or Crystal Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. ***MONEY-BACK GUARANTEE.***



PATENT PENDING.

Mfrs. Famous 1,500-Mi. Steinite 1-Tube set $6. Long distance Crystal Set, $6. Steinite Crystals, 50c—3 for $1. Write for complete illustrated literature on all Steinite Radio Products.

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

$1 Postpaid If you are not delighted with results you get your dollar back

Photogravures of Your Favorite Artists

GALLERY OF RADIO STARS

SUITABLE FOR FRAMING OR PLACING IN YOUR ALBUM

BY special arrangement, Radio Digest is able to offer our readers an opportunity to secure fine photogravures of their favorite Radio stars at practically no cost.

Radio fans will be able now, by this very special offer, to have pictures of their favorite artists and announcers before them when they listen in.

All that is necessary to secure photogravures from the Gallery of Radio Stars is to send the coupon published each issue in Radio Digest, accompanied by ten cents to cover the cost of mailing and postage. Where a series of three photogravures is desired, it will only be necessary to send twenty-five cents and three consecutive numbered coupons clipped from Radio Digest. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

WITH COUPONS ONLY

10c Each
3 for 25c

To cover cost of mailing and postage.

20. Vincent Lopez, No. 1 Pennsylvania Orchestra

SIZE 11x14 INCHES

Select Your Favorites from the Gallery of Radio Stars

1 Wendell Hall, king of ukulele ditties
2 Graham McNamee, 1925 Gold Cup announcer
3 Jack Little, popular wandering balladist
4 Billy B. Van, the sunshine man
5 Coon-Sanders' "Nighthawks" at KYW
6 George Hay, 1924 Gold Cup announcer
7 Harmony Girls, Edith Carpenter, Grace Ingram
8 Ford and Glenn, Lullaby Boys of WLS
9 "Roxy" Rothafel of WEAF chain fame
10 The Hired Hand, famous "Substitute Announcer" of WBAP
12 Bob Emery, Big Brother of WEEI
13 "Bill" W. G. Hay, ex-KFKX, now of WLIB
14 Happiness Boys, jovial singers of WEAF
15 Lambdin Kay, "Little Colonel" of WSB
16 Leo Fitzpatrick, "Merry Old Chief," WJR
17 Henry Field, 1925 Gold Cup runner-up
18 Al Carney, organ favorite at WHT
20 Vincent Lopez, No. 1 Pennsylvania orchestra
21 E. L. Tyson, pleasing voice at WWJ
23 Art Gillham, "The Whispering Pianist"
25 Harry Ehrhart, "Dream Daddy" at WLIT
26 Correll and Gosden of "Kinky Kids Parade" fame and Sam 'n' Henry at WGN.
27 Norman Brokenshire, popular at WRC, WJZ
29 Jane Novak, Blues Singer of Twin Cities, WCCO
30 Jean Sargent, the original, now at WHT
31 Ralph Emerson, popular organist at WLS
32 Edna Adams, of KPRC
33 Pat Barnes, vaudeville announcer at WHT
38 Walter Wilson, "Uncle Bob" of KYW
40 Ray-O-Vac Twins, known country-wide
41 Art Linick, KYW's Mrs. Schlagenhauer
42 Fred Hamm of WTAS, now WLIB, fame
43 Meyer Davis' Le Paradis orchestra of WRC
46 D. R. P. Coats, 1925 Silver Cup announcer
47 Gene Rouse, WOAW's popular announcer
49 Iris Ruth Pavey, KOA's invisible stage beauty.
51 Ipana Troubadours, on the WEAF Chain

COUPON NO. 23

This coupon entitles the holder to one photogravure selected from the Radio Digest Gallery of Radio Stars when accompanied by ten cents to pay the cost of mailing and postage.

Three consecutively numbered coupons entitle the holder to three photogravures when accompanied by 25 cents. Remittance must accompany the coupon. Cash at your risk. Add 5 cents to personal checks for exchange.

EAST NEEDS PEP TO CAPTURE GOLD CUP

ARNOUX, MAY AND BROKENSHIRE STILL 1, 2 AND 3

Chester Gaylord, WTAG, to Fourth—Who Will Win?—Bonus May Bring Surprise Ending

If the East is going to repeat its surprise of 1925 and again capture the Radio Digest Annual Gold Cup Award, it will of necessity require considerable votes, for indications show western announcers still firmly entrenched in the first two places.

G. C. Arnoux of KTHS is still first with a 11,000 vote gain. Earl E. May of KMA remains second with a 6,000 vote increase and Norman Brokenshire of WJZ, strongest eastern contender, continues to hold third and shows an 8,000 vote gain.

Chester Gaylord of WTAG, sixth in last report, has jumped to fourth over the heads of Pat Barnes of WHT, who has been forced to fifth, and A. S. Kyne of KMMJ, now pushed down to sixth. Gaylord gained 4,000 votes, but this speed isn't fast enough to catch up with any of the present three leaders, considering the rate they are adding votes.

Who'll Win? Nobody Knows

Nobody can predict who will win the solid gold 1926 cup and title of world's most popular Radio announcer for 1926. The bonus votes may throw off the final counts of many present leaders and bring a dark horse to the top. Watch out for the bonus votes which are explained in detail further on.

The coupon ballot numbered eleven appears this issue. There are three more to appear, the last one being published in the first September number of Radio Digest. The end is fast approaching.

Gaylord's advance was the only surprise above eleventh place since the last published report. Henry Field of KFNF, the Hired Hand of WBAP, Phillips Carlin of WEAF and Peter MacArthur of WOC remain seventh, eighth, ninth and tenth respectively as before.

Below tenth place climbs were made by Johnen of WLW, Grubb of KFAB, Griffin of WHO, Johnson of WCCO, Konecky of WOAW and Cole of WHO. Kay of WSB, Sullivan of WQJ, Husing of WRC and Kaney of KYW remained in their places, while losses were taken by Randall of WSMB, Palmer of WOAW, W. G. Hay of WGN and WLIB, Schilling of WHB and Isbell of KNX.

Standing of Leading Twenty-Five

The present standing of the first twenty-five candidates is given below. The figure in parentheses following the name and stations of certain announcers, indicates their order in the standing last issue if they were in the first twenty-five:

1. G. C. Arnoux, KTHS (1).....33,739
2. Earl E. May, KMA (2).....25,179
3. N. Brokenshire, WJZ (3).....24,110
4. C. Gaylord, WTAG (6).....15,540
5. Pat H. Barnes, WHT (4)....15,096
6. A. S. Kyne, KMMJ (5).....14,402
7. Henry Field, KFNF (7).....11,287
8. The Hired Hand, WBAP (8).. 9,248
9. Phillips Carlin, WEAF (9).. 6,681
10. Peter MacArthur, WOC (10) 5,483
11. Louis J. Johnen, WLW (12).. 3,967
12. Gayle V. Grubb, KFAB (14).. 3,782
13. C. R. Randall, WSMB (11).. 3,715
14. R. W. Griffin, WHO (15)..... 3,621
15. Lester Palmer, WOAW (13) 3,186
16. Lambdin Kay, WSB (16)..... 2,465
17. Jerry Sullivan, WQJ (17).... 1,743
18. Paul Johnson, WCCO (20).... 1,738
19. J. T. Schilling, WHB (18).... 1,706
20. E. Konecky, WOAW (25)..... 1,581
21. Edw. B. Husing, WRC (21).. 1,542
22. W. G. (Bill) Hay, WGN (19) 1,520
23. Harold Isbell, KNX (22)..... 1,402
24. Sen Kaney, KYW (24)..... 1,385
25. N. Dean Cole, WHO..... 1,375

Although the order has not changed for the five leading Canadian contestants who seek the special 1926 Canadian Silver Cup and title of Canada's most popular Radio announcer for 1926, Miss Lillian Shaw of

(Continued on page 29)

ROMEO IS KEEN FOR PRETTY COVER GIRL

APROPOS of the Radio Digest cover girl, this issue, Marcella received the following letter from a Montana fan which was forwarded to our correspondent, Mr. G. L. King, Los Angeles:

"Marcella: When weather and other conditions permit I find myself holding the dials on KHJ, Los Angeles, for a certain Miss Luella James. I imagine she's a pip from her voice. Can you tell me anything about her?

Romeo de Butte."

To which our Mr. King replied:

"Marcella: Your air mail of 21st about Luella James.

"Miss James sings exclusively over KHJ, the Los Angeles Times station. She is five foot three; weighs 118 pounds; has hazel-brown eyes, medium brown hair —NOT BOBBED— and a VERY light complexion. She is studying voice under tutelage of Sam Glasse. She has a good contralto voice, very pleasing personality and other qualifications best appreciated when seen on the sands of Redondo Beach, near her home.

Very truly,
G. L. K."

Looking Ahead

Big Brother Bob Emery at Boston Has So Many Brothers He Doesn't Know What to Do—almost but not quite. Thousands of them he never has seen. There are thousands of little sisters in his big Radio family, too. They all get together five nights a week for air adventures and the story appears in the Radio Digest dated August 1.

When John Wolf and Ned Tollinger, a Couple of Town Boys at Council Bluffs, happened to tune in together while coming from a party in a flivver, they little dreamed it would lead to national fame. But it did. The story appears in the next Radio Digest, on newsstands July 31.

Another Van Demark Short Story Will Appear in the Next Radio Digest. It is called "The Fall Guy." Van Demark comes from Texas where O. Henry first established his fame as a story writer. They tried to make a Fall Guy out of Dick but Dick turned the tables. You'll like it.

Four Years Ago WEAO, the Station of Ohio State University, at Columbus, began broadcasting educational subjects interspersed with bits of campus frivolities. It has established an unusual record which will be featured in Radio Digest soon.

It May Be a Little Station as Electrical Power Is Rated, but WFBG at Altoona speaks with the voice of the mountains. This voice is wafted from one coast of the continent to the other. There is a very human touch to its activities as will be told in an early number of Radio Digest.

How Do You Like the Trouble Chart on Page Eight? The technical staff promises another easily understandable and helpful article on Radio sets' tricks and foibles. Watch for it in the August 1 issue, on newsstands July 31.

What's New in Receivers? A Fair Question—and one whose answer you, no doubt, are interested in learning. Milo Gurney surveys the market and describes the outstanding offerings of the opening season. These thumb nail sketches will interest you.

Special articles about broadcasting stations and artists, with photographs, and NON-RADIO fiction 5,000, 10,000 and 30,000 words in length are desired. No manuscripts accepted unless typewritten and prepaid, or returned without return postage being inclosed. All manuscripts are sent at owner's risk.

SHORT WAVES

By Marcella

Marcella had a short vacation just before putting this edition to press and she met lots of famous people. It was on the occasion of the recent re-opening of KVOO, the "Voice of Oklahoma," at Bristow, whither she went with her boss. Let's see, Boss, whom did we meet? Oh yes, Frank Lane and Roy Griffin of KVOO, Adams Colhoun of WFAA, Gayle Grubb of KFAB, Lester Palmer of WOAW, Peter MacArthur of WOC, Henry Field of KFNF, G. C. Arnoux of KTHS, and Bob Graham of KFJF. Just prior to that trip several notable visitors shook hands with me at the office. These were the Mona Motor Oil Twins of KOIL and the country-at-large, and Eugene Konecky of WOAW. What do you want to know about them? My Boss says I can tell anything I want—so ask me.

* *

"M", "Inquisitive" and several others have asked about H. Dean Fitzer, the "Singing Announcer", Chief of the Nighthawks and director of WDAF. Following are just a few of the things he is willing to admit about his present and past. Fitzer, early last fall, succeeded Leo Fitzpatrick, the Merry Old Chief of the Nighthawks. Fitzpatrick went to WJR and took his title with him, becoming the Merry Old Chief of the Jewett Jesters. Fitzer's friends were soon calling him "the Singing Announcer", so he bowed and took unto himself the title. The Nighthawks hear his songs far into the night, but rest assured, he is modest enough to give others a chance too. He was born in Kansas City and hopes to die there—after a reasonable length of time of course—taking only one great sojourn in foreign parts. As a warrior back in '18 he played a slide trombone on a destroyer. Between the period of the war and his succession to the WDAF microphone he was a newspaper man, which seems to be the background of so many leading announcers. He is twenty-seven years old, 5 feet 11 inches tall, wears brown eyes, browner hair, no bow ties and few Tuxedoes, has a wife, and a baby to spank (Mr. Fitzer forgot to put the comma after wife so it was inserted by Marcella). The fellow informs me it does not add to an announcer's mail to admit he's married, but Marcella knows all, tells all.

* *

Another promised sketch for this issue is that of Ernest Rogers of WSB, "Willie the Weeper" or "Old King Tut, the Radio Nut"— take your choice of name or nom de Radio—who was originally "discovered" about three years ago by Colonel Lambdin Kay, WSB's drawling director. Age, 27; married seven months; height, trifle over five feet; eyes, baby blue except when someone looks at his new wife when they become violently green; complexion, indoor tan on a "skin you love to touch"; hair if any, used to be red; ambition, to travel around the broadcasting stations for some big corporation selling soap, sarsaparilla, or sardines by singing songs about them; present occupation, feature writer and general assignment man for the Atlanta Journal. "Willie" adds many interesting bits in his letter to me. He says he prefers blondes, but since his wife is a brunette, to say nothing about it, so I won't. He notes that the Keith circuit thinks he ought to go on Loew time and the Loew circuit vice versa; that he has sung "Willie the Weeper" 2,777,777 times up to last Tuesday; that his chief claim to distinction was when he elected himself president of the Red Head Club of WSB at the organization meeting of the outfit, he being the only voting member present; and that his favorite Radio periodical is the Radio Digest, because he adds, "they printed my picture a couple of times, you know." He has recorded "Willie the Weeper" and "My Red Haired Lady" for Columbia and Okeh, and Ernest Hare recorded Mr. Rogers' "Tune in with My Heart." "Forgiveness," another of his songs, has been published, and in addition he has written many other tunes. He remarks, however, that he did not write "I Wonder What Became of Sally".

* *

Wendell Hall, speaking of red heads, is off the air until fall. During his vacation he will get a new repertoire of songs and stories ready for the air. Marcella also happens to know that at least a few weeks of his time will be spent with "Gloomy Gus" or Gayle Grubb of KFAB, striking terror into the hearts of Nebraska fish with rod and reel.

* *

Yes, "Marguerite", Chester Gaylord of WTAG, Worcester, Mass., is still single and eligible. Your interest in him as a candidate for the 1926 Gold Cup is shared by "Roxy" of WEAF, for I understand the latter notable sent Mr. Gaylord a vote to help his count along. Incidentally, three newspapers, the mayor, postmaster and other Worcester civic leaders are campaigning for the victory of the announcer

(Continued on page 15)

UNUSUAL RADIO SUMMER HERE

HONOR MARCONI FOR INVENTION OF RADIO

THIRTIETH ANNIVERSARY IS CELEBRATED IN ITALY

University of Bologna Plays Host to Famous Scientist—Townspeople Laud Former Resident's Success

BOLOGNA, Italy.—The thirtieth anniversary of the first Radio patent has just been celebrated here, by a ceremony in honor of Senatore Guglielmo Marconi.

The ceremony was held in the old university, in the presence of Signor Belluzzo, minister of economy, the Syndic of Bologna, representatives of many scientific societies, and professors of the university, who wore their picturesque traditional gowns. After a few words by the Syndic, Senatore Marconi rose amid hearty cheering to deliver his speech.

Although during the last thirty years he had, he said, had to remain almost always absent from his native city, he had never forgotten it, and many times, during his 86 journeys across the Atlantic, in the wildernesses of Canada, and in Ireland, his thoughts had gone back to his dear Bologna, to which he felt himself bound by so many sacred affections and memories.

Marconi Recalls Beginning of Radio

The famous inventor then recalled the beginning of his invention, the difficulties he met with, and the result he had finally achieved. He then reviewed the progressive and widespread application, and the benefits of Radio, mentioning as its last achievements, the service rendered by broadcasting in England during the general strike and the message from the Norge. He concluded by recalling his great teacher, Adolfo Raighi, the Bolognese scientist, who made important studies of electrical waves.

After the ceremony a gold medal was presented to Senatore Marconi by the commune of the university. The rector also announced that a yearly prize for the best science student had been instituted under the name of Guglielmo Marconi.

Later Senatore Marconi was entertained at dinner in the city hall, and in the evening he motored to the mountain village of Sasso, where as a boy he passed his summer holidays, and where in the villa of his family he made his first tentative experiments in Radio.

A. Atwater Kent Gets Wooster Honor Degree

Aged Institution Recognizes Work of Noted Manufacturer

WORCESTER, Mass.—"Radio is the young man's field," declared A. Atwater Kent in a recent address given to the graduating class at Worcester "Tech" where Mr. Kent was formerly a student.

"There never was a time when the graduate of the technical school had the opportunity he has today," continued Mr. Kent. "Nor was there ever so wide a field for his knowledge, nor so great a chance for him to make good.

"In the field of Radio alone, the development is so rapid that the most highly skilled engineers are required to keep pace with them. It appeals to the imagination of the young man and demands his highest technical skill. Not even we who are in closest touch with the Radio field can tell exactly what baffling mysteries of the air yet remain to be solved."

Worcester Polytechnic institute is one of the oldest institutions of its kind in the United States and yet it never had conferred an honorary degree until this occasion of the set manufacturer's visit. In recognition of his efforts in arranging a national broadcast of famous artists and of his success in the development of popular Radio reception the institute conferred upon Mr. Kent the title of doctor of engineering.

KNX Adds Two Pickups

LOS ANGELES.—Station KNX, "The Voice of Hollywood," has acquired two new remote controls by tieing in a theater and a beach club by land wires. A total of nine is now used.

The theater is the new Carthay Center, located midway between Hollywood and Beverly Hills, and said to be one of the finest movie palaces in the West, while the beach club is that of the new Edgewater club at Santa Monica, described as America's most sumptious seaside club.

RADIO DROWNS OUT EVIL DENTIST DRILL

CHICAGO.—Dr. G. M. Smith, Chicago tooth puller, has discovered a new use for Radio—and if you ever had a tooth excavated by one of those devilish drills, you'll be interested. While treating Paul Ash, whose performances are broadcast by WGN each Friday night, Dr. Smith got his bright idea. "There's no jazz in that drill, ouch!" commented Ash. The next time Ash sat in the chair he was surprised to hear the strains of orchestra music. The patient forgot the drilling.

GOOD RADIO QUARTZ IS HARD TO LOCATE

WASHINGTON, D. C.—An apparent scarcity in quartz, superinduced mainly by its newly discovered use in Radio oscillators in transmitting sets, has been reported by the bureau of standards. There may be an abundance of the crude quartz available, it was pointed out by the bureau of scientists, but the quality necessary for use in radio frequency sets at the bureau apparently is unobtainable in sufficient quantities. Quartz used in this work of necessity must be of fine quality.

"MISS LOS ANGELES," KFI ARTIST

It is quite possible that Radio show visitors in California will have the privilege of hearing the somewhat frail but remarkably sweet voice of the little lady pictured above. Reason for the charm in the voice is apparent for the lady is none other than "Miss Los Angeles" herself, runner-up in last year's Atlantic City bathing beauty contest. Of course she has another name. She is known to her fellow artists at KFI as Miss Adrian Dore. Be sure to hear her when she is announced on the programs—then, see her if you can.

Bad-Time Stories Make Morris Leaf in Demand

Pacific Coast Grown-Ups Amused by Revised Versions

HOLLYWOOD, Calif.—The latest sensation for listeners on the Pacific Coast is Morris Leaf, the Bad-time Story Man, whose Radio appearances have made such a hit that it probably will not be long before the vaudeville stage reaches out to claim him.

Morris Leaf came to Hollywood in the guise of an artist commissioned by an eastern movie magazine to sketch forty portraits of famous screen celebrities. His task completed, he decided to remain, falling under the lure of the sunny skies, palm trees and sandy beaches.

One night, while visiting KNX with a friend who was a Radio entertainer, he was called upon to make some remarks over the microphone. On the spur of the moment he gave one of his "bad-time" stories. In Hollywoodese, it was a "kick" and Morris Leaf was commanded to return with more. This he did until today he is described as one of the few who can dispense humor over the Radio and get away with it.

"Bad-time" stories it might be explained, are stories all youngsters are familiar with, given with a dialect and modern touches. A few of the knockouts are, "Punkinhontas and Capt. John Smith, Inc.," "Little Red Riding Habit," "The Piper of Heidsick," "The Fisherman" and many others conned from the Arabian Nights, fairy lore and tales of history.

NATIONAL OPEN GOLF CLASSIC GOES ON AIR

WEAO Handles Matches Played on Scioto Course

COLUMBUS, O.—America's greatest golf classic, the National Open tornament, July 8, 9 and 10, was broadcast to the ears of golf fans by WEAO, the Ohio State University station.

Chief Engineer R. C. Higgey, working with George Sargent, "pro" at the Scioto Country club links, where the tourney was held, arranged the service direct from the links which employed a portable telephone transmitter. Mr. Sargent is president of the national organization of golfers and is himself a former open champion. R. Lee Henderson, WEAO's well-known and experienced sports announcer, headed the crew of announcers which described the matches on the Scioto course.

EVEN BETTER PROMISE FOR COMING YEAR

Cooler Weather Forecast

1927 May Find Much of United States with No Warm Weather Is Radical Prediction

By Eric H. Palmer

NEW YORK.—Shifting ice in the Arctic wastes may mean a summer of extraordinary DX reception for Radio fans. Cool days in June and July have been attributed to the heavy discharge of polar ice, in addition to which sun spots and reduced solar radiation are given as primary causes for the unusual weather conditions.

The outlook for unusually good reception during the next two months is excellent if the prophecies of scientists regarding the weather come true.

Everyone knows that Radio reception falls off in the heated term when the days are longer and what we call static is prevalent. Recently, with cool evenings, there has been noticed a vast improvement in transmitting stations and better receivers. Atmospheric conditions have been conductive to such improved reception.

More Radio Weather in Store

Now it is predicted that we are to have many more cool days in July and that next year there will be no summer at all!

Steamship captains are heading further south this year on account of icebergs. Amundsen, the explorer, reported open ice 150 miles or more from Spitzbergen during his flight last year, and Byrd, flying over the same route, stated that the ice has come all the way down to that island. The whole North Atlantic seaboard has felt the northerly winds.

Undoubtedly, many Radio fans have read with the greatest interest the predictions of Herbert J. Brown, the professional long-range weather forecaster in Washington, who foretold the cold days in June this year and has stated that in 1927 there will be a frost every month in the northeastern part of the American continent.

Brown's Weather Forecast

Mr. Brown bases his forecasts on the changes in the amount of heat given off by the sun and absorbed by the oceans.

"It has taken since the beginning of 1922", he declared, "for the northern Pacific area to exhaust the momentum of the sun's heat which began to drop nearly five years ago. Cold air will come into the Canadian northwest and deep into the United States next winter and in 1927 from the arctic circle and Bering sea. Cold also will come from cold waters which now extend from California to the Hawaiian islands."

The change in the weather may be very disappointing and damaging to many interests, particularly to agriculturists. Looking at the matter from the standpoint of Radio, however, we can only venture the opinion and the hope that we will have the finest summer reception this year ever reported and that it appears as if 1927 will be the banner year.

Radio Helps Baseball Says Rogers Hornsby

Cardinal Manager Himself Listens to Ball Broadcasts

ST. LOUIS.—Rogers Hornsby, manager of the Cardinals here and demon batsman, believes baseball is having its biggest year and credits Radio with contributing to that end. The famous "Rajah of St. Louis" remarks:

"While the attendance figures from all over the country indicate that baseball is experiencing one of its greatest years, it is my opinion that Radio has done considerable in maintaining interest in the national pastime. This is especially true in out-of-the-way places where the major league clubs do not appear.

"Through Radio, baseball is brought right to the homes of those not fortunate enough to be able to attend the games.

"I am a Radio fan and enjoy listening to the reports of the games in which the Cardinals do not participate."

KTAB—"Shepherd of the Air"

LITTLE Weather-Blistered Church in Oakland, California, with Its Pastor, Rev. G. W. Phillips, Rises from Obscurity on Wings of Radio. Popular Programs Presented During Week.

This manner of belief and faith has not been changed by the great influx of the hordes from the more indifferent—and slightly idolatrous East where the golden calf and mammon have in some instances supplanted the higher spiritual side of life. But even among these there are some who have come down from the Puritans and the Quakers and more of late the Methodists, Baptists, Presbyterians, Congregationalists and others who have established their "meeting-house" on the four-corners of America.

For these, who are the bed rock of our nation, Sunday service is the event of the week. It is the feast day for the soul—a day of holy communion with God and fellow man. Nobody misses church—that is, nobody who can very well avoid it. But there are cases—yes, many, many of them—where seemingly unsurmountable obstacles do prevent. Some are held down by the weight of years, others have been stricken to their beds and for others who live far on winding roads to the logging camps and mines there is no "meeting-house" within a day's journey.

Eventually this latter situation came to the attention of the directors of one of the largest broadcasting stations in San Francisco. Here was a chance for real service. They consulted each other and decided to seek a preacher—a Shepherd of the Air—one who could understand the needs and supply them, a man who could speak the language of the little-church-on-the-hill as it exists from Puget Sound to Miami.

One day a stranger paused before the Tenth Avenue Baptist church of Oakland. It was just a little church. Obviously wealth had not paused here to display its pious opulence. The clapboards were warped and scaly with weather-shriveled paint. The eaves were rusty and the shingles were ruffled like the feathers on a mother hen who shelters her chicks in a tempestuous storm.

But the faces of the people who entered—they glowed and beamed from a light that came from within! The stranger watched them. Then he too entered and sat in a pew near the door. His aloofness melted under the simple, straightforward message uttered by the Rev. George W. Phillips from the plain, little pulpit. There were no flourishes; no wild, grandiloquent phrases—he read from the Bible and interpreted the precept, "Love they neighbor as thyself."

A few days later the pastor found a blue envelope in the parsonage letter box. He was surprised at what

(*Continued on page 30*)

At the top in the big picture hat is Miss Adelaide Ashton, one of the popular operatic favorites of KTAB and whose soprano voice is well adapted to the microphone. At the left is Miss Millicent Benioff, Russian artist with a mezzo-soprano voice that melts like liquid into the air. Mrs. Billie Empey is the lady with the saxophone, one of the regulars on the KTAB programs. Below are the Boulevard Players who recently presented a story of the California gold rush days for the Oakland listeners.

Mr. Howard Eastman (left) pianist and director of the Lorraine Trio who play at the KTAB luncheon concerts each sunny, California noon.

By HAROLD P. BROWN

OUT beyond the rugged hills of the West country there is a little church much like the tens of thousands of other little churches that dot this country over, only THIS little church has been lifted on the wings of fame until now it sings its message of salvation and redemption to the seven seas and the continents that touch thereon.

Of course there is nothing miraculous or supernatural about it at all—unless you consider the episodes of the beginning as guided by a hand above the ken of man. It has merely converted the regulation church spire to a Radio antenna and there is a microphone before the pulpit.

In California and all the vast territory of the Sierras, the Rockies, the vales between and the shores of the Pacific, there dwell a people who love their God and worship Him. They maintain the family altars of the fathers and at night they kneel by their beds to offer prayers of thankfulness for the day that is done and supplication for grace for the night and the day to come.

Sitting on Top of the World

CALIFORNIA Writer Declares Major Mott at KFWO, Catalina Island, Occupies Top Seat of Radio Sphere, Where He Chats at Will with Orient, Europe and Antipodes.

By NETTIE DUGA PILCHER

WE HAVE much to forgive the writers of modern jazz songs. More frequently than not they wear us down with the continuous reiteration of some catch word or bit of slang. On occasion, though, we forget all this and feel truly grateful for the popularization of an adequate and satisfying phrase.

"Sitting on top of the world," to me is one of these. It brings to mind not only the feeling of joy that the one who sits there must experience, but also the accomplishment that preceded attainment of a seat on the world's top. Be the accomplishment big or little, this feeling of sitting on top of the world must be the reward of one who triumphs, whether it be in love, literature, science, or the business world.

Surely Lawrence Mott is entitled to such a seat, because, from his island home he talks with the world. He has worked out Radio communication to its Nth degree. Tomorrow may bring something new again, this earth revolves so fast, but today his demonstrations stand as a record, and always will.

Veritably, this man occupies a unique position on the world's pinnacle. Appreciating his happy circumstances, he, in return gives much to the world by way of Radio. He gives it freely, generously and without charge.

Situated on a gloriously beautiful island, thirty miles at sea off the coast of Southern California, amid towering mountains and jagged cliffs, shaded canyons, sandy strands of beach bordered with transparent turquoise waters, is the Radio station, KFWO, which this fortunate man owns and operates.

At left is chalet from whence famous Wrigley chimes are broadcast by remote control each day over KFWO. Major Lawrence Mott (right) in his army uniform. Below, Miss Frances Hewitt and the KFWO cat whose purr has been heard in Alaska and the canary whose trill has been heard in New York from Catalina.

Above are two views of Major Lawrence Mott, owner and operator of KFWO at Avalon, Catalina Island. Upper photo shows him in comfortable shirt-sleeves before the mike and below he is in the tropical palm grove from which the station rises.

MOST broadcasting stations and their programs are as excellent as they are numerous, but here is one station with a few distinctive features.

Major Mott repays the world from his personally conducted station by sending out with his entertainment quantities of good fellowship, cheer, sunshine of thoughts, happiness, and encouragement. There are no paid programs from KFWO under any consideration and nothing is advertised therefrom!

Isn't it a fine feeling, once in a while, to know that there are folks who still believe in doing things for the sheer love of the doing; who are interested enough to experiment that the other fellow may be taught. And isn't it fine to be on the receiving end, once in a while, and to sit back in an easy chair drinking in good music or pleasant words without a care whether your mattress manufacturer, your stock broker, your doughnut fryer, or the man who supplies your tires pays the bill.

KFWO has been, by the manipulation of one letter, turned into the slogan, "Katalina for Wonderful Outings." These words, appearing on Major Mott's stationery, are as near to advertising as the island station ever gets, but the slogan is clever so we forgive him.

Even in the matter of souvenirs has KFWO proved to be different. Quite in keeping with its location and the spirit of the station, three ounce bags of rich silver ore are mailed out to all who write to Major Mott or to KFWO. This ore is obtained at the Wrigley mines on the island. Four hundred and ninety-one bags of ore passed through the Avalon post office in seven weeks.

Perhaps it is unfair to leave Lawrence Mott so long without a more formal introduction lest you miss knowing some of his more serious achievements. Major Mott bears his rank in the U. S. A. Signal Corps, O. R. C., and he conducts for his government a very powerful experimental station, 6XAD and 6ZW, of from 500 watts up to 2,000, at will. This part of the Mott station on Catalina Island is housed in a building by itself and is purely for research work for the U. S. Signal Corps at Washington and in conjunction with the Bureau of Standards, Radio department, also at Washington.

USING telegraph only on ten, twenty, and forty meters for transmitting purposes, this Radio wizard has daily communication with Australia, New Zealand, China, Japan, Java, Germany, England, France, Italy, Holland, Switzerland, and Cape Town, South Africa. In like manner communication was maintained with both of the MacMillan expedition.

If this isn't sitting on top of the world, what is?

All of which remarkable effort was accomplished on forty meters, using Western Electric tubes and apparatus of the latest design with 500 watts power. Major Mott uses specially designed Radio apparatus manufactured

WOAI Intrigues Border "Vets"

"TAKE Me Back to Old San Antonio," Sing Soldiers of the North as They Tune in Texas Station and Recall Days When Mobilized to Keep Villa Beyond the Rio Grande

IN THE minds of many soldiers of the North who camped round about Fort Sam Houston during the World war, San Antonio lingers as a sort of dream city. Within its environs they found many a happy holiday. Time has softened the harsh outlines of the rigorous camp life—time and memories of a certain cruel, bloody, bone grinding army life that enchained them a little later.

The two experiences stand apart. They cannot be compared because there is little or nothing in common that is of consequence to compare. Tongues may be silent about the real war but wag loquaciously when it comes to telling tales of life "on the border" with the general hospitality of the Texas people in the background.

Keeping WOAI pepped up and in the forefront as one of the most popular stations of the South is the job of Joseph G. Cummings (top), station manager and chief announcer. Every Tuesday evening from 8:30 to 9:30 Central standard time, these talented artists of the Gebhardt Mexican Players may be heard over the San Antonio station. They are under the direction of the famous composer, Jose Conrado Tovar. At left is the Joske Story Lady, whose real name is a mystery so far as the station announcements are concerned. Below are the Mistletoe Melody Maids, whose charming folk songs thrill Jack and Pete of the old Fightin' Seventh.

So it happens that Texas broadcasting stations are popular in the North. Grizzled veterans of the "Villa War" will set the dials at WOAI or some other Texas station and hark back a decade, the days "way back when—"

Little Jack Downey was one of these. He had been through the whole mess of it and when he came back to his little flat on Green street, Chicago, it was hard for him to find a job sufficiently entertaining to be maintained permanently. He joined the police force, hoping to get a chance to battle some of the gun gangsters in the bad lands. But no such luck favored him. One day, not far from his home, a big warehouse burned and he saw a batallion chief with six of his men slide down a line of hose from the seventh floor through billowing clouds of smoke and flame. Three of the men had to be carried away in stretchers and one died later in the hospital. So Jack Downey decided to join the fire department.

Just a few days before the time that these events are being set down Jack came out of the post office building on Dearborn street at Quincy. A tall and soldierly man was coming up the steps. While the man was still two steps from the top and just about level, eye to eye, with our hero, Jack jabbed out a sturdy arm and caught him by the shoulder.

"I can't be wrong!" exclaimed Jack, "but it's me old buddy, Pete Cahill, or I'm a dead one or he is and this is his ghost."

"Jack Downey of the old Fightin' Seventh!" said the other as their two palms slapped together and they stood grinning in silence for a moment, "and 'tis neither of us that's dead—yet. Sure, and where have you been hidin' out all these years. I haven't seen you since—since, not since that night we chased them disrespectful spicks out of the alley at San Antonio for makin' familiar eyes at the girl who had been singin' for the bhoys at camp."

"Now, that's the truth," replied Jack while crowds moved around them in and out of the big federal building. "And I remember the occasion well, 'twas a little alley beside the opery house of the plaza where we brought the girl for the show. An alley it was but a street they called it and it ran back somewhere to that little creek, dignified by the name of a river. I was most drowned tryin' to find you after you had chased one of the toughies into it. Wherever did you go, Pete, from there."

"That's something I never could quite make out myself because after I slipped on the stones in the river I woke up in a civilian's house and when I went back to the camp the old Fightin' Seventh had busted up into another outfit and all my buddies were gone. But that's long ago and I've been to Europe and back since as I suppose the same of you. I see by the uniform you're a fireman."

"'Tis a good job but monotonous. I find nothing more exciting. Sure, drivin for the chief I get to a fire or two a day and there's a bit of kick in slashin' the old man's red buggy up the boulevards doing sixty or better and watchin' the traffic scatter right and left and up the lamp poles for those caught on the islands. It's dull, though. Some days two fires and maybe three and that's all. Never a fire that's worth the fightin'. But, Pete, have ye ever been back to the border?'

"Not even once, yet. But some day I'm goin' for I have a recurrin' appetite for the chili and chiladies and hot tamalies they served in that Mexican restaurant in the same alley across from the operey house we were talking' about. You remember it, Jack Downey?"

"Indeed, I do Big Boy and I'm goin' there tonight though I'll not be served at the tables. But I'll hear the Mexican moosishuns and the clink of the chili bowls. (*Continued on page 29*)

Below is Mr. Otis Vaughan, assistant announcer at WOAI, San Antonio.

SURE-FIRE STUFF

by HARRY VAN DEMARK

ALL Is Not Glitter Behind the Footlights and Sheila Shambaugh Declines the Booking Agent's Proposition. Jadwyn Attempts Force and Meets Johnny's Iron Fist. Action and Thrills in This Story!

WHEN a speeding automobile suddenly loomed out of the night and struck down one of the Dancing Shambaughs it left Sheila Shambaugh to carry on alone. She had to devise a new solo dancing act, earn money for a living for herself and Bobby and then make payments on Bobby's doctor bill.

Sheila was a proud girl and she shunned the sympathy of her fellow artists, but Johnny Clavering, the headliner with her bill, was different. She wouldn't tell him for the world although he really cared and was noted for his kindly deeds. Then Johnny discovered Jadwyn, the booking agent, coercing Sheila into an unfair contract.

"You must be getting something more than your regular commission for this girl's act?" insinuated Clavering with a pointed look square into the eyes of the scheming Jadwyn.

"WELL, I'm not saying that I am or that I'm not. But Barnes Jadwyn is no fool. Confidentially, I'm planning to put her in a musical tab. Got a chance to get thirty weeks on the Panlow time. Then, if things shape up right, I'll bring it east and knock 'em dead." The booker shrugged a self-satisfied shoulder.

"By the way," said Johnny, as if struck by a sudden thought. "Ever hear from Mooney & Ray?"

Jadwyn's face clouded. He cleared his throat once or twice before he replied. Er—no; not in over a year. You know, I won my case," he added rather lamely.

"Let's see—didn't they contend that you had held back fifty per cent of their salary or something like that?"

"Yes, but I proved they owed me money and the court threw out the case."

"Seems to be a little specialty of yours, Jadwyn, getting extras out of the acts you represent."

"Well, I've done a lot for some of 'em—and you know a man must live."

"There was another friend of mine you used to represent—Belle Winton. What became of her?"

"Say, what is this, Johnny—an inquisition?" Jadwyn eyed the headliner suspiciously, then smiled as he went on: "No; I haven't heard from Belle—not for a year and a half."

"She had you in court, too, didn't she?"

"Yes; but I won out."

"You tried to force your attentions on her—wasn't that what she claimed?"

"Er—well, yes, it amounted to that; but of course it wasn't true."

"How did you squirm out of that?"

"Had a witness. Proved she was trying to twist me around her finger so I'd get her salary raised."

"And now you have a contract with Miss Shambaugh?"

"Certainly I have."

"Well, don't try any of your tricks on her."

"Oh, see here, Clavering, you think because you're a headliner, in good standing with the powers above, you can talk to me any way you please. But you fellows never get so far up that you can't come tumbling down. Remember that."

"Save your threats for some other time; but take this tip from me: Play straight with that little girl in No. 5, or the next time the judge is apt to tell you to think it over for a year or two."

Johnny passed on down the corridor, entered his dressing room and slammed the door.

THE next week the bill went into the Bijou, Brooklyn. Four acts dropped out, shifted by the vagaries of the booking office, leaving but five of the nine that had played the Palladium. Two new acts were penciled in by the bookers, giving the Bijou a seven-act bill.

Johnny and Sheila were among those retained.

The rehearsal was in full swing Monday morning when Johnny walked on the stage. A team of acrobats, a sister team, a girl act, a male dancing duo, and the Great Ganton, with Johnny and Sheila, rounded out a well-balanced bill.

They swarmed strenuously over the bare stage now, telling the stage manager how to hang their stuff, giving the electrician his light plots and the projectionist the cues for the "spots."

"Hello!" Johnny greeted cordially, as he saw Sheila leaning against the proscenium at one side of the stage.

"Morning, Mr. Clavering." She gave him a wan little smile.

"This isn't the Palladium; but perhaps we'll fare even better than we did last week," he said cheerily.

"I don't know. I—I seem to be losing my pep."

"Anything I can do?"

"Not unless you can tell me a way to raise a lot of money—and raise it quick."

"Do you need money?" queried Johnny bluntly.

"Of course. Ever know anyone who didn't? Oh, don't pay any attention to me," she quickly added. "I'm only a poor atom, not worth one moment of your time." Her shoulders sank dejectedly while the great somber eyes filled with tears. She turned away toward a dark corner of the stage.

Johnny followed. "You know I'll be glad to help you."

"You can't help me. No one can. Please go away and leave me alone."

"I'm your friend—and I want to help. What is it you need money for?"

"NOT—not for myself. I—well, I didn't say I needed money for anything."

"You implied that you must have some at once."

"And what if I must?" she demanded in a contradictory tone. "We can't always have what we have to have, much less what we want. But I'll say this—you were right about Barnes Jadwyn. He's—he's just impossible—that's all!"

"Has he been bothering you?"

"He made me a proposition last week to head an act he expects to produce. Said he must have an answer by Tuesday night. But he got impatient—couldn't wait. So he came to my hotel yesterday, forced his way into my room and insisted that I accept his offer at once. Perhaps I acted unwisely, but I told him to leave and never come near me again."

"That was the greatest thing you ever did. And now, tell me—"

"You'll have to excuse me," she interrupted; "it's my turn to rehearse." She jerked a bundle of music from her portfolio, hurried down stage and thrust it into the orchestra leader's hands.

Perhaps it was just as well that way, Johnny reflected, with a sad little shake of the head. Surely, she would hesitate to accept aid from him—and then, there was friend husband to consider. Husbands had a way of taking unreasonable attitudes when other men grew chummy with their wives. And if Sheila accepted a loan—well, it might be misunderstood.

He decided to forget the whole matter, and succeeded for a time. He saw no more of Sheila that day or evening; nor the next afternoon. Every time he came off she had dressed and left the theater.

But on Tuesday night he stopped amazed near Sheila's door as he recognized Jadwyn's voice.

"Yes, you told me not to come, but I came and I want a different answer from the one you gave me Sunday," Johnny heard him say.

"BUT I won't accept your terms; even though you were fair on the money end of it, the other things are impossible."

"Oh come, girlie, be reasonable!"

"If you come any nearer I'll scream!"

Johnny threw open the door and stood for a moment poised on the threshold. Sheila stood with her back to the wall, a small chair in her hands, held out as if to restrain Jadwyn from approaching her.

The agent turned at the sound of the door. He and Johnny measured each other a few seconds in silence. Then Johnny stepped closer. Jadwyn's face grew crimson with anger. Sheila wavered forward, dropped the chair and thrust herself between them. Jadwyn shrank back into a partial crouch.

Johnny thrust Sheila aside and sprang upon the agent. The two men crashed down against the make-up shelf. Johnny's twisting grip on Jadwyn's throat bulged the gray-green eyes, jerked down the weak jaw, mottled the sensual face. They swayed from the shelf, stumbled backward over the chair, and pitched to the floor, rolling over and over at Sheila's feet. The girl cringed, half-fainting, against the wall.

Johnny swayed slowly to his feet, dragging Jadwyn with him, then, releasing his clutch on the other's throat, sent him hurtling back to the floor where he lay groaning.

"When you're able to get up, get out of here, and see that you leave Miss Shambaugh alone in the future," he warned.

"I'll get you for this, Clavering," spluttered Jadwyn. "I've been on to

(*Continued on page 28*)

Johnny's twisting grip on Jadwyn's throat bulged the gray-green eyes, jerked down the weak jaw and mottled the sensual face. They swayed from the shelf, stumbled backward over the chair and pitched to the floor, rolling over and over at Sheila's feet. The girl cringed half fainting against the wall.

If It Doesn't Work—Then?

MAYBE YOU Can Put Your Receiver Back in Condition Yourself. Troubles Are Often Slight. Here Are Some Helpful Hints. Try Them.

By The TECHNICAL EDITOR

RADIO troubles, like the Ten Commandments, generally occur in series of ten, or so it seems. Nine times they will be of your own creation. As for the tenth, a pair of pliers, screw driver, hydrometer, a soldering iron and a voltmeter will be the only "life savers" required for restoration of Radio reception happiness.

A receiver is somewhat delicate and should be treated with consideration. Because it always has worked is no guarantee that it will continue to function without attention. Batteries need replacement, those which light the filaments of the tubes require periodical charging, and your antenna cannot be installed and then left to care for itself against the four winds of Heaven without expecting the day to arrive when all is silent.

Storage A batteries should only be tested with a hydrometer, while their specific gravity so measured should never be allowed to fall below 1275. The plate or B batteries, for accuracy's sake, should only be tested when connected to the receiver, with the receiver in operation, or at the moment immediately after using. Waiting until a bank of B batteries have been at rest for a period before taking readings results is only fooling yourself. Never test B batteries with an ammeter. Ammeters are the finest little B battery killers one can use, while the readings which you may obtain are almost meaningless. Use a voltmeter and avoid the "one dollar" variety. B batteries whose voltmeter readings indicate voltages but 75 per cent of normal, should be discarded as they have served their useful life. Removing dust accumulations from the tops of B batteries should be a weekly practice, while the terminals of wet storage batteries should also be kept free from accumulations by cleaning them periodically with a cloth dampened in a baking soda solution.

General Instructions

Never remove a lighted tube from its socket. Turn off the battery supply. Then you may remove it in safety.

Do not use pliers or a screw driver to make repairs while either the A or B batteries are connected to the receiver.

When charging the A battery, the safe method is to entirely disconnect it from the receiver as well as from the B battery.

Always avoid forcing your tubes. Burning them beyond their rated voltage is an indication that you will soon be purchasing new ones. Pushing up the control rheostat may get that particular station but it will also "get" your tubes.

If you want to take a chance on paralyzing your tubes, the best way is to use your receiver during a lightning storm. If you don't want to take this risk, the program the following evening will be considerably better.

Do not wonder that your loud speaker goes "west" one fine day, if you persist in disconnecting it from the receiver while the tubes are lighted.

Because the vacuum tubes which you are using indicate an operating value of five volts, does not mean that you must operate them as high as this voltage, but it does mean that they should not be operated above this figure. Many a tube operates best somewhere between four and five volts.

Every six months take a peek above the roof. You HAD an antenna there which was clear of obstructions, had clean insulators and was in condition 100 per cent, but all these factors do not remain unchanged always.

Totally avoid exposing your adeptness at twisting rheostat controls. Once set, they require adjustment only when testing for defective contacts. He who attempts to tune in a station by adjusting his rheostats "knoweth not what it's all about."

The quickest way to locate a disturbing noise is first, to disconnect the aerial when, if the noise continues, you may then be certain that the trouble is local within the receiver or its battery connections.

Little Troubles and Easy Remedies

Paralyzed Tubes. Tubes which have become "paralyzed" because of too much B battery can usually be restored by disconnecting the B battery connections to the receiver and lighting the tube filaments for thirty minutes; or you may employ any one of many of the tube reactivators now offered by the dealers.

Fixed Condensers. A defective fixed condenser is usually beyond repair, considering the low cost of such devices. It should be replaced with a new one.

Variable Condensers. Dust accumulations between the plates of condensers may be cleaned readily with a pipe cleaner. These are procurable at any tobacco store. If plates touch one another when rotated they may be straightened by bending slightly with a case knife laid flatwise upon the plate. Most condensers of today have "take-up" adjustments which will correct this error. Poor connections in such a condenser are usually traced to grease in the bearings (if condenser is not "pig-tailed"), weak spring contacts, or poorly soldered connections.

Sockets. Weak or dirty socket contact springs in sockets are the source of most socket trouble. Tighten the retaining screws; clean springs carefully with fine sandpaper. If bent out of shape, straighten. A hairpin is convenient for lifting the springs.

Burned Out Transformers. These cannot be repaired well. Replacement is the best policy. The repair usually would cost more than a replacement.

Loose Tube Prongs. Look out—they cannot be tightened readily, although at times a dab of glue will set the prong. If you are in the habit of cleaning the prongs of the tube, rubbing the points over a cloth will be sufficient. Never sandpaper them.

Moisture and Dust. Two-thirds of the grief connected with a Radio receiver is caused by dust within the receiver. Periodical cleaning should be given all receivers, whether they need cleaning or not, as quite often such a cleaning will bring to light a loose or faulty connection which needs repair. Keeping the receiver in a dry place is also good insurance against Radio's bugbear, moisture.

Common Questions and Their Answers

Will a six tube set receive twice as far as a three tube set? No.

If I get good results with a 50-foot aerial will I get twice as good results with a 100-foot aerial? No.

If I get good results using 22½ volts upon my detector tube, will I get twice as good results if I use 45 volts? No.

(*Continued on page 30*)

Ten Troubles—What They Mean

1 **Tubes do not light.** This may be caused by, a depleted or dead A battery, defective rheostat, dirty or poor socket contact springs, burned out tubes, broken wire going to the A battery or rheostat, or A battery connections wrong.

2 **Tubes light but there is no response in loud speaker.** Dead B battery, B battery connections reversed or wrong, poor contact at plate or grid prongs of a tube socket, broken phone or loud speaker cord, tube paralyzed because of using too much B or plate battery, or broken or faulty connections in audio frequency transformers.

3 **Signals good with detector, but faulty when using amplifier.** The A battery in poor condition, audio transformer reversed or burned out, poor spring contacts in amplifier sockets, polarity of A battery reversed, C battery reversed or disconnected, short circuit or moisture in fixed condenser across primary of the first audio frequency transformer, or defective jacks or tube.

4 **Signals on detector weak but good with amplifier.** Batteries run down, A battery reversed, defective tuner connections, too much or too little grid leak resistance, poor grid connection in socket, aerial or ground disconnected or making poor contact, aerial grounded or against obstruction which is collecting the energy, too much or not enough B battery on detector tube plates, damp coils, dirty variable condenser, or short-circuited lightning arrester.

5 **Signals clear in detector but distorted in amplifier.** Too little B battery on amplifier, too much B battery without proper C battery bias, broken wire in amplifying transformer, poor socket contact, transformers too close together, too many stages of transformer coupling, too high ratio of transformers, transformer connections reversed.

6 **Knocking, scraping, scratchy sounds when tuning.** Dust between plates of variable tuning condensers, too much B battery on the detector tube plate, too much wire in tickler coil if using a regenerative detector, too much A battery because of rheostats being turned too high, poor socket contacts, or insufficient grid leak.

7 **Trouble same as 6, but which is not caused by tuning.** Poor connection to aerial or ground, aerial swinging or rubbing against some object, loose loop aerial connections, loose tube contacts, dirty tuning condenser plates, defective detector circuit jack, tubes burned too bright, not enough grid leak.

8 **Howls, hisses, effected by tuning.** Too much B battery, tickler advanced too far, tubes too bright, incorrect value grid leak, broken wire in tickler coil, poor ground or aerial connection, or dirty condenser plates.

9 **Same as 8 but not effected by tuning.** Too much filament current, too much detector B battery, short circuit in grid condenser, improper grid leak, poor socket spring contacts, transformers too close together or of too high a step-up ratio, too many stages of audio amplification.

10 **Wavering signals.** Leakage in aerial due to swinging or contact with some object, sooty, dirty insulators, loose bearings in condensers, poorly soldered wiring contacts, or possibly a "friend" blooping.

Sir Oliver's New N Circuit

LODGE, Eminent British Scientist and Inventor of Tuning, Now Brings to Light His Latest Discovery Which Practically Does Away with Tuned Aerial, "Blooping," and Will Aid Selectivity.

By MILO GURNEY

THERE is an old adage which goes—"If you want to know how fast this old world of ours is moving, try buying yesterday's newspaper." To which we might add: "If you want to know how fast Radio is moving, tell us who invented electrical tuning?" All of which is but a prelude to the announcement that the same authority who invented tuning is the inventor of the new N circuit which is creating such a furor in England—Sir Oliver Lodge.

Because of his prominence as a physicist and Radio authority, it is assured that the development of this circuit will be watched with much interest in this country.

In effect, the discovery includes a combination of inductances and capacities so arranged as to entirely prevent "blooping" while of even greater interest is the claim that the use of the circuit will materially add to the selectivity of one's receiver.

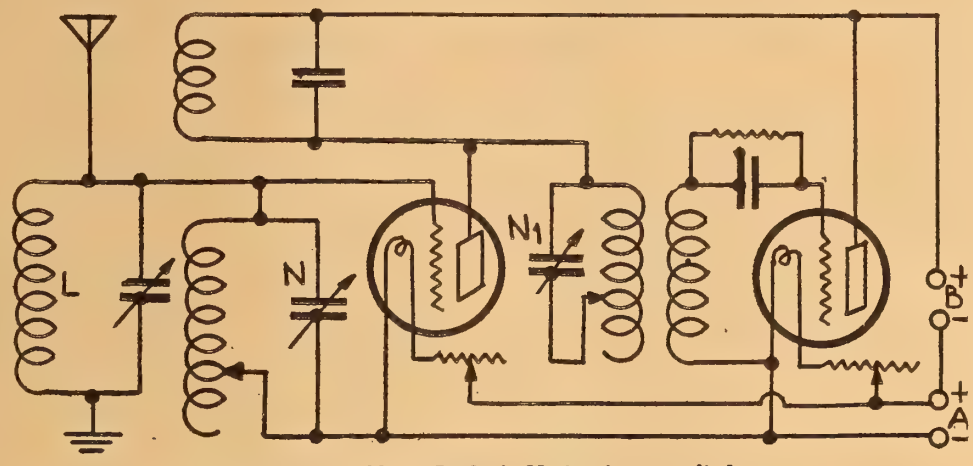

Figure 1. Sir Oliver Lodge's N circuit as applied to a tuned plate radio frequency amplifier and detector combination.

Data which would aid the builder in arranging the circuit have not been released. However, the principle involved and several applications of it have been secured by Radio Digest for its readers. These circuits are presented here in figures 1, 2, 3 and 4.

In order to understand the principle underlying the discovery, a rehearsal of the average conditions found in many circuits now employed in this country appears as important.

Where Present Receivers Fail

Our standard types of vacuum tube receivers fall below modern requirements in two important particulars. First, their efficiency as regards range is largely offset by their failure to secure a high standard of selectivity. Obviously, getting distant stations means little if one is to be troubled with excessive interference from stations which overlap. Second, the use of regeneration by careless hands in tuning often converts the receiver into a transmitter, making the night miserable for all.

It is only natural, therefore, that the broadcast listener should be much interested in any development which promises to affect an improvement in both of these directions. This is particularly true when such a discovery is sponsored by so eminent an authority as Sir Oliver Lodge.

In the early days of wireless, Sir Oliver was the first to discover the principle of electrical tuning, thus making it possible to radiate signals on a definite wave length. It was this discovery that laid the foundation for selectivity by enabling a receiver to be tuned so as to separate signals with varying wave lengths. In this latest contribution to Radio reception a remedy is provided for that particular abuse of tuning known as "condenser swinging."

While there are several methods now coming onto the market for balancing of a set so that it cannot energize an aerial, the Lodge method or N circuit, attacks the problem in characteristic fashion. In describing his invention, Sir Oliver lays particular stress upon the fact that it is intended primarily to prevent any kind of local disturbance. By this is not meant that excessive static, leaky power line noises, etc., are eliminated, but that no matter how unskilled the operator may be, or how carelessly the tuning controls are handled, the action of the N circuit prevents any radiation from the receiving aerial to which the set is connected. Of added interest is the statement that the circuit acts as a filter, operating solely by resonance, and on that account it should increase the selectivity of the receiver as a whole.

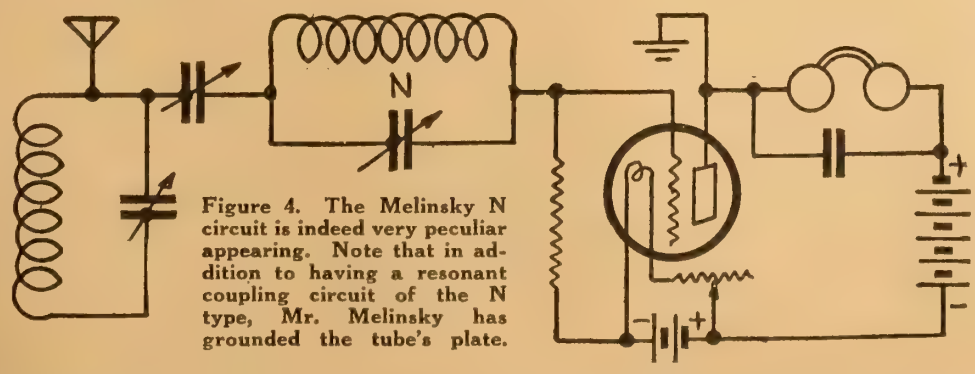

Figure 4. The Melinsky N circuit is indeed very peculiar appearing. Note that in addition to having a resonant coupling circuit of the N type, Mr. Melinsky has grounded the tube's plate.

Taps Off Side Potentials

In any open oscillating medium, such as an aerial, the are obviously alternating end potentials at its capacity terminals, as well as a varying potential everywhere (except possibly at the earth connection). It is these side potentials which, if tapped off, are sufficient to stimulate a responsive tuned circuit into oscillation. The potential oscillations of definite frequency built up in the N circuit are then transferred to the grid of an amplifying tube. In this manner selectivity is secured and with a desirable lack of distortion.

Figure 1 indicates the N circuit as applied to a tuned plate amplifier and detector combination. It will be noted that there is only a one point connection from the antenna to the N circuit, and that the latter is connected across the grid and filament input to the tube. A similar circuit (N1) is shown as

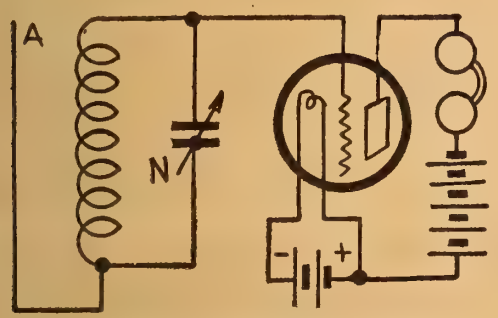

Figure 2. Here the aerial is employed only as an untuned collector for the tuned loop N.

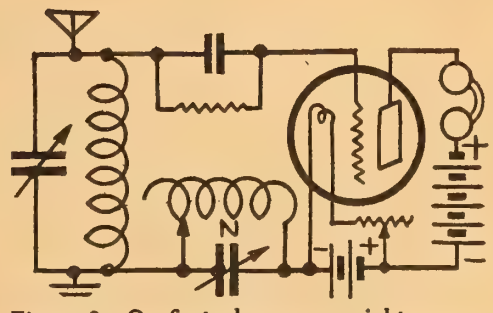

Figure 3. On first glance one might assume that this is a rejector circuit, but it isn't.

coupling the radio frequency to the detector tube. The single point connection between the antenna and the N circuit appears to be sufficient to energize the latter and thus build up oscillations of considerable amplitude by resonance.

Such oscillations are then applied across the grid and filament of the first tube and offer amplified plate currents in the ordinary manner.

Both magnetic and electrostatic coupling must be eliminated between the secondary and the N circuits, otherwise the main object of this novel arrangement is lost. It is likewise essential that the aerial and plate circuits should be isolated. By this we mean that all high frequency currents must be by-passed from flowing in the plate circuit.

Why Circuit Cannot "Bloop"

In operation the circuit provides a one way coupling between the aerial and the grid of the tube. As the N circuit is actuated by voltage rather than current, the energy transfer is small, although such voltages as are built up in the loop circuit N are such as to produce a pronounced effect in the plate circuit. Bear in mind that a vacuum tube is essentially a voltage operated device rather than a current operated one.

Because of the high resistance existing between the grid and filament of a tube, there is practically no diversion of this energy in the N circuit and as a consequence no damping effect.

In figure 2 is pictured the aerial as untuned and serves merely as a collector for the tuned loop N. Figure 3 is interesting, for at first glance, those who are familiar with the rejector, or so-called wave trap circuits will confuse their arrangement and assume that figure 3 is such a circuit. However, it is pointed out that such is not the case as rejector circuits are tuned to the wave length which one desires to eliminate.

Figure 4 shows a circuit developed by M. M. Melinsky, who is associated with Sir Oliver. This includes a novelty of application typical of this gentleman's versatility. In addition to utilizing a resonant coupling of the N type, it will be noticed that the output plate circuit is grounded. In addition the supply batteries are left "floating." (*Continued on page 30*)

Why Bloop Now?

THE "blooping" evil has just about subsided. At least it isn't what it was at the time of the last transatlantic tests. This is because, first, the public has been educated to "go easy" with its radiating sets, and replace them when it is utterly impossible to operate them without blooping.

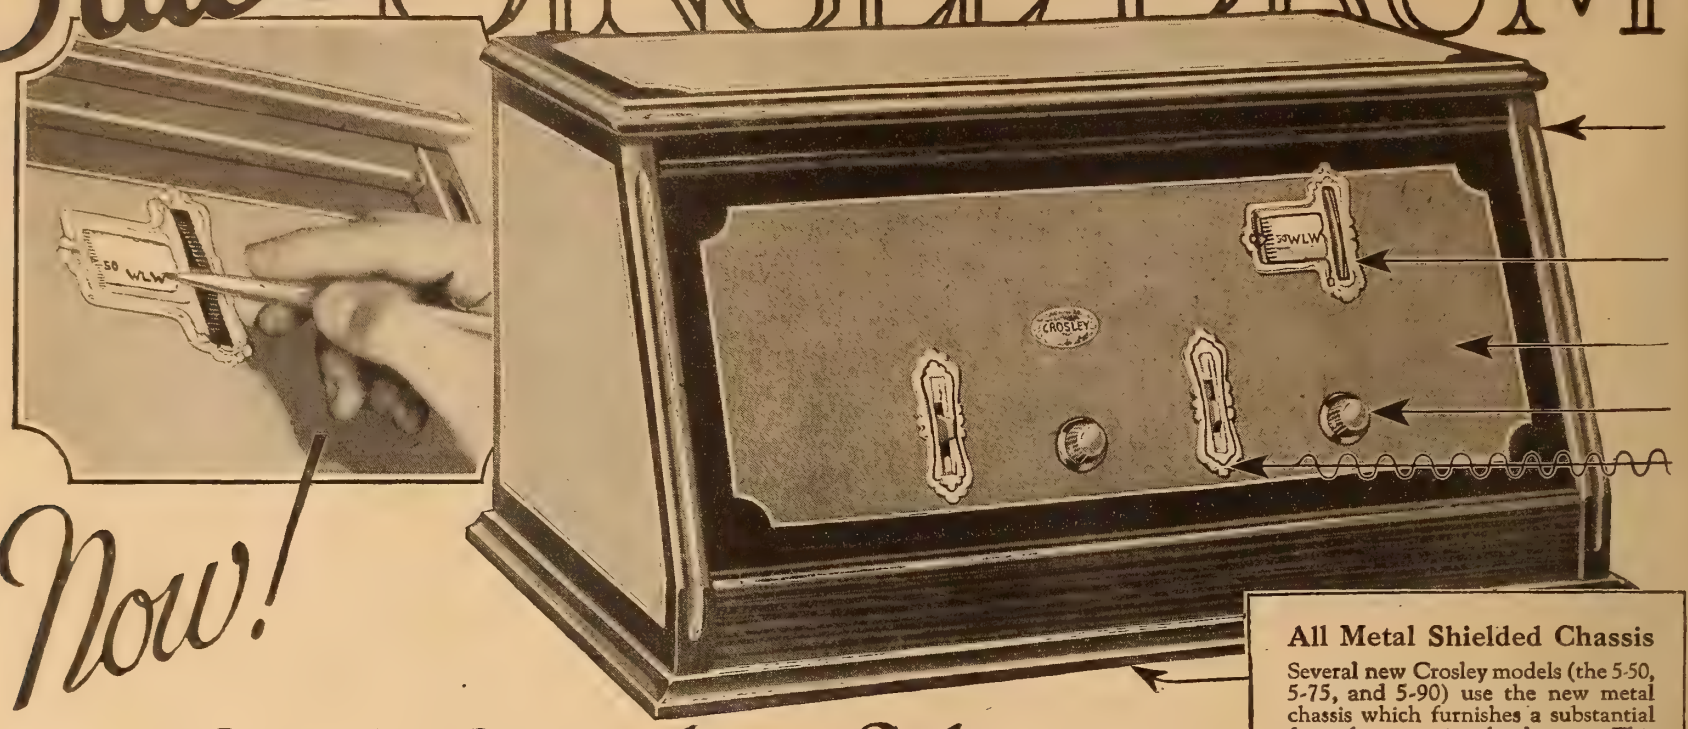
Then, secondly, the manufacturers have improved the designs of their receivers to get away from radiation. It is now possible to purchase a score of different makes of receivers that are absolutely non-radiating.

In other words, the "blooper" has gone out of style. His irate neighbors have helped to bring about the new order.

Now Sir Oliver Lodge, a trifle late we fear, has a new non-radiating circuit. It won't revolutionize the Radio industry. It isn't necessarily an improvement over 1925 or 1926 model receivers of the better manufacturers, but here it is—its good points enumerated—for you to look over.

—THE EDITOR.

5 tube SINGLE DRUM



Now!

Single Control *and* Selectivity

Amazement and delight will seize upon you the instant you contrast the surpassing performance of this new type of Crosley Radio with what has hitherto been considered radio perfection.

And you may well stand dumbfounded to find 5 tubes with single control embodied in its Drum Station Selector, the sharp tuning feature of its Acuminators, its adaptability to power output tube, and its beautiful appearance . . . in a radio set for $50!

Crosley mass production reaches its highest peak in giving the world this incomparable value. So magnificent are the radio engineering achievements in this new model that the price is positively astonishing.

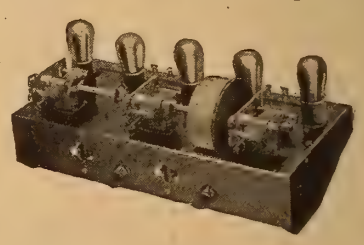
The cabinet is solid mahogany, beautifully finished in two-tone and striped in gold. Metal fittings are rose gold finish.

Never before such an astounding Crosley value. See it—hear it—operate it yourself—at any Crosley dealer's . . . now.

All Metal Shielded Chassis

Several new Crosley models (the 5-50, 5-75, and 5-90) use the new metal chassis which furnishes a substantial frame for mounting the elements. This effects excellent alignment of the gang of condensers, as well as affording a mounting for a rheostat, acuminators, crescendon, coils, sockets, transformers and insulation terminal strip.

This metal shielded chassis is divided into three compartments. Thus the units shielded from each other prevent



interstage as well as external coupling This improves the stability of the circuit and increases the selectivity as well. The metal shielded chassis is indeed a most progressive step in advanced radio design. This feature has never been offered before in sets of moderate price.

The Musicones—

The announcement of the new Super-Musicone is predicated on the success of the Regular (12 inch cone) Crosley Musicone in replacing hundreds of thousands of old type loud speakers. (Keep in mind that it's the exclusive Crosley patented actuating unit and *not* the cone that makes possible its wonderful performance). 12 inch Musicone Regular *now* $12.50.

The Crosley Super-Musicone (16 inch cone) is considered by some to develop more resonance in bass reproduction and is naturally louder than its 12 inch counterpart. Beautifully decorated both in front and on the back. Price $14.75.

The MUSICONSOLE into which the Musicone has been skillfully built, holds all batteries, wires and accessories. Two-toned mahogany finish. 24½ inches long inside. Price $32.

Crosley Musicones are manufactured under basic patents issued and pending, controlled by Crosley. Prices slightly higher West of the Rockies. For descriptive catalog write Dept.

THE CROSLEY RADIO CORPORATION, Cincinnati
Owning and operating WLW first remote control super-power broadcasting station in America.

Crosley manufactures radio receiving sets which are licensed under Armstrong U. S. Patent No. 1,113,149 or under patent applications of Radio Frequency Laboratories, Inc., and other patents issued and pending.

CROSLEY

[STATION SELECTOR] RADIO RECEIVER

SOLID MAHOGANY CABINET

Graphic Station Selector

All stations found instantly on this *one* single control. It revolves smoothly under slight pressure. Once stations are found, they are easily written on the drum. No log book to fuss with. Stations from one end of the wave band to the other are easily brought in at all times—IN THE SAME PLACE. This advanced improvement in station finding has heretofore been found only in the highest priced radios.

POWER TUBE ADAPTABILITY

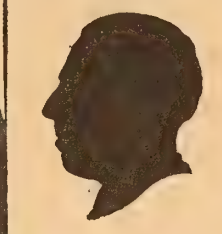
Crescendon Control

This exclusive Crosley feature supplies very unusual volume from distant stations. In cases where on ordinary radios ears must strain to catch the station many leagues away, the turn of the Crescendon on a Crosley swells the reception to room-filling volume. This Crosley feature has already given great satisfaction in the 4-29 and 5-38 models brought out early this year.

Acuminators

(*From "acuminate", meaning "to sharpen"*)

Heretofore single dial control sacrificed selectivity. It was practically impossible for sets located near broadcasting stations to tune them out and bring in distant stations. By means of these Acuminators, very sharp tuning is accomplished where the reception from stations spreads broadly over the dial. Under average conditions, when once adjusted, these acuminators do not have to be touched again.



$50.

5-TUBE SINGLE CONTROL RADIO

Priced without accessories

Crosley 1927 radio achievements fit all purses

At $9.75

The little double-circuit single-tube "Pup" has already brought happiness to thousands. If the thousands of reports sent to Crosley last winter are any indication, probably the greatest distances over which laymen have ever heard radio signals have been with this set.

At $29

The 4-29—a 4-tube receiver of amazing efficiency. Such radio performance has never before been possible at such a low price. Brought out early this season it quickly proved its right to a permanent position in the Crosley line. Crescendon equipped!

At $38

The 5-38—this 5-tube tuned radio frequency set incorporates two stages of non-oscillating radio frequency amplification, regenerative Crescendon controlled detector and two stages of audio frequency amplification. Sales and performance since its introduction mark the 5-38 as a spectacularly popular model and one of Crosley's most startling values.

At $65

The RFL-75—true cascade amplification; non-oscillating—non-radiating, regardless of how it may be mishandled. This perfect balancing is achieved by introducing the Wheatstone bridge into each stage of amplification—a clever engineering feature instantly recognized by radio technicians—and appreciated by the layman because of the selectivity and tone this set affords.

At $75

The 5-75—Crosley's new console radio—embodying the 5-tube single control with drum station selector as offered in a table model at $50. SOLID MAHOGANY cabinet into which is built the Crosley Musicone. Ample compartment for batteries. Stands 41 inches high. Beautifully finished in two tones.

At $90

The RFL-90—the console model of the $65 RFL circuit, introducing the double drum station selector! This is a fine radio engineering achievement offered in a beautiful housing of solid mahogany, finished and decorated so exquisitely as to grace the finest surroundings. MUSICONE built in—ample room for batteries and all accessories, 41 inches high, 30½ inches wide.

Prices slightly higher West of the Rockies.

Acknowledging Applause

OUR recent editorial, "Two Cents for a Program," has aroused much comment. Broadcasting stations have universally endorsed it. Listeners, as a whole, have condemned it. The broadcasters are not satisfied with the present mail-reaction or postal-applause. The public is satisfied that it is doing entirely too much applauding because stations do not take the trouble of acknowledging even by form letter or post card.

The trouble is with the invisible audience. They should not expect personal replies or even form post card replies to their letters or cards of applause. The expense to a station of attempting to answer the daily mail from listeners, especially if that volume of mail were as great as it should be, would be terrific and entirely prohibitive.

Listeners should not expect to receive answers to their letters to the stations. If the station studies its applause and directs its programs to meet the changing trend in the desires of its listeners, that is sufficient. If that station should, say once a year, mail a general picture post card of its studio and equipment or the like to the ten thousand or one hundred thousand listeners who have corresponded during the year, then those listeners should be highly elated and honored that the station should go to the expense of several thousand dollars just to send them tokens of favor.

When we go to the theater, to a recital or to vaudeville, we applaud what pleases us. The degree of our applause indicates the depth of our appreciation. Yet, although all we receive in return is a bow or curtsey, we feel amply repaid. The real reason for the applause is for an encore. If that is granted, we are paid in full for our applause. The artist, actor or performer does not call our names from the stage and thank us individually.

So it is with the broadcasting stations. They will endeavor to improve and repeat along the lines of the programs most favored by applause from the invisible audience. And such acknowledgment of our post cards and letters is indeed enough.

A Great Problem Solved

ALTHOUGH there are some twenty-five Radio stations in the Chicago district and cutthroat competition would be the natural thing, the "Windy City" station owners showed that the best interests of the industry as a whole come first and individual gain second by their recent successful cooperative broadcasting of the major events of the great Eucharistic Congress. Credit for this large undertaking should go to the member stations of the Chicago Broadcasters association, under whose direction the feat was accomplished.

Of all the stations in Chicago, only ten are members of the association, but these ten cover the broadcast band from 21 meters up to 536 meters. The stations included in the group are: WOK, 217 meters; WBCN and WENR, 266 meters; WGN, 303 meters; WLS, 345 meters; WEBH and WJJD, 370 meters; WMAQ and WQJ, 448 meters, and KYW, 536 meters. Of this group, WBCN, WGN, WEBH, WMAQ and KYW took active part in the broadcasting of the congress features, WJJD not participating on account of being unable to use A. T. & T. lines from Chicago to Mooseheart and WQJ giving its time to WMAQ.

Mechanically the broadcast was made possible through the use of the central board at the WLS Hotel Sherman studio into which seventy-six pairs of telephone lines are routed permanently by the Illinois Bell Telephone company. All events were picked up by a trunk line installed between WLS and the pickup point and then routed through the board to the various stations broadcasting the feature.

It is hoped that the Chicago Broadcasters association will combine to handle other events of national importance originating in their city. Other cities top-heavy with stations could do well in following the lead of Chicago. Local stations not members of the C. B. A. should take a hint and get on the band wagon if the better interests of Radio listeners are to be served.

RADIO INDI-GEST

A Radio Husband

Monday
Wife: "Pa, let's go to the theater,
You never go to a show."
Hubby: "We live in a different age, dear,
I go on my Radio."

Tuesday
Wife: "Mrs. Jones has asked us to play bridge,
I'd certainly like to go."
Hubby: "Oh! what's the use it bores me so,
I play on my Radio."

Wednesday
Wife: "I've tickets for the opera, dear."
Hubby: "Well, you'll have to go alone.
I'd ten times rather stay right here
And hear through my telephone."

Thursday
Wife: "Tonight you must work in the garden,
For grass seed you have to sow."
Hubby: "Oh! let George do it, I'm so tired;
I must work my Radio."

Friday
Wife: "I have a BIG surprise for you,
I've opened our piano.
I want to sing the old sweet songs
You liked so long ago."

Saturday and Sunday
Hubby: "Well!! if you are not the limit!
You are so selfish; you know
The only thing in the world I like
Are tunes in my Radio.

RHEA SHELDON

Painless Dentistry in Alaska

Fairice, Alaska.

Edator Indi-gest: There has been a agent hear in fairice celling Radio sets to the natives. He cells a nine Toob calld the Sooper Phoney Dine and it would kill you to lisstn over it. They is ceveral atachments to do house work and little odd jobs. They is one dile you tern to make it sead cherries and another you tern makes it polish false teath. The wires must have been twisted for a neybor tuck his teath out and putt them in the slot to be polished and when he twisted the dile to make it polish it pulled three teath out of his plait before he could get it terned off. The cherrie seader wire must been onto the dile where it said to polish teath. It was a good joak. Always as ever,

KITTLE DRUMMER

The Indi-Gest "Colyum"

Here's to the "Colyum" of Indi-Gest,
The column of comment, and poems, and jest,
Whose editor hears from many a pest
With a load he has just removed from his chest.

Contributions come in from the East and the West,
Some in good language versed, and some badly messed.
Some writers the editor ranks with the blest,
While others he'd like to place under arrest.

If your stuff is all right and passes the test
He will give it a place along with the best;
But if it is bum, or old stuff newly dressed
It will go in the basket beside Indi's desk.

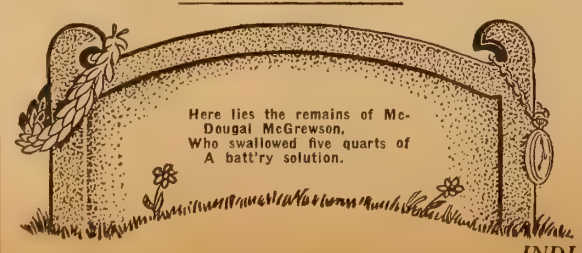
Intermission Idiosyncrasies

A. C. S. Announcing

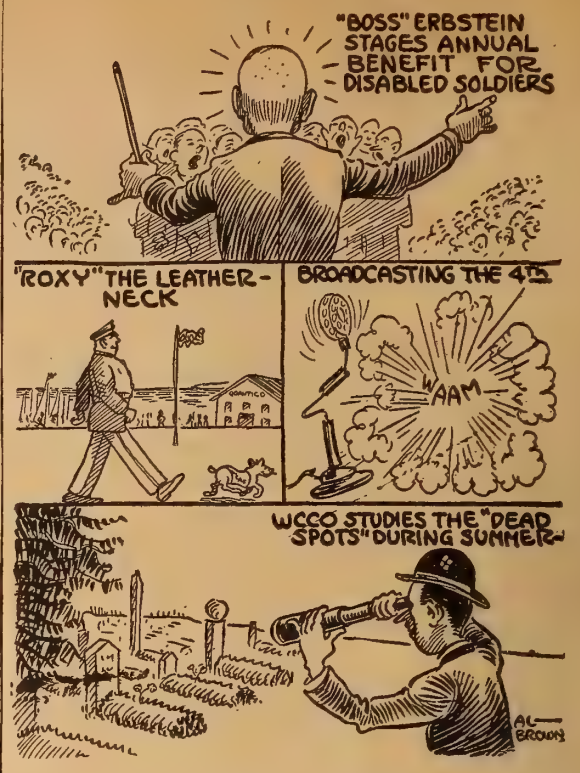
"At 8:15, Anson Dudley Jones, an ex-president of the I. W. W. Welfare association will favor us with a short recitation entitled, 'The Light That Failed'. For your information we wish to state that this selection has nothing whatsoever to do with Rudyard Kipling's masterpiece. The nag Anson Dudley will rave about tonight only carried ninety-two pounds and blew the foundation out from under Anson Dudley's bank roll."

ARTHUR C. STOWELL



INDI

Current Events



Condensed

BY DIELECTRIC

If the early part of this summer had been sultry and as "staticy" as usual to the time of the year, you would have had a grouchy reviewer to contend with. As it is, the very first mention to be made of any programs refers to one of several heard from Station WHO, Des Moines. You readily see how the cool breezes encourage generous emotions for the subject under discussion is sopranos—or, more particularily, a coloratura soprano, and I have but the most favorable comment to make. Her selections, in part, were similar in range and composition to the Bell Song in Lakme, which is rather a difficult selection to render, and I wish to say that not only was this singer's intonation excellent but her tones throughout were well-rounded and of quality.

Station KDKA, the world's pioneer broadcaster, should provide any of you with the style of program appealing to your tastes, for I find the director of their studio has no pet feature which he rides to death, nor a superabundance of mediocre talent. Most all stations this time of year pay more attention to the lighter forms of entertainment and, undoubtedly, at your request. However, you may find classical features and lectures by looking through the columns of Radio Digest, as these are included on the programs of some stations every month of the year. From Pittsburgh's best known station you will always find variety numbers—both instrumental and vocal.

An outstanding event in Radio broadcasting during the past few weeks was the miking of the reception to Lieutenant Commander Byrd, through Station WOR, Newark, N. J., that modest explorer returned to the city from which his expedition started. New Yorkers were heard to give these courageous polar flyers a rousing welcome with bands playing, sirens shrilling, cheers and handclapping, both on the streets and in the city hall; then the addresses of praise, followed by Commander Byrd's disclaiming the honors heaped upon him. In a second of time we were a part of the chamber of commerce party awaiting his arrival there and listening to the encouraging reports of the progress of his party from the city hall.

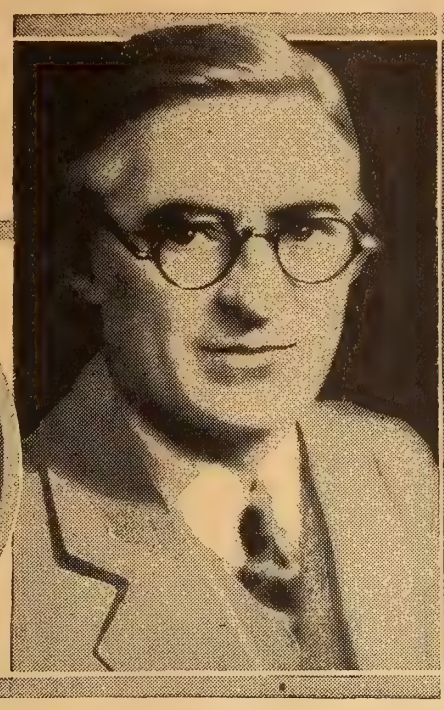
Another very pleasing entertainment was provided in one of the programs broadcast by Station WLW, Cincinnati. The Hotel Garfield Imperial Serenaders were responsible for this treat. They really are a very lively aggregation of musicians and keep one from twisting the dials to a new setting.

Station WHT, Chicago, is one of the many offering seasonal inducements to secure your attention, which, if given, will not result in disappointment. After listening to a wealth of amusement from the Wrigely studio, I decided the crown should rest upon the brow of a young lady with an intriguing voice who sang popular songs in that I'm-singing-to-you style, which calls for a clean shave and collar right away before she notices. Other features were good—but forgotten.

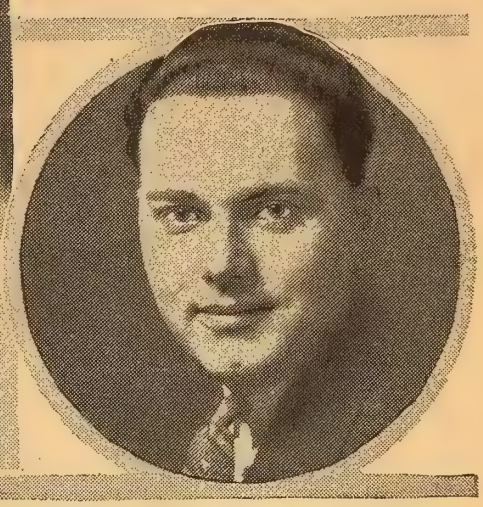
It is impossible to make mention of all the programs any station puts on the air during the periods between issues of this magazine, so you will find what we shall choose to call "excerpts" of the broadcasts. There's that station in Cincinnati with which we are all familiar and most of us enamored—WSAI. With plenty to choose from and lots to harp on, both sweetly and acridly, instead your attention is recalled to but one selection in a group of songs rendered by a baritone, the possessor of a very good voice for lyric singing. The Kashmiri song has been heard often over the Radio but never to better advantage.

POPULAR PACIFIC COAST ANNOUNCERS

At right, "Uncle" John Daggett, director and announcer of KHJ, Los Angeles, is one of the West's most popular voices. In the Northwest it is "Dick" R. V. Haller, below, of Station KGW, Portland, Ore.



At left, Charlie Wellman, announcer at KFWB, has a large following. Below is the much adored Harold Isbell, now of KNX, recently at KYW, Chicago, and before that at the mike of KFI, Los Angeles.



LOS ANGELES READY FOR BIG EXPOSITION

FOURTH NATIONAL SHOW IS SET FOR SEPT. 5 TO 11

Waldo T. Tupper Again Director General—Ambassador Auditorium Place —Prepare for Large Crowds

LOS ANGELES.—Radio dealers and broadcasters are working in unison in Los Angeles in preparation of the Fourth annual National Radio exposition which will be held in this city from September 5 to 11.

The show, which is expected to exceed in quality and interest the Radio exposition staged in Los Angeles last year, is predicted by members of the city's Radio Trades associations as being in all likelihood the equal of any Radio exposition held in the United States this year.

Waldo T. Tupper is again director general, and J. E. Hartley, president of the Los Angeles Radio Trades association, is working with him and a general exposition committee in perfecting the plans.

Ambassador Auditorium Selected

Dealers, manufacturers and manufacturers' agents are joining in plans for the exposition. They have agreed on giving willingly of their time in making the exposition as a whole, as well as their individual exhibits reflect the great growth which Radio has enjoyed in the last few years in Southern California.

Ambassador auditorium, on the grounds of the Ambassador hotel, which harbored the exposition for the last two years, again has been chosen for the locale. It is being redecorated to a considerable extent for the occasion, and to make room for all the exhibits demanded this year, the building is undergoing alterations.

The Southern California coterie of broadcast fans already is showing keen interest in the coming event. Due to the great number of homes and bungalows in California, Radio long has been a popular pastime with stay-at-homes.

Prepare to Entertain Crowd

Preparations are being made in Los Angeles for entertaining a vast crowd of Radio enthusiasts expected to attend from out of city points. As was the rule last year, it is planned to make the effect of the show permeate every quarter of the city and surrounding areas, even penetrating to adjacent states. Hundreds last year visited the show from Arizona and New Mexico points, and hotels in Los Angeles are already receiving inquiries from prospective guests.

Recognizing the value of the Los Angeles exposition, numerous eastern manufacturers have obtained space, according to Mr. Tupper.

Coney Island Fights on WHN

NEW YORK.—When fans tune in WHN programs on Friday nights for the rest of the summer they will be able to get the results of every boxing event going on at Coney Island stadium. George Utassey will be at the "mike" to tell about the matches.

ANGELUS TEMPLE REJOICES RETURN

Mourning Changes to Joy as the Escape of Aimee McPherson Is Celebrated

LOS ANGELES.—Reported by the press of the country and given up by her relatives as among the missing dead, Aimee Semple McPherson has returned to her flock at the Angelus temple and its broadcasting station, KFSG, little worse for the kidnaping adventure inflicted upon her except for the shock.

Following her discovery and identification in a hospital at Douglas, Ariz., she told a remarkable story of abduction and ransom and how she had been held a prisoner for six weeks in a shack on the Mexican side of the border near Sonora, while posses searched for traces of her, the ocean was dragged for her body, and her followers mourned.

Her captors were holding Mrs. McPherson for $500,000 ransom, she said, but she would not assist them in their efforts to collect. In an unguarded moment one day she escaped and ran toward the border until exhausted. An American found her and brought her to the hospital at Douglas.

Highest Towers in City of Los Angeles Are at KMTR

HOLLYWOOD, Calif.—July 1 marked the opening of KMTR's new studio on the top floor of the Terminal building, Hollywood's newest skyscraper and the most beautiful industrial building in the Los Angeles metropolitan district.

Two graceful steel towers adorn the top of the building, and, as it was constructed with the idea in mind, the Radio towers give a finishing touch to the artistic whole. The building, with the towers, comprise the highest building in Los Angeles, and KMTR's towers form a landmark that can be seen for miles around.

"Hollywood's Distinctive Station," KMTR, was recently purchased by the Echophone Manufacturing company from the K. M. Turner Radio company. The Echophone company formerly operated Station KFON at Long Beach, Calif.

WAIU, Columbus, Moves From City and Adds Power

COLUMBUS, O.—Before the end of July Station WAIU, owned and operated by the American Insurance Union, will have moved its transmitter outside the Columbus city limits and assumed a new power rating of 750 watts.

The new transmitter will be located in a plot set aside for it on the grounds of the Elks Country club, more than ten miles from the center of Columbus. All equipment will be new, including steel masts, bungalow-type power house and the broadcaster comprised of General Electric parts. Storage batteries will supply the power.

The exodus to the country club was scheduled tentatively to be completed by July 17.

WEAF Releases Dance Schedule for Summer

Six Orchestras Will Supply Eight Hours of Music Weekly

NEW YORK.—Realizing that the summer months bring with them the desire on the part of many of the younger listeners to dance, WEAF has arranged its schedule of dance music to provide ample syncopation by well-known orchestras at convenient times. The weekly time table, which shows a total of eight hours of music by six different orchestras, is given in Eastern daylight saving time and follows:

Monday evenings: 8:00-8:30, music from Park Lane Restaurant; 11:00-12:00, music by B. A. Rolfe's Palais d'Or orchestra.

Tuesday evenings: 10:30-11:30, orchestras in this list alternate weekly; 11:30-12:00, the Buffalodians from the Monte Carlo.

Wednesday evenings: 11:00-12:00, Pelham Heath Inn orchestra from Pelham Heath Inn, New York city.

Thursday evenings: 7:30-8:00, dance music from Park Lane Restaurant; 11:00-12:00, the Buffalodians from the Monte Carlo.

Friday evenings: 10:30-11:00, Jack Albin's orchestra from Marine Roof of Hotel Bossert; 11:00-12:00, Pelham Heath Inn orchestra from Pelham Heath Inn, New York city.

Saturday evenings: 10:00-11:00, Ben Bernie's orchestra from Hotel Roosevelt.

World's Largest Studios at Playing Card Station WSAI

CINCINNATI, O.—When WSAI celebrated its third anniversary recently with a nineteen hour continuous program, at the same time new and enlarged studios were christened by the United States Playing Card company's station.

WSAI's new plant includes an immense reception room, as large as the average hotel lobby, three artist studios, an ensemble studio capable of seating 100 musicians, a solo studio and a rehearsal studio. All these studios are connected by a common announcer's booth, where the director may handle programs from any studio. Adjoining this layout are the control operator's room, the artists' lounge and the director's office.

The new studios are believed to be the largest and most completely equipped in the world.

Governorship Aspirants on Air with Speeches at WCCO

MINNEAPOLIS.—Candidates for the governorship of Minnesota recently utilized Radio to present to the voters of the state their arguments for election. It was the first non-partisan Radio political rally ever held in the state, arranged by the League of Women Voters, and broadcast by WCCO, the Gold Medal station.

The candidates were Magnus Johnson and Tom Davis, Farm-Labor candidates, and Governor Theodore Christianson of Minnesota and George E. Leach, Republican candidates. They each spoke in alphabetical order for fifteen minutes.

SAN FRANCISCO WILL SHOW SET PROGRESS

EXPOSITION ON AUG. 21 TO 28 ANNOUNCES PLANS

Cooperative Merchandising Plan to Be Shown Dealers—100,000 Visitors Expected to Attend

SAN FRANCISCO.—Whether it is possible to make each major Radio exposition show as marked an advance in Radio engineering as the exposition previous will be one of the tests afforded the Pacific Radio exposition to be held in San Francisco, August 21 to 28, this summer.

Already the pennants of the new show are being flung to the breeze. The arrangements have been placed in the hands of a professional showman who has organized an efficient staff of experts to insure that San Francisco will maintain its standards of past years as an exposition city.

Anthony A. Tremp is the genius selected to bear the big individual responsibility and his past experiences are said to have made him the logical candidate for the job. He has been named the managing director.

Develop Cooperative Merchandising

One of the first operations of the committee staff was to develop a plan for cooperative merchandising within the industry. The objectives to this end have been established on the following basis:

To bring about closer acquaintanceship between manufacturers, their agents, distributors and dealers that they may know each other better and have a fuller understanding of the problems of each other.

To provide an opportunity for dealers and jobbers to meet factory representatives and discuss the sales angles on the various products in which they are interested and which they are taking on for the coming season.

All Dealers Asked to Attend

In furtherance of this plan the exposition committee through the Pacific Radio Trade association intends to provide season passes for every Radio dealer in northern California, Nevada, Utah, Southern Oregon and other surrounding territories.

It is estimated that 75,000 to 100,000 visitors will be attending the exposition. The Society of Radio Pioneers is planning to outdo the past success of its Midnight Frolic by staging it on a larger scale.

Chicago Stations Pick Up Legalized Illinois Fights

CHICAGO.—Boxing and Radio were associated recently when the first championship bout was staged since legalized fighting came back to Illinois. The preliminaries as well as the main bout between Rocky Kansas of Buffalo, lightweight champion of the world versus Sammy Mandell of Rockford, Illinois, the challenger, were broadcast by Stations KYW, WJJD, and WLS, and Stations WMAQ and WGN who came in on the main bout.

ANOTHER COW YARN; BOVINES VETO JAZZ

CINCINNATI.—The studio staff of Crosley WLW station here is not quite sure whether a fan who suggested a special program at four o'clock in the morning is serious or just kidding. He claims that a special program broadcast for the benefit of dairymen at that time would increase the production of milk and warns against playing jazz as most good cows do not like this type of music.

Canada Marks First Church to Go on Air

Tablet Is Unveiled in Service at Winnipeg Sanctuary

WINNIPEG, Man.—Four men recently took part in a little ceremony here that will stand as part of history. The occasion was the commemoration of the first service broadcast by Radio from a church in Canada on Easter Sunday, 1923. The church was the Fort Rouge United.

The four men who officiated in the simple ceremony were: Rev. E. F. Church, the pastor who preached the first Radio sermon from a church in the Dominion; D. R. P. Coats, announcer of CKY, who broadcast it; "Paddy" of the Winnipeg General hospital, who was a listener, and Rev. Dr. John MacLean, archivisit of the Manitoba Conference of the United Church of Canada, who remembers the days when electric lights and telephones were marvels scarcely possible.

Contributions were made by Radio listeners for the tablet which was unveiled. The inscription on it was matter of fact, "The first church service broadcast in Canada was held in this church on Easter Sunday, 1923. Rev. E. F. Church, B. A., pastor, was the preacher, CKY operating."

WGHB, Clearwater, Is Sold To New Ft. Harrison Hotel

CLEARWATER, Fla. — Station WGHB here, which has been operating for the Clearwater chamber of commerce since last January, has been sold to Ed. A. Haley, owner and builder of the new Fort Harrison hotel to be opened shortly. Mr. Haley plans to transfer the present equipment of WGHB to the Fort Harrison hotel and operate it in conjunction with the roof garden.

New call letters will identify the station at the opening of the Fort Harrison. The combination of WFLA, designating West Florida (W-FLA), is sought

KVOO DEDICATES SET WITH GALA PROGRAM

FAMOUS ANNOUNCERS AID IN CHRISTENING PARTY

New 1,000-Watt Western Electric 'Voice of Oklahoma' Opened by Southwestern Sales Corporation

TULSA, Oklahoma.—"KVOO, the Voice of Oklahoma, broadcasting its re-dedication program of twenty-four hours. On the occasion of the opening of our new 1,000-watt Western Electric set, we are glad to announce that Tulsa and Bristow are hosts to many prominent Radio personalities."

That was something like the announcement that greeted the ears of southwestern listeners recently when the new transmitter of the Southwestern Sales corporation, at Bristow, with studios in Bristow and Tulsa, officially went on the air.

Prominent indeed was the representative group of famous announcers that journeyed to help KVOO celebrate. The guests included Peter MacArthur of WOC, Davenport; G. C. Arnoux of KTHS, Hot Springs; Adams Colhoun of WFAA, Dallas; Henry Field of KFNF, Shenandoah, Iowa; Gayle Grubb of KFAB, Lincoln, Nebr.; Lester Palmer of WOAW, Omaha, and Bob Graham of KFJF, Oklahoma City. E. E. Plummer, editor of Radio Digest, was also a guest.

Business Welcomes New Station

Business was almost at a standstill in Tulsa and Bristow at the start of the twenty-four hour broadcast, opened by the speeches of Roy C. Griffin, manager of KVOO, and H. E. Rollestone, president of the Southwestern Sales corporation which owns and operates "The Voice of Oklahoma." The Rotary and Lions clubs and the Tulsa chamber of commerce turned out full memberships in joint meeting at the luncheon marking the opening.

Lawn parties, luncheons, tours and banquets filled the gala day. Two studios, the one at Bristow in the Hotel Roland and the other at Tulsa in the Hotel Mayo, were kept alternately busy with artists and programs announced by the guest announcers during the non-stop twenty-four hour program.

Four hundred prizes with a total value of $2,500 were presented to listeners sending in communications.

Hear WJZ in Jerusalem

NEW YORK.—On a postal card received from Major L. D. Gardner by C. B. Popenoe, manger of Station WJZ, the statement is made that WJZ was heard clearly in the ancient city of Jerusalem. The card is postmarked June 3, 1926.

EDUCATING CHILD BY RADIO TOPIC OF TALK

W. E. HARKNESS OF WEAF ADDRESSES EDUCATORS

Influence of Broadcasting on Children Is Analyzed—Further Study of Field Is Urged

PHILADELPHIA.—"The child in the home can and does tune in to any program that is available and can absorb many things which he would not otherwise hear. Under these conditions it is important that if Radio is to accomplish the greatest good for the greatest number it be in the hands of those who realize their responsibility to the listening public rather than in the hands of those who for publicity or other selfish purposes will depreciate this medium of communication."

So stated William E. Harkness, vice-president and general manager of the Broadcasting Company of America which operates Station WEAF in New York, in an address before the members of the National Education association meeting recently at the Garrick theater in Philadelphia.

Children Educated to Like Classics

Mr. Harkness' topic was "Radio and the Child." Before launching into his main theme he gave his listeners a good insight of the Radio situation in general. This included some interesting data which had been compiled from questionnaires and surveys made by several important publishers throughout the country and WEAF as well. One of these surveys determined the average listeners per set to be five.

As the result of another questionnaire, Mr. Harkness pointed out the fact that due to the children's choice of operatic and classical music it would seem to indicate that the efforts of the city and town schools to stimulate an interest in these classes of music have been effective.

In speaking of Radio and the newspaper, Mr. Harkness stated that the former would never supplant the latter, but on the other hand, both would have their own place, particularly in the field of education.

In closing Mr. Harkness stated: "So far the so-called educational program experiments. There has been no systematic planning by the broadcasters and educators. Much remains to be done individually and collectively before satisfactory results are obtained."

COSTUMES HELP CARRY ILLUSION

Broadcasting in costume helps carry the character over the microphone, many artists believe. "Betsy Ross," or Marie Rogge, who at one time gave sewing lessons to feminine fans of KPO, Hale Brothers, San Francisco, is shown as she appeared in the studio. Betsy Ross in nom de plume, she dressed Betsy Ross style.

SHORT WAVES

By Marcella

(Continued from page 2)

at WTAG. His description: age, 27; eyes, blue; hair, brown; height, 6 feet 2 inches; weight, 160 pounds; disposition, happy-go-lucky. He is a great favorite with both men and ladies, and is known all through Worcester and vicinity as "Our Chester" and as "New England's Favorite". Not only is he talented as an announcer but he plays the saxophone and accompanies at the piano excellently.

* *

"Ribs", where have you been? George Dewey Hay, otherwise known as the "Solemn Old Judge", has been director of WSM, Nashville, for a long time. He announces at times, sharing this work with Jack Keefe.

* *

Stephen Cisler, Jr., announcer at WAMD, Minneapolis, hastens to correct me regarding his past microphone experience. He has never announced from WOC or WHO. His career started at KOCH, Omaha and he substituted for a time last summer at KTHS. His recent employment took him from WDGY, Minneapolis, to WAMD. He has however, served as guest announcer at WOAW, WAAW, WLB, WHAT and WRHM.

* *

"Lottie" wants to have information regarding Tell Taylor and E. Clinton Keithley, singers. The former is a tall, stout fellow and works as a music publisher's representative, The latter is a middle-aged man who has composed a number of songs.

* *

No, "Interested One", I do not know where Mr. Leuchtman, former WCX announcer, is. Mary Tudor, WCX pianist, is at WJR. Her picture is on page 17 of this issue of Radio Digest.

* *

Walter Wilson, KYW's "Uncle Bob", is married, "Kathryn", but he has no children. But then, he philosophizes, whenever the kids have a party they invite him. He loves to take a pail of angle worms, a hook or two, and his wife to some convenient creek and fish.

* *

What deep secret would you like to know about your favorite broadcast star? Drop me a note, girls and boys, and I'll do my best to answer here. MARCELLA.

WOMEN'S PROGRAMS INDEX

Monday

Atlantic Eastern Central Mountain Pacific
10:30 a.m. 9:30 8:30 7:30 6:30
WWJ (352.7m-850kc), Tonight's dinner.

STATIONS TO FEATURE MUNICIPAL

HIGH LIGHTS OF THE AIR

SUMMER has not affected the quality of programs, only changed them in tone. Many municipal organizations such as the Baltimore City Parks orchestra and Municipal band, Denver Municipal band, New York Philharmonic orchestra and Newark Philharmonic band are bringing music of an outdoor type into the homes of millions. Band concerts may now be enjoyed by all on cool, moonlit evenings.

Continuity programs with a definite thread running through them are being given more and more by Radio stations. "On the Volga River," a John Clark production at WSWS, Thursday, July 15, is a program of this sort. Folk songs native of the country through which this river flows will be sung. Interesting bits of folk lore will be given, and the invisible listener will carry away with him a musical picture of a part of the world he has perhaps never seen.

A reading of unusual interest will be given from WMAQ, Friday, July 16, when Prof. B. G. Nelson of the University of Chicago gives a reading from "Cyrano de Bergerac." Alumni of the university who have taken public speaking with Prof. Nelson will enjoy tuning in.

WIP will take the listener who is not able to attend the Sesquicentennial into the middle of the great fair Saturday, July 17, and let him listen to the Episotic drama. As this great pageant unfolds the announcer will be the eyes of his audience.

Who does not remember Gertrude O'Neil Ganley whose mischievous fun made her such a favorite at the Gold Medal Station WCCO. She has been absent for some time but returns Saturday, July 17, to make up for lost time and to amuse her friends with some new readings.

Another program the Gold Medal station schedules this month which will attract listeners is the listing of Flor's Little German band, Saturday, July 24. All the old German favorites will be played as only a German band can play them. This is only one of the international dance programs being given at WCCO.

Is there anyone who does not know the Charleston? At least the dance floors refuse to give them away. But perhaps some poor wallflower unable to bend his knees in this famous dance will welcome WLW, Monday, July 26. Tune in quietly and take your first lesson, but, a little warning, do not try it with the earphones on.

Monday, July 26, is also to be famous because a popular pair well known to middle westerners, Clara Kurtz and her Chocolate Cake-Eater are entertaining this same evening at KOIL.

First aid to the campers is the new idea at WGHP, Detroit. And a good idea it is. You may find out during this Tuesday evening half hour how to carry less and yet better supplies, how to cook over an open fire and even what to do when it rains; in other words how to be a camper de luxe.

Finish off the month with that peppy bunch of artists, Ray Jones' orchestra and singers. Not only does this group play all the latest jazz songs but also sings them.

WMAQ (447.5m-670kc), "Cyrano de Bergerac." Prof. R. G. Nelson.				

STATIONS TO FEATURE MUNICIPAL ORGANIZATIONS DURING SUMMER

HIGH LIGHTS OF THE AIR

SUMMER has not affected the quality of programs, only changed them in tone. Many municipal organizations such as the Baltimore City Parks orchestra and Municipal band, Denver Municipal band, New York Philharmonic orchestra and Newark Philharmonic band are bringing music of an outdoor type into the homes of millions. Band concerts may now be enjoyed by all on cool, moonlit evenings.

Continuity programs with a definite thread running through them are being given more and more by Radio stations. "On the Volga River," a John Clark production at WSWS, Thursday, July 15, is a program of this sort. Folk songs native of the country through which this river flows will be sung. Interesting bits of folk lore will be given, and the invisible listener will carry away with him a musical picture of a part of the world he has perhaps never seen.

A reading of unusual interest will be given from WMAQ, Friday, July 16, when Prof. B. G. Nelson of the University of Chicago gives a reading from "Cyrano de Bergerac." Alumni of the university who have taken public speaking with Prof. Nelson will enjoy tuning in.

WIP will take the listener who is not able to attend the Sesquicentennial into the middle of the great fair Saturday, July 17, and let him listen to the Episotic drama. As this great pageant unfolds the announcer will be the eyes of his audience.

Who does not remember Gertrude O'Neil Ganley whose mischievous fun made her such a favorite at the Gold Medal Station WCCO. She has been absent for some time but returns Saturday, July 17, to make up for lost time and to amuse her friends with some new readings.

Another program the Gold Medal station schedules this month which will attract listeners is the listing of Flor's Little German band, Saturday, July 24. All the old German favorites will be played as only a German band can play them. This is only one of the international dance programs being given at WCCO.

Is there anyone who does not know the Charleston? At least the dance floors refuse to give them away. But perhaps some poor wallflower unable to bend his knees in this famous dance will welcome WLW, Monday, July 26. Tune in quietly and take your first lesson, but, a little warning, do not try it with the earphones on.

Monday, July 26, is also to be famous because a popular pair well known to middle westerners, Clara Kurtz and her Chocolate Cake-Eater are entertaining this same evening at KOIL.

First aid to the campers is the new idea at WGHP, Detroit. And a good idea it is. You may find out during this Tuesday evening half hour how to carry less and yet better supplies, how to cook over an open fire and even what to do when it rains; in other words how to be a camper de luxe.

Finish off the month with that peppy bunch of artists, Ray Jones' orchestra and singers. Not only does this group play all the latest jazz songs but also sings them.

RUSSIAN dance music floats over the ether whenever the lively group below confront the microphone of WCCO. These young refugees have banded together and are known as the Russian Art troupe. WCCO plans to give a series of international dance music programs during the summer and besides featuring these talented Russians will broadcast the Scandinavian dance orchestra, and Flor's Little German band. To the right and to the left are two young musicians who are popular with the gentlemen who read our Marcella column. Billie Allen Hoff, left, is a pretty little blues singer who wanders around from one Chicago station to another. She is singing at the present time from both WMBB and KYW. On the right is Mary Tudor, a regular entertainer at WJR. She sings and plays the piano.

EDUCATIONAL FEATURES

Monday

Atlantic	Eastern	Central	Mountain	Pacific	Program
6:30 p. m.	5:30	4:30	3:30	2:30	WNYC (526m-570kc), German lessons, V. H. Berlitz.

Queen Titania and all her court appear at KHJ, Los Angeles, regularly once a month or even oftener depending upon the moon and various other things which only fairies can understand. No one knows the queen's mortal name but it is generally known that this pretty young lady is a child star of great promise. The dancer standing at the left looks as if she might belong to the fairy court of Queen Titania. She is Ruth Russell Matlock, soprano, who sings, plays the piano, acts and dances before the microphone of WFBH, New York.

Here is Paul Ash of the Merry Mad gang, haircut and all. Just imagine, Balaban and Katz think so highly of this cut they have made Mr. Ash sign a contract to wear his hair this way. But all this will not interest Radio fans who tune in for the famous entertainer and his orchestra at WGN on Friday nights, which all goes to show Mr. Ash would be just as entertaining without any hair. Dorothy Stevens Humphrey, right, might have stepped down from some old-fashioned picture frame to be inserted in our columns. This lovely costume she wore last winter when appearing in an operatic role. Her beautiful voice is often heard from WEAO, Columbus.

Eastern Standard or Central Daylight Saving Time Stations

WBAL, Baltimore, Md. (245.8m-1220kc), 6:30-7:30 p. m., WBAL dinner orchestra; 7:30-8, WBAL male quartet; 8-9, WBAL trio; 9-10, WBAL dance orchestra.

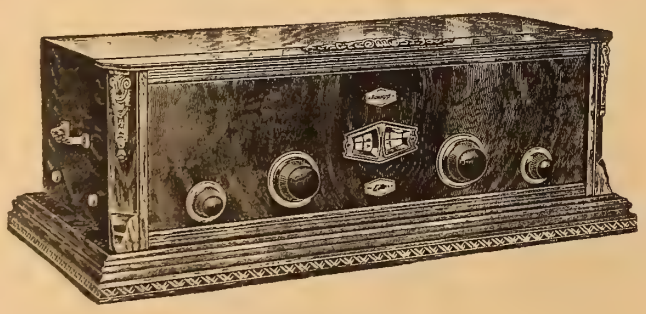
Howard Radio Co. — Guaranteed Products — Chicago, U.S.A. — Reg. U.S. Patent Office



For the Years Ahead!

A receiver that solves the radio problem today and meets the requirements of tomorrow.

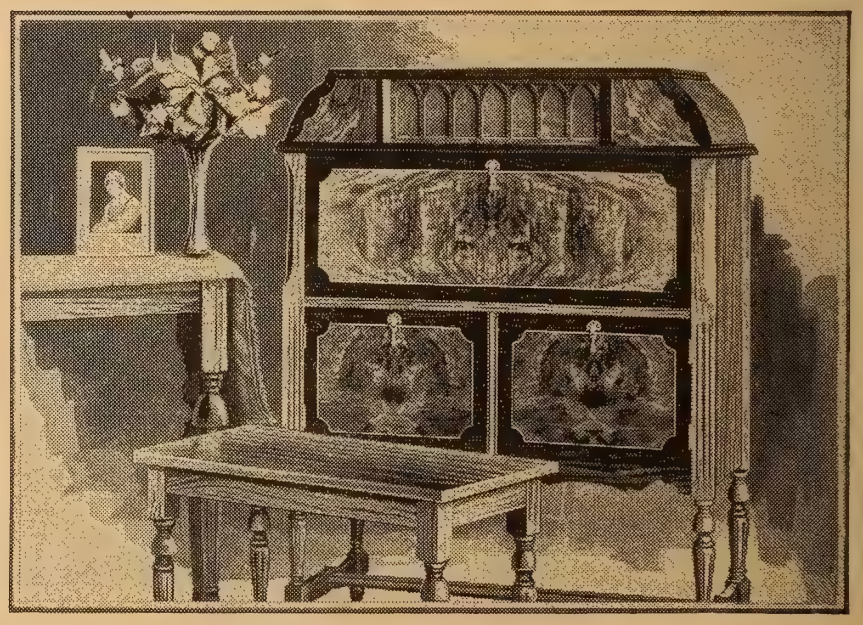
Completely shielded—seven tubes and *loop operated*—a *super-power* instrument that protects against neighboring broadcasts and brings in the distant programs, tone-true, pure.

HOWARD RADIO COMPANY
Chicago, U. S. A.

On Display
Booths 123-126, Los Angeles Show

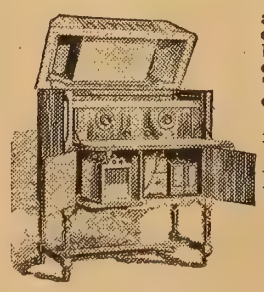
West Coast Distributor:
Howard Radio Distributing Company
5623 Sunset Blvd., Los Angeles, Cal.

Licensed by Independent Radio Manufacturers, Inc. — Reg. U.S. Pat. Off. — NEUTRODYNE — Reg. U.S. Pat. Off. — Other Patents Pending



Console Style R-23—Bench Style 24

THE latest perfected style of wall console with tone chamber above the receiver space. The tone chamber is constructed of seasoned wood with metal throat. The design is such that pure, undistorted tone of full volume is assured.



The receiver compartment is equipped with adjustable panels so as to accommodate any set, the panel of which does not exceed 10½ x 32 inches in size. The battery compartment below the receiver space will easily accommodate charger, B batteries and A battery. The A battery sets on a leaf which pulls forward for easy filling or testing.

Dimensions—37 inches wide, 16 inches deep, 45 inches high.

Made of American Walnut with five ply walnut veneer top and panels. Door panels of matched butt walnut. Finished in two-tone walnut, piano finish.

Write for catalog showing complete line of Consoles, Cabinets and Tables. Sent free on request.

Distributors and dealers—attractive territory still open. Write for interesting proposition.

Sketch showing how Console opens so as to afford easy accessibility to all parts. The cabinet work and the cabinet hardware controlling the movement of doors, top and drop leaf are of the highest quality.

KMOX, St. Louis, Mo. (280.2m-1070kc), 6:30 p. m., Jacquinot Jules, organist; 7, Frank Suda, Erwin Thurman, Buster Brown; 8, KMOX Radio orchestra; 9, orchestra; Eva Sirwell, Bill Snyder; 9:30, Bamalogue; 10, KMOX staff.

KOIL, Council Bluffs, Iowa (277.6m-1080kc), 7:30 p. m., Lucille's midnight syncopators; 11, Hotsy-Totsy hour.

KWCR, Cedar Rapids, Iowa (278m-1080kc), 9 p. m., entertainment.

WBAP, Fort Worth, Texas (475.9m-630kc), 7:30-8 p. m., Sunday school lesson; 8-8:30, Vesper symphony; 9:30-11, Hired Hand's Little symphony.

WCOA, Pensacola, Fla. (222m-1350kc), 7 p. m., Wildcats from jazzland, Pensacola jazz band; Dr. C. J. Heinberg, violinist; Frances Keen Villat, vocalist; Harry Davis, tenor; Billie Burke, ukulele soloist; Sid Nichols, pianist; Frank Marchesi, clarinetist; old-time love serenade in romance, Neapolitan serenaders.

WFAA, Dallas, Texas (475.9m-630kc), 6:30-7:30 p. m., Ford's Texas Trumpeters; 8:30-9:30, G. Haydn Jones.

WGBF, Evansville, Ind. (236m-1270kc), 7 p. m., Lincoln-Ford orchestra program; 8, musical program.

WHAS, Louisville, Ky. (399.8m-750kc), 7:30-9 p. m., concert, James Boyer, director.

WHB, Kansas City, Mo. (365.6m-820kc), 7-8 p. m., Sweeney Radio orchestra.

WHO, Des Moines, Iowa (526m-570kc), 7:30-8 p. m., Philbreck and his Younker tea-room orchestra; 8-9, musicale; 11-12, orchestra.

WMC, Memphis, Tenn. (499.7m-600kc), 8:30 p. m., Hotel Gayoso orchestra; 11, Bob Miller.

WOAI, San Antonio, Texas (394.5m-760kc), 8:30 p. m., San Antonio College of Music.

WOAW, Omaha, Nebr. (526m-570kc), 6 p. m., music review; 6:30, orchestra; 9, Puritan hour.

WOS, Jefferson City, Mo. (440.9m-680kc), 8:20 p. m., Big Four string band.

WSM Nashville, Tenn. (282.8m-1060kc), 7 p. m., Andres Jackson hotel trio; 8, Peabody ensemble singers; 10, Mrs. Daisy Hoffman, pianist; 10:30, F. Arthur Henkel, organist.

Mountain Standard Time Stations

KFXF, Colorado Springs, Colo. (250m-1200kc), 8 p. m., Juvenile program.

KOA, Denver, Colo. (322.4m-930kc), 6:30 p. m., Brown Palace string orchestra; 7:30, Rev. William O. Rogers; 8, Denver Municipal band.

Pacific Standard Time Stations

KFI, Los Angeles, Calif. (467m-642kc), 7-8 p. m., dance music; 8-9, Aeolian organ; 9-10, Harry Decker's Hawaiians; 10-11, Packard ballad hour.

KFWB, Hollywood, Calif. (252m-1190kc), 6-7 p. m., Pontiac Six dinner hour; 8-9, program, John Wright, The Right Tailor; 9-10, studio program; 10-11, Warner Brothers frolic.

KGW, Portland, Ore. (491.5m-610kc), 6-7 p. m., dinner concert; 8-9, concert; 10:30-12 midnight, Hoot Owls.

KHJ, Los Angeles, Calif. (405.2m-740kc), 6:30-7:30 p. m., Uncle John and the children; 8-10, Times de luxe program; 10-11, Clement's Super-six orchestra.

KNX, Hollywood, Calif. (336.9m-890kc), 7-8 p. m., Loftus Land company program; 8-9, Jell-X-Cell program; 9-10, Order of Optimistic Donuts; 10-11, Hollywood American Legion fights; 11-12 midnight, Ambassador hotel dance orchestra.

For stations silent tonight refer to first Saturday's list.

Atlantic or Eastern Daylight Saving Time Stations

CFCA, Toronto, Can. (356.9m-840kc), 9 p. m., CFCA's summer orchestra.

WEBR, New York, N. Y. (272.6m-1100kc), 8 p. m., Joseph Bonaccorso, violinist; Forrest J. Kleinhans, baritone.

WEAF, New York, N. Y. (491.5m-610kc), 4-12 midnight, orchestra; musical comedy hits; Goldman band concert; Ben Bernie's orchestra.

WGBS, New York, N. Y. (315.6m-950kc), 7:45 p. m., Arcadia orchestra; 10:30, Arrowhead Inn dance orchestra.

WHAR, Atlantic City, N. J. (275m-1090kc), 8 p. m., Seaside hotel trio.

WIP, Philadelphia, Pa. (508.2m-590kc), 6:05 p. m., Benjamin Franklin concert orchestra; 8:15, Hotel Ambassador orchestra; 9, Hotel Traymore orchestra; 9:45, Emmet Welch's Minstrels; 10:15, Garden Pier dance orchestra; 10:45, Ted Weems' Novelty dance orchestra; 11:30, Hotel Shelburne dance orchestra.

Equal Amplification At All Wavelengths! —*the Equamatic System*

A simple and positive method of automatically equalizing and balancing all radio circuits at all broadcasting wavelengths has been the aim of radio engineers since the inception of radio receiving.

This aim is now realized in the Equamatic System

1. The Equamatic System gives maximum and equal sensitiveness and amplification over the entire tuning range.
2. It develops greater selectivity without distortion or loss of harmonics.
3. It assures perfect balance on all wavelengths without employing "losser" methods.
4. It accomplishes greater effective wavelength range for any given inductances and condensers.
5. It conserves the life of "A" and "B" batteries.
6. It simplifies operation of all sets by perfect synchronization of the first dial with the others.
7. It eliminates fundamental wavelength antenna absorption.
8. It provides simple adjustment to meet varying conditions, permitting perfect balance of tubes, antenna, and associated apparatus.

EKROTH LABORATORIES REPORT—

states they find that the Equamatic System "possesses greater average amplification, selectivity, sensitivity, and freedom from distortion than those of the present leading types of commercial radio receivers, and, further, that these advantageous features are maintained equal in value at all frequencies within the full broadcasting range."

The essential parts for the building of an Equamatic receiver are made by Karas Electric Company, manufacturers of the well-known Orthometric condenser, the Harmonik transformer and Micrometric dial. A booklet fully explaining the Equamatic System, what it accomplishes and how it does it, will be sent on receipt of 10c in coin or stamps.

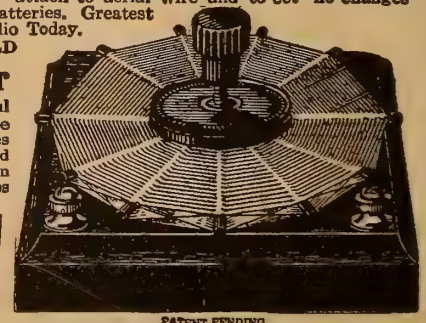
Steinite Low Loss Interference Eliminator

No Radio Set Complete Without It

Select stations at will. With music and voices crowding the air the average set fails to bring in the desired stations properly. The ***Steinite Interference Eliminator*** shuts out local and other interference. You get one station at a time, the one you want, and tune in loud and clear. Operates on any set—attach to aerial wire and to set—no changes—no extra tubes or batteries. Greatest Dollar Value in Radio Today.
OVER 300,000 SOLD

Improved Results With Tube or Crystal Try entirely at my risk the wonderful improvement this inexpensive little device will make in the reception of your set. Improves results on both crystal and tube sets that use any kind of aerial except loop antenna. Clears up reception wonderfully, increases volume, and partially absorbs static. ***MONEY-BACK GUARANTEE.***

Mfrs. Famous 1,500-Mi. Steinite 1-Tube set **$6.** Long distance Crystal Set, **$6.** Steinite Crystals, **50c—3 for $1.** Write for complete illustrated literature on all Steinite Radio Products.



PATENT PENDING.

Put this interference eliminator on your set and note amazing improvement. No tools needed—install in a moments time. Connect with set and follow simple instructions. Money back promptly if not delighted. $1.00 postpaid anywhere in U. S. when cash with order.

$1 Postpaid If you are not delighted with results you get your dollar back

References: Exchange National Bank, Atchison Savings Bank. Order today—a dollar bill will do.

STEINITE LABORATORIES, 261 Radio Bldg., ATCHISON, KANSAS

Saturday, July 31

WJZ, New York, N. Y. (454.3m-660kc), 7:05 p. m., Harry Leonard's Waldorf-Astoria Roof orchestra; 8:25, Stadium Philharmonic concert, WRC; 10:30, Hotel Astor Roof orchestra.
WMAK, Buffalo, N. Y. (265.3m-1130kc), 6:30-7:15 p. m., dinner music, Hotel Onondaga; 7:30-8:30, musical program, Shea Buffalo theater; 8:30-11:30, musical program.
WMCA, New York, N. Y. (340.7m-880kc), 7 p. m., Tappen's orchestra; 8, musical program; 11, Ernie Golden and his Hotel McAlpin orchestra; 12, McAlpin entertainers.
WNYC, New York, N. Y. (526m-570kc), 7 p. m., piano selections; 7:15, songs.
WOR, Newark, N. J. (405.2m-740kc), 6:30 p. m., Jacques Jacobs Hotel Shelton ensemble; 7:30, Oreste's Queensland orchestra; 8, Klein's Serenading Shoemakers; 9, Newark Philharmonic band; 10, Berkeley Carteret orchestra; 10:30, Monterey society orchestra; 11, Ben Bernie's orchestra.

Eastern Standard or Central Daylight Saving Time Stations

KYW, Chicago, Ill. (535.4m-560kc), 7 p. m., music hour; 8, Congress hotel studio; 9-10:30, classical program; 10-11:30, classical concert; 10:30-12 midnight, carnival.
WBBM, Chicago, Ill. (225.3m-1330kc), 5-6 p. m., Eddie Hansen, organist; 8-9:30, Pullman Porters' quartet, Lee Sims, Eunice Hoefer, organist, "Hi and Si," Alemite string trio, Fred L. Jeske, baritone; Kay Ronayne, contralto; 9:30-10, Moss Covered melodies; 10-11:30, Fred L. Jeske, baritone; Florence Sangor, pianist; Smith and Ford, Alemite high pressure orchestra; Howard Osburn's Vanity Fair cafe orchestra; Eunice Hoefer, organist; Lee Sims; 11:30-2 a. m., Pullman Porters' quartet, Jack Crawford's Alemite high pressure orchestra, Howard Osburn's Vanity Fair cafe orchestra, WBBM staff artists.
WENR, Chicago, Ill. (265.3m-1130kc), 6-7 p. m., Rauland lyric trio; 8-9, popular program; 9-10, All-American Pioneers; 12-2 a. m., midnight frolic.
WGES, Chicago, Ill. (249.9m-1200kc), 8-9 p. m., organ, Frank Sylvano, Louis Panico, orchestra; 11-1 a. m., Bobby Lee, Ned Santry, Joe Morrison, Al Bernstein, Louis Panico, ballroom orchestra.
WGY, Schenectady, N. Y. (379.5m-790kc), 6:30-7:30 p. m., WMAK; 7:30, WJZ; 9:30, Hotel Sagamore, dance orchestra, WHAM.
WHAR, Atlantic City, N. J. (275m-1090kc), 8 p. m., Seaside hotel trio.
WJAZ, Chicago, Ill. (329.5m-910kc), 9-1 a. m., Elmer Winthrop, baritone; James Harvard, cellist; Avery McIntyre, pianist; Marie Wright, soprano; Harry Davis, baritone; Chez Pierre Hawaiian quartet.
WJJD, Mooseheart, Ill. (370.2m-810kc), 4:45-7 p. m., Howard L. Peterson, organist; Palmer House symphony players; Compton's "I see by the newspaper" man; Palmer House Victorians; 7-9, Isabel Defaut; Palmer House Victorians; Simeon Oliver; 9-11, Isabel Defaut; Cook Sisters; 11-1 a. m., Settin' Up hour; Palmer House Victorians; Jack Nelson.
WLIB, Chicago, Ill. (302.8m-990kc), 7:15-7:30, p. m., dinner music; 7:30-8, Drake concert ensemble; Pattison Coates, baritone; 11-11:20, Correll and Gosden; 11:20-1 a. m., Liberty studio ensemble; Ambrose Larsen, organist; Drake hotel dance orchestra.
WLS, Chicago, Ill. (344.6m-870kc), 6:30 p. m., Elsie Mae Look, organist; 7, Lullaby time, Elsie and Ralph; 7:15-1 a. m., National barn dance with fiddlers and callers; Maurie Sherman's orchestra; Ralph Emerson, organist; WLS Twin Wheeze.
WLW, Cincinnati, Ohio (422.3m-710kc), 7 p. m., organ concert, Johanna Grosse; 7:30, meeting, Sekatary Hawkins Radio club; 8, Johanna Grosse; 8:30, Uncle Charlie Warner's Coon Dog orchestra in an "Old Fiddlers Revival"; 9, Henry Theis' Castle Farmers.
WMAQ, Chicago, Ill. (447.5m-670kc), 6 p. m., Chicago theater organ; 6:30, orchestra; 8, Daw and Pratt; 8:30, photologue; 9, Chicago theater Radio revue.
WMBB, Chicago, Ill. (249.9m1200kc), 7-8 p. m., Trianon ensemble, Elizabeth Reohlk, cellist; Margaret Conrad, violinist; Preston Graves, pianist; Frank Bordner, baritone; Franklin Kidd, tenor; 9-11, Trianon orchestra; Dell Lampe, Woodlawn theater orchestra, Armin F. Hand, Trianon ensemble, Clinton Keithley, tenor; Mable Bagley, contralto; John Norton, Harmonica specialty, Bob Bennett.
WOK, Chicago, Ill. (217.3m-1380kc), 6-7 p. m., Tip-Top Inn string ensemble concert; 10-1:30 a. m., Tearney's Town club orchestra; Midway Garden orchestra; Pershing Palace orchestra; Katz and his Kittens' orchestra; Capitol theater program.
WOOD, Grand Rapids, Mich. (241.8m-1240kc), 9 p. m., Elizabeth Barker Van Campen hour of music; 10:05, Bob, Hazel McOsker, Freddie Gleason, Thelma Dykman, Louie Cunningham, Dodo and Mom, Van Wyck's instrumental quartet, Ramona Gardens orchestra.
WRC, Washington, D. C. (468.5m-640kc), 7:30 p. m., WJZ; 10, Kitt hour of music; 11-12, Otto F. Beck, organist.
WREO, Lansing, Mich. (285.5m-1050kc), 6-7 p. m., Gold Standard ensemble; Speed-Wagon serenaders; 10-12, Speed-Wagon serenaders; Merwin Jenkins, blind entertainer.
WSAI, Cincinnati, Ohio (325.9m-920kc), 8:15 p. m., news; 8:30, Bicycle Playing Card sextet; 12 midnight, Lelia LeMar, Latonia Melody Boys.
WSWS, Chicago, Ill. (275m-1090kc), 8 p. m., Terrace Gardens orchestra; Mildred Bragdon; Matthews Sisters; 10, Terrace Gardens quintet; Joe Caffey; 12 midnight, Witching hour.
WTAM, Cleveland, Ohio (389.4m-770kc), 6 p. m., Horwitz Collegian serenaders; 7:30, studio program; 8, Hollenden hotel orchestra; 9, novelty studio program.
WWJ, Detroit, Mich. (352.7m-850kc), 7:30 p. m., Goldman band concert.

Central Standard Time Stations

KFRU, Bristow, Okla. (374.8m-800kc), 6-9 p. m., KVOO orchestra.
KLDS, Independence, Mo. (440.9m-680kc), 8 p. m., studio program.
KMA, Shenandoah, Iowa (252m-1190kc), 9-11 p. m., Ye Olde Tyme Gang orchestra; Willy Cunningham, the Farmer Scotchman.
KMOX, St. Louis, Mo. (280.2m-1070kc), 6:30 p. m., Jacquinot Jules, organist; 7, Little Red Schoolhouse; Stark Musical Bears; 8, orchestra; Porter Brown, banjoist; 9, KMOX Radio orchestra; 9:30, KMOX Radio orchestra; 10, dance music.
KOIL, Council Bluffs, Iowa (277.6m-1080kc), 6:30 p. m., Miss Leo Kearse, piano selections; 7:30, Geo. C. Wahl, baritone; Francis Wiatt, soprano; Glenna Biei Heath, contralto; Myron V. Johnson, tenor; 11, Hotsy-Totsy hour.
KPRC, Houston, Texas (296.9m-1010kc), 8 p. m., Frank Tilton, boy pianist; 10, National Advertisers' essay contest.
WFAA, Dallas, Texas (475.9m-630kc), 6:30-7:30 p. m., Jimmy Joy's orchestra; 8:30-9:30, Ray Jones orchestra; 11-12, Jack Gardner's orchestra.
WHAS, Louisville, Ky. (399.8m-750kc), 7:30-9 p. m., concert, Frances Sellers, whistler.
WMC, Memphis, Tenn. (499.7m-600kc), 8:30 p. m., Walter Moore.
WOAW, Omaha, Nebr. (526m-570kc), 6:15 p. m., orchestra; 7:30, Creighton educational period; 9, Omaha Printing company; 10, Elks club organ jubilee.
WSM, Nashville, Tenn. (282.8m-1060kc), 7 p. m., Andres Jackson hotel trio; 8, popular and barn dance program.

Mountain Standard Time Stations

KFXF, Colorado Springs, Colo. (250m-1200kc), 9 p. m., Sells-McClusky first orchestra.

Pacific Standard Time Stations

KFI, Los Angeles, Calif. (467m-642kc), 7-8 p. m., Al Wesson and his orchestra; 8-9, Angelus string trio; 9-10, semi-classical hour; 10-11, Packard Radio club; 11-2 a. m., KFI midnight frolic.
KFWB, Hollywood, Calif. (252m-1190kc), 6-7 p. m., Pontiac Six dinner hour; 8-9, varied studio program; 9-11, Warner Brothers frolic.
KGW, Portland Ore. (491.5m-610kc), 6-7 p. m., dinner concert; 10-12, Indian Grill; Punch Green, pianist.
KHJ, Los Angeles, Calif. (405.2m-740kc), 6:30-7:30 p. m., Uncle John and the children; 8-10, Tower studio feature presentation.
KNX, Hollywood, Calif. (336.9m-890kc), 7:30-8 p. m., studio program; 8-10, KNX feature programs; 10-11, Ambassador hotel dance orchestra; 11-1 a. m., Edgewater.

RADIO-MADE SCREEN STAR MAKES DEBUT

TO FILM "ANN HOWE," NOT KNOWN EXCEPT ON AIR

Motion Picture Producers Watch Experiment—Curious Invisible Audience May Put Her Over

NEW YORK.—With the signing of Ann Howe to star in a series of twelve screen productions, Radio scores another triumph as a powerful medium for popularizing a personality. The Ann Howe, who was introduced to Radio fans as a mythical person whose destinies as an aspirant to fame in pictures would be guided by the audience of broadcasting, flashed sensationally following her first introduction from Stations KFI and KNX in Los Angeles by Don Meany, known as a representative of film stars.

Meany's appeal that Radio assert itself in making a film star met with such enthusiastic response from KFI and KNX audiences that a trip was arranged for him to visit the largest broadcasting stations from San Francisco to New York as a guest announcer and sponsor of the movement to so poularize Ann Howe that she would be sought out by picture producers to play star roles in photoplays.

The new star's name was derived from the idea expressed in the question "Can Radio make a screen star?" The reply was an emphatic "Yes" but the question then was "Ann Howe?" Within a period of weeks the unusual enterprise launched in Ann Howe's behalf has reached its goal. Just recently Ann Howe, now in New York, signed a contract to star in a film series.

The pictures will be taken in New York. Wally Van, famous as a screen comedian in the old days, will direct the "Radio made" screen star in her first vehicle, a comedy drama.

Ann Howe's appearance has remained secret from the Radio audiences who have pledged their support of her efforts on the screen. Though many screen tests were made of the young woman in California, these have been viewed only by production officials.

Lodge Is Seventy-Five

LONDON.—Sir Oliver Lodge, the "Grand Old Man of Science" and pioneer of Radio, who has the gift of being perennially youthful, has just passed his seventy-fifth birthday. But he was almost too busy to notice it.

"I am feeling younger now than when I was in the harness," said Sir Oliver in an interview. "My experience has been that when a man retires he becomes younger. Everyone should retire in good time, for there is no tonic like it. You want to retire before you are played out, for it gives so much more opportunity to do all that you desire."

$1,000, Medal for Paper on Radio Communication Law

CHICAGO.—The Charles C. Linthicum foundation of the Faculty of Law of Northwestern University here, announces that a sum of $1,000 and a medal will be awarded to the author of the best essay or monograph, submitted by March 1, 1927, on "The Law of Radio Communication". The scope of the paper is to include the aspects of the subject as a problem of international law and as a problem of legislation in the United States.

Another sum of $1,000 and a medal will be awarded for the best essay or monograph, submitted by March 1, 1928, on the subject known as "Scientific Property," i.e., the granting of a quasi-patent right to the maker of a scientific discovery.

The author must be either a member of the bar or a student registered in any American or Canadian law school. Complete conditions of the awards may be secured by writing the Dean of the Northwestern University Law School, Northwestern University building, Chicago.

70,000 Sets in Denmark

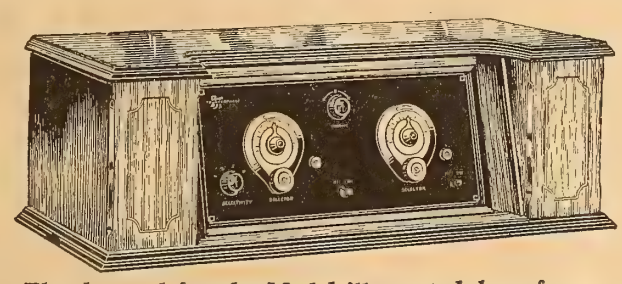
WASHINGTON, D. C.—A recent survey of Denmark showed approximately 70,000 Radio receiving sets in use, according to a report to the department of commerce from Commercial Attache H. Sorenson at Copenhagen. Copenhagen has 48,000 sets, thirty-five per cent of which are tube receivers.

New B-T Contributions to Better Radio

The Counterphase-Eight

and the *NEW*

COUNTERPHASE-SIX



The demand for the Model illustrated here far exceeded the production of the factory.
The New* COUNTERPHASE PERMANENT *models will be enclosed in beautiful cabinets introducing some new ideas in design.

In the New COUNTERPHASE B-T have achieved their ambition for which all have been striving, namely, to secure sensitivity over the full scale and it is done **without an oscillation control** and in a set that **cannot be made to oscillate.**

The "blooper" evil is destroyed, there is greater efficiency and at the same time greater simplicity.

Through an entirely new arrangement, the COUNTERPHASE-EIGHT furnishes a degree of selectivity that even B-T have never before attained.

These are only a few of the many features found in these new PERMANENT models. Special circulars tell the whole story.

BETTER TUNING

The Tenth Edition of BETTER TUNING gives full information on the New COUNTERPHASE and B Power Unit and other information of value to anyone interested in Radio. Sent on receipt of 10c in stamps or coin.

B POWER UNIT

Recommended for use with our receivers, the best endorsement we can give but it may be used with any set up to seven tubes. Fixed resistances enable the user to know at all times the exact voltage delivered to the set.

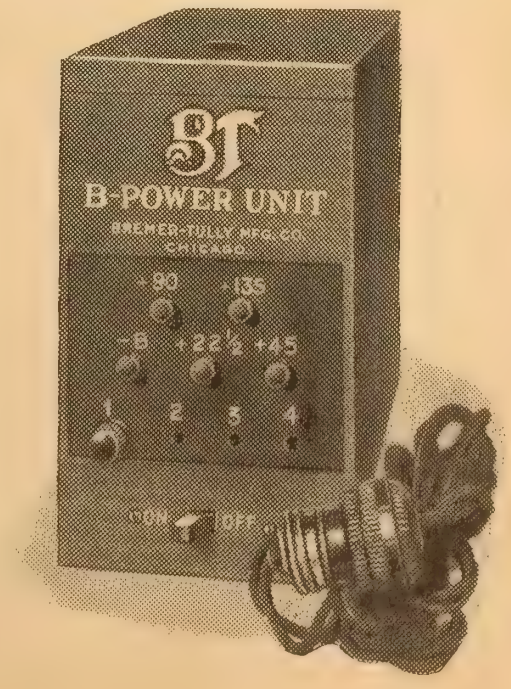
It would not be on the market if B-T did not believe it superior to any similar unit now sold.

B-T Leadership and Prestige has increased steadily year by year since broadcasting began.

Each season B-T has brought out new and original products.

Foolish and extravagant advertising claims have never been made but the Radio Public has always found out eventually that B-T products are seldom equalled and never surpassed.

The success of the B-T NAMELESS of three years ago is known the world over. In it was introduced the original "Oscillation control." This year you may expect to see many sets feature various modifications of tone controls, high wave switches, etc.



BREMER-TULLY MFG. CO. 532 SO. CANAL ST. CHICAGO, ILL.

"SURE-FIRE STUFF"

(Continued from page 7)

your game for some time. You're in love with this dame—that's what's the matter with you."

"Matter or not, it's none of your affair. Now get up and get out before I give your windpipe another squeeze."

Jadwyn pulled himself up with the aid of a chair, sat for a moment panting, then staggered toward the door, making a feeble effort to straighten his collar and cravat. "This is only the beginning of trouble for you two—remember that!" With this threat he straightened up, seized his hat and lunged through the door.

"Oh, Mr. Clavering," faltered Sheila. "Did you hear what he said?"

"Never mind that," returned Johnny. He took her hands in his own. "And now let's be sensible. You need money, and you've got to take it from me. How much?"

"Oh, but I can't—I can't!"

"You can and will. I understand everything. Will five hundred be enough?"

"Yes, more than enough—but—"

"Then it's settled. I'll go to my dressing room and write a check. You sit down and write to Bobby. Tell him everything just as it occurred. He's a sensible chap and he'll understand."

"Yes, I believe he will; and some day we'll repay the loan." The look of joy that suffused her features made Johnny Clavering grit his teeth.

The next morning the telephone in Johnny's room tinkled shrilly.

"This is Mr. Beall's office," said a voice at the other end of the wire. "He wants to see you at once."

"Tell him I'll be there as fast as a taxi can bring me," was Johnny's quick reply.

INSTINCTIVELY he had expected this summons. Jadwyn would try to make good on his threat. But Mr. Beall, "Czar" of the vaudeville world, was a just man, as Johnny knew.

Within half an hour he was ushered into the palatial office of the vaudeville magnate on the top floor of a prominent office building.

"Sit down, Clavering," greeted Beall cordially. "And have a cigar—we can talk better if we smoke."

"Thanks," said Johnny and dropped into a chair.

"Let's see—you've been in vaudeville eight years now, haven't you?"

"About that time I think, sir."

"And in all that period we have never had a complaint about you—until today."

"I'm surprised Jadwyn didn't ring you up at home last night."

"Well he unloaded on me this morning. I presume you know the charge he had lodged against you?"

"No, sir; but it might be anything, coming from him."

"Criminal assault!"

"If true, seems like it would be a case for the police."

"Yes; but instead Jadwyn came to me." Beall adjusted his glasses and picked up a sheet of memorandum on his desk. "Just what do you know about this girl, Sheila Shambaugh?"

"Never saw her in my life, till I opened at the Palladium last week. But she's sure-fire in the two-a-day, and if she gets her dues she'll be a billtopper in another year."

"Know anything about her?"

"Not much, Ganton says she's supporting a crippled husband. Said they were known on the small time as the Dancing Shambaughs."

"How did you come to choke Jadwyn?"

"I would have been delighted at the chance on general principles; but fortunately he gave me a better opportunity. I was passing Miss Shambaugh's dressing room when I heard loud voices. From the girl's tones I knew she needed help. Well, sir, she got it! I have no regrets. That's all there is to that, sir."

"What do you know of Jadwyn's business relations with Miss Shambaugh?"

"I know he has a personal contract with her, giving him not only the usual commission but a slice of her salary—his usual policy in dealing with artists, as perhaps you know."

"Did Miss Shambaugh tell you he was gouging her?"

"No; but Jadwyn practically admitted it himself."

"Good!" Beal arose and extended his hand. This confirms our suspicions. Miss Shambaugh is a plucky girl and we're going to take care of her. And Johnny—unofficially, you know—I don't believe you choked Jadwyn half hard enough!"

Johnny grinned and took his leave.

* * *

"A lady in the lounge to see you, sir," a bell-boy informed him when he returned to his hotel.

Johnny lifted his eyebrows in mild surprise, shrugged his shoulders and followed the blue-uniformed lad. Some fellow-artist in trouble no doubt.

It was a distinct shock—why, he could not have told—to have Sheila rise to greet him.

"You've seen Mr. Beall," she cried "and the news is bad?"

"Pretty bad," returned Johnny gravely.

"Oh, I knew it—I knew it!"

"Bad—for Jadwyn."

"For Jadwyn? You mean—"

"At the end of his rope—yes. No more long suffering artists on his books; no more threats to do as he says or be sent to the sticks."

"Oh, Johnny—I—I—mean, Mr. Clavering—"

"Make it Johnny—everyone calls me that."

"I was so worried—so worried——"

"Well your troubles are over now."

"No—I mean worried—afraid—for you!"

"For me?"

"Yes; I could never forgive myself if you had lost out because of me."

"Believe me, Sheila, I couldn't have lost out in a better cause."

She began suddenly to laugh; then to cry; slightly hysterical. The nervous strain was telling on her.

"Poor kid!" murmered Johnny. He never knew how it happened, but she came quickly into his arms, and all else for the moment was forgotten in the realization that she cared.

"Johnny, I—I know you'll think me a silly little fool, but I've been mad—perfectly mad—about you ever since that first day at the Palladium."

"Mad about me! That sounds wonderful, but great heavens, girl we must stop this before it goes to far!"

"Too far?" She raised a startled face to his. "You—mean—you—do not—care?"

"Care? More than I ever knew I could care for anyone."

"Then——"

"Why, there's Bobby, Sheila—we must think of Bobby!"

"But Bobby won't care now. I sent him the money last nght."

Johnny staggered back. "Won't care? Will you tell me for pity's sake, just what kind of a husband he is?"

"Husband!" gasped Sheila. "Why he's not my husband—just my dear old buddy! I thought you knew that."

Johnny choked up. He couldn't speak. But he registered joy in a way Sheila could not misunderstand.

THE END

Alice wanted to help but what could she do when her father said that Dick's physiognomy was against him for ever achieving success as a lawyer? She did what she could and it almost spelled disaster. It's another Van Demark short story in the next Radio Digest. Don't miss it.

KFWO ON TOP OF WORLD

(Continued from page 5)

for him by the Western Electric company of New York and not to be found in any other broadcasting station.

How we love to quote the old platitude about "he who laughs last—" It's just as true as it ever was. Some three years ago Major Mott was the cause of much merriment when he asserted his belief in low wave lengths. Today the low wave length is "the thing" in Radio with stations struggling to get as low a wave as possible.

To quote further from copy book lore, "The proof of the pudding is in the eating." With but 250 watts and a wave length of 211.1 meters KFWO is heard clearly in every state in the union, in every Canadian province and as far north on the Atlantic Coast as Point Tupper, Nova Scotia, which is some one hundred and fifty miles northeast of Halifax. Needless to say Honolulu is familiar with KFWO programs and what is more astounding two exact reports have come in from London, England!

"He who laughs last—" With 250 watts and a short wave length Major Mott has made records in the last few months for his station never equalled by 5,000-watt stations on the Pacific coast. Every known record for distance, per watt, power input, has been broken.

Not to be outdone the studio cat and canary indulge in a mild argument for honors. "My purr has tickled the ears of listeners in in Vancouver, B. C. far up the Alaskan Coast, and as far east as Detroit," proclaims Tabby.

The canary trills back, "That's nothing! My musical voice has been heard in New York City, in Portland, Maine, and in Mexico City. So there!"

The Major is free to speak on Radio matters but he is most reticent about his other accomplishments. Quite without his knowledge the author visited the library and discovered in Who's Who that Jordan Lawrence Mott, 3d, received his A. B. at Harvard in 1905 about which year he began the writing of short stories, most of which have the outdoor setting or tang of the sea and have appeared in leading magazines. In book form Major Mott has to his credit, Jules of the Great Heart, The White Darkness, To the Credit of the Sea, and Prairie, Sea and Snow.

It is a question whether Lawrence Mott's successes in the world of literature have ever brought him the satisfaction or feeling of attainment he must daily experience from sending his messages to nearly every country of the globe.

All people do not read. Radio reaches many thousands of persons who are not readers. It is a field in which one's auditors may be limited only by the boundaries of the world itself. Major Lawrence Mott with his non-commercial broadcasting station has made friends in legion.

Overlooking the famous Avalon Bay on Catalina Island, California, is a little chalet housing the now already famous Wrigley chimes, said to be exact duplicates of those in Westminster Abbey and the largest in this country.

The average weight of the chimes is 600 lbs. each. The entire action is electrical with a solenoid action, each solenoid weighing an additional 150 lbs., and the chimes are played from consoles located in the home of Wm. Wrigley, the

Concert Singer on Air To Demonstrate Voice

Introduces Self to Patrons on Ten Station Chain

NEW YORK.—Something new in the method of presenting concert stars to local mangers was introduced recently, when Concert Manager Arthur Judson presented Irving Jackson, American baritone, through a chain of ten leading broadcasting stations.

Although well known abroad where he has been singing for several years, Mr. Jackson is not yet known to his native country. His home is in Boston.

In order to book a tour for him as soon as possible, his manager, Mr. Judson, arranged for a network of broadcasting stations to carry Mr. Jackson's voice simultaneously so that concert patrons might write to Steinway hall, here, and indicate whether or not they would like to hear the artist on their concert series next season.

Stations which carried the broadcast were WEAF, WTAM, WSAI, WOC, KSD, WFI, WEEI, WCAE, WWJ and WCCO.

Children Greet Late Spring In Forest Cabin of WHAD

MILWAUKEE.—Spring, which has been so late in coming to all parts of Wisconsin this year, has tendered its greetings to listeners of WHAD here through the medium of fifty little voices singing in the Children's Hour program from WHAD's Forest Cabin.

It is to the children of the Bartlett Avenue school, Milwaukee, that the privilege of heralding that happy time was given. These little choristers, ranging in ages from ten to fifteen and from grades five to eight, told their story of the "Coming of Spring" with a little cantata in which they depicted the birds, the flowers, raindrops, the southwind and the sunshine. The "Spirit of Spring," impersonated by little Miss Maxine Randall, called upon the violets, daisies and bluebells, the southwind, raindrops and sunshine, and listened to their song.

Children between the ages of six and sixteen come to the Forest Cabin of WHAD each Saturday and offer children's entertainment for children.

GOLD CUP AWARD RACE

(Continued from page 2)

CKY, who has been leading since the start of the contest, more than doubled her total number of votes in the past two weeks. Hooper of CKCK and Wright of CNRV displayed some action, but not enough to threaten the position of the fair leader. The standing is:

1. Lillian Shaw, CKY (1).....4,273
2. Bert Hooper, CKCK (2)..... 831
3. H. C. Fricker, CKCL (3)..... 665
4. Geo. A. Wright, CNRV (4)..... 396
5. C. W. Darling, CFCF (5)..... 104

As a reward for saving consecutively numbered ballots and casting them at one time for the same candidate, a bonus vote, with size depending on the number in consecutive order, is credited to that candidate.

Each of these ballots will count for one vote when sent in separately. You can hold these ballots until you have four that are consecutively numbered and when they are sent in, a bonus of eight votes or total of twelve will be granted.

The larger number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. For a complete series of ballots, including one from each issue from March 27 to September 1, a bonus of fifty votes will be allowed.

Swollen Copyright Charges Block Broadcast of Opera

LONDON.—Owing to copyright difficulties, the British Broadcasting company has been unable, as intended, to broadcast the opera "Othello," which has just been given at the Royal Opera House here.

The copyrights on the latest Verdi operas, such as "Othello," "Falstaff," and "Aida," have not expired yet, and are held by an Italian syndicate which has the right to prohibit any performance. The syndicate demands a higher fee for the transmission than the B. B. C. can pay.

"Aida" was recently broadcast, but the syndicate has decided that not enough was paid for it then, and have raised the price. There is no longer any copyright over the earlier Verdi operas, such as "Il Trovatore" and "La Traviata."

WOAI INTRIGUES VETS

(Continued from page 6)

'Tis the Radio, Pete, and I have a grand one that I made myself with eight tubes in it. Won't ye come up and join me?"

"Now, I'll kiss the foot of Pat's pig if I'm not listenin' to the invitation of a gintleman after me own heart and I'm tellin' you that I'll accept with pleasure if you'll tell me the address I'm to go."

At 8 o'clock to the dot by the silver ticker Jack carried on his hairy wrist Pete Cahill walked into the Downey flat on Green street and was introduced to the little mother. They went into the parlor where Jack exhibited the mysterious interior of his super-het with its interlacing of red, yellow and green strands and silver bulbs.

"And for why do you call the one at the end a 'power tube'?" asked Pete, "I see no difference betwane them at all."

"That's what I'm comin' to," Jack smiled with prideful superiority. "If ye'll just sit back comfortable and fill your pipe I'll connect you directly with San Antonio."

He hunched over from a low chair and turned the dials gently and deftly. In a moment a low murmuring drone suddenly flared up like a flame that has reached oil and into the room poured the rythm and thrumm of the Gebhardt Mexican Players over Station WOAI. Sweet and melodious it was as the natural born instinct of the Mexican player who alone knows how to produce in his own kind of a concert. They play regularly from this station under the direction of Jose Conrado Tovar, famous composer and pianist.

"'Tis more wonderful than I can express in words," sighed Pete, "and do you mean to tell me for the truth that this grand music comes through the air all the way from San Antonio to this very room?"

"Yes, 'tis the gospel truth, and if ye'll listen ye'll hear more that'll surprise you. And if you can't feel yourself transported to San Antonio there's something lacking in your sense of imagination. That's Mister J. G. Cummings, the manager, that you're hearin' now makin' the announcements. Sometimes it's Mister Oelkers or Otis Vaughan. But listen, this is good—the Mistletoe Melody Maids."

The two "old" vets puffed at their pipes in silence while southern folk songs rippled out of the screened cabinet from voices that must have been of those who were young and fair. There are eight of the Mistletoe Maids.

"And do you mind the time when those southern ladies invited the boys in our batallion to a tea to be served in the old Alamo gardens and when everything was ready for us to go even with the consent of General White, the colonel backed up and called it off? Do you mind the old Alamo mission where even the soldiers took off their hats when they entered the door? Just think, you are listenin' within hearin' of the sacred place!"

But the apex of the evening's entertainment came when the military band from Fort Sam Houston was announced. They played the Missouri Waltz and it was no difficult feat to vision the scene on the old parade ground with the entire regiment going through the "sittin'-ups" without other command than the measured cadences of this popular air of border days.

It was a wonderful evening from the bulletins of world events by the San Antonio Evening News to a grand concert by the San Antonio College of Music. Even the Joske Story Lady varied her usual place on the program from the afternoon to contribute an anecdote of interest to grown-ups as well as to the children. Who was she? Ah, a subject of much speculation between Jack and Pete, who would like to have believed that she was the same girl who came to sing to the "bhoys in the camp" some ten years ago, except, but you couldn't tell without seeing the face.

This may seem a long way around to tell about Station WOAI but it gives a view of its importance from a distance because in the main the story is true. A letter from Mrs. Gilbert Lang of the WOAI staff says, "WOAI is heard in every state in the Union and from the mail it seems to be a very popular station in the North as far as Canada and Alaska. Perhaps our most distant record is a letter from Johannesberg, South Africa, telling us they had heard a concert from WOAI."

Norway Builds Superstation

LONDON.—The Norwegian government has placed an order with a British firm for a broadcasting station which will equal in power the largest of the German stations. The set will be capable of feeding the aerial with twenty-five kilowatts. This means that the new station will be nearly as powerful as 5XX, the B. B. C.'s high-power station.

SHEPHERD OF THE AIR

(Continued from page 4)

it contained. He took the ferry to San Francisco and called at the office of the big broadcasting station and found a warm welcome waiting for him. Would he take the orders of a Shepherd of the Air and broadcast the divine message to the shut-ins who could not attend regular church services?

"Go preach the gospel to all the earth." No man ever received a clearer, more definite call than this. And thus the little Baptist church in Oakland and its pastor were lifted up in the heavens so that the miner in the rocky uplands and the herdsman in the valley could hear and join in worship, as they actually did.

This relationship continued for some time. The postmen brought mail from grateful listeners by the bagful. Some were tear stained from hearts that had been breaking from solitude and loneliness. Others had been brought back from the by-paths. It was a great work for the Master's vineyard.

Then came a fatal day—a black and crushing day for the pastor and his fellow workmen in the little Baptist church of Oakland. Somebody had raised a forbidding hand. The weekly sermons were no longer to be included in the regular programs of the great broadcasting station. All the multitude of hopeful listeners for religious comfort must be abandoned.

There was consternation as the Rev. Phillips called his flock together and explained the situation. What could be done about it? A broadcasting station was such a tremendous proposition; costly and difficult to understand technically. But somehow from unexpected sources outside the church the way seemed open. Money donations began coming in with an initial contribution of $2,500 from a man in a distant town who heard the voice of the Shepherd of the Air.

A broadcasting station for the Tenth Avenue Baptist Church! Others took up the slogan. The fund grew. Emissaries went to Washington. The call letters KTAB were obtained and in a very short time the little church on the corner at Oakland housed its own broadcasting station and today the Rev. Phillips sends out his Sunday service to an audience that has become greater than ever before.

But a church in these days must be broader than in the days of old. It must supply more than the spiritual bread of a Sunday service. And so KTAB during the week provides programs of wholesome entertainment. Ada Morgan O'Brien has come from one of the older San Francisco stations to direct the musical programs. She selects that which is good as well as enjoyable. Recently in cooperation with the pioneer Oakland Post-Enquirer she put on a special world-wide program in which KTAB proved its far reaching power. Letters were received from Australia and other countries touched by the Pacific stating that they had heard this specially arranged program.

During the week the station is operated by the Associated Broadcasters of Oakland. It speaks for the municipality and on through the ether waves into thousands of distant points goes the slogan, "Oakland the Industrial Capital of the West."

Who can really tell the whys and wherefores of outstanding events? What mysterious way performed the wonder of lifting a comparitively obscure little church into such a great sphere that it's voice literally spans the Pacific? If you can't answer this problem, put it up to the Rev. Geo. W. Phillips; he will tell you.

KFWO ON TOP OF WORLD

(Continued from page 28)

chewing gum magnate, who owns Catalina Island and whose California home is on the opposite side of Avalon Bay, as well as from the offices of the Catalina Island company located near the pier where the steamships dock. The home of Zane Grey, well-known writer of western stories, is just behind the chalet.

The broadcasting of the chimes is done by KFWO, the 250-watt station operated by Major Lawrence Mott of the Signal Corps, and is accomplished by a cleverly devised switching arrangement invented by Engineer Hansen of the Pacific Telephone and Telegraph company.

The chimes are broadcast daily 6 to 6:30 p. m., by KFWO on its frequency of 1420 kycs. or 211.1 meters with 250 watts power, an arrangement that has proven very satisfactory for long distance rebroadcast work, in which Major Mott is mainly interested and for which Catalina Island offers an ideal location, being entirely surrounded by water and away from all power line disturbances, artificial and natural shields.

WHEN IT DOESN'T WORK

(Continued from page 8)

They tell me that my receiver has a range from 200 to 600 meters. How far does that mean that I should be able to receive? The wave length range of 200 to 600 meters has no bearing on the distance which one may receive, but refers to the class of stations to which your receiver will tune. In other words, it means that you should be able to receive stations which broadcast on wave lengths between 200 and 600 meters.

Very often my loud speaker will begin to howl. This noise starts with a low howl and gradually increases until it drowns out the reception. Is the trouble in my receiver or the tubes used? In most cases the trouble is not chargeable either to the tubes or the wiring of the receiver but lies in the construction of the loud speaker. This is particularly true of many cone type speakers. It is caused by the paper cone vibrating at a given wave length, these vibrations being in tune with the diaphragm or metal container of the speaker mechanism. As such vibrations are reflected from the cone to the speaker mechanism, they are re-amplified. In a succession of such reflections a state of resonance is set up which causes the howling. There is no cure for this condition except that the speaker mechanism might be readjusted so that it would have a fundamental frequency varying from that of the cone.

Why is is possible for me to receive nearby stations on either of two dial settings? The reason for this is that at times one is likely to be able to tune in a station, especially one not distant, on one of its harmonics. As a definition of harmonics entails a story within itself, a simple explanation will be given as follows. A harmonic consists of a sympathetic frequency or side tone frequency usually carrying the overtones.

SIR OLIVER'S N CIRCUIT

(Continued from page 9)

Speaking on the subject of radiation, we quote Sir Oliver Lodge as follows: "It is a fact that from an oscillating circuit true radiations or waves are not flicked off until a distance of a quarter of a wave length is reached. Within such distance the energy pulsates to and fro, out and in. A little more goes out than comes back again, but within that quarter wave length distance we get pulsating energy decidedly greater than wave emission energy—a sort of inductive effect that is superseded by waves at greater distances. When two aerials are so close as to feel this pulsation, they are bound to react upon one another to some extent. Such action is not true radiation and should not be so stigmatized."

Improve Your Audio Amplifier
and Get Astonishing Results!

The main point of difference between new sets to be marketed this Fall and sets in use is in greatly improved and refined audio frequency amplifiers.

You can easily improve the audio systems of present sets and bring them up to date. Our book will teach you how.

Four years research are embodied in our new 40 page book covering all systems of audio frequency amplification. The good and bad points of each system are clearly described and everything is illustrated to help readers bring their sets up to date.

Send 25 cts. for new book on Audio Frequency Amplification and bring your set up to date for new tubes.

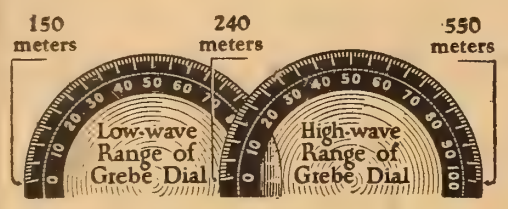
Which Quality Do *You* Desire Most?

Grebe Colortone
Reg. U. S. Pat. Off.

Grebe Binocular Coils
Reg. U. S. Pat. Off.
and Low-Wave Extension Circuits



The high-wave reception range of the Grebe dial (B)—from 550 down to 240 meters—equals the practical tuning range of the usual receiver. The low-wave range of the Grebe dial (A) provides additional reception down to 150 meters.

"If you have fields and will not plow them, your barns will be empty."

If you want the best in radio and fail to buy the Synchrophase, you must blame only yourself.

Doctor Why

MANY radio enthusiasts consider tone quality the most important characteristic of a radio set, with selectivity a close second; others reverse the order. But practically all agree that every set should be judged by the amount of tone quality and selectivity which it exhibits.

The Synchrophase possesses both these qualities in a remarkable degree, because of two exclusive Grebe developments—The *Colortone* and *Binocular Coils.*

The *Colortone* gives full control over the loud speaker, harmonizing it with the set and keeping the pitch right for voice or instrument. It also makes it possible to reduce, to a great degree, disturbances due to static and to suppress high-pitch frequencies caused by heterodyne interference of one station with another.

The *Grebe Binocular Coils* keep the set free from disturbing waves from undesired stations, giving an isolation that is unusual.

Ask your dealer to demonstrate all exclusive Grebe developments which make reception so remarkable

TEN LEADERS STILL SAME FOR GOLD CUP

ARNOUX CONTINUES AT TOP OF LIST AND ADDS VOTES

Chester Gaylord of WTAG Shows Strength by Heavy Increase—Canada Becomes More Active

For the first time since standings have been published for the 1926 Radio Digest Gold Cup Award for world's most popular Radio announcer, this issue's report shows that the ten leading candidates are still in the same identical places they held the last time the standing appeared. It seems that the leaders have clinched their positions—but wait for the end when the bonus vote comes into account!

The twelfth ballot appears this issue. There will be but two more. Who will get the solid gold cup valued at $5,000?

In the meantime, G. C. Arnoux of KTHS leads, E. E. May of KMA is second, Norman Brokenshire of WJZ is third and Chester Gaylord of WTAG remains fourth. These four candidates have shown the most activity recently in the addition of votes which may or may not be taken as an indication of strength.

Arnoux added approximately 15,000 votes, May 10,000, Brokenshire 5,000, and Gaylord 13,000—a figure nearly as large as the leader, Arnoux.

Standing of Leading Twenty-Five

The present standing of the first twenty-five candidates is given below. The figure in parentheses following the names and stations of certain announcers, indicates their order in the standing last issue if they were in the first twenty-five.

1. G. C. Arnoux, KTHS (1).....48,161
2. Earl E. May, KMA (2).....35,465
3. N. Brokenshire, WJZ (3).....29,543
4. C. Gaylord, WTAG (4).....28,036
5. Pat H. Barnes, WHT (5)....18,492
6. A. S. Kyne, KMMJ (6).....14,461
7. Henry Field, KFNF (7).....12,406
8. The Hired Hand, WBAP (8)..11,234
9. Phillips Carlin, WEAF (9).. 7,527
10. Peter MacArthur, WOC (10) 5,781
11. C. R. Randall, WSMB (13).... 5,053
12. Louis J. Johnen, WLW (11) 4,565
13. Gayle V. Grubb, KFAB (12) 4,082
14. R. W. Griffin, WHO (14)..... 4,024
15. Lester Palmer, WOAW (15) 3,236
16. Lambdin Kay, WSB (16)..... 2,825
17. W. G. (Bill) Hay, WGN (22) 2,417
18. Edw. B. Husing, WRC (21).. 2,346
19. E. L. Tyson, WWJ..... 1,938
20. J. T. Schilling, WHB (19).... 1,895
21. Jerry Sullivan, WQJ (17).... 1,772
22. Paul Johnson, WCCO (18).... 1,738
23. E. Konecky, WOAW (20).....1,618
24. Sen Kaney, KYW (24)..... 1,545
25. N. Dean Cole, WHO (25)..... 1,514

Canadian Silver Cup Standing

Two new aspirants for the special silver cup to be awarded to the most popular Canadian announcer for 1926, have made their appearance, and while their vote is as yet not threatening, the list of leaders has been extended to seven this time to show the changes caused. The two new men are Robert W. Combs of CKNC and Jacques Cartier of CKAC. Miss Lillian Shaw of CKY still holds the lead to good advantage, however. The standing is:

1. Lillian Shaw, CKY (1).....4,436
2. Bert Hooper, CKCK (2).....1,092
3. H. C. Fricker, CKCL (3)..... 691
4. Robt. W. Combs, CKNC..... 560
5. Geo. A. Wright, CNRV (4)..... 396
6. Jacques Cartier, CKAC..... 307
7. C. W. Darling, CFCF (5)..... 104

How to Get Bonus on Votes

As a reward for saving consecutively numbered ballots and casting them at one time for the same candidate, a bonus vote, with size depending on the number in consecutive order, is credited to that candidate.

Each of these ballots will count for one vote when sent in separately. You can hold these ballots until you have four that are consecutively numbered and when they are sent in, a bonus of eight votes or total of twelve will be granted.

The larger number of consecutive ballots submitted, the greater is the bonus allowed. Eight consecutive ballots receive a bonus of twenty votes. Twelve consecutive ballots receive a bonus of thirty votes, or a total of forty-two votes. For a complete series of ballots, including one from each issue from March 27 to September 1, a bonus of fifty votes will be allowed.

AL JOLSON PICKED FRONT COVER GIRL

IT TAKES Al Jolson, the famous comedian, to appraise beauty and talent quickly and correctly wherever he finds it. His discerning eye peeps out from the burnt cork ever alert to detect a new voice and a charming face. For instance, he discovered Miss Ethel Rose-Scott, the beauty who adorns the Radio Digest cover this issue. Since then his judgment has been heartily approved by admiring Radio fans throughout the country for Miss Ethel's voice has been heard from broadcasting studios from Broadway to Los Angeles. Just now she is a favorite at KHJ, the gravitating center of the Hollywood stars who are heard on the air.

Looking Ahead

Professorial Dignity and Campus Nonsense Make WEAO, Ohio State University, versatile and instructive as well as entertaining. Pen and camera review in the mid-August Radio Digest.

A Wren Carols From a Mountain Side and WFBG, Altoona, Pa., Speaks to the Nation—one of the smallest national broadcasters. Read "Voice of the Alleghenies" in next Radio Digest.

Uncle Sam Sits On His Own Front Porch and Talks to the whole Sam family from coast to coast and border to border through WCAP at Washington. Pictures and details "on the fire."

A Whirlpool In a Goldfish Bowl! Her Neighbor's Fish Cage and one little lie drove Lois from the placid waters of the home town into the dizzy swirl of city night life. It's a brilliant new serial written especially for Radio Digest by Merlin Moore Taylor, and he's named it "GOODY GOODY GIRL"—first installment soon.

A Prince, Gangster Gunmen and a Sweet Girl All Mixed Up in a High Flying Night Club figure in an interesting two-part story by Maurice Coons. The first installment will appear in Radio Digest August 15.

And the Fall Guy Pulls a Fast One on the Big Traction Magnate at Valley View which you will greatly appreciate in the concluding chapter to be pubished in Radio Digest of the next issue.

What's New in Radio—In Which the Technical Editor Will Give thumb nail sketches covering advance receiving set models for those who feel that Radio is "slipping."

Indicating Meters—Their Use—Abuse—and Importance in a Radio Receiver. Read this important article which tells the plain truth about taking the guess out of Radio.

Special articles about broadcasting stations and artists, with photographs, and NON-RADIO fiction 5,000, 10,000 and 30,000 words in length are desired. No manuscripts accepted unless typewritten and prepaid, or returned without return postage being inclosed. All manuscripts are sent at owner's risk.

SHORT WAVES

By Marcella

No, Lester Palmer and "Dizzy Izzy," of WOAW, are not the same person. Many seem to think so, but they are two individuals. Dizzy Izzy is played by Eugene Konecky, announcer and poet laureate of WOAW. He is rather short, say 5 feet, and weighs about 130 pounds. He is round faced, wears "specs" and is usually in the act of smiling. Has been with WOAW since it opened, and ah—he admits that he is married happily, and has a boy four years old whom he is training to take his place. Mr. Konecky is full of modern ideas and all the girls write in to him just the same. Lester Palmer, his co-announcer and program director, is also a veteran of WOAW, having been with the station since the start. "L. P." as he announces himself, is perhaps 5 feet 5 inches tall, 135 pounds in weight, blond haired with blue eyes, good looking, 25 years old and single. He is American born of Swedish extraction, member of the English Lutheran church, belongs to the Tangier Temple Shrine, has written several songs, and just recently hung out his shingle as a budding young lawyer.

* *

Now and then a "he" writes in to find out about his favorite sopranos. I will say fewer hes than shes write to Marcella, however. But here is "E.K.C." who want to know about Ruth Etting of WLS and Ruth King, formerly of WTAM. Penchant for Ruths, Yes? Miss Etting, rather I mean Mrs. Etting, for she is married, is a pretty little blue-eyed blonde, 112 pounds, light and born about a quarter century ago. Miss King—you are luckier here—is not with WTAM any longer but is at present in the entertainment booking business in Cleveland. Besides being single, attractive and a good dancer, she has bobbed, dark brown hair, brown eyes if I remember correctly, a pleasant disposition and ability to play championship tennis. Her weight is about 125 to 130 pounds, and she stands about 5 feet 5 or 6 inches tall.

* *

Our famous Los Angeles correspondent, G. L. King, writes, "Please tell 'Marcella' that Clyde Hager is no longer with KFQZ, Hollywood." There, I've told myself and you too. Frank Creswell is now announcer and Frank Barry, cowboy tenor, program director at KFQZ. The whereabouts of Mr. Hager are not uncovered. Mr. King adds a note to the effect that Chet Boone and Tom Mitchell, both well known to southern California listeners, are now joint managers of KNRC, Los Angeles.

* *

Henry Anderson, studio director of KSO, Clarinda, Ia., is admired by "Jeanette," who would know him better. Yes, for the most important question, he is still single. He is a tall, six foot, slender, black haired "sheik." He has piercing black eyes, is very absent-minded when it comes to remembering where he puts his hats and shoes, and is still well under thirty years of age. Mr. Anderson arranges all the KSO programs and gives vocal selections himself quite often.

* *

The Harmony Girls, Mrs. "M. J. E.," record with Brunswick. The record concerns can no doubt tell you what Radio stars they have recorded.

* *

Thanks for "them kind words," "Ruby," and just for that I'm going to answer your questions right near the top of the column. Elsie Mae Look, (cute name isn't it?) who is heard with Ralph Emerson and Jerry on programs from WLS, is a cute little girl with light brown hair. She is short and a little plump, young and pretty, and single. She plays and teaches the organ and works with Ralph Emerson at his organ school. Jerry, they say, is "Dud" Richards, who happens recently to have been married. Dud is short, with curly black hair, pleasant features, a splendid sense of humor and ability to entertain. I won't guess his age, because I might be wrong, but I'm sure he's over the thirty mark.

* *

And here's another "he" inquirer who wants to know what has become of Rose Vanderbosh, former studio accompanist at WQJ. Well, "J.C.D.," she is still in Chicago but not on the air. She has a splendid position as accompanist for the prima donna at the Samovar cafe. Rose is very pretty with her very dark hair, light blue eyes, supple slenderness, youth and personality. She is single, but there is a rumor current that she is engaged to some fortunate young man.

* *

Is Charlie Wellman, of KFWB, married? asks "Gladyce." Very much so. He has a 12-year-old son. His wife is at present very ill—has been for the past six or eight months. She is staying at Venice, Calif., to get the beneficial effects of the salt air and has a Radio set that will tune to nothing but KFWB. Don't believe I have ever known a more devoted couple. Whatever his faults may be—tra, la, la—Charlie Wellman is a wonderful husband. You are a baker's dozen years too late, Gladyce.

HOOVER LOSES CONTROL OF RADIO

MEMORIAL PLANNED FOR RADIO MARTYR

START FUND FOR LESTER WOLF MONUMENT

Boy Operator Killed at WOK, Homewood, Called First to Die Broadcasting.

He was only a boy in his teens but his name will live in Radio history as the first martyr in the field of broadcasting for public entertainment. One of the big New York broadcasting stations has already started a fund that a monument may be erected to perpetuate the memory of Lester J. Wolf, 19 years old, killed at his post of duty as assistant operator for Station WOK, Homewood, Ill., July 10.

There was no thought of tragedy in the minds of the revelers who danced away the midnight hours in the Moon-Lite Gardens of the Chicago Beach Hotel. Never had Conductor Katz and His Kittens been in better fettle. The great room was aglow with soft and tinted lights. Over the heads of the dancers Katz sometimes peered through the towering windows on the broad veranda where happy couples and little groups strolled in the pale light and listened to the gentle lap of the water on the beach below. But hearts beat faster in the Garden.

Musicians Urged to Play

"Valencia! Valencia!" It was just forty minutes past midnight and a dozen voices called for the delirious European melody. Smilingly Katz turned to his Kittens and the seductive strains from this latest craze swept through the room. Its exotic rhythm sent gilded heels gliding across the glistening floor. Sparkling lights, gleaming shoulders, jeweled fingers, radiant faces, brilliant costumes, spotless linen and fathomless black revolved in a kaleidoscopic array.

Over the orchestra, suspended by invisible wires, glistened a small disk acutely tuned, which sucked up the music and atmosphere and whisked it like magic along a wire to the WOK broadcasting station, twenty miles distant, and throughout the Middle West into homes where lonely hearts were hungry for happiness and joy, trickled the gaiety of the Moon-Lite Gardens and Katz and His Kittens.

Valencia surged on to its exulting finish. Life was sweet. Happiness reigned. Fair hands and strong burst into a thunder of applause. The vigor of the ovation pressed a sensitive metallic membrane against a wall. A pop of blue flame in the station at Homewood! Silence in the home receivers.

Applause Blows Fuse

"Fuse blown!" exclaimed Herman Pomy, the chief operator.

"I'll fix it," answered Lester, springing to the mysterious assortment of wires and apparatus of the back panel. He was proud of his knowledge of what all those little wires and attachments signified.

Pomy joined him and they both started looking for the fuse that had blown.

"I've found it," shouted the boy, forgetting in his youthful eagerness the switch to divert the deadly current, as his fingers reached for the fuse connection. A muffled groan as 6,000 volts shot through his body. He crumpled into a half sitting posture on the floor. Pomy bent over him, white and staring.

"My God, Less, what did you do?"

"Never mind, I'm all right now."

But the lids dropped wearily over his eyes, his head lolled inert, his jaw sagged and Pomy rested the tired boy on the floor while he ran to the phone.

Doctor Finds Boy Dead

Eight agonizing minutes by the station clock Pomy waited for the doctor. The physician placed a stethoscope over the boy's heart. There was the barest tremor but in a moment even that had become forever still.

"Valencia! Encore!" dancers called in the Moon-Lite Gardens.

"What's the matter?" George W. Allen, director, had Homewood on the wire. "The station is silent."

"Less is killed. The applause blew a fuse and he tried to fix it without pulling the switch," explained Norman E. Wunderlich, chief engineer, who had come running to the station.

A week later the president of Neutrowound, which owns the station, received a wire from Station WRNY, New York. They proposed to raise $10,000 for the parents of the boy who live in Homewood. But the father declined, with expressions of appreciation, to accept any funds for the loss of their pride and joy.

"Then we'll erect a monument to the first martyr of Radio entertainment broadcasting," answered the New York station. WOK subscribed the first thousand dollars.

Lester had worked in New York and Philadelphia before coming to the Chicago territory. With his amateur station 9ALQ he was a member of the American Radio Relay League.

No Radio Conference This Fall Hoover Declares Until Legislation Is Passed

Secretary of Commerce Believes Confusion Would Result—Stamps Approval on Self-Government by Broadcasters—Announces No Licenses Will Be Issued Except to Completed Stations

WASHINGTON, D. C.—No Radio conference will be held in Washington next autumn, according to the announcement made by Secretary Hoover. This will be the first time in five years that a conference has not been held.

Mr. Hoover believes that the calling of a conference in the autumn would effect no good purpose inasmuch as last year's conference went on record on Radio legislation and no action has yet been taken on the recommendations. The calling of such a conference, he thinks, would lead rather to confusion than otherwise.

Reports are being received by the secretary of the establishment of various Radio control associations amongst the broadcasters. These, he believes, will be more of a local than a national character and he views them as he would anything that makes for better self-government.

In connection with the issuance of new broadcasting licenses, Mr. Hoover has ordered that such licenses will not be issued except upon the completion of a station. This means that the 600 odd stations which have applied for licenses will receive them immediately, but only upon completion of their stations providing they decide to go ahead and erect them.

MISS FISHER IN "RADIO GOWN"

"What an unusual costume, must be a Radio gown!" exclaimed Marcella when the above photograph was received in the Radio Digest editorial department. "You see the skirt radiates from the waist and all those little ruffles represent the ether waves. But that isn't important. The lady is Miss Marian Fisher, coloratura soprano at WOAW, Omaha. And, if I'm not mistaken, she's one of the principal reasons Lester Palmer, announcer, enjoys his work there so well." The gown is ankle-length.

Dr. Lee DeForest Honored By Yale University Degree

NEW YORK.—The degree of Doctor of Science has been conferred upon Dr. Lee DeForest, "Father of Radio," by the faculty of Yale university. On the occasion, Prof. William L. Phelps said:

"A graduate of the Sheffield Scientific school in 1896, Dr. DeForest is celebrating his thirtieth reunion, and his classmates are celebrating him. He took a doctor's degree at Yale in physics in 1899, and since then has devoted himself with patience, perserverance and indomitable resolution to research in the general field of communication, to which he has made a fundamental contribution by his invention of the audion. This invention has made possible the development of world-wide Radio communication by telegraph and telephone; it has made it possible by wire telephony to carry on conversation over a gulf of 5,000 miles. Dr. DeForest is one of the foremost magicians in the romantic domain of modern science; he has helped to make the present age pre-eminently the age of miracles."

Jack Riley's Orchestra on Air Now Over Station WDAF

KANSAS CITY, Mo.—A new orchestra, under the direction of Jack Riley, has taken the place of Billy Adair's orchestra at the Hotel President and has become one of the "Around the Town" group of WDAF, the Kansas City Star station.

The orchestra is heard Tuesday and Thursday nights on the "School of the Air" program from 6:30 to 7 o'clock, Central time, and also on the "Around the Town" program Saturday nights. There are five pieces in the orchestra, which has been arranged for playing both concert and popular numbers.

Erbstein Show Nets $5,000

CHICAGO.—Over $5,000 was taken in at the Auditorium theater recently during the benefit performance given by Charles E. Erbstein to provide smokes for disabled soldiers at government hospitals. Stars from fifteen Chicago Radio stations and from current loop attractions provided the entertainment for the 2,000 persons who were in attendance.

LAW SMASHES BUT CHAOS IS IMPROBABLE

To License All Stations

They Must Not Interfere, However, and Public Opinion Will Hold Whip, Belief

WASHINGTON, D. C.—"Build your station, pick a non-interfering wave and time schedule, apply to the department of commerce for a license, which must be granted, and go on the air."

Such is the meaning of the recent opinion of the antiquated 1912 Radio law, handed to Secretary of Commerce Hoover at his solicitation by the United States attorney general. In view of the fact that congress failed to pass any Radio legislation, Secretary Hoover was uncertain as to how far his department could go in the control of Radio.

He found out.

Broadcasting stations of the United States are now at liberty to use any wave length they see fit outside the band between 600 and 1,600 meters, according to the official decision.

Will Chaos Result?

Newspapers, broadcasting stations and listeners have been clamoring to learn, following the decision, whether or not this would mean chaos in the air. Many fear that it will come. Others are equally confident that it will not and cannot.

The second group is nearest correct. Chaos, in the strictest sense of the word, will not result. Even the 1912 Radio law provides that a station dare not "willfully or maliciously" interfere with the signals from another station. Such being the case, the anticipated rush of 600 waiting applicants for broadcasting licenses will be somewhat checked, for most of them will find it extremely difficult to find a wave length or hours on which they can use a certain wave length, with any speakable power, without causing interference in some degree.

Public opinion, it is believed, will handle the situation until adequate legislation is passed by congress in December. Most of the existing stations are "standing pat" on their wave lengths and present hours of operation.

Department of Commerce Statement

In an official statement relative to the attorney general's decision, the department of commerce says:

"The failure of congress to complete Radio regulation and the confusing decisions of the courts on the Radio law of 1912, led the department to request from the attorney general an opinion on the whole question of departmental authority.

"The most important feature of the opinion is in respect to the right to assign an authority to enforce or deny the use of particular wave lengths to individual stations. This question is the key to all regulation.

"Since 1923 the department has been making such assignments. In doing so it has followed the decision of the court of appeals of the District of Columbia, rendered in that year. That court directly held that the secretary was, by the law of 1912, under the duty to make such assignments for the purpose of preventing interference. Until April of this year this was the only court ruling on the subject.

"The recent decision of the Chicago court, however, cast doubt on this authority, since it adopted a construction of the 1912 act directly contrary in this respect to the view taken by the court of the District of Columbia.

"The attorney general now likewise disagrees with the construction of the district court of appeals and advises that while under the law each applicant for a license must designate a definite wave length, outside the band between 600 and 1,600 meters, yet he is at liberty to use other wave lengths at his will.

Must Issue Licenses

"The department will, therefore, in accordance with the opinion, not assign wave lengths, but will merely recite on the face of the license the wave length selected by the applicant as the normal wave length of the station. Under the attorney general's opinion, no authority exists in the department, or elsewhere, to compel adherence to this wave length, and the department must issue licenses to each applicant.

"The general effect of this opinion is that regulation has broken down and sta-

(Continued on page 21)

Fame Crowns Iowa's Oil Twins

Oil Twins Doing Their Stuff at KOIL, Council Bluffs. John Wolf strums "de ol' banjo" and Ned Tollinger "carries the air."

NED TOLLINGER and John Wolf of Council Bluffs "Discover" Each Other on a Flivver Ride—Now on National Singing Tour for KOIL

OH, YES, it was quite an eventful party—some party!

They didn't think so much about it at the time. But you never can tell how those things are going to turn out. If it hadn't been for that party you, I and a million or so other folks scattered promiscuously between two of the world's most famous oceans never would have seen nor heard these Oil Twins from Council Bluffs.

But that is the way fate has of doing things. It was a regular party one of the town boys threw at a farm house just beyond the corporation limits last August. Ned Tollinger and John Wolf happened to be two of the boys who were invited. They took their girls in a borrowed flivver. They had a wonderful time. It was the first occasion the four of them ever had been to a party together.

As they chugged along the country road on their way home they were still feeling pretty good (nothing wrong about that) and one of the girls said: "Let's have a song."

"What do you want to sing?" asked Ned.

"Oh, let's try one of the old ones—Sweet Adeline."

"Sweet Adeline . . . " piped off Ned in a very fine, very steady baritone.

"Swe-eet, swee-eet Ade-Adeline," chimed in John's clear and vibrant tenor with a few variations of his own composition.

Each stared at the other and the girls gaped at both of them. Their voices were blending together in one of those amazing harmonies that generally are discovered by accident. Each voice seemed a counterpart of the other. They both remarked about it and the girls clapped their hands in an ecstacy of unbridled glee and joy.

"Guess we're a team," said Ned.

"Never knew I could sing so good," said John.

"Try that new one about 'Anybody Here Seen Sally,' or 'What's Become of Sally,' or something like that," suggested one of the girls.

"Oh, nix on that. Let's try 'You Forgot to Remember,'" advised Ned.

And that proved even better than "Adeline." One of the girls had a friend who had a friend whose cousin was connected with the KOIL broadcasting station at Council Bluffs. So she said the boys were so wonderful they ought to be heard on the air.

They practiced together a few times and John disclosed his fine technique with the piano, the guitar and the banjo. Finally they were booked for a September date.

It was a day of trembling and just a little bit of fear when they found themselves waiting in the luxuriously furnished studio of KOIL. But once they had sounded out before the microphone they were right at home and forgot everything else except just blending their voices together.

They had no sooner finished than the telephone began to ring and one of the girls called up to tell them that their voices had come over the air even better than it had sounded in the flivver that first night when they discovered each other. Then others began to call up wanting to know who the new singers were.

"The tenor and the baritone?" quizzed the announcer, "why that's our new team—the Oil Twins."

Boston Booms Big Brother Club

Bob Emery of Station WEEI Binds 30,000 Members in Radio Fraternity. Little Sisters Also Admitted. Provide Own Entertainment on Daily Programs.

By MARSHAL Z. TAYLOR

WHILE the peace propagandists are fighting it out and there is much palaver going around in a loose way about the "brotherhood of man" something real and practical along this line is being accomplished by the Radio broadcasters.

"Big Brothers" are springing up in all quarters. Independently of each other they are weaving little threads through the ether that eventually may be welded into steel chains to protect and uplift the nation.

One of the earliest pioneers of all the Radio brothers is Big Brother Bob Emery at WEEI, Boston. Listen in when Brother Bob has convened the Boston Edison Big Brother club and you will never accuse the Hub city of being cold and codfishy again. Congeniality and friendliness never were better exemplified than in the letters that are sent in by the boys and girls of the Boston area, some of which Brother Bob reads aloud.

There are close to 30,000 members in the Boston Edison Big Brother club. To be a member in good standing with this great affiliation costs two cents a week, which is the price of the two cent stamp for postage necessary to send the letter-a-week dues. Only a small percentage of all the letters received can be broadcast but the business of sitting down and writing a letter, with a feeling that it is wanted and is read by somebody who is interested makes it worth while for the individual who writes it.

Thus every member is enabled to take part and contribute something of himself to the great fraternity. It gives him even larger facilities for self expression than would be found in the ordinary club where only a few members find opportunity to participate. Here, each one has a voice in the big "conclaves" that are held daily except Saturdays and Sundays.

But letter writing is only a small part of Brother Bob Emery's club. There are special musical programs, plays and other entertaining features with members of the club taking personal part in the studio before the microphone.

Boston culture is traditional. Therefore it is only to be expected that out of a club membership of 30,000 there should be many individuals who are really talented. These are discovered and invited to contribute to the program on Monday evenings. Always there are two or three good singers or instrumental artists for the first night of the week.

On Tuesday, after Brother Bob has called the meeting to order at the usual Big Brother period—6:45 to 7:30 p. m.—may be heard the Ukulele band or the Big Brother Glee club. From the picture of the glee club shown at the bottom of this page it may be seen that there are as many big sisters as there are big brothers, which goes to prove, as Brother Bob always maintains, that the Big Brother club at WEEI is just as much for the big and little sisters as it is for the brothers. Then there is the Harmonica orchestra of real boys. They, too, are seen on this page and take it from one who has heard them they know their mouth-organs both coming and going—although the word "mouth-organ" is almost an unforgivable vulgarity to the Bostonese.

These are the golden days for the Wednesday nighters for a special part of the club hour is devoted each week to the Radio Order of Junior Gardners. As a matter of fact Brother Bob considers this his special night and for this particular feature he makes it his business always to find something unusual and helpful for the young gardners who thrill over the miracle of things that spring into life and beauty from little hard-shelled seeds placed in the ground and nurtured.

This also is an eventful night for the big brothers who dwell in lighthouses and warn mariners of the treacherous rocks near shore. For weeks these vigilant guardians are isolated from their fellow beings but they have their Radio receiving sets and during Big Brother hour WEEI throws its beam on them and they are on the stage before a very vast audience. They write their weekly letters which are broadcast so that they are in this manner enabled to keep in contact with each other and at the same time made to feel that they are not forgotten by their sympathetic brothers who are ashore.

Sure, that's Big Brother Bob Emery at the Top with the Harold Lloyd Specks. You know that smile just as you would the smile on Sister Frances McLaughlin, just above, who speaks for the members of the brotherhood who are not brothers. That music you took for a harp orchestra came from this Harmonica Quintet. Below is the Big Brother Glee Club.

Thursday night means a short Radio play, spelling bee or a debate on some subject that all brothers should find of mutual interest. This is a feature that Brother Bob considers one of his "binders" to hold the members together in a firm unison.

Boston high schools with musical organizations, including bands, orchestras, glee clubs and choral societies have their turn at reaching the great Radio audience on Friday night. Educational institutions throughout the area find this feature one of the most stimulating influences in bringing their musical units to a highly artistic standard. It becomes a matter of contest as to which school brings the greatest amount of mail applause as the result of its contribution to the Radio program, for all schools may listen in and judge for themselves.

Besides widespread public contact through the Radio the Big Brother club has conspicuous newspaper support. Each day the Boston Transcript devotes a generous share of its Radio page to the doings of the Big Brother club. This is conducted under a permanent head, "On the Air with Big Brother." Then in the big Sunday edition of the Herald there is a special (*Continued on page 22*)

THE FALL GUY

by JOSE B. & HARRY VAN DEMARK

DICK STANDISH Possessed a Face That Was Perfectly Satisfactory to Alice Tellyhew but Did Not Fit in With Her Father's Theories of "Faces and Professional Success." Then Came the Big Test and—Well, Don't Miss This Great Two-Part Story by the Van Demarks.

CHAPTER I

Straight From the Shoulder

WHEN JASON TELLYHEW, broker, business man, stockholder in half a dozen Valley View corporations, etc., etc., decided that Dick Standish was no good as a lawyer, and generally not worth his salt, he went wrong on two points out of a possible two, thereby batting .000 for the day. For in that rash judgment was meant to be expressed not only a contempt for the potentialities of said Standish, but a blistering sneer at the law as practiced by this youthful disciple of the eminent Mr. Blackstone.

Mr. Tellyhew was a blunt, forthright man who never evaded or modified a truth—as he saw it. So when he indulged in certain remarks of a distinctly personal nature, Dick got the idea, somehow, that Alice's father did not like him.

As a matter of fact Dick had regarded his forehead, his eyes, his nose and mouth and chin, simply as attributes common to the human species. It had been astonishing to learn that there were people—Jason Tellyhew among them—who looked upon the features as an external record of one's habits of thought. Until that particular evening he had not realized how short was the distance between his nose and mouth, nor had he thought anything of the fact that his chin was not of the iron-jawed variety.

When Tellyhew finished, Dick's blue eyes snapped.

"From all of which," he said, "I gather you'd rather I'd not come to the house."

"Ask yourself," replied Jason Tellyhew coldly. "Take a bird's-eye view of yourself as you appear tonight; your clothes are shabby; your shoes show evidences of being on their last soles; and yet, in the face of all this, you have the nerve to call on Alice."

"Has Alice objected to my coming here?"

"That doesn't enter into the discussion at all. Where's your pride, Standish? Why, if I was in your circumstances I'd seek new fields in the hope that fortune would be a little kinder."

"You've wanted to get me out of Valley View ever since I started to call on Alice."

"Nonsense! That's a mere figment of your imagination. Why should I want to get you out of Valley View?"

"I SUPPOSE you've figured out that I'll be a failure all my life, and for that reason wouldn't be eligible as a son-in-law."

"Well, suppose I do figure it that way? Shows I'm pretty wise, eh? I'm a good reader of human nature. I tell you, you haven't it in you to succeed. I never knew a man with features like yours to make a success of life."

"And, if you'll pardon me, I never knew a man with features like yours to be bubbling over with the milk of human kindness. About the time you started to figure me out of the running as a son-in-law, I began to wonder how I was ever going to tolerate you as a father-in-law!"

"Now, see here, Standish, you get out of my house—"

"Oh, I'm going! But you've had your say; now I'm going to have mine. I've tried hard to get a foothold in Valley View. I even asked your aid to get some of the minor cases your own attorney didn't care to handle."

"Of course, I wanted to help you, Standish—"

"If you believe that, you're only kidding yourself, Mr. Tellyhew. Every bone in your body has been crying out, 'He's no good!' 'Get him out of town!' Oh, I know! But down in Virginia the Standishes are known as stickers. We've got a pedigree, too, but in this day and age that gets you nothing. But we happen to have some nerve along with it, and I want you to know that I'm not going to leave Valley View. I'm going to win out—and God help you if you ever get into any litigation with me on the other side!"

Rather theatric, yes, but it was delivered with all the fire of the young Southerner's hot blood. And probably somewhere in the sub-conscious mind of Jason Tellyhew it found an echoing response—for every man likes a fighter.

BEFORE Tellyhew could frame a fitting reply, the young whirlwind tore out of the room, slammed the door none too politely, and dashed pell mell into the arms of a vision in pink, who gave evidence of having been listening at the key-hole.

The young whirlwind tore out of the room . . . and dashed pell mell into the arms of a vision in pink, who gave evidence of having been listening at the key-hole.

"What did he say, Dick?" Alice Tellyhew anxiously inquired.

Dick's anger quickly passed. "Oh, he said plenty—and I'm afraid I did, too."

"Oh, you talked back to him! I'm glad of that!"

"We may both be sorry," Dick returned rather glumly. "I boasted that I would make good in spite of him—and it's going to be a tough job."

"But you will—and I'll help all I can."

Dick told her of the conversation in the library, omitting only her father's references to his personal appearance. He somehow could not bring himself to refer to them. No one knew better than Alice Tellyhew the reason Dick had grown so shabby of late, and being a girl with a golden heart, it had excited more pity than the young man knew.

"And now he's forbidden me the house," Dick said, in conclusion. "But I suppose that had to come."

"It won't make any difference with me, dear; I'll meet you wherever you say."

Later Dick took his leave, having seen no more of Jason Tellyhew. If Tellyhew suspected that Dick had lingered for a few words with Alice he evidently chose to "wink at it," and bide his time.

Dick was crossing Commonwealth avenue, one of Valley View's prettiest paved thoroughfares, when a man fell sprawling on the pavement in the path of an approaching automobile. With Dick to think was to act, and he fairly hurled himself to the danger point and, as the car's brakes began to grind, seized the man by a leg and jerked rather than pulled him out of the way, just as a limousine, heavy and cumbersome, swept past and came to a standstill.

The man who had fallen was uninjured except for the shock, and smiled as Dick helped him to his feet.

"Mighty near got me that time," he observed. "Would have, if you hadn't happened along, young man."

The occupants of the car came running back to inquire if anyone was injured, and being absolved from all blame, went their way rejoicing.

"And now, if you'll please tell me your name—" began the man.

Under the street lamp Dick got a good look at him and uttered an astonished exclamation:

"Alderman McGuire!"

"Ah, so you know me? Sorry, but you seem to have the advantage."

"My name is Standish—lawyer. My card!" Dick handed him a slip of pasteboard.

"Standish—lawyer—eh? Well, Standish, I wouldn't be surprised if you saved my life. I'm mighty grateful. If you'll just suggest something I can do in return—"

"Nothing at all, Mr. McGuire. Delighted that I was in a position to help you. And now, if you're all right, I'll say good night."

"I'm all right, thanks—good night!" the alderman responded, with a wave of the hand.

All the way to his meager room Dick Standish's heart was filled with happiness—the happiness that comes with the thought of a deed well done.

CHAPTER II

On the Skids

THE modern fable of the greased skids and the quick descent is not in its essentials a pleasant one; but if all the truth is to be told about Dick Standish, it must form an important part of this chronicle.

It covers that period from the early fall till the first balmy days of spring. It includes for the sake of exactness a fleeting sketch of all that happened between the day upon which young Standish, clad in a deeply-creased blue serge suit, which spelled custom made in bold letters, first burst upon the horizon of Valley View, and a time, some months later, when he sat in a sparsely-furnished office in the Continental Bank building, deep in the realization that his first half-year as a lawyer, "on his own," had been productive of few satisfying things, with a particular scarcity of clients, and, by the same token, of dollars.

The twelve hundred dollars which he had in the bank in the beginning had dwindled to practically minus, and a few friends was all that was left worth while.

At first the enthusiasm of youth had made quite a dent in the staid old world. Some friends who had promised him their business had brought him at infrequent intervals such remunerative employment as the taking of acknowledgments, the preparation of an occasional legal instrument, or the prosecution of some minor matters of debt. In one of these cases he had sued for the munificent sum of $20.00.

Some three months after he had opened his office, he had removed to more economical lodgings and taken to wearing his clothes for longer periods; also his taste in hosiery, which had formerly ran to the silk-clocked variety, asserted itself only at sporadic intervals.

HIS friend had been more than generous at first; so generous that, embarrassed as he was, Dick had found the acquiring of funds for a temporary period comparatively easy. But as time passed and he still spoke of the day when his practice would be self-supporting, this became curiously reversed—Dick found it easier to ask, but his friends found it harder to respond.

Those who had gone down in their pockets with every aspect of gladness and eagerness, spoke of being temporarily embarrassed themselves; others who had gone down not quite so gladly or eagerly, flatly refused.

With his credit firmly but politely curtailed at his favorite haberdashery, Dick began to be more and more careful with his apparel. Still confident that his luck would turn, and still possessed of a certain blue suit and one pair of clocked hose, reserved for special occasions, the flames of optimism continued to burn like a hickory fire, now leaping, now dying almost to nothing—but burning.

On a few hundred dollars in Dayville, Virginia, a spendthrift may amass a temporary Rockefeller repute; but in a city the size of Valley View the climate has a depressing, not to say dwindling effect on such a hoard.

At the end of the fourth month Dick's twelve hundred dollars had vanished, and through the aid of a generous pawnbroker he began to live on the contents of his trunk—beginning at the top.

At the same time he had found himself eating at a severely unclean little hole-in-the-wall where for twenty cents is served a clammy fluid libelously re-

(Continued on page 20)

Diagnose Your Set Troubles

" 'Of making many books' 'twas said,
'There is no end', and who thereon
The ever-running ink doth shed
But proves the words of Solomon."

IF RADIO'S past history is any indication of its future, he who would gaze into the crystal ball would find much at which to marvel. Men who "go down to the sea in ships" need no longer fear. The Radio compass is ever alert to guide the floundering vessel with its human cargo to a haven of safety. It does not require a long stretch of one's imagination to conceive that in the near future the Radio compass will likewise safeguard the desert wanderer.

DON'T THINK the Old Set Will Go On and On

The happenings of today are photographed and transmitted via Radio across the seven seas. Tomorrow's breakfast table paper will picture the world's events. Radio transmission of power is an accomplished laboratory fact, and we may expect its early release for practical commercial use for the relief and convenience of those who are in parts isolated. Yesterday's desires are but today's actualities.

Radio—that uncanny something which has commanded the attention of the civilized world—means much. There is often true greatness in a word.

Even We Break Down

Yet to those of my readers who read and run, the little exasperating troubles are only magnified because we have become so dependent upon this Genii for our entertainment that the denial of it for a moment causes us to wonder when it will be perfected. The answer to him or her who is waiting such perfection is "when all else is perfected." The phonograph still retains its scratch of the needle, automobiles refuse to run forever

(Continued on page 22)

Troubles—Their Cause—and Cure

No Reception

Trouble	Cause	Possible Cure
Tubes do not light.	Burned out tube or tubes.	Replace tubes.
	"A" battery disconnected.	Connect properly.
	Socket springs do not make contact with tube terminals.	Bend up socket springs.
No click in phone or loud speaker when plugged in jack.	"B" battery disconnected. Phone or loud speaker cord broken or disconnected.	Connect and test for broken wire in cord.

Intermittent Reception

Trouble	Cause	Possible Cure
Signals fade slowly and periodically.	This is a natural condition considered as caused by a shifting of the wave train or absorption due to atmospheric conditions.	Be patient. The signal will return to normal strength within a short period.
Continued intermittent swaying of signals.	This is usually caused by a swinging antenna or lead-in wire.	Take up slack in antenna or lead-in wire.
Instantaneous stopping of signal.	Detector tube is blocking. Caused usually through using a grid leak of too high a value.	If leak used is variable reduce its value. If a fixed leak is used replace with one of less resistance.

Weak Reception

Trouble	Cause	Possible Cure
Cannot secure maximum volume from stations which generally come in loud.	Tubes need replacing as they no doubt have been forced through turning rheostats too high.	Have tubes tested, and rejuvenated possibly.
	Weak "B" battery.	Put in new "B" battery.
Strong signals when receiver is first turned on which gradually die out.	"A" battery current weak.	Recharge storage "A" battery or replace dry cell "A."
Signal strength about equal with or without antenna connected.	Aerial grounded or corroded. Loose or poor aerial connection. Dirty insulators. Poor ground connection.	Take a day off and fix them.
Signals increase if tubes are changed to other sockets.	This indicates that one or more tubes are better amplifiers than detectors.	You cured the trouble when you found they worked better in the other sockets.
Weak signals come through the loud speaker without distortion. Loud signals badly distorted.	This is a positive indication that you are overloading your tubes.	Increase the plate voltage on the last tube with a proper "C" bias or better still use a power tube in the last audio socket.
When using only the detector considerable distortion is noted.	Detector tube is oscillating or the radio frequency tube may be.	Reduce filament control rheostat, also plate voltage on the radio frequency tube. If using neutralizing condensers, readjust.

Noisy Reception

Trouble	Cause	Possible Cure
Continuous slow whistle with a slightly varying amplitude.	Two stations are heterodyning. In other words, their wave lengths are interfering with each other owing to their being of too nearly the same frequency.	No remedy. Report to nearest Radio Supervisor what stations were heterodyning. He will correct the difficulty.
Whistling in the audio stages but not when using the detector alone.	Open transformer connection or winding.	Test for opening and repair or replace.
	"C" battery connected wrong.	Connect "C" battery properly by having the plus terminal of the "C" battery connected to the minus filament of the "A" battery ahead of the rheostat.
	Forcing of tubes through having rheostat too high.	
A "put-put-put" noise, often reaching a continuous purring occurs.	Loose or broken connection to the grid leak or grid connection to the detector.	Inspect and make this connection secure. Sometimes the grid leak is defective.
A high-pitched continuous note which will stop at times when rheostats are nearly turned off.	The loud speaker is vibrating and causing the grid of one of the tubes to vibrate.	Change location of the loud speaker so that the vibrations will not be directed toward the receiver. Stand speaker on soft mat.
Starting with a low pitched whistle, the pitch gradually rises while tuning.	This generally indicates that you are using a grid leak of too high a value.	Adjust or replace with a lesser value leak.
	This also may be caused through having the grid and plate leads too close to one another or parallel to each other.	Rewire receiver or have it rewired to avoid grid-plate lead coupling.

Broad Tuning

Trouble	Cause	Possible Cure
Cannot log some stations consistently.	Station may be varying from its assigned wave length, or possibly operating with a tight antenna coupling with the added effect caused by forcing their transmitting tubes.	Buy the station's chief engineer a lunch and tell him your troubles.
Cannot tune out a particular station.	You are too close to the station or using an antenna whose fundamental wave length picks up the harmonics of the station. Faulty receiver design.	Change the length of your aerial, making it shorter.
	Poorly designed variable condensers.	Use straight line frequency condensers.
Cannot receive through local stations.	Aerial usually too long.	Shorten the aerial.
Cannot get any stations without excessive static or noise.	Radio's holiday.	Go to bed. Tomorrow night's program will be better anyway.

Broadcasters' Property Rights

INASMUCH as Secretary of Commerce Hoover has seen fit to throw open the doors of the air to all individuals and firms seeking permission to broadcast, in accordance with the opinion of the United States attorney general on the 1912 Radio law, we ask what privileges, what rights, if any, are the pioneer broadcasters to enjoy?

Wave lengths, once held sacredly, made famous and popular by the capital invested by trail-blazing persons and corporations, evidently mean nothing at the time of writing. Anyone can apply for and get a license and go on the air on a valuable wave length, making that wave less valuable to the pioneering concern and disturbing the public, accustomed to hearing the good entertainment or service from the older broadcaster.

There is no equity in such an arrangement. It is said that there is no law without there is equity, and therefore, by logic it would seem that this allowing of anyone to trespass "legally" on a popularized ether channel, is indeed far removed from the standards which we consider legal and just.

It is not right that a concern which has been broadcasting for five years—or less—and has spent from $100,000 to several million dollars, should lose the most valuable asset it enjoys, its right-of-way. We are not claiming that the older stations will lose their actual wave lengths, but so many of the 600 waiting stations can decide that so-and-so's wave length is just the one for them and thereupon pounce upon it, that the wave length is, to all intents and purposes, lost.

Even if the attorney general's opinion is bolstered soon with legislation, let us look with criticism upon the provisions of the White and Dill Radio control bills. Neither of them adequately provides for the protection of invested capital, established good will, or right of precedence. We quote the Chicago Tribune:

"It is disconcerting to people who have spent large sums of money constructing broadcasting stations, and other large sums and much energy and initiative in building up a good will, to be told—as they are in both bills—that their enterprise creates no property right; that their license and wave length may be taken from them if the controlling power sees fit.

"Railroads are perhaps the most regulated of any means of interstate commerce, yet they are not so limited. The road which had foresight enough to build through the only mountain pass available is permitted to profit by its initiative. It acquires a property right.

"Radio broadcasters, who will be the principal persons to be affected by any controlling legislation, are justly apprehensive over the clauses denying property rights contained in both bills."

We second the motion of the Chicago Tribune in the belief that every citizen interested in Radio will agree that it is fair that the first broadcasters, the broadcasters who have spent the money, and those who have served the best, should have some privilege, some protection for their initiative and investment.

Broadcasters, we believe, should enjoy privileges based upon their precedence in the field, the capital they have invested, the service they have rendered the public in regular and improved programs, and their quality of transmission and reaching power. Perhaps we should eliminate the factors named above which are founded upon capital invested or ability to spend money, yet if we did, we would not attract capital to do broadcasting, to improve it, and establish a regular, dependable and enjoyable service. Besides precedence, the invested capital must be considered.

Unless such protection is assured by holeproof, nonpolitical Radio control legislation, we can only advise the existing 529 broadcasters licensed previous to the let-down of the bar on licenses, to go off the air or sell their equipment to the 600 waiting individuals and firms who seek to go on the air. It would be the irony of fate to see the newcomers invest their money, their energy and initiative, and find in the end that they too had bought merely a "pig in a poke."

RADIO INDI-GEST

Green Radios

By Jennie Harris Oliver

The evening was wistfully lighting its candles,
And I, in my garden, was seeking a rose,
When in tuned the wind, and I heard the trees singing
A whispering anthem with swelling solos.

I heard the pines playing their mighty pipe organs;
I heard the oaks chanting a deep symphony.
The elms and the locusts their long harps were sweeping;
The maples and junipers caroled to me.

And then, as the poplars were clapping their fingers,
And I, in my garden, was picking a rose,
I heard the wind rushing away in the village
To broadcast the music of green Radios.

Indi Likes Your Poem, Jennie, and he hopes you will contribute more. The lilting rhythm is perfect. The thought is original and refreshing. The top of the column to you!

The Wonders of Radio

Station PDQ: "Carruh Mu Buck tu Ol Verginnuh."
Station PXY: "Kerry Ma Beck too Oald Ferginnie."
Station: PSL: "Curry Me Bick tew Eold Vairginew."
Station PRZ: "Kierrie Mo Bock tao Olda Vorjinah,"

and then a few more variations on an old theme. Then we get, "Darlink I Yam Groaning Cold," or "Me, My, Muh Old Ken, Kain Kun, Kin, Kon Tickee, Tuckah, Tooky Hum, Home." And so on, year after year. Will there never be a funeral? How may we outlaw some of those "dear old" frazzled songs?

C. L. STONAKER

By Having Congress Pass a Radio law or outlaw, Mr. Stonaker, or, of course, you might have some of the Chicago bomb specialists take the offending stations up.

The Radio School

You can learn to make this and how to grow that;
How to make yourself thin and how to get fat.
They will teach you to cook and tell how to bake,
But none of them offer to sample your cake.

They teach economics and languages too,
But none of them tell how to make good home brew.
They talk about corn; how to plant with a drill,
But they don't tell us how to construct a good still.

They teach many things in the Radio School,
From music and dancing to shoeing a mule.
But one subject is lacking; we all want to know
How to get without working, a surplus of dough.

GEORGE

WHAT! George, don't you know how to make a surplus of dough? That's easy. We ought to know. Go into the Radio business. Or be an announcer. I've heard they lead an easy life and are paid handsomely.

"WHO'S WHO IN RADIO"

Dear Indi: In competition with Miss Marcella please allow me to explain that the announcer at WBAR is not red-headed. That's the reflection from his nose.

The Awful Fate of the Cables

Fairice, Alaska.

Edator Indigest: As evry won is terning to a poet I take my pencil in hand to rite a poem of a acktuel fakt that I no to be a fakt. I hoap you like it:

"I now will tell of the fait that fell, on the fambly of Dennis Cable. He bawt a Radio, brawt it hoam, and set it on a taible. He wood toon in this and toon in that, and showt, hears KSD. His wife wood pleed, that he wood leeve it there and let it be. But he'd toon in this and toon in that and travel ore the nashion, and he nevr stopt until he'd plop onto anothur stashion. His wife she sighd as she set by his side and asked to let her toon it. No No quoath he, Deer, dont you see, that you wood surely ruin it. So she got soar, and slammed the doar, and that night 'Some Steps on a Stare.' A radio set was smashed to heck, far beyond all repare."

Chapter too. (2):

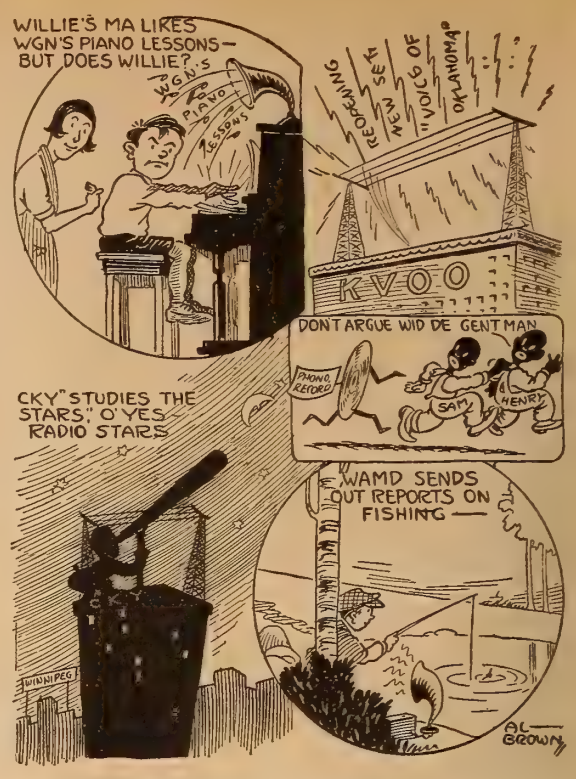
"So now no more doos she slam the doar, but they set in the evening and laff, at 2bit records plaid ore and ore on a neighbors Phoneygraff."

KITTLE DRUMMER

If Rhea and the Third Trombone Player, and a lot of other dilatory contributors, don't get busy and kick in with some good prose and poetry, especially prose with a wallop, pretty soon, I think I'll rent out this column to Mr. Dielectric. This vacation idea appeals to me, too.

INDI

Current Events



Condensed

BY DIELECTRIC

Following the ruling that Secretary Hoover may not keep Radio lines clear, pending some action from those mighty men of congress, I have been anxiously waiting for a "jam" in the ether-way. It may come—but not in time to save me the effort of reviewing some more broadcast programs. With Old Man Static whooping 'er up, just a half-dozen or so stations operating at one time on a popular wave length would suffice to allow me a vacation; something you feel would be best for all concerned. The boss is taking one, you are enjoying yours—except for this column which must be read to see if Dielectric has found any new stations, but that is getting away from the subject of impending disaster to listeners in, both amateur and professional, when waves and power sense freedom.

Everyone tuning in the Chicago Station WOK, during the hours when the Midway Garden dance orchestra entertains, comes back for more. This is true of distant listeners as well as those residing in the neighborhood of Chicago's broadcasters, and can be accounted for easily enough by the manner in which popular dance numbers are rendered. If it had not been for the fact of so many relying on this particular feature, the disappointment to those listening for succeeding numbers the night of the catastrophe would have been ordinary, but the terrible experience of losing one of their operators caused WOK to shut down completely. You knew afterward what happened—a rare fatality.

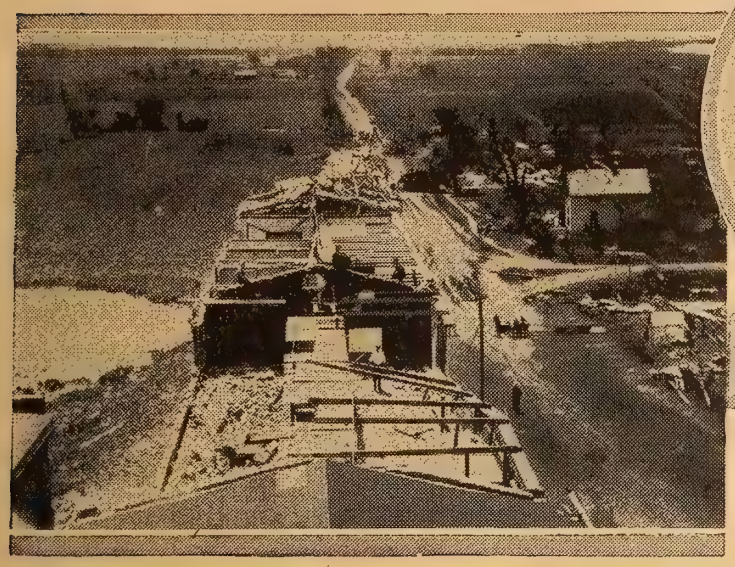
Radio had brought to millions of listeners events in the making, of local importance, as can more easily be appreciated, and of national consequence, a feat that still carries new thrills. To hear our president address us from a point thousands of miles away has no longer the impress of unreality—he is before us! Radio provided the way in which a large section of the listening public could together hear the voices of four presidents, three of whom deceased, and Station WGN, Chicago, deserves all the credit for planning such a feature. The records preserving the voices of Presidents Wilson, Harding and Roosevelt were used to refresh our memories of these leaders and carried to distant points with lifelike reproduction. It was a feature worth while.

When Station WLW, Cincinnati, is so disposed (which is often) it can offer a musical entertainment that holds the attention of large Radio audiences, and is not forced to forage afield for talent with which to accomplish it. Right in the Cincinnati College of Music flourishes talent pleasing to all. Recitals by the students in the summer classes there afford music lovers evenings of real pleasure, assuring a wide variety of musical entertainment—at least so far as different instruments are concerned. It would pay to listen for these concerts.

Our old friends the New York Philharmonic orchestra has been on the air to help dispel heat discomfor and make us realize that some good things are assured even during vacation season. Station WJZ, new York, with other stations, broadcasts this concert series with the knowledge that thousands of enthusiasts are listening in each time. After all, it is refreshing to hear such a rendition of that grand symphonic work of Beethoven—his Fifth—as these players gave it, at a time when there is a preponderance of lighter music. Certainly many are enjoying the privilege of listening to one of the foremost orchestras in the world under conditions which require the least outlay.

HOW KSO LOOKED AFTER TORNADO HIT

Radio Station KSO at Clarinda "took the air" with practically the whole works a few weeks ago when hit by a twister that carried death and destruction over a wide path that included the Berry Seed company, home of KSO.



Paul Maxwell (left) and Henry Anderson, engineer and director, respectively, were at one end of the building when the tornado hit the other. A few yards from them a boy was hurled 350 feet and killed.

When the "air took the station" at KSO it left the south antenna tower upside down over one corner of the seed building as shown below. Work on the construction of a new and larger station was begun at once.

SPONSORED CONCERT IS THE THING IN EAST

ADVERTISERS PAY COST OF BROADCASTS NOWADAYS

More Toll Programs Expected for Next Season—Political Speeches Also to Yield Revenue

NEW YORK.—The great and powerful force of good-will advertising is "paying the bill" for broadcasting, and ere the fall is here, good-will advertising programs and concerts will dominate the air in New York.

Nearly every New York station is commercializing at least a part of its time, and the booking offices of the stations are having a busy summer signing contracts on the air for the fall and winter, or in some few cases, giving the time to advertisers who will bear the expense of furnishing high class talent.

From officials of the Broadcasting Company of America and the Radio Corporation of America it is learned that little time on the winter schedules of their stations is being reserved for broadcast programs that are not "sponsored." Sporting events and a few nationally important celebrations and dinners will be offered to the listening public without the advertising by-line.

Commercial Programs Few Now

Until autumn, however, the sponsored programs are becoming fewer and fewer than during the past winter and spring and are giving way on the ether lanes to the principal concerts of New York and Washington. The best Radio features of the air entertainment in the east are, with possibly two exceptions, of the nonadvertising variety and include the broadcasting of the Goldman band concerts from New York university, the New York Philharmonic society concerts, from the Lewissohn stadium and the United States Marine and Army band concerts from the Sylvan theater in Washington.

Politics on Air in Fall

So far no definite policies have been worked out for broadcasting the more important political speeches in the fall. Although not a presidential campaign year, several parts of the United States have political crisis scheduled for November and attempts to bring them more directly to the public attention through the medium of the microphone will be made in various states.

That a number of stations will sell time to the candidates for Radio addresses is taken for granted and it is understood that both the democratic and republican headquarters are working out Radio campaigns.

Garland, of WBBM, Proud Papa

CHICAGO.—A pink silk cape, a pair of pink boots and a baby's dress were "put on the air" recently by Charlie Garland, director of WBBM, the Stewart-Warner Air theater here. Charlie is doubling his broadcasting duties with the position of proud father to Baby Richard Garland, who was presented with the above mentioned wearing apparel by the WBBM studio staff. Garland was so proud of the baby's new trousseau that he told the world about it over the microphone.

FOUR PICK WAVES AND GET LICENSES

Three of First Stations Authorized Under New Ruling Are in Chicago

WASHINGTON, D. C.—Four additional broadcasting stations were authorized to operate on self-selected wave lengths with the issuance of licenses by the department of commerce to WCFL, Chicago Federation of Labor, on 491.5 meters; WJBT, J. S. Boyd, Chicago, 238 meters; WMBI, Moody Bible Institute, Chicago, no wave length designated, and KGAR, Tucson (Ariz.) Publishing Co., Tucson, Citizen, 243.8 meters.

These were the first stations to be licensed since the announcement of the opinion of the attorney general denying the power of the secretary of commerce to regulate Radio and thereby leaving broadcasters without any restrictions as to wave bands or power to be used.

Department of commerce officials stated that the four stations were the first to be licensed because theirs were the only formal applications received and they had plants erected and ready to operate. Practically all of the 600 other applications, it was said, were informal and submitted by persons who stated they proposed to erect broadcasting stations, but who did not state when they expected to operate.

LeRoy M. E. Clausing Now Chief Engineer for WBBM

CHICAGO.—Following its "Radio Coue" of "Bigger and better day by day" WBBM, the Stewart-Warner Air theater, Chicago, has secured an acknowledged leader in Radio engineering to supervise the broadcasting service of the company by the signing of contract with LeRoy M. E. Clausing, former chief engineer of WEBH, who has already taken charge.

"Mr. Clausing is not only a Radio transmission engineer of theory," said an official of the company, "but has many years of practical application of his ideas behind him. In securing him we feel WBBM will greatly add to its service."

During the war Clausing was stationed at Great Lakes Naval Radio laboratories, at the Trans-Atlantic station at Belmar, N. J., and later was Radio aide at the Naval Radio laboratories at Charleston, S. C., and the Naval Radio research laboratories at Washington, D. C.

Commission Rests Its Case Against RCA for Summer

WASHINGTON, D. C.—It is probable that no further testimony will be taken by officials of the federal trade commission in the case against the Radio Corporation of America until September, according to announcement just made public. The next testimony will be taken in San Francisco.

At the conclusion of the taking of testimony in this case in New Orleans recently it was agreed that further testimony could be taken after ten days' advance notice by the commission's examiner, William C. Reeves. The general understanding is that no testimony will be taken during the summer months.

Sixty Canary Powered Chorus Is in Training

Louis Katzman Plans Treat for Invisible Audience

NEW YORK.—A chorus of no less than sixty canary birds will soon be broadcast over one of the leading New York stations by Louis Katzman, director of a weekly feature of WEAF and fourteen affiliated stations.

Mr. Katzman, who numbers among his many hobbies that of a canary fancier, has selected sixty of his most musical birds whose voices harmonize, and is training them for the concert. The canaries' voices vary in timbre so that they will be enabled to render four part harmony.

A feature of the canary bird program will be a trio of these birds who are already trained for the purpose and have three different and distinct vocal ranges. One of them has a voice of the depth of a parrot which, Mr. Katman says, corresponds to a canary bird bass.

GALAXY OF STARS ON AIR FROM WLS

Van Gordon, Marshall, Freund and Others Sustain Summer Interest in Programs

CHICAGO.—Musical Radio history is being made this summer in the series of all-star artist concerts being broadcast over WLS, Chicago. With a view to keeping the same high standard of program the year round instead of following the usual summer broadcasting slump, the Sears-Roebuck Agricultural station is presenting a galaxy of grand opera, concert and instrumental stars of national and international reputation which should keep real music-lovers within earshot of their receivers every Friday evening this summer.

Charles Marshall, Cyrena Van Gordon, Helen Freund, Glenn Drake and Chicago's justly famed Little Symphony orchestra with George Dasch as conductor, are some of the midsummer musical treats to be picked out of the air. These stellar concerts are being given every Friday evening until September 24, at 8:30 p. m., Central time, from the WLS studio in the new Hotel Sherman.

Radio audiences, maintains Edgar A. Bill, director of WLS, are entitled to good music the year round. The order of appearance of the artists in the remainder of the series is as follows:

August 6.—Marie Morrisey, contralto, assisted by Theodore DuMoulin, concert cellist of renown. August 13.—Little Symphony orchestra of Chicago, concert, "When Music Was Young." August 20.—Glenn Drake, tenor, assisted by Charles Lurvey, concert pianist. August 27.—Little Symphony orchestra of Chicago, concert, "The Age of Romance in Music." September 3.—Helen Freund, soprano, assisted by Herbert Kirschner, talented violinist. September 10.—Little Symphony orchestra of Chicago, concert, "Painting Pictures in Tone." September 17.—Cyrena Van Gordon, prima donna mezzo-contralto. She will be assisted by the WLS trio. September 24.—Little Symphony orchestra of Chicago, concert, featuring works of American composers.

OLD FAVORITES BEST LIKED M'QUHAE SAYS

BUT POPULAR IRISH TENOR SEES EXCUSE FOR JAZZ

Is Outlet for Pent-up Emotions of American—Noted Singer Formerly Milked Cows on Canadian Farm

NEW YORK.—"Jazz" songs are not generally popular with listeners, according to the hundreds of requests received by Allen McQuhae, the Irish tenor, who sings in concert over the Radio each Sunday night in the Atwater Kent hour.

Old favorites of years gone by are most in demand and, Mr. McQuhae said, indicate that the Radio programs reach the listener when he is thoroughly relaxed at home and in a more contemplative, reminiscent mood.

"But jazz is very useful," said Mr. McQuhae. "It is an outlet for the pent-up emotions which many of us would not let go. The American is naturally self-contained about his emotions, but let a good band play some of the old works made into jazz form and it makes him light and happy in heart and mind and he wants to dance. Jazz has its place, although many of the tunes are stolen from the old masters and revamped."

In classifying the requests with a view to singing first the songs most in demand, it is found that there are very few songs on the list of a hundred or more that have not been asked for many times, while there is a large group polling a very general demand.

McQuhae Started as Farm Hand

Mr. McQuhae, who now sings to a million or more Radio fans each Sunday evening, said the smallest audience to which he had sung regularly in his early youth was a group of farm hands in Manitoba, Canada.

"When I first came to this country," said the Irish tenor, "I went to work on a farm in Canada for ten dollars a month. I milked ten cows night and morning. And let me tell you, if ever I have to work on a farm again, I've forgotten how to milk. It's the curse of farm life.

"As I milked, I always sang to the cows, so while I was milking, the other hands sat around the cow barn and listened. Then, when I had finished my work, they always insisted that I help them with the horses."

That was fifteen years ago. In the meantime the noted tenor has appeared in concerts before many of the most brilliant audiences of this country and Europe.

Happiness Boys Go Off Air Until Early in September

NEW YORK.—The Friday evening audience of WEAF which each week tunes in for the purpose of hearing the Happiness Boys, will regret to learn that the programs of the boys have been temporarily discontinued. This regret is tempered by the fact that they will again begin broadcasting during the early part of September. While the inimitable Billy Jones and Ernest Hare are not on the air the Radio audience can be sure that they will be busy planning and arranging their programs for the fall broadcast.
